Appendix B – Board of Supervisors Resolution No. 2017-0976

# BEFORE THE BOARD OF SUPERVISORS COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF HAMLET AND	)	
COMMUNITY PLANS 2017 UPDATE	)	
(GENERAL PLAN AMENDMENT 17-035)	)	Resolution No. <u>2017-0976</u>
AND AMENDMENTS TO THE TULARE	)	Ordinance No. <u>3515, 3516, 3517,</u>
ZONING ORDINANCE NO. 352	)	<u>3518, 3519, and 3520</u>

UPON MOTION OF SUPERVISOR WORTHLEY, SECONDED BY  
SUPERVISOR ENNIS, THE FOLLOWING WAS ADOPTED BY THE BOARD OF  
SUPERVISORS, AT AN OFFICIAL MEETING HELD DECEMBER 5, 2017, BY THE  
FOLLOWING VOTE:

AYES: SUPERVISORS CROCKER, VANDER POEL, SHUKLIAN, WORTHLEY,  
AND ENNIS

NOES: NONE

ABSTAIN: NONE

ABSENT: NONE

ATTEST: MICHAEL C. SPATA  
COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# EAST TULARE VILLA HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for East Tulare Villa is to develop a plan which can accurately reflect the needs and priorities of this community. East Tulare Villa is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks, etc.) and to stimulate economic development within the community.

### Location

The community of East Tulare Villa (**see Figure 1**) is located on the east side of the San Joaquin Valley and is a census-designated place located in the western portion of Tulare County. It is bounded by Bardsley Avenue in the south, State Route (SR) 137 in the north, Munson Road in the west, and Road 132 in the east and adjacent to the city of Tulare. East Tulare Villa is in Section 08 Township 20 South, Range 25 East, MDB&M, and can be found within the Tulare, United States Geological Survey 7.5 Minute topographic quadrangle. East Tulare Villa is located at an elevation of 302 feet above sea level, National Geodetic Vertical Datum. The coordinates of East Tulare Villa are: Latitude: 36.20356 and Longitude: -119.27762 (**see Figure 2**).

### Planning Area

The East Tulare Villa Hamlet Development Boundary (HDB) area consists of 178.5 acres (**see Figure 1**). The Land Uses within the HDB includes agriculture (orchards and pasture), which currently occupy 54 percent of the 178.5 acres. Urban development, including urbanized uses such as residential and commercial development occupy 18 percent of the 178.5 acres. The remaining 10 percent are lands dedicated for Right-of-way (**See Table 1**).

Table 1 - East Tulare Villa Land Use	
Land Use	Acres
Residential	32.6
Commercial	0.4
Agricultural	97.4
Rights-of-way	18.1
Total	178.5

Source: Tulare County GIS

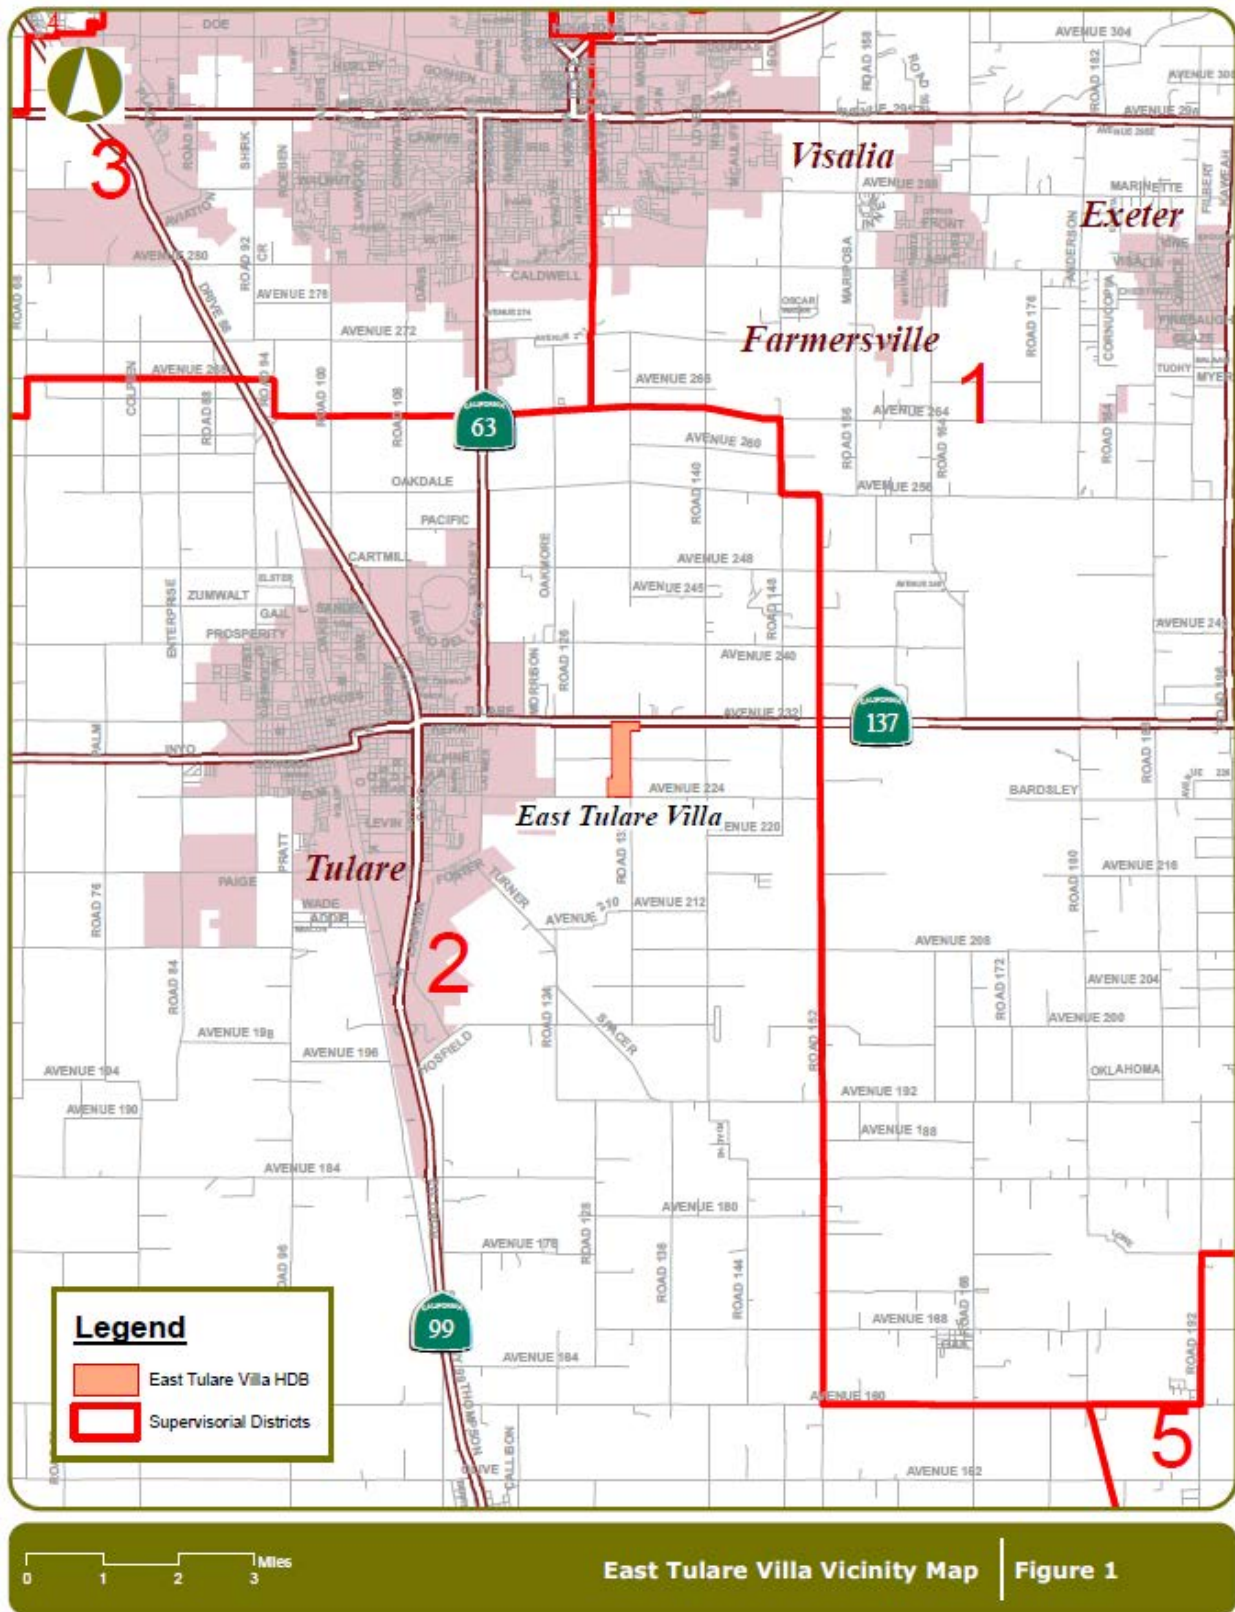

No change is proposed to the Hamlet Development Boundary.

### City of Tulare's Sphere of Influence (SOI)

The community is located adjacent to the Tulare city limits and outside the city's 2035 Urban Development Boundary. Although East Tulare Villa is within the city of Tulare's Sphere of Influence (SOI) (**see Figure 3**), the city's General Plan land use map designates the area Rural Residential 0-2.

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### **Recommendations/request**

1. City Transit
2. Street lights/ Traffic calming/ Road improvements
3. Shopping center (grocery stores)
4. Sewer
5. Public parks

### **Demographics update:**

The Community made a more accurate population would be 900 persons projected in E. Tulare Villa. 45K is too high of a household stated income. A more reasonable number would be 30-35K per household income. Approximate 200 housing units' just on two streets. Majority of people own their homes. There were two ladies who stated they have lived there all their lives and not many people rent in E. Tulare Villa. Average person per household is greater than 3.65. Community laughed and said, "3.65 is far below average. Six people live in my house".

### **City Transit:**

One big concern to the community was City Transit. Community stated that the bus only goes to College of the Sequoias (COS). From COS it goes back to Tulare Station. Every time the bus takes people back to the station, people need to pay again to go to the next location. People would like to be able to go directly where needed. More bus stops would need to be constructed. More shuttles to schools can create more parent involvement in the schools.

### **Septics:**

Community would like to connect to a community sewer. "This shouldn't be complicated because COS just got connected" said a community resident. The distance from Road 130 to COS is about one mile or two. Pipelines are close.

### **Streets / Roads:**

Roads the community really wished would be improved would be Road 137, Road 226 and Road 130 (Allen Rd).

### **Lighting:**

Community all agreed that their community needs more **street lights**. "At night it's too dark and dangerous to walk home from work" said a community resident. The ones that they currently have do not function now.

### **Parks:**

Live Oak and Cypress Park are the two nearest public parks to the community. It's about 6 miles away from the community. Would like a closer park where parents and kids can walk to. This can create a healthy lifestyle.

### **Schools:**

Students attend Tulare Union School and Mission Oak High School

# EAST TULARE VILLA HAMLET PLAN

---

## **Markets:**

The only market the community has is the Victorian Market. Community needs an actual grocery store they can purchase for their home needs.

## **Hospital / Fire station:**

Most people go to Visalia if they need to make a hospital visit. Community feels Tulare Hospital doesn't attend to them as they should. The nearest fire station is on Foster Dr.

## **Internet Access**

Most families in East Tulare Villa do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or expensive compared to what it costs in nearby cities. Without access to the internet, they are unable to do essential things such as online job hunting, applying for resources, and or providing homework help to their kids.

# EAST TULARE VILLA HAMLET PLAN

## EAST TULARE VILLA TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as East Tulare Villa.

#### Population

In 2015, East Tulare Villa's population was 951. (see Table 2)

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>East Tulare Villa</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	954	53.7%
Female	19,334,329	50.3%	226,607	49.9%	512	46.3%
Total	38,421,464		454,033		442	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project East Tulare Villa's population during the Planning Period (see Table 3).

**Table 3 - Projected Annual Growth Rate**

	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.46%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

<sup>1</sup> Tulare County Regional Blueprint, page 7

# EAST TULARE VILLA HAMLET PLAN

## Median Age

East Tulare Villa's population's median age is younger than the median age of both Tulare County, as well as the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.6
Tulare County	30.1
East Tulare	38.1

2011-2015 American Community Survey 5-Year Estimates

## ETHNICITY AND RACE

In 2015, approximately 40.5% of East Tulare Villa's population was White, 0% was African American, 0.3% was Native American, 2.0% were Asian, and 0.2% was two races or more (see Table 5). Approximately 57% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	East Tulare Villa	%
Total	38,066,920		451,108		954	
Hispanic or Latino (of any race)	14,534,449	38.2%	279,022	61.9%	544	57%
White (Not Hispanic)	14,905,601	39.2%	141,322	31.3%	386	40.5%
Black or African American (Not Hispanic)	2,155,929	5.7%	5,997	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	145,736	0.4%	3,241	0.7%	3	0.3%
Asian (Not Hispanic)	5,062,736	13.3%	14,268	3.2%	19	2.0%
Some other race (Not Hispanic)	81,869	0.2%	352	0.1%	0	0%
Two or more races (Not Hispanic)	1,044,136	2.7%	6,444	1.4%	2	0.2%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in East Tulare Villa

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

# EAST TULARE VILLA HAMLET PLAN

---

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for East Tulare Villa was about 1.7% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 1.7% includes only the employable labor force (that is, not every person of the population) results in about 12 unemployed persons of East Tulare Villa's person labor force of 307.

<b>Table 6 - Employment Status</b>			
<b>Employment Status</b>	<b>California</b>	<b>Tulare County</b>	<b>East Tulare Villa</b>
Population 16 years & over	30,312,429	325,404	704
In labor force	19,269,449	194,420	307
Civilian labor force	19,137,441	194,102	307
Employed	17,246,360	170,780	295
Unemployed	1,891,081	23,322	12
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	397

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

East Tulare Villa's median household income was \$50,163, compared to \$42,031 for Tulare County and \$61,818 for the State of California (see Table 7).

<b>Table 7 - 2011-2015 American Community Survey: Income</b>			
<b>Geography</b>	<b>Median household income (dollars)</b>	<b>Median family income (dollars)</b>	<b>Per capita income (dollars)</b>
<b>California</b>	\$61,818	\$70,720	\$30,318
<b>Tulare County</b>	\$42,031	\$44,814	\$17,876
<b>East Tulare Villa CDP</b>	\$50,163	\$50,435	\$15,859

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, East Tulare Villa's median household income was \$50,163, whereas the State of California's median household income was \$61,818. East Tulare Villa's median household income was 81% of the State of California's median household income, and therefore it is considered a disadvantaged community.

# EAST TULARE VILLA HAMLET PLAN

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes). According to the California Department of Finance, the

Table 9 - Housing Tenure			
	California	Tulare County	East Tulare Villa
Occupied housing units	12,717,801	133,570	275
Owner-occupied	6,909,176	75,685	148
Renter-occupied	5,808,625	57,885	127

2011-2015 American Community Survey 5-Year Estimates

Table 8 - Housing Tenure (%)			
	California	Tulare County	East Tulare Villa
Owner-occupied	54.3%	56.7%	53.8%
Renter-occupied	45.7%	43.3%	46.2%

2011-2015 American Community Survey data indicated 53.8% of the housing units in East Tulare Villa was owner-occupied (see Tables 8 & 9). Similarity, 45.7% of housing units were owner occupied in Tulare County and 54.3% of the housing units were owner occupied in the State of California.

### Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in East Tulare Villa indicated that approximately 37% of the housing units were sound. Approximately 63% of East Tulare Villa's housing units were deteriorated and 2% were dilapidated (see Table 10).

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
East Tulare Villa	26	37	53	63	0	0	0	0	2	2	84

Source: Tulare County 2015 Housing Element

# EAST TULARE VILLA HAMLET PLAN

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009. (see Table 11) The total number of housing units in Tulare County is 144,792.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	East Tulare Villa
Total housing units	13,845,790	144,792	274
Built 2014 or later	10,183	196	
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	19
Built 1990 to 1999	1,495,571	21,767	10
Built 1980 to 1989	2,117,819	22,733	3
Built 1970 to 1979	2,503,688	27,111	72
Built 1960 to 1969	1,871,029	15,500	106
Built 1950 to 1959	1,907,512	13,694	20
Built 1940 to 1949	865,607	7,494	13
Built 1939 or earlier	1,298,438	8,186	31

2010-2014 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in East Tulare Villa was 4.10 persons per household (see Table 12). The average owner occupied household size is 2.93.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
East Tulare Villa	2.93	4.10

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in East Tulare Villa was 0.0%, which was lower than both Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 6.3%, which was higher than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
East Tulare Villa	6.3%	0.0%

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

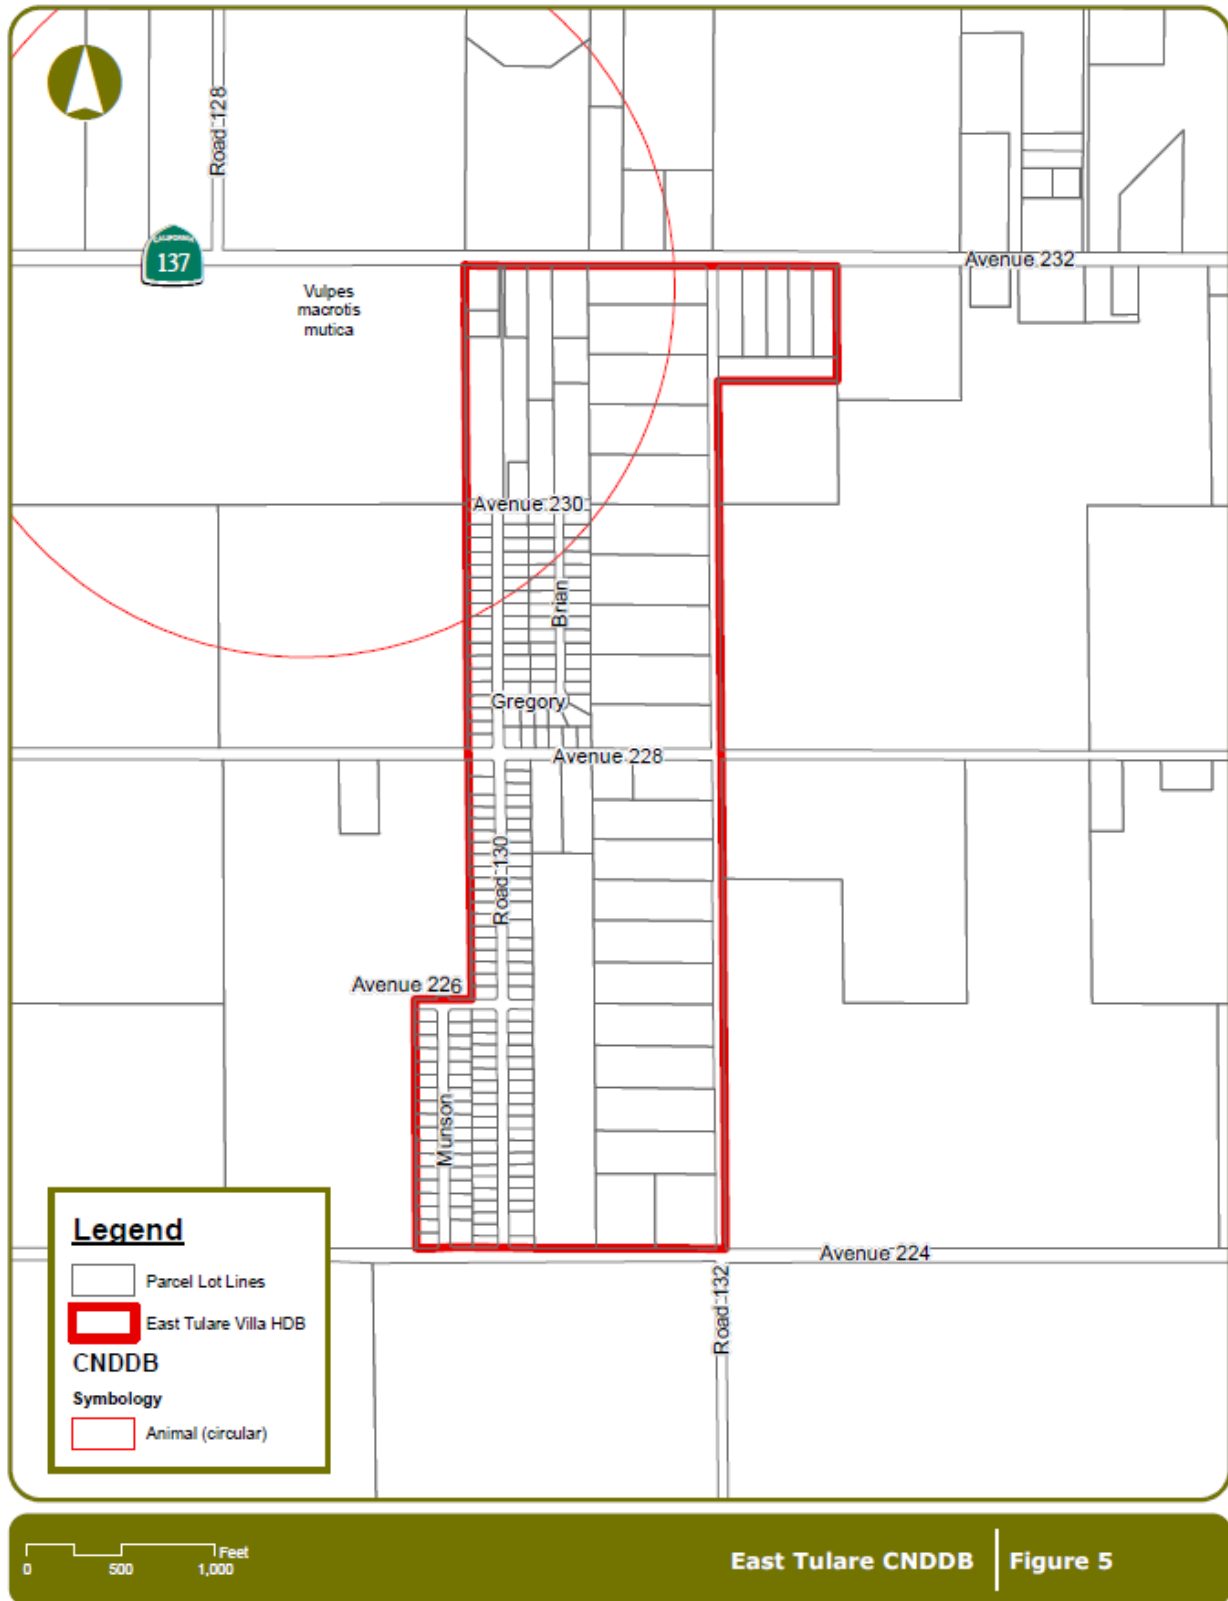

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016 (**see Figure 5**) indicates there are special status species within the Tulare Quadrant Species List (which includes the East Tulare Villa Planning Study Area) consisting of two animal species and two plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Swainson's hawk (*Buteo Swainsoni*, state threatened); San Joaquin adobe starburst (*Pseudobahia peirsonii*, federal threatened); and California jewelflower (*Caulanthus californicus*, federal and state endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect East Tulare Villa are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [East Tulare Villa] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County (see **Figure 6**), the following soil types are located in East Tulare Villa. Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**Biggriz-Biggriz, saline-Sodic complex, 0 to 2 percent slopes.** The parent material of Biggriz is alluvium derived mainly from granitic rock sources. The soil is somewhat poorly drained. The permeability is moderately slow, the available water capacity is high, and the shrink-swell potential is moderate.

For building site developments, the major management factors are rare flooding hazard and the soil is highly corrosive to steel. The land capability classification: Biggriz- unit, 2s-6, irrigated: subclass, 6s, non-irrigated; Biggriz, saline-sodic--unit, 3s-6, irrigated; subclass, 7s, non-irrigated MLRA: 17.

The areas that are Biggriz soil are considered prime farmland and the areas that are saline-sodic are not considered prime farmland. The map unit is dominantly non-prime farmland.

**Calgro-Calgro, saline-Sodic, complex, 0 to 2 percent slopes,** Erosion potential is low to moderate and shrink swell potential low.

**Tujunga loamy sand, 0 to 2 percent slopes,** very deep, somewhat excessively drained soils that formed in alluvium from granitic sources. The soil is used for grazing, citrus, grapes, other fruits, and urban residential or commercial development

## PHYSICAL CONDITIONS

### Air Quality

The East Tulare Villa Planning Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources).<sup>6</sup> The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change

---

<sup>6</sup> Tulare County General Plan Background Report, page 6-13.

# EAST TULARE VILLA HAMLET PLAN

---

the natural qualities of the air. Because East Tulare Villa is located near the central portion of the Valley with prevailing winds from the northwest, it is susceptible to the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of East Tulare Villa include State Highway 137 and agricultural activities.

## Flooding<sup>7</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C1275E. East Tulare Villa is located within Flood Zone X – Areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood. East Tulare Villa is also located within the FEMA 500 year flood zone (see **Figure 7**). Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates are not required unless property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within East Tulare Villa there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

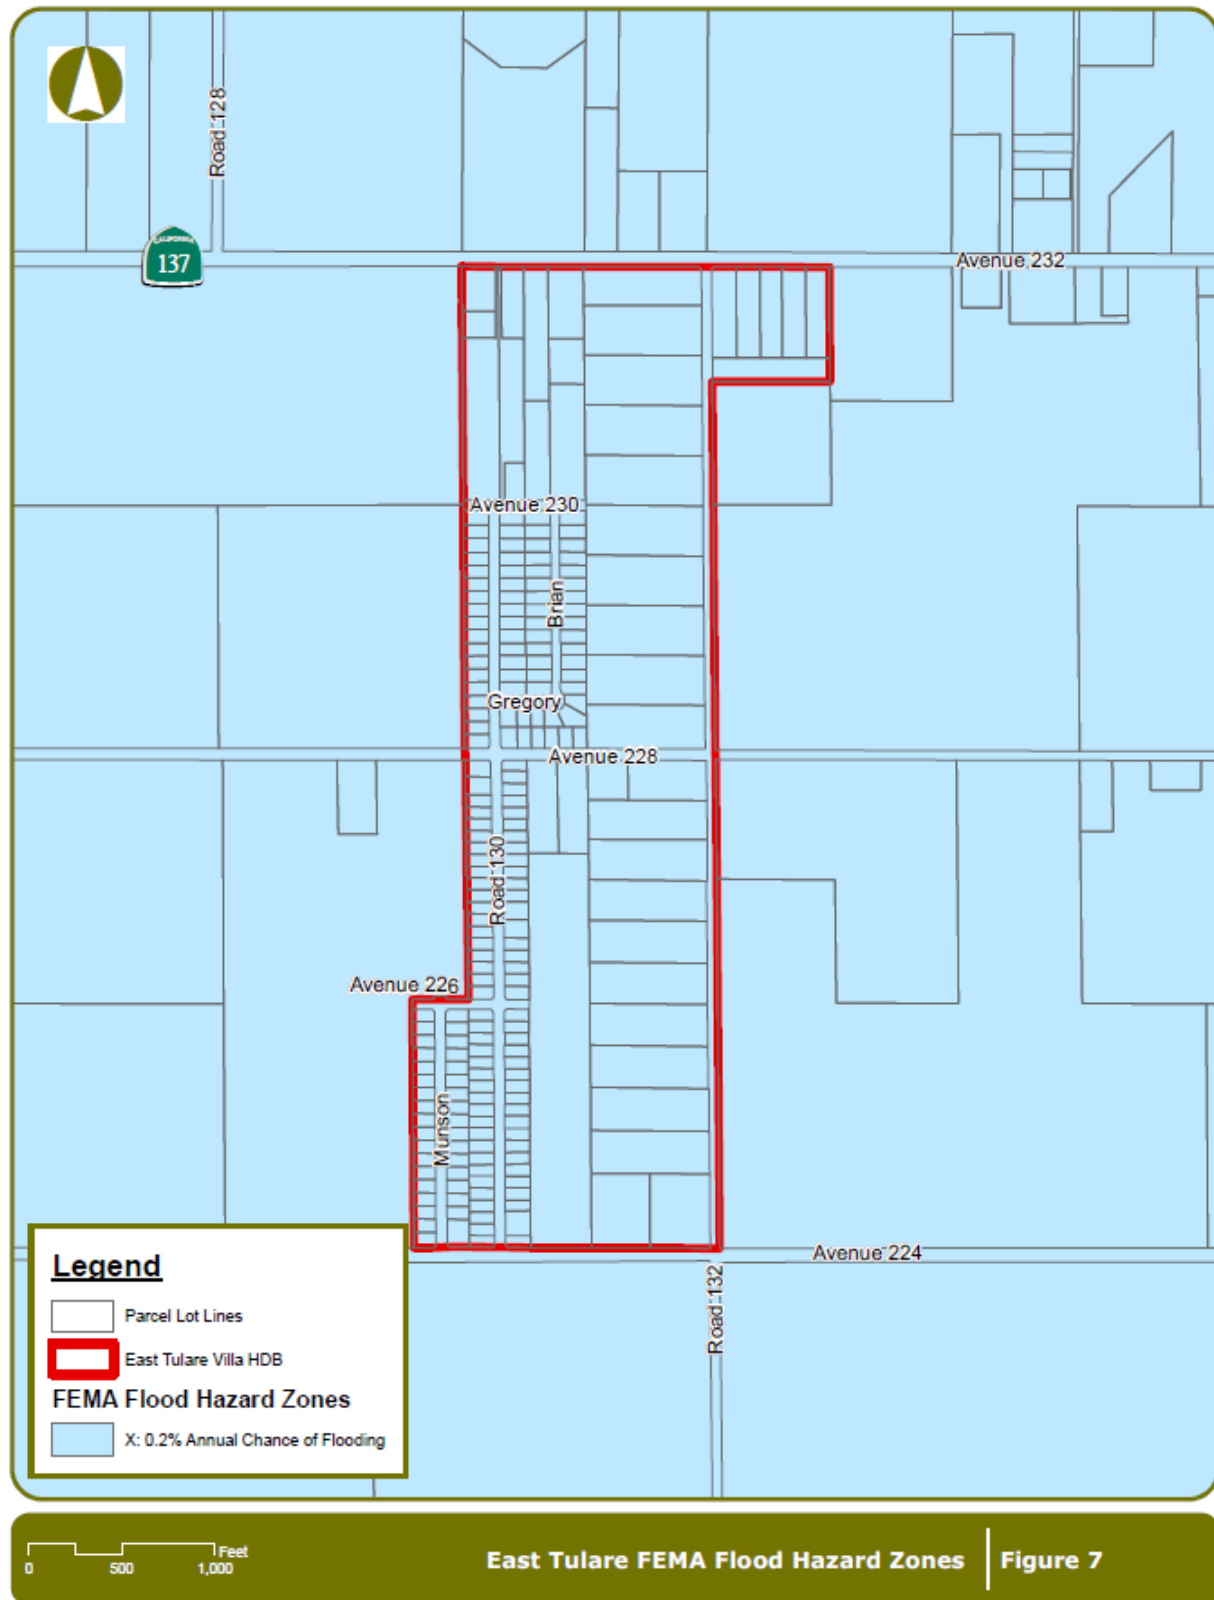

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <http://msc.fema.gov/portal>.

Figure 7 - FEMA Flood Map

# EAST TULARE VILLA HAMLET PLAN

## Noise<sup>8</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. **Table 14** summarizes the daily traffic volumes along State Route 137 from the State Route 63 to State Route 65. Together, these noise sources place a portion of East Tulare Villa's urbanized areas within the 60 dB Ldn noise contour. The Noise Element includes performance standards for new residential or other noise-sensitive land uses which are to be located near noise-impacted areas. The Element indicates that these uses will not be permitted unless effective design measures can be integrated into the development to mitigate the impact of noise.

Table 14 - Noise Levels					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
State Route 137 from State Route 63 to State Route 65	11,000	100	215	463	997

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

Southern California Edison provides service to East Tulare Villa.

### Domestic Water & Wastewater

East Tulare Villa is served by CalWater's Tulco system (which is not connected to Cal Water's Visalia system). The Tulco System's water quality meets State requirements. The system is down to one functional well. CalWater is in the process of linking to the City system so that the City can provide water on an emergency basis if the last well breaks down. City water lines currently run along Bardsley

# EAST TULARE VILLA HAMLET PLAN

---

Avenue on the south border of East Tulare Villa. These lines serve the COS campus on the south side of Bardsley.<sup>9</sup>

## Sewer

No public sewer facilities are available in East Tulare Villa. Each land owner relies on septic systems for wastewater. There is no community wide sewer system in East Tulare Villa. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent.

## Storm Drainage

“East Tulare Villa does not currently have a storm drainage system. A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.”<sup>10</sup>

## Solid Waste

Solid waste disposal services for the Community of East Tulare Villa is provided by USA Waste, a private company. Solid waste generated in East Tulare Villa can be disposed of at Road 80 Landfill, located at 8614 Avenue 328.

## Roads

It is reported that road conditions are poor and most roads need work, roads have potholes, cracks and bumps. This makes residents concerned with both driving conditions and walkability. Road conditions are described as poor and most of the roads in town need work. East Tulare Villa roads are not regularly maintained and the few times that roads have been serviced, the repair work was poor because the roads were patched and not repaired.

---

<sup>9</sup> City of Tulare Final Municipal Service Review, prepared by Tulare County Local Agency Formation Commission, August 2013.

<sup>10</sup> Action Program 9, Tulare County 2015 Housing Element

# EAST TULARE VILLA HAMLET PLAN

There are several roadways in East Tulare Villa that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.
- ✓

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>11</sup>

## Street Lights

Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

**Table 16** identifies the location of existing street lights that are maintained by Tulare County, in East Tulare Villa, as well as their specifications. Figure 8 also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type “W” represents a wood post for which the light is commonly shared with a Utility provider. Similarly, “M” represents metal and “C” represents concrete.”<sup>12</sup>

**Table 16 - Specifications of Existing Street Lights**

Specifications of Existing Street Lights

Figure 8 - East Tulare Villa Inventory of Roadway Facilities

# EAST TULARE VILLA HAMLET PLAN

## Sidewalks

Sidewalks are typically separated from a roadway by a curb and accommodate pedestrian travel. They improve mobility for those with disabilities and are also an important part of walking routes to schools. They provide the space for pedestrians to travel within the public right-of-way while being separated from vehicles and bicycles.

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

The County and VRPA Technologies surveyed existing sidewalks within the Community. **Table 17** identifies the location of existing sidewalks in East Tulare Villa. **Figure 8** also displays this information graphically. The sidewalks represented in **Table 17** and **Figure 8** do not distinguish between ADA compliant sidewalks and noncompliant sidewalks. The majority of sidewalks represented below were constructed prior to current ADA guidelines and would be considered non ADA compliant facilities. Such noncompliant facilities would require complete reconstruction to be considered ADA compliant.

**Table 17 - Existing sidewalks in East Tulare Villa**

Location of Existing Sidewalks			
No.	Roadway	Limits	Location
1	Bardsley Avenue	West of Munson Road to Road 132	South side

(Source: County of Tulare Public Works and VRPA Technologies, February 2014)

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within East Tulare Villa.”<sup>13</sup>

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare's urban transit systems. Public transit is not currently available in the East Tulare Villa. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in East Tulare Villa, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified SR 137 as a proposed Class III Bike Project<sup>14</sup>. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely used outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. The only bike route within or near the community is SR 137.

## AMTRAK

The Hanford AMTRAK station, located approximately 25 miles northwest of East Tulare Villa in Kings County, the closest station providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

## Mefford Field Airport

"The nearest operational General Aviation Airport is Mefford Field located in the City of Tulare approximately five (5) miles south of East Tulare Villa (**see Figure 9**). "Mefford Field is owned and managed by the City of Tulare. The one runway at the airport is 3,900 feet long. It is estimated about 70% of airport operations occur to the northwest on Runway 31. It is also estimated that about 70% of aircraft use the airport during the daytime hours (7:00 a.m. to 7:00 p.m.), 25% during the evening hours (7:00 p.m. to 10:00 p.m. and 5% during the nighttime hours (10:00 p.m. to 7:00 a.m.)"<sup>15</sup> East Tulare Villa is located outside of Mefford field's Airport Safety Zones.

<sup>14</sup> TCAG Action Element, TCAG 2014 Regional Transportation Plan. Page 3-89.

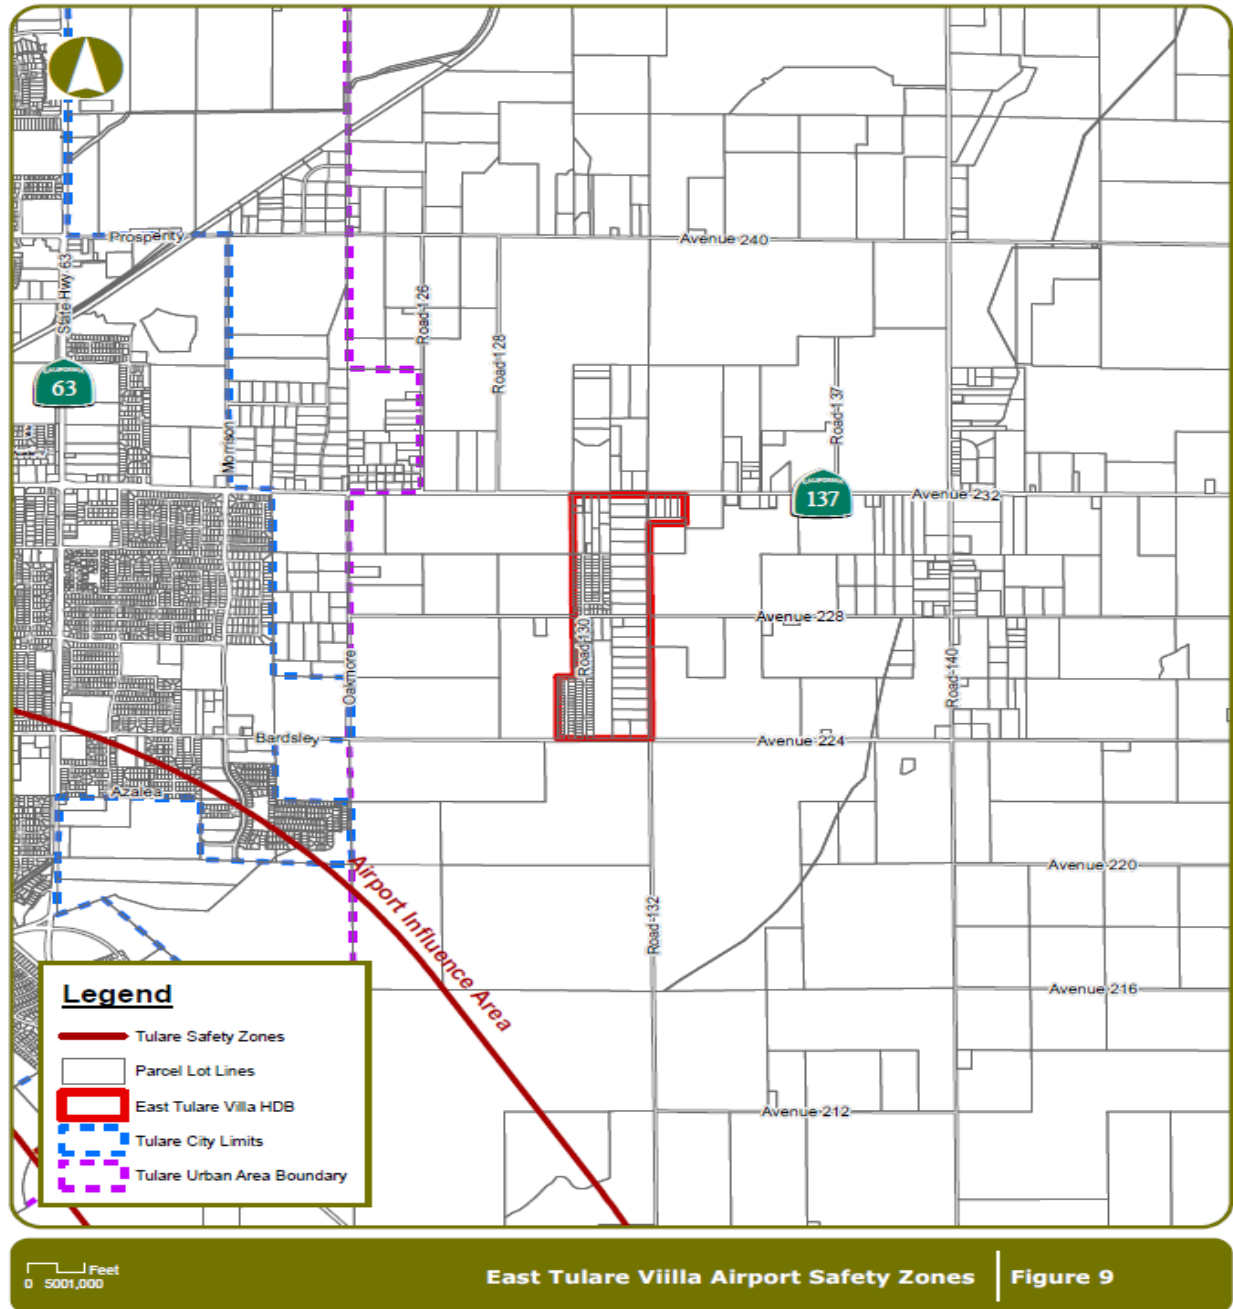

<sup>15</sup> Tulare County General Plan Background Report, page 8-64

# EAST TULARE VILLA HAMLET PLAN

## Aviation

Visalia Municipal Airport, is located approximately 15 miles north of East Tulare Villa. Fresno Yosemite International Airport (FAT), approximately 70 miles northeast of Matheny Tract, is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field, Bakersfield's principal commercial airport, is approximately 70 miles southeast of East Tulare Villa and offers direct flights to several destinations.

Figure 9 - Mefford Field Airport

---

## PUBLIC SERVICES

### Community Resource Center

The community lacks resources and needs a facility where residents can access information and county services. People in East Tulare Villa expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used for homework assistance, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service East Tulare Villa. This could also be the place where residents access a reliable internet connection.

### Sheriff

Police protection services are provided in East Tulare Villa by the Tulare County Sheriff's Department main Sheriff's Office located at 2404 W. Burrell Avenue, in Visalia, approximately 10 miles north of East Tulare Villa.

### Fire

No fire hydrants are found in East Tulare Villa. Fire protection and emergency medical services are provided for East Tulare Villa by the Tulare County Fire Department. There are three City fire stations and one County fire station in the Tulare area. County Fire Station #25 is within Tulare City limits. The community is served by Tulare Fire Station #25 located at 2082 Foster Drive, in Tulare. Engine 25, Water Tender 25 and Squad 25 are assigned to this location.

### Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The East Tulare Villa Hamlet Plan Area is within the Tulare City Elementary School District. The District provides K-8 grade education in the western region of Tulare County. High School students attend high school in Tulare. East Tulare Villa is within the Tulare Joint Union High School District.

### Parks

There are no County owned/operated public parks in East Tulare Villa. The closest public park to the community is Mooney Grove Park, located 10 miles north of East Tulare Villa. This facility is operated by the County of Tulare and features picnic areas, playground, and baseball diamonds. The City of Tulare is located one mile west of East Tulare Villa.

### Library

"The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main

**Table 18 - Library Location & Hours**

Branch	Address	Service Hours (2017)
Visalia	Main Branch 200 West Oak Avenue Visalia, CA 93291	Tuesday - Thursday 9:00 am – 8:00 pm Friday: 12:00 pm – 6:00 pm Saturday: 9:00 am – 5:00 pm

Library hours current as of June 2017

# EAST TULARE VILLA HAMLET PLAN

---

branch.”<sup>16</sup> The Visalia Main Branch Library is located in Visalia 25 miles away (see Table 18). Tulare Public Library is located five miles to the west, in the City of Tulare.

## THE EAST TULARE VILLA HAMLET PLAN

### CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another. East Tulare Villa is a small agricultural community located adjacent to State Route 137. The major rural collector roads is Avenue 308. There are no proposed major streets as part of this Hamlet Plan.

The 2014 Regional Transportation Plan and projections for Year 2040 traffic volumes do not exceed the LOS “C” threshold. Less than significant impacts will occur to SR 43 as a result of the Project primarily because increased traffic loads on SR 43, and its various entry and exit point, is more associated with growth in the Central Valley and the increased need for Californians to be able to travel north and south. Both the Highway Capacity Manual (HCM) and the Tulare County General Plan (TCGP) LOS remain at B or C through Year 2040 projections while the build-out time frame of the Community Plan is Year 2030.

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>17</sup>

#### Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>18</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

---

<sup>16</sup> General Plan Background Report, page 7-96

<sup>17</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

<sup>18</sup> Tulare County General Plan Background Report, page 5-7.

# EAST TULARE VILLA HAMLET PLAN

---

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# EAST TULARE VILLA HAMLET PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the East Tulare Villa Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for East Tulare Villa to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

East Tulare Villa Hamlet Plan, and input received from East Tulare Villa citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

##### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

##### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
2. Locate high density residential uses in close proximity to planned shopping areas. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available. The County shall ensure that solid waste facility sites (for example, landfills) are protected from the encroachment by sensitive and/or incompatible land uses. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
3. The County shall work with the Schools to provide safe routes to school.
4. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the East Tulare Villa Community Plan.

# EAST TULARE VILLA HAMLET PLAN

---

5. The East Tulare Villa Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.
6. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

**Housing**

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.

4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in East Tulare Villa.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in East Tulare Villa.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.

# EAST TULARE VILLA HAMLET PLAN

---

4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

#### Policies:

1. Encourage the East Tulare Villa to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

#### Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## **Environmental Quality and Public Safety**

### **GOAL I: Preserve and enhance the quality of life for present and future generation of East Tulare Villa citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

# EAST TULARE VILLA HAMLET PLAN

---

## Objective: Protect Agricultural Lands:

Land within the respective East Tulare Villa, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of East Tulare Villa.

## Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of East Tulare Villa.

# EAST TULARE VILLA HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 178.5 acre East Tulare Villa Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute 54 percent of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 951 by 178.5 urbanized acres (area within the HDB), which equals 5.3 persons per urbanized acre (**see Tables 19 and 20**) showing population projections). Projecting the population at a 1.3% growth rate adds 203 persons in year 2030. Multiplying the 203 persons by the 1/3 ratio suggests an additional 2.6 acres of land will be required to accommodate development by the year 2030.

### Population Growth Forecast

<b>Growth Rate</b>	<b>2015</b>	<b>2020</b>	<b>2030</b>
0.013	951	1,014	1,154

<b>Year</b>	<b>Population</b>	<b>Growth (%)</b>
2015	951	0.013
2016	963	0.013
2017	976	0.013
2018	989	0.013
2019	1,001	0.013
2020	1,014	0.013
2021	1,028	0.013
2022	1,041	0.013
2023	1,055	0.013
2024	1,068	0.013
2025	1,082	0.013
2026	1,096	0.013
2027	1,110	0.013
2028	1,125	0.013
2029	1,139	0.013
2030	1,154	0.013

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>19</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in year 2015 the community had 275 dwelling units (including vacant dwellings) with a population of 951. At an annual growth rate of 1.3%, the projected housing units are 293 and 334 in years 2020 and 2030, respectively, and projected population is 1,014 and 1,154 in years 2020 and 2030, respectively.

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

<sup>19</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# EAST TULARE VILLA HAMLET PLAN

---

## Infrastructure

In order for more development to occur, water service levels need to be expanded, for which grant funding will be required.

## Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require a discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

## Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce

Table 21 - Education Attainment			
Educational Attainment	California	Tulare County	East Tulare Villa
Population 25 years and over	24,865,866	258,046	588
Less than 9th grade	10.1%	20.8%	17.7%
9th to 12th grade, no diploma	8.4%	11.2%	13.6%
High school graduate (& equivalency)	20.7%	25.0%	26.9%
Some college, no degree	22.0%	22.3%	34.2%
Associate's degree	7.8%	7.5%	6.6%
Bachelor's degree	19.6%	8.9%	1.0%
Graduate or professional degree	11.4%	4.3%	0.0%

2011-2015 American Community Survey 5-Year Estimates

Development Partners include Proteus Inc., and CSET. Based on the 2011-2015 American Community Survey (see **Table 21**), the educational barrier in East Tulare Villa begins in grade school. Of the adults age 25 and older, 17.7% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

## Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices are in the City of Tulare. There are two hospital located in close proximity to East Tulare Villa. Tulare Regional Medical Center located approximately 5 miles to the west, in the City of Tulare and Kaweah Delta located approximately 20 miles to the northeast, in the City of Visalia.

# EAST TULARE VILLA HAMLET PLAN

---

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (see **Table 22**) and Zoning Plan District (see **Table 23**) have been updated.

<b>Table 22 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	160.4
Right-of Ways	18.1
East Tulare Villa HDB	178.5

<b>Table 23 - Proposed Zoning Districts</b>	
Proposed Zones	Acres
C-2-MU	17.0
R-1	138.1
R-A-43	12.8
R-A-65	9.25
Right-of Ways	140.80
East Tulare Villa HDB	178.5

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations contained in the East Tulare Villa Hamlet Plan. The following components comprise the East Tulare Villa Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the East Tulare Villa Hamlet Plan, there are several proposed changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the uses that require a use permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

### Mixed Use Overlay District

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of East Tulare Villa.

# EAST TULARE VILLA HAMLET PLAN

---

## Zoning and Land Use Map Update

The current Zoning Map for East Tulare Villa (**see Figure 12**) will be amended to be compatible with the Land Use Map (**see Figure 11**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 13**).

## City of Tulare's Land Use Designation and Zoning

Currently, the community is located adjacent to the Tulare City Limits and outside the city's 2035 Urban Development Boundary (**see Figure 4 Above**). Although East Tulare Villa is within the city of Tulare's Sphere of Influence (SOI) (**see Figure 3**), the city's General Plan land use map (**see Figure 10**) designates the area Rural Residential 0-2; however, Tulare County has not formally adopted the City's Urban Development Boundary, or zoning, and the Tulare County zoning still applies to the property within East Tulare Villa regardless (and there was no pre-zoning of the East Tulare Villa by the City of Tulare, at the time of this Plan).

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

## A-2 *Mixed Use Overlay District (Zone Change Text)*

---

The following regulations shall apply in the community of East Tulare Villa, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of East Tulare Villa.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for East Tulare Villa.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# EAST TULARE VILLA HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for East Tulare Villa. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# EAST TULARE VILLA HAMLET PLAN

---

## A-3 *Development Standards (Mixed Use Zoning District)*

---

To promote Economic Development within the East Tulare Villa Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within East Tulare Villa. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the East Tulare Villa Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within East Tulare Villa. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# EAST TULARE VILLA HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# EAST TULARE VILLA HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# EAST TULARE VILLA HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link

# EAST TULARE VILLA HAMLET PLAN

---

fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

# EAST TULARE VILLA HAMLET PLAN

---

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

# EAST TULARE VILLA HAMLET PLAN

---

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or “lollipop signs.”
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

# EAST TULARE VILLA HAMLET PLAN

---

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateways signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

# EAST TULARE VILLA HAMLET PLAN

---

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT	)	
TO SECTION 16.H OF ORDINANCE NO. 352	)	
TO ALLOW ADDITIONAL BY-RIGHT USES	)	RESOLUTION NO. 9369
CONSISTENT WITH THE ADOPTED HAMLET	)	
PLANS, AS PROPOSED IN CHANGE	)	
OF ZONE NO. PZC 17-039	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

PZC 17-022, PZC 17-023, AND PZC 17-024	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Ordinance No. 352, the Zoning Ordinance as set forth in attached Exhibit "B" Allensworth Rezoning Plan (PZC 17-037), to include the Hamlet Community of Allensworth, consistent with the adopted Allensworth Hamlet Plan 2017 Update, Exhibit "E" Delft Colony Rezoning Plan (PCZ 17-015), to include the Hamlet Community of Delft Colony, consistent with the adopted Delft Colony Hamlet Plan 2017 Update, Exhibit "H" East Tulare Villa Rezoning Plan (PCZ 17-016), to include the Hamlet Community of East Tulare Villa, consistent with the adopted East Tulare Villa Hamlet Plan 2017 Update, Exhibit "K" Lindcove Rezoning Plan (PCZ 17-017), to include the Hamlet Community of Lindcove, consistent with the adopted Lindcove Hamlet Plan 2017 Update, Exhibit "N" Monson Rezoning Plan (PCZ 17-018), to include the Hamlet Community of Monson, consistent with the adopted Monson Hamlet Plan 2017 Update, Exhibit "Q" Seville Rezoning Plan (PZC 17-019), to include the Hamlet Community of Seville, consistent with the adopted Seville Hamlet Plan 2017 Update, Exhibit "T" Teviston Rezoning Plan (PCZ 17-020), to include the Hamlet Community of Teviston, consistent with the adopted Teviston Hamlet Plan 2017 Update, Exhibit "W" Tonyville Rezoning Plan (PCZ 17-021), to include the Hamlet Community of Tonyville, consistent with the adopted Tonyville Hamlet Plan 2017 Update, Exhibit "Z" Waukena Rezoning Plan (PCZ 17-022), to include the Hamlet Community of Waukena, consistent with the adopted Waukena Hamlet Plan 2017 Update, Exhibit "CC" West Goshen Rezoning Plan (PCZ 17-023), to include the Hamlet Community of West Goshen, consistent with the adopted West Goshen Hamlet Plan 2017 Update, Exhibit "FF" Yettem Tract Rezoning Plan (PCZ 17-024), to include the Hamlet Community of Yettem, consistent with the adopted Yettem Hamlet Plan 2017 Update, and

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# LINDCOVE HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Lindcove is to develop a plan which can accurately reflect the needs and priorities of this community. Lindcove is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). It has become apparent that a more precise plan is needed to increase the availability of infrastructure funding (drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks) and to stimulate economic development within the community.

Lindcove is a census-designated place located in the northern portion of Tulare County. It is bounded by Avenue 312 in the south, Boston Avenue in the north, Road 226 in the west, and Road 228 in the east and encompasses 0.7 square miles of land. It is not directly served by any State Route.

### Location

The community of Lindcove (**see Figure 1**) is located on the east side of the San Joaquin Valley, and a census-designated place located in the central east portion of Tulare County. It is bounded by Avenue 312 in the south, Boston Avenue in the north, and Road 226 in the west, and Road 228 in the east and encompasses 0.7 square miles of land. It is not directly served by any State Route. Lindcove is located roughly five (5) miles northeast of the city of Exeter in Tulare County. Lindcove is located in Section 17 Township 18 South, Range 27 East, MDB&M, and can be found within Rocky Hill United States Geological Survey 7.5 minute topographic quadrangle. Lindcove is located at an elevation of 453 feet National Geodetic Vertical Datum. The coordinates of Lindcove are: Latitude: 36.3595, Longitude: -119.0721 (**see Figure 2**).

### Planning Area

The Lindcove Hamlet Development Boundary (HDB) area consists of 73.3 acres (**See Figure 3**). The Land Uses within the HDB include agricultural activities (orchards and pasture), which currently occupy 76 percent of the 73.3 acres. The remaining 23 percent are lands dedicated for Right-of-way.

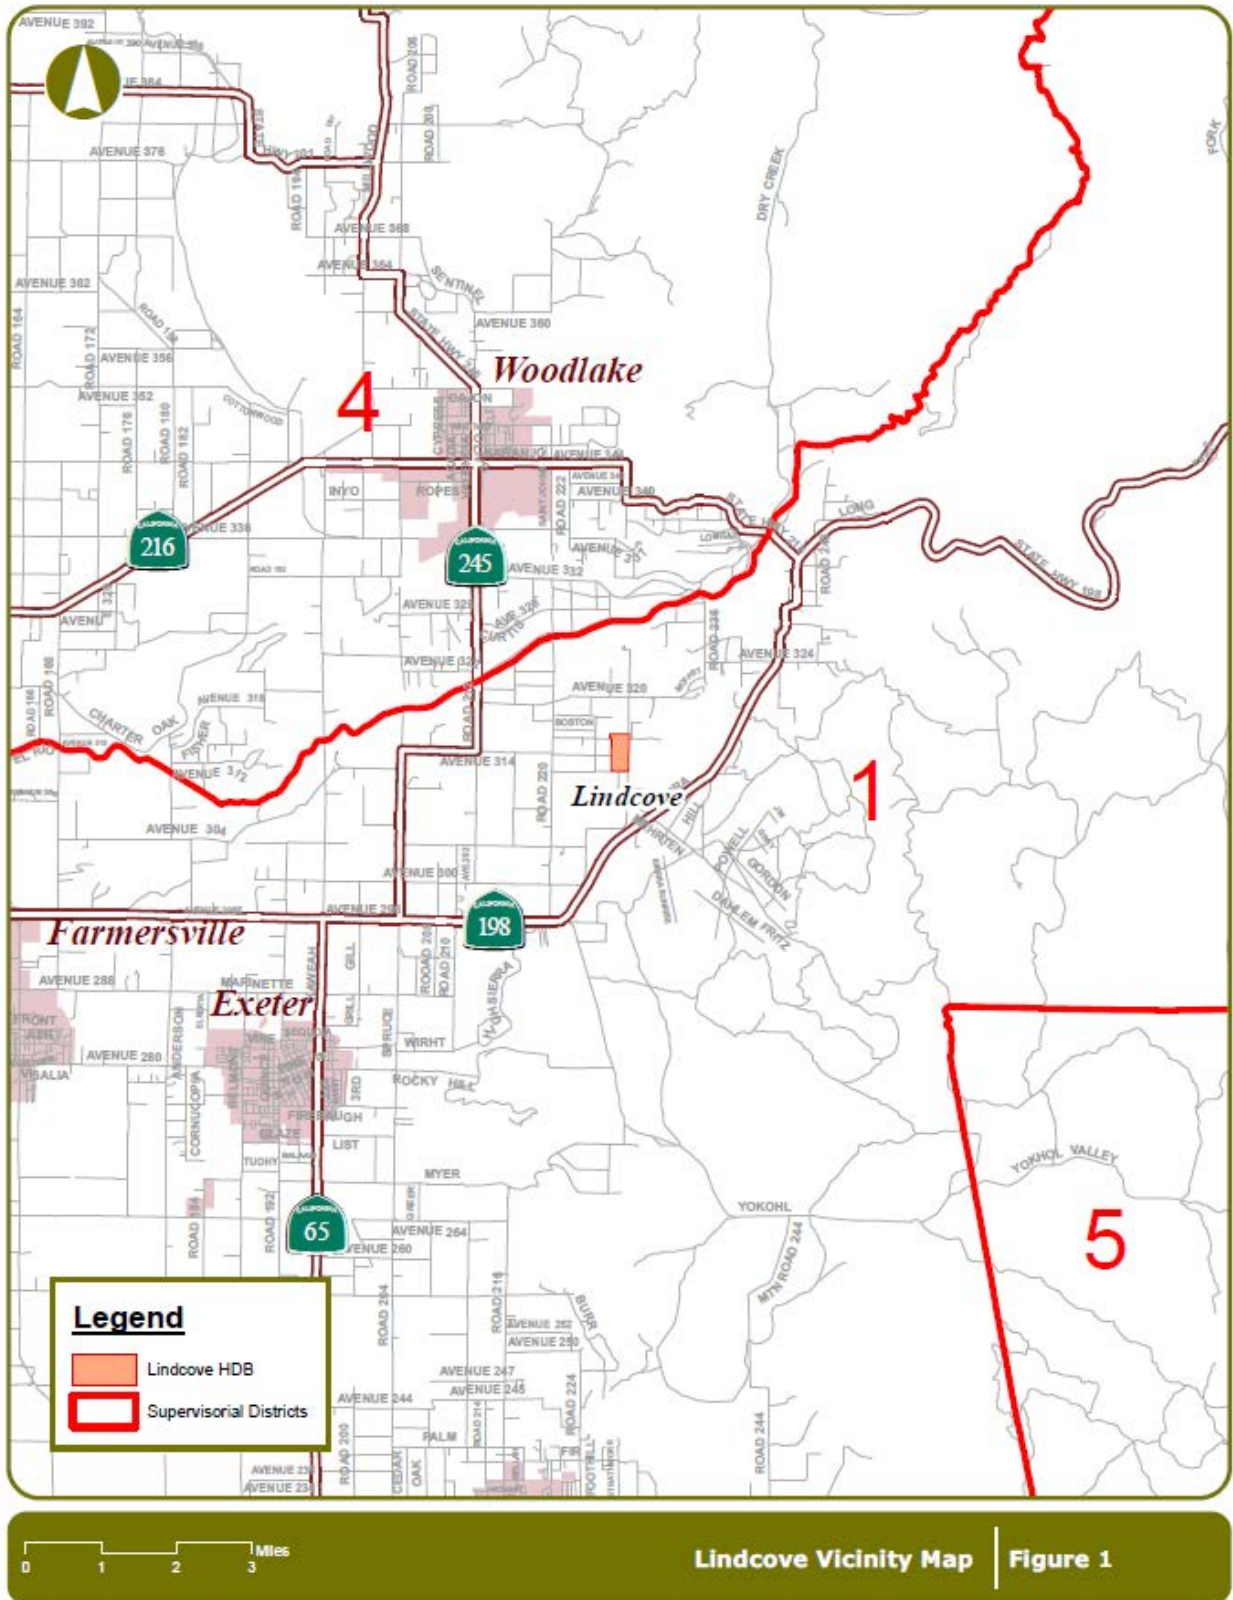

Table 1 - Lindcove Land Use	
Land Use	Acres
Agricultural	55.9
Rights-of-way	17.3
<b>Total</b>	<b>73.3</b>

Source: Tulare County GIS

No change is proposed to the Hamlet Development Boundary.

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### Community Outreach Steps

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. Self-Help Enterprises (SHE) staff performed various outreach methods to promote community participation and make local residents aware of the Strategic Growth Council (SGC) project.

- 1.) SHE staff made phone calls to local residents to determine who was interested in allowing us to have a community meeting at their home
- 2.) SHE staff visited the community and did outreach in efforts to identify a meeting location.
- 3.) Throughout the community outreach process, SHE staff explained the goals of the project and emphasized the importance and benefits of participating in the SGC project.
- 4.) SHE staff went door to door to complete resident surveys. SHE collected seven surveys in the community of Lindcove.

### Community Survey

A detailed survey was developed in efforts to gather specific community information about different areas of improvement. The survey inquires about the following: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and Priority Improvements.

On Thursday April 7, 2016, SHE staff went door to door in Lindcove to ask residents to participate in a community survey for SGC. Based on the information collected in the surveys, the following is a list of communities' top improvement needs:

### Priority Improvements

- 1) Natural Gas
- 2) Community Water System
- 3) Street Lighting
- 4) Sidewalks
- 5) Public Transportation
- 6) Community Center
- 7) Community Park
- 8) Internet Access

### **Natural Gas**

Lindcove residents report that they do not have natural gas lines and that propane is their source of fuel. Families report a high cost of propane, this cost results in people not heating their homes to a comfortable temperature, and this can lead to increased cold and flu in small children and elderly people.

# LINDCOVE HAMLET PLAN

---

## **Water System**

Lindcove is a private well community, residents their own and maintain their own well. Resident expressed that they are interested in exploring their options for connecting to a neighboring community water system, they understand that this may include an initial cost and would result in paying a monthly water bill.

Some residents are concerned with their water quality and perceive their water to be unsafe to drink. Most families do not drink the water from their tap, they either buy bottled water or have a water filtration system. In 2014, SHE tested nine water wells in Lindcove. In summary, four of the nine wells had Total Coliform present, all 9 wells tested over the MCL for Nitrates and four wells exceeded the MCL for 123 TCP.

## **Street Lights**

Residents report dark streets at night due to little or no street lighting and that they stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern, especially since the sheriff's department seldom patrols Lindcove. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Sidewalks**

The community of Lindcove has too few sidewalks. The residents that were surveyed reported that the street they live on does not have a sidewalk. People report that this is a problem for kids while walking around town and for parents who push a stroller through town. The lack of sidewalks becomes an even bigger problem during the rainy season. When it rains, residents and kids are forced to walk to school in the mud and through big puddles of water. Lindcove traffic travels at a high rate of speed and the absence of sidewalks to provide a clear separation between walking paths and the road creates a safety hazard for pedestrians.

## **Public Transportation**

Residents expressed their frustration for the lack of public transportation access. The Lindcove residents that do not drive or own a vehicle, find it hard to travel outside of town. Often residents need transportation to go into Visalia or Exeter for doctors' appointments and shopping needs. Many residents expressed the need for a bus route that goes out through their community. Bus transportation to and from Lindcove would help many residents to travel on a daily basis.

## **Neighborhood Park**

In the community of Lindcove there is no safe green space for children to play and adults to be physically active. The nearest park is located over 3.5 miles away in the city of Exeter. Lindcove residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and for the health of their children from lack of physical activity that comes from not having a safe place to be physically active.

# LINDCOVE HAMLET PLAN

## Internet Access

Most families in Lindcove do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or expensive compared to what it costs in nearby cities. Without access to the internet, Lindcove residents are unable to do things such as online job hunting, apply for resources, or provide homework help to their kids.

## LINDCOVE TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Lindcove.

#### Population

In 2015, the Population for Lindcove was 494 (See Table 2).

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Lindcove</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	211	42.7%
Female	19,334,329	50.3%	226,607	49.9%	283	57.3%
Total	38,421,464		454,033		494	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

**Table 3 - Projected Annual Growth Rate**

	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.46%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

<sup>1</sup> Tulare County Regional Blueprint, page 7

# LINDCOVE HAMLET PLAN

## Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Lindcove's population during the Planning Period (see **Table 3**).

## Median Age

Lindcove's population's median age is older than the median age of both the Tulare County and the State of California (see **Table 4**).

<b>Table 4 - Median Age</b>	
<b>Geography</b>	<b>Median Age (years)</b>
California	35.8
Tulare County	30.3
Lindcove	37

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 21.1% of Lindcove's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 5.5% was two races or more (see **Table 5**). Approximately 73.5% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

<b>Table 5 - Race &amp; Ethnicity</b>						
	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Lindcove</b>	<b>%</b>
Total	38,421,464		454,033		494	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	363	73.5%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	104	21.1%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	27	5.5%

2011-2015 American Community Survey 5-Year Estimates

## **ECONOMIC CONDITIONS**

### Employment in Lindcove

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production (see **Table 6**).

# LINDCOVE HAMLET PLAN

According to the California Department of Finance, the 2010-2014 American Community Survey indicated that the unemployment rate for Lindcove was about 15% while the rate for Tulare County was 13.5%. The unemployment rate for the State of California was 10.1%. Keeping in mind that the 15% includes only the employable labor force (that is, not every person of the population) results in about 64 unemployed persons of Lindcove's person labor force of 248.

<b>Table 6 - Employment Status</b>			
<b>Employment Status</b>	<b>California</b>	<b>Tulare County</b>	<b>Lindcove</b>
Population 16 years & over	30,312,429	325,404	400
In labor force	19,269,449	194,420	198
Civilian labor force	19,137,441	194,102	198
Employed	17,246,360	170,780	168
Unemployed	1,891,081	23,322	30
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	202

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Lindcove's median household income was \$43,571, compared to \$61,818 for the State of California (see Table 7).

<b>Table 7 - 2011-2015 American Community Survey: Income</b>			
<b>Geography</b>	<b>Median household income (dollars)</b>	<b>Median family income (dollars)</b>	<b>Per capita income (dollars)</b>
<b>California</b>	\$61,818	\$70,720	\$30,318
<b>Tulare County</b>	\$42,031	\$44,814	\$17,876
<b>Lindcove CDP</b>	\$43,571	\$43,393	\$16,573

2011-2015 American Community Survey 5-Year Estimates

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, Lindcove's median household income was \$43,571, whereas the State of California's median household income was \$61,818. Lindcove's median household income was 70.8% of the State of California's median household income.

# LINDCOVE HAMLET PLAN

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes). According to the California Department of Finance, the 2011-2015 American Community Survey data indicated 51.4% of the housing units in Lindcove were

owner-occupied (see Table 9). Similarly, 57.2% of housing units were owner occupied in Tulare County and 54.8% of the housing units were owner occupied in the State of California.

Table 8 - Housing Tenure			
	California	Tulare County	Lindcove
Occupied housing units	12,717,801	133,570	142
Owner-occupied	6,909,176	75,685	73
Renter-occupied	5,808,625	57,885	69

2011-2015 American Community Survey 5-Year Estimates

Table 9 - Housing Tenure (%)			
	California	Tulare County	Lindcove
Owner-occupied	54.8%	57.2%	51.4%
Renter-occupied	45.2%	42.8%	48.6%

2011-2015 American Community Survey 5-Year Estimates

### Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Lindcove	5	14	4	11	17	49	1	3	8	23	35

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Lindcove indicated that approximately 14% of the housing units were sound. Approximately 63% of Lindcove's housing units were deteriorated and 23% were dilapidated (see Table 10).

# LINDCOVE HAMLET PLAN

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009. (see Table 11) The total number of housing units in Tulare County is 144,792.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Lindcove
Total housing units	13,845,790	144,792	142
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	28
Built 1990 to 1999	1,495,571	21,767	3
Built 1980 to 1989	2,117,819	22,733	19
Built 1970 to 1979	2,503,688	27,111	61
Built 1960 to 1969	1,871,029	15,500	6
Built 1950 to 1959	1,907,512	13,694	7
Built 1940 to 1949	865,607	7,494	15
Built 1939 or earlier	1,298,438	8,186	3

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Lindcove was 3.93 persons per household (see Table 12). The average owner occupied household size is 3.05.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Lindcove	3.05	3.93

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Lindcove was 0.0%, which was lower than both Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 0.0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Lindcove	0.0%	0.0%

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

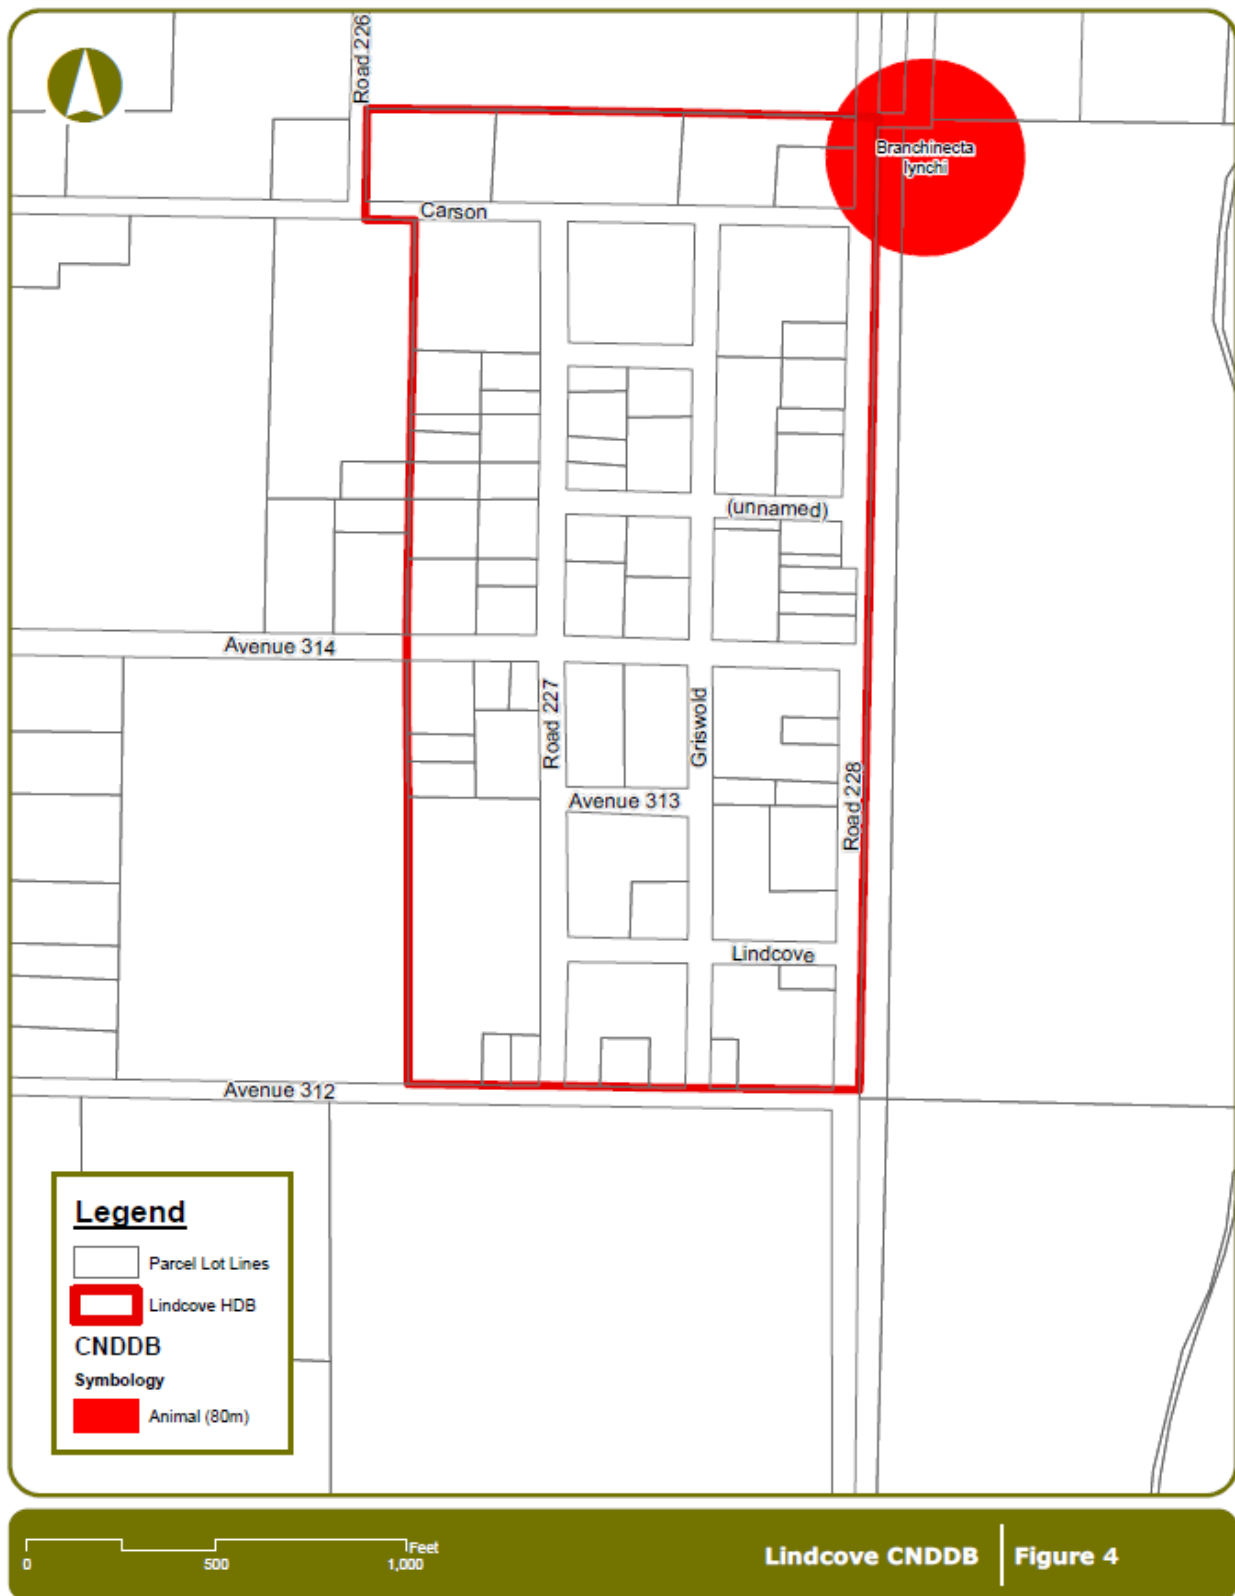

A California Natural Diversity Database (CNDDB) search conducted on November 1, 2016 (**see Figure 4**) indicates there are special status species within the Lindcove Quadrant Species List (which includes the Lindcove Planning Study Area) consisting of one (1) animal species and two (2) plant species: vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened); Striped adobe-lily (*Fritillaria striata*, state threatened); and San Joaquin adobe sunburst (*Pseudobahia peirsonii*, federal threatened and state endangered).

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Lindcove are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Lindcove] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Lindcove (see Figure 5). Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**San Joaquin loam, 0 to 2 percent slopes**, is moderately deep to a hardpan, well drained and nearly level. This soil is suitable for orchards, vineyards, and cultivated crops but is somewhat limited by the presence of hardpan which restricts root growth. This problem can be alleviated by ripping and shattering the hardpan. The soil is poorly suited to urban uses because of a high clay content, very slow permeability and a cemented hardpan. Septic tank filter fields are severely limited for these reasons.

**San Joaquin loam, 0 to 9 percent slopes**, is moderately deep to hardpan, well drained and gently rolling. The soil is suited to cultivated crops and orchards. The main limitations are hardpan and a moderate erosion risk on steeper slopes. The soil is also suited for rangeland with erosion a slight limitation. The soil is unsuitable for building sites, roads and septic tank filter fields due to high clay content, very slow permeability and the cemented hardpan. This problem can be overcome by the importation of more suitable soils.

## PHYSICAL CONDITIONS

### Air Quality

The Lindcove Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Lindcove is located near the middle-east end of the Valley with prevailing winds from the northwest, it is susceptible to the accumulation of adversely modified air,

# LINDCOVE HAMLET PLAN

---

particularly when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Lindcove include agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0980E (**see Figure 6**), all portions of Lindcove are located within Flood Zone X, which is defined by FEMA as “Areas determined to be outside the 0.2% annual chance floodplain. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each Community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use Planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”<sup>7</sup> Although some areas of Tulare County have experienced major flooding along its major rivers, the Lindcove Plan Area has not. There are portions outside of Lindcove, that are within and adjacent to the FEMA 500 and 100 year flood zones. According to the Tulare County General Plan Update, substantial flooding could occur in Tulare County if the two (2) major dams were to experience failure. The inundation area below the Terminus Dam (on Lake Kaweah) does extend to portions of Lindcove.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Lindcove there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is

# LINDCOVE HAMLET PLAN

---

## Noise<sup>8</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan background Report Lindcove lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom SCE has arrangements, and rolling blackouts.

### Domestic Water & Wastewater

Lindcove does not currently have any domestic water service. Lindcove also lacks a sanitary sewer service and relies on individual or community septic systems.

### Sewer

No public sewer facilities are available in Lindcove. Each land owner relies on septic systems for wastewater.

# LINDCOVE HAMLET PLAN

---

## Storm Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

Lindcove does not currently have a storm drainage system.”<sup>9</sup>

## Solid Waste

Solid waste disposal services for the Community of Lindcove is provided by USA Waste (Waste Management), a private company. Solid waste generated in Lindcove can be disposed of at Road 80 Landfill, located at 22466 Road 80, Visalia.

## Roads

“There are several roadways in Lindcove that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.

---

<sup>9</sup> Action Program 9, Tulare County 2015 Housing Element

# LINDCOVE HAMLET PLAN

- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads<sup>10</sup>

**Table 14 - Roads in Need of Major and Medium Repair in Lindcove**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Avenue 312	Blair Road to Griswold Road	GRX
2	Road 228	Avenue 312 to Carson Avenue	CHIP

(Source: County of Tulare Public Works, 2012)

OLAY – overlay resurfacing operation  
 CHIP – chip seal  
 GRX – grind and remix

ACST – asphalt reconstruction  
 RCST – cold mix reconstruction

# LINDCOVE HAMLET PLAN

Figure 7 - Lindcove Inventory of Roadway Facilities

# LINDCOVE HAMLET PLAN

---

## Street Lights

There are currently no streetlights located within Lindcove.

## Sidewalks

There are currently no sidewalks located within Lindcove. The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Lindcove.”<sup>11</sup>

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation. Currently no transit bus stops are located within Lindcove.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely used outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future.

---

<sup>11</sup> Action Program 9, Tulare County 2015 Housing Element

# LINDCOVE HAMLET PLAN

---

## AMTRAK

The Hanford AMTRAK station, located approximately 35 miles to the west in Kings County, is the closest station to Lindcove providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 25 miles west. Fresno Yosemite International Airport (FAT), approximately 70 miles northwest of Lindcove is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 80 miles southwest of Lindcove and offers direct flights to several destinations.

## **PUBLIC SERVICES**

### Community Resource Center

The community lacks many resources and needs a place where residents can go to access information and county wide resources. People in Lindcove expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used for homework assistance, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service Lindcove residents. This could also be the place where residents access a reliable internet connection.

### Sheriff

Police protection services are provided in Lindcove by the Tulare County Sheriff's Department main Sheriff's Office located at 2404 W. Burrell Avenue, in Visalia, approximately 15 miles west of Lindcove.

### Fire

Fire protection and emergency medical services are provided for Lindcove by the Lemon Cove Fire Station located at 32490 Highway 198, in Lemon Cove. Patrol 13, Engine 13 & Water Tender 13 are assigned to this location.

### Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Lindcove Hamlet Plan Area is within the Sequoia Union School District. The District provides K-8 grade education at Sequoia Union School District. High School students attend high school in Exeter. Lindcove is within the Exeter Union High School District.

# LINDCOVE HAMLET PLAN

---

## Library

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>12</sup> The closest library is located in Exeter 5 miles away (**see Table 15**).

Table 15 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Exeter	Exeter Branch Library 230 East Chestnut Exeter, CA 93221-1712	Tuesdays & Wednesday 11:00 a.m. – 5:00 p.m., 6:00 p.m. – 8:00 p.m. Thursday & Friday 9:00 a.m. - 1:00 p.m. 2:00 – 6:00 p.m.

Library hours current as of June 2017

## Parks

In the community of Lindcove there is no safe green space for children to play and adults to be physically active. The nearest park is located over 3.5 miles away in the city of Exeter. Lindcove residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and for the health of their children from lack of physical activity that comes from not having a safe place to be physically active.

# THE LINDCOVE HAMLET PLAN

## **CIRCULATION AND TRAFFIC**

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”

---

<sup>12</sup> General Plan Background Report, page 7-96

# LINDCOVE HAMLET PLAN

---

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>13</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

## GOALS, OBJECTIVES AND POLICIES

This Section of the Lindcove Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Lindcove to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Lindcove Hamlet Plan, and input received from Lindcove citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan.

2. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned shopping areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
5. The County shall ensure that solid waste facility sites (for example, landfills) are protected from the encroachment by sensitive and/or incompatible land uses.
6. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
7. The County shall work with the Schools to provide safe routes to school.
8. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Lindcove Community Plan.
9. The Lindcove Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.

# LINDCOVE HAMLET PLAN

---

10. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

**Housing**

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Lindcove.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Lindcove.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

# LINDCOVE HAMLET PLAN

---

## Economic Base

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

#### Policies:

1. Encourage the Lindcove to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

#### Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.

2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## Environmental Quality and Public Safety

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Lindcove citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

#### Objective: Protect Agricultural Lands:

Land within the respective Lindcove, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

# LINDCOVE HAMLET PLAN

---

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Lindcove.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Lindcove.

# LINDCOVE HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 73.3 acre Lindcove Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute 76 percent of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 494 by 73.3 urbanized acres (area within the HDB), which equals 6.8 persons per urbanized acre (see **Tables 16 and 17**) showing population projections). Projecting the population at a 1.3% growth rate adds 106 persons in year 2030. Multiplying the 106 persons by the 1/3 ratio suggests an additional 1.4 acres of land will be required to accommodate development by the year 2030 if projections are realized.

### Population Growth Forecast

Table 16 - Lindcove Population Projections			
Growth Rate	2015	2020	2030
0.013	494	520	600

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

Population and Housing Units The year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>14</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in year 2015 the community had 142 dwelling units (including vacant dwellings) with a population of 494. At an annual growth rate of 1.3%, the projected housing units are 527 and 300 in years 2020 and 2030, respectively, and projected population is 527 and 6007 in years 2020 and 2030, respectively.

Table 17 - Population Projections		
Year	Population	Growth (%)
2015	494	0.013
2016	500	0.013
2017	507	0.013
2018	514	0.013
2019	520	0.013
2020	527	0.013
2021	534	0.013
2022	541	0.013
2023	548	0.013
2024	555	0.013
2025	562	0.013
2026	569	0.013
2027	577	0.013
2028	584	0.013
2029	592	0.013
2030	600	0.013

# LINDCOVE HAMLET PLAN

---

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, water service levels to be expanded for which Grant funding will be required.

### Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

### Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and

### Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Based on the 2011-2015 American Community Survey (**see Table 18**), the educational barrier in Lindcove begins in grade school. Of the adults age 25 and older, 26.1% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

# LINDCOVE HAMLET PLAN

Table 18 - Education Attainment			
Educational Attainment	California	Tulare County	Lindcove
Population 25 years and over	24,865,866	258,046	345
Less than 9th grade	10.1%	20.8%	26.1%
9th to 12th grade, no diploma	8.4%	11.2%	25.8%
High school graduate (& equivalency)	20.7%	25.0%	25.2%
Some college, no degree	22.0%	22.3%	15.4%

Graduate or professional degree	11.4%	4.3%	3.5%

2011-2015 American Community Survey 5-Year Estimates

## Health Care

Health care is important for economic development as businesses need healthy employees. The other nearest medical offices are located in the City of Exeter, approximately five (5) miles to the southwest. The closest hospital is Kaweah Delta District Hospital located in the City of Visalia, approximately 20 miles to the west.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 19**) and Zoning Plan Districts (**see Table 20**) have been updated.

Table 19 - Proposed Land Use	
Proposed Land Use	Acres
Mixed Use	56.0
Right-of Ways	17.3
Lindcove HDB	73.3

Table 20 - Proposed Zoning Districts	
Proposed Zones	Acres
C-2-MU	10.5
R-A-43	45.5
Right-of Ways	17.3
Lindcove HDB	73.3

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations found in the Lindcove Hamlet Plan. The following components comprise the Lindcove Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

# LINDCOVE HAMLET PLAN

---

## Zoning Districts Changes

As part of this Implementation Program for the Lindcove Hamlet Plan, there are a several of changes to existing zoning districts. These changes are described below.

## Chapter 16 of the Zoning Code

Revise chapter 16 of the zoning code to limit the uses that require a use permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

## Mixed Use Overlay District

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Lindcove.

## Zoning Map Update

The current Zoning Districts for Lindcove (**see Figure 8**) will be amended to be compatible with the Land Use Map (**see Figure 7**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 9**) Lindcove proposed Zoning District.

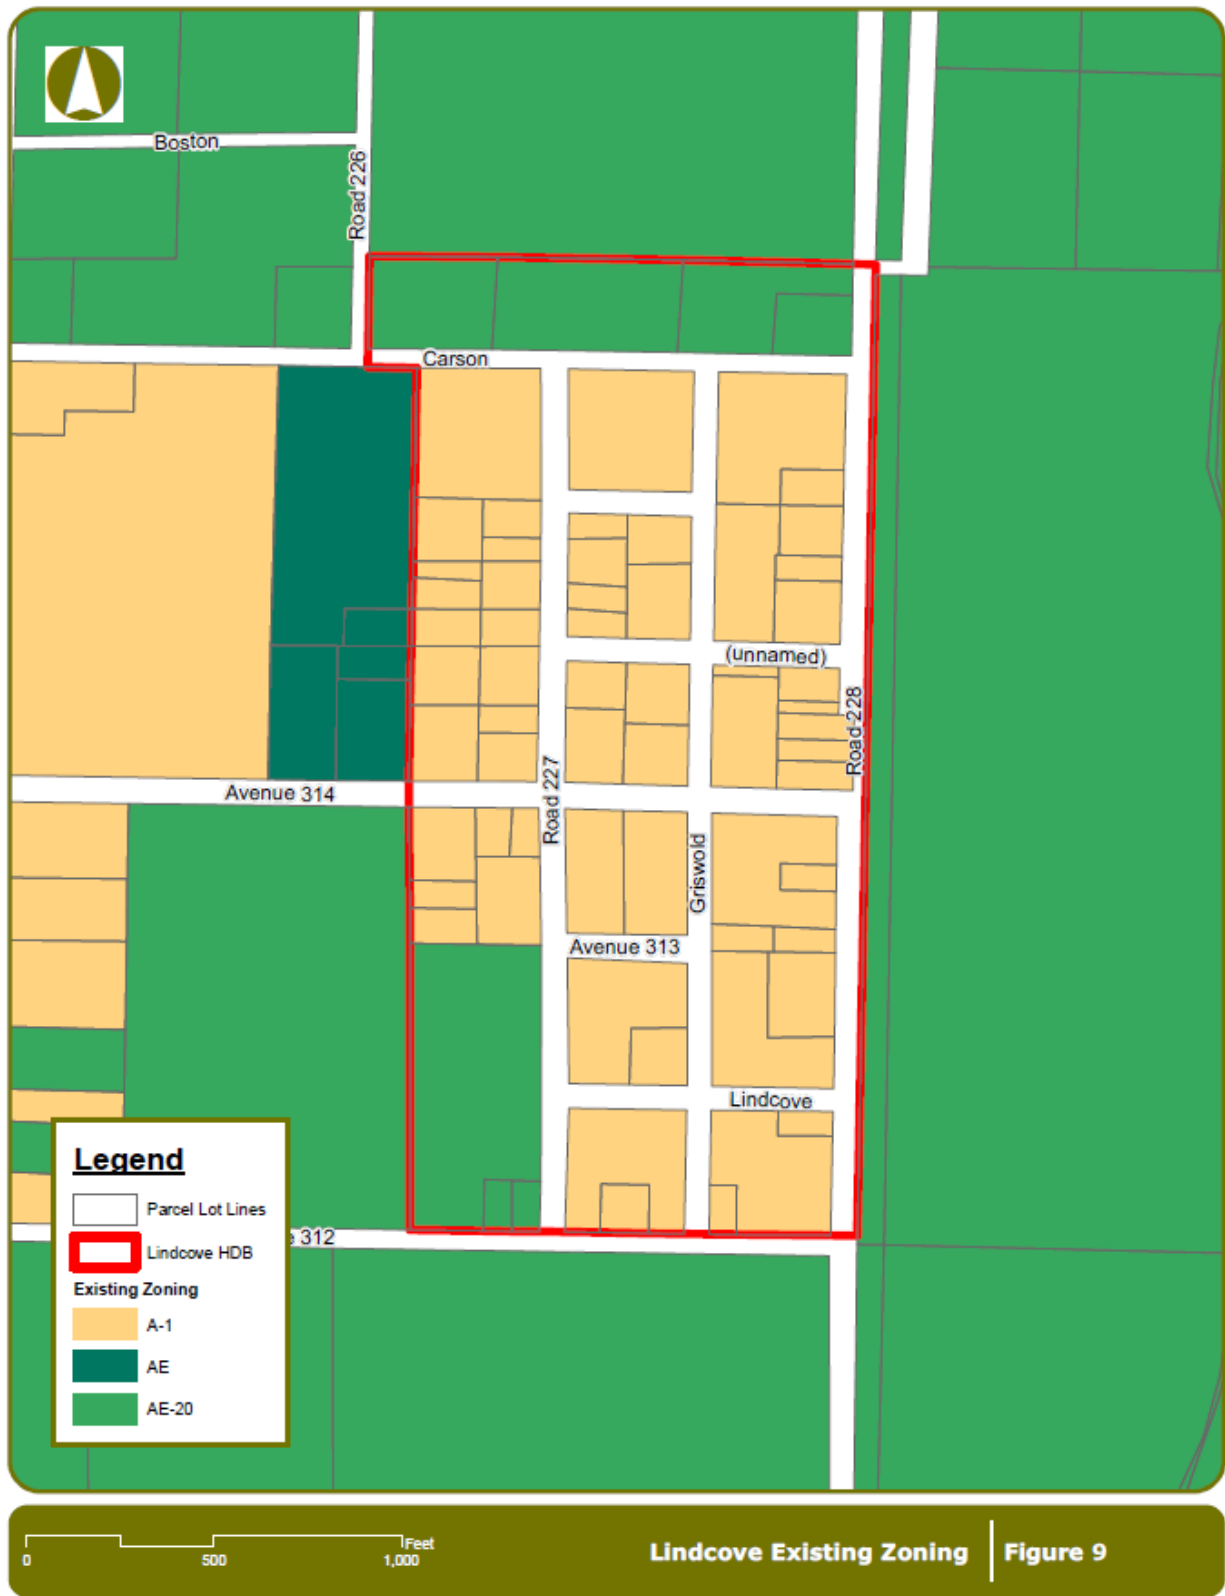

# LINDCOVE HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

## A-2 *Mixed Use Overlay District (Zone Change Text)*

The following regulations shall apply in the community of Lindcove, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Lindcove.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Lindcove.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Autowrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planing Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# LINDCOVE HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or

# LINDCOVE HAMLET PLAN

---

fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Lindcove. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# LINDCOVE HAMLET PLAN

---

## A-3 *Development Standards (Mixed Use Zoning District)*

---

To promote Economic Development within the Lindcove Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Lindcove. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Lindcove Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Lindcove. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# LINDCOVE HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# LINDCOVE HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# LINDCOVE HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# LINDCOVE HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# LINDCOVE HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# LINDCOVE HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# LINDCOVE HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# LINDCOVE HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE HAMLET PLANS 2017 ) RESOLUTION NO. 9366  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, AND PART III )  
AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT	)	
TO SECTION 16.H OF ORDINANCE NO. 352	)	
TO ALLOW ADDITIONAL BY-RIGHT USES	)	RESOLUTION NO. 9369
CONSISTENT WITH THE ADOPTED HAMLET	)	
PLANS, AS PROPOSED IN CHANGE	)	
OF ZONE NO. PZC 17-039	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

PZC 17-022, PZC 17-023, AND PZC 17-024	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Ordinance No. 352, the Zoning Ordinance as set forth in attached Exhibit "B" Allensworth Rezoning Plan (PZC 17-037), to include the Hamlet Community of Allensworth, consistent with the adopted Allensworth Hamlet Plan 2017 Update, Exhibit "E" Delft Colony Rezoning Plan (PCZ 17-015), to include the Hamlet Community of Delft Colony, consistent with the adopted Delft Colony Hamlet Plan 2017 Update, Exhibit "H" East Tulare Villa Rezoning Plan (PCZ 17-016), to include the Hamlet Community of East Tulare Villa, consistent with the adopted East Tulare Villa Hamlet Plan 2017 Update, Exhibit "K" Lindcove Rezoning Plan (PCZ 17-017), to include the Hamlet Community of Lindcove, consistent with the adopted Lindcove Hamlet Plan 2017 Update, Exhibit "N" Monson Rezoning Plan (PCZ 17-018), to include the Hamlet Community of Monson, consistent with the adopted Monson Hamlet Plan 2017 Update, Exhibit "Q" Seville Rezoning Plan (PZC 17-019), to include the Hamlet Community of Seville, consistent with the adopted Seville Hamlet Plan 2017 Update, Exhibit "T" Teviston Rezoning Plan (PCZ 17-020), to include the Hamlet Community of Teviston, consistent with the adopted Teviston Hamlet Plan 2017 Update, Exhibit "W" Tonyville Rezoning Plan (PCZ 17-021), to include the Hamlet Community of Tonyville, consistent with the adopted Tonyville Hamlet Plan 2017 Update, Exhibit "Z" Waukena Rezoning Plan (PCZ 17-022), to include the Hamlet Community of Waukena, consistent with the adopted Waukena Hamlet Plan 2017 Update, Exhibit "CC" West Goshen Rezoning Plan (PCZ 17-023), to include the Hamlet Community of West Goshen, consistent with the adopted West Goshen Hamlet Plan 2017 Update, Exhibit "FF" Yettem Tract Rezoning Plan (PCZ 17-024), to include the Hamlet Community of Yettem, consistent with the adopted Yettem Hamlet Plan 2017 Update, and

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# MONSON HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Monson is to develop a plan which can accurately reflect the needs and priorities of this community. Monson is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks, etc.) and to stimulate economic development within the community.

### Location

The community of Monson (**see Figure 1**) is located on the east side of the San Joaquin Valley, and is a census-designated place located in the northwest portion of Tulare County. It is bounded by Avenue 384 in the south, Avenue 388 in the north, Sand Creek in the west, and Road 108 roughly three (3) miles southeast of the city of Dinuba in Tulare County (**see Figure 2**). Monson is in Sections 34 & 35 Township 16 South, Range 24 East, MDB&M, and can be found within Monson United States Geological Survey 7.5 minute topographic quadrangle. Monson is located at an elevation of 325 feet National Geodetic Vertical Datum. The coordinates of Monson are: Latitude: 36.4927, Longitude: -119.3357.

### Planning Area

The Monson Hamlet Development Boundary (HDB) area consists of 115 acres (**see Figure 3**). The Land Uses within the HDB include agriculture (orchards and pasture), which currently occupy 82.7 percent of the 115 acres. Urban development, including urbanized uses such as commercial development occupy 0.8 of the 115 acres. The remaining 12.4 percent are lands dedicated for Right-of-way (**See Table 1**).

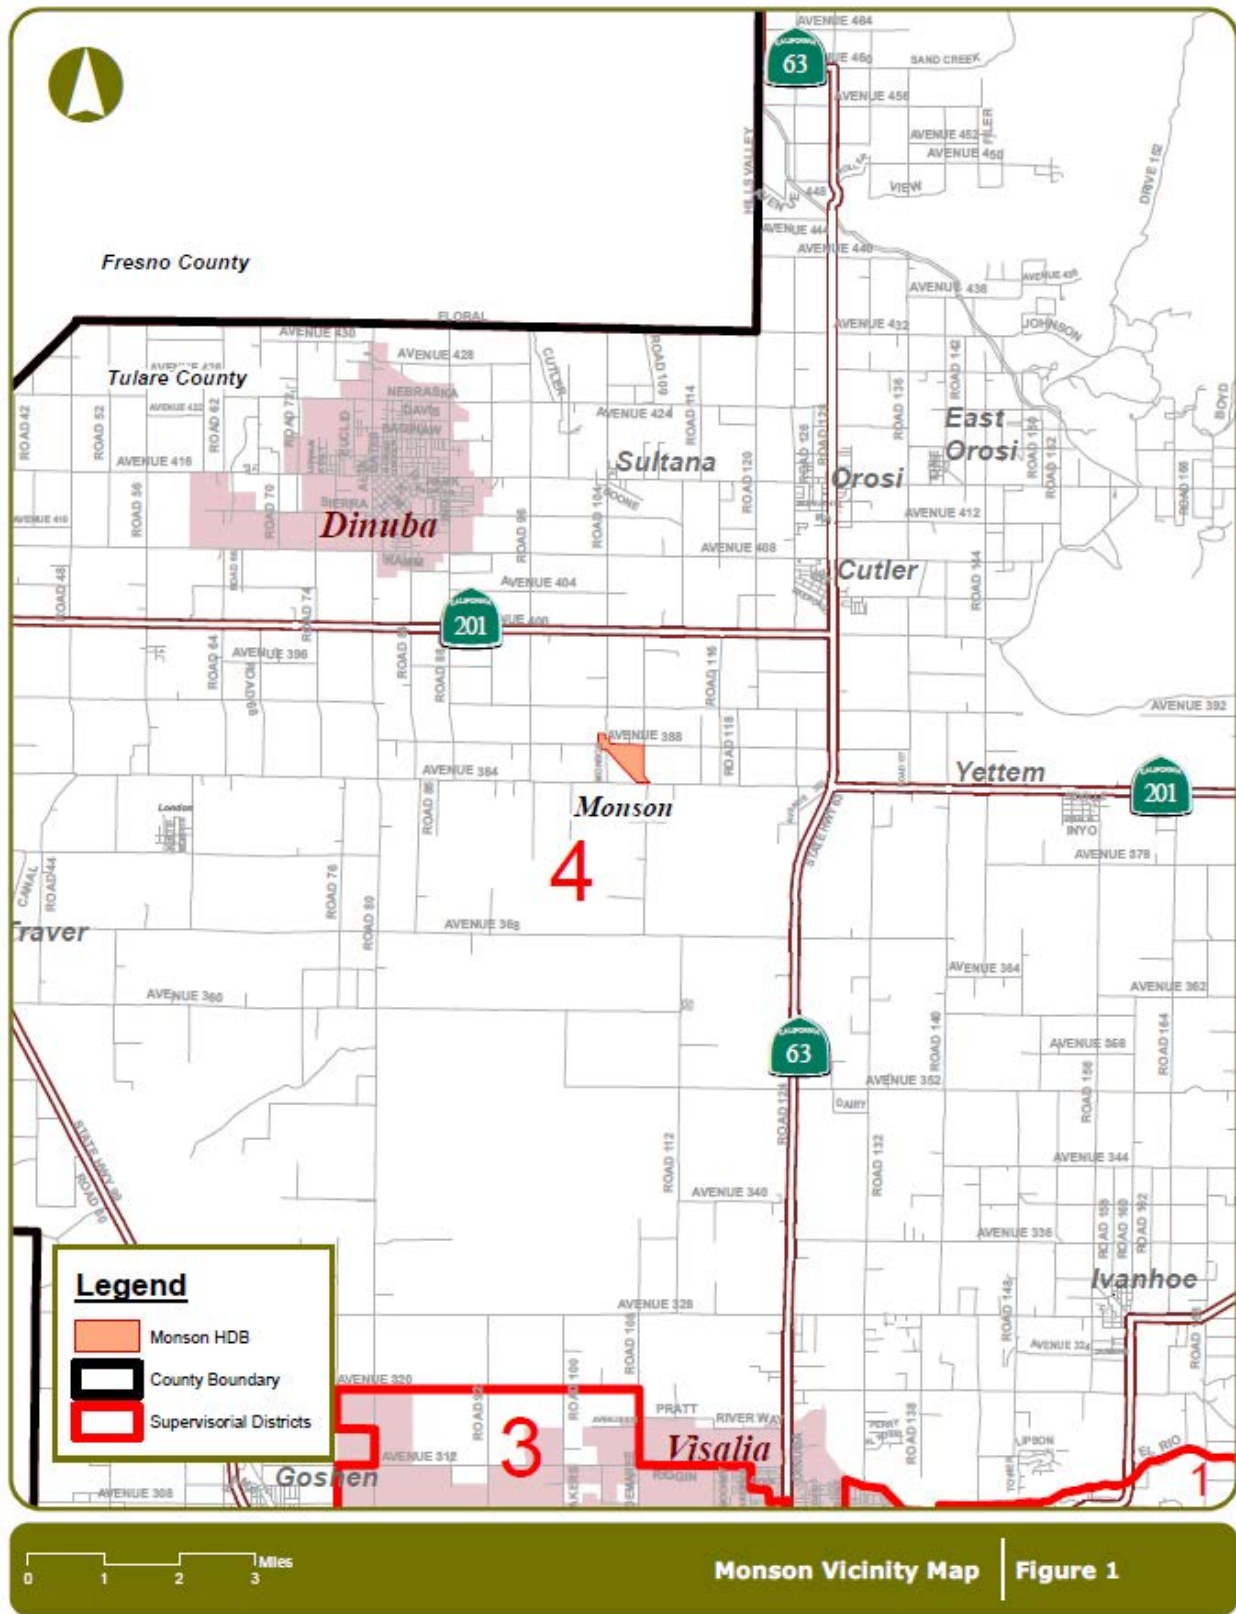

Table 1 - Monson Land Use	
Land Use	Acres
Commercial	1
Agricultural	99
Rights-of-way	14.9 (approx.)
<b>Total</b>	<b>115</b>

Source: Tulare County GIS

There are changes being proposed to the Hamlet Development Boundary to align north of the railroad tracks to the west of Monson Road, approximately 4.8 acres (**see Figure 11**).

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the SGC project, Self Help Enterprises (SHE) went door to door throughout the community of Monson to distribute flyers to homes. SHE emphasized with residents about the importance of participating in this process.

### Community Outreach Steps

Self-Help Enterprises (SHE) utilized various outreach methods to promote community participation and increase awareness of the SGC project:

- 1.) An informational flyer was developed.
- 2.) On Monday August 17 and Wednesday August 19, 2015, SHE staff went door to door to distribute flyers to homes.
- 3.) SHE staff partnered with La Voz de Monson (a local community group of residents that was formed to encourage community involvement, gather support and to spread the word about the importance of attending this meeting.
- 4.) SHE made phone calls to local residents.
- 5.) Throughout the community outreach process, SHE staff explained the goals of the project and emphasized the importance and the community benefits of participating in the SGC community meeting.
- 6.) To ensure that residents had multiple opportunities to be made aware of the meeting, flyers were posted at the local corner store.

### Community Meeting

Self-Help Enterprises conducted a community meeting (with two SHE staff members and one Tulare County RMA employee present) in Monson on Thursday, August 20, 2015 at 6:30 pm. The meeting was scheduled in the evening to make it easier for working residents to attend. The meeting was held at 38660 Monson Drive, the home of a local resident. The purpose of the meeting was to discuss Monson improvement needs, gather community data, and report the findings of the meeting in a final report. More than Twenty Monson residents attended the meeting. Eleven (11) community surveys were collected.

# MONSON HAMLET PLAN

---

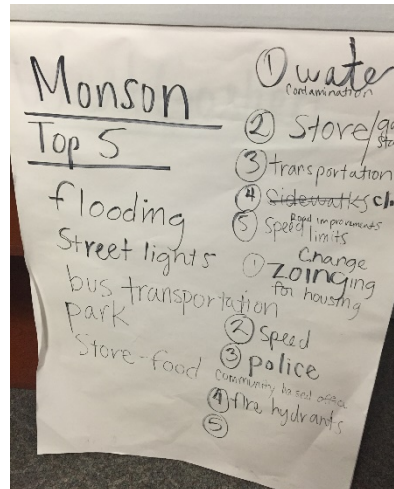

## Community Survey

A survey was developed as a tool to gather a variety of community information about multiple topics. The survey asks about the following community related topics: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation Options, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Infrastructure, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and the priority of various improvement needs. Residents were encouraged to add information and comments to the survey.

After careful discussion at the Monson SGC community input meeting, residents concluded that the following is a list of priority improvement needs.

## Priority Improvements

1. Water Issues
2. Storm Water Drainage/ Street Flooding
3. Road Improvements
4. Street lights
5. Bus transportation
6. Fire hydrants
7. Community based Officer/Sherriff patrol
8. Community Park
9. Health Care Clinic
10. Zoning changes

# MONSON HAMLET PLAN

---

## **Sewer System**

There is no community wide sewer system in Monson. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent.

## **Storm Water Drainage/Flooding**

Monson residents report that the community does not have adequate storm water drainage. Large puddles form when it rains and the water does not drain because there is nowhere for the water to go. This is a problem because the stagnant water attracts insects and mosquitos. Residents report that some streets flood during the rainy season, most of the roads in town are dirt roads this makes mud and pot holes. Not having curb and gutters or sidewalks also adds to the problem

## **Road Improvements**

Road conditions are a big concern to Monson residents. It is reported that road conditions are poor and most roads need work, most streets have potholes, cracks and bumps. Drivers feel unsafe and are constantly worried about damage caused to their vehicles while driving on Monson roads. Residents report that roads are narrow and that two cars barely fit on one road at the same time. According to residents, Monson roads are not regularly maintained.

## **Street Lights**

Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the sheriff's department seldom patrols Monson. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Speed Limit Signs**

During the SGC community meeting residents expressed concern about the speed of traffic in town. Many vehicles travel at a high rate of speed on Monson Drive as well as on the other main roads in town. Residents believe that in order to avoid more car crashes, the County should install a speed limit sign on Monson Drive and speed bumps on residential streets to slow traffic. Residents shared that there is little to zero patrol done by the Sheriff and California Highway Patrol, this adds to the speeding problem.

## **Public Transportation**

Residents expressed their frustration from the lack of public transportation access. The Monson residents that do not drive or own a vehicle, find it hard to travel outside of Monson. Often residents need transportation to go into Visalia or Dinuba for doctors' appointments and shopping needs. Many residents expressed the need for a bus route that goes out through Monson. Bus transportation to and from Monson would help many residents to travel on a daily basis.

## **Zoning**

During the community meeting residents stated that they are unable to build new homes or start businesses due to the way land is currently zoned in Monson. Residents expressed that zoning changes are needed to allow residents to build new housing in the community. During this meeting, it appeared that multiple residents would be interested in building a home in Monson if zoning laws permitted it.

# MONSON HAMLET PLAN

---

## **Community Based Officer**

The Tulare County Sheriff Department is responsible for patrolling the community of Monson. Residents report that the TCSD response time is unacceptable and that there is little to zero Sheriff Patrol within the community. Residents are worried about the rate of unreported crimes and crimes that go un-responded to. Monson residents are asking for increased Sheriff Presence in their community.

## **Fire Hydrants**

Residents are worried because their community does not have fire hydrants. Residents feel vulnerable to fire emergencies. The nearest fire water supply is in Sultana. In case of a fire, Dinuba Fire Department would service the Monson community.

## **Neighborhood Park**

In the community of Monson there is no safe open green space for children to play and adults to be physically active. The nearest park is located 8 miles away in the city of Dinuba, survey results show that in Monson, children play in the street or do not play outside at all. Monson residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and for the health of their children from lack of physical activity that comes from not having a safe place to be physically active.

## **Local Market**

The community of Monson is a food desert. This community does not have a local food market that sells fresh produce, meat and dairy. The Monson Market sells some food however, most of it is highly processed, packaged, and not considered nutritious. In addition, the food prices are much higher there than in neighboring communities and the quality of food is not as fresh as it is in other communities. Monson residents regularly travel to Dinuba (8 miles) or Visalia (15 miles) to buy their groceries.

## **Medical Clinic**

Monson residents do not have access to medical care within the community. The nearest medical clinic is approximately 8 miles away in Dinuba. Most residents report traveling to Visalia, 14 miles, Dinuba, 8 miles or Orosi, 8 miles for medical care. This is concerning to residents especially during medical emergencies. Families without vehicles and one car families are especially affected by this. Families that do not have a car are forced to find transportation to access medical care in a nearby community by paying for a ride or using public transportation to travel there. The Tulare County Area Transit does not make regularly scheduled stops in Monson, the TCAT will pick up Monson residents by appointment when calling the day before. Residents report that they are very concerned about the thought of having to travel so far in the case of a medical emergency. The nearest hospital is in Visalia, 15 miles away, and it takes approximately 20 minutes for the nearest ambulance to get to Monson from Visalia.

## **Internet Access**

Most families in Munson do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or expensive compared to what it costs in nearby cities. Without access to the internet, Munson residents are unable to do things such as online job hunting, apply for resources, or provide homework help to their kids.

# MONSON HAMLET PLAN

## MONSON TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Monson.

#### Population

In 2015, the Population of Monson was 237 (see Table 2)

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Monson</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	128	54%
Female	19,334,329	50.3%	226,607	49.9%	109	46%
Total	38,421,464		454,033		237	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Monson's population during the Planning Period (see Table 3).

<b>Table 3 - Projected Annual Growth Rate</b>		
	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.46%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

<sup>1</sup> Tulare County Regional Blueprint, page 7

# MONSON HAMLET PLAN

## Median Age

Monson's population's median age is younger than the median age of both Tulare County, as well as the State of California (see Table 4).

<b>Table 4 - Median Age</b>	
<b>Geography</b>	<b>Median Age (years)</b>
California	35.8
Tulare County	30.3
Monson	26.4

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 18.1% of Monson's population was White, 4.6% was African American, 0% was Native American, 0% was Asian, and 26.6% was two races or more (see Table 5). Approximately 86.9% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

<b>Table 5 - Race &amp; Ethnicity</b>						
	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Monson</b>	<b>%</b>
Total	38,421,464		454,033		237	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	120	50.6%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	43	18.1%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	11	4.6%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	63	26.6%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Monson

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Monson was about 12.1% while the rate for Tulare County was 13.5%. The unemployment rate for the State of California was 10.1%. Keeping in mind that the 12.1% includes only the employable labor force (that is, not every person of the population) results in about 21 unemployed persons of Monson's person labor force of 131.

# MONSON HAMLET PLAN

<b>Table 6 - Employment Status</b>			
<b>Employment Status</b>	<b>California</b>	<b>Tulare County</b>	<b>Monson</b>
Population 16 years & over	30,312,429	325,404	173
In labor force	19,269,449	194,420	131
Civilian labor force	19,137,441	194,102	131
Employed	17,246,360	170,780	110
Unemployed	1,891,081	23,322	21
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	42

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Monson median household income is currently unavailable, however the State of California's median household income is currently \$61,818 (see Table 7)

<b>Table 7 - 2011-2015 American Community Survey Income</b>			
<b>Geography</b>	<b>Median household income (dollars)</b>	<b>Median family income (dollars)</b>	<b>Per capita income (dollars)</b>
<b>California</b>	\$61,818	\$70,720	\$29,527
<b>Tulare County</b>	\$42,031	\$44,814	\$17,894
<b>Monson CDP</b>	Not available	Not available	\$18,344

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes).

<b>Table 8 - Housing Tenure</b>			
	<b>California</b>	<b>Tulare County</b>	<b>Monson</b>
Occupied housing units	12,717,801	133,570	62
Owner-occupied	6,909,176	75,685	49
Renter-occupied	5,808,625	57,885	13

2011-2015 American Community Survey 5-Year Estimates

<b>Table 9 - Housing Tenure (%)</b>			
	<b>California</b>	<b>Tulare County</b>	<b>Monson</b>
Owner-occupied	54.8%	57.2%	62%
Renter-occupied	45.2%	42.8%	79.0%

2011-2015 American Community Survey 5-Year Estimates

# MONSON HAMLET PLAN

## Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Monson indicated that approximately 14% of the housing units were sound. Approximately 64% of Monson's housing units were deteriorated and 23% were dilapidated (see Table 10).

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Monson	3	14	3	14	7	32	4	18	5	23	22

Source: Tulare County 2015 Housing Element

## Age of Structures

Most of the homes in Tulare County were built between 2000 and 2013. (see Table 11) The total number of housing units in Monson is 62.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Monson
Total housing units	13,845,790	144,792	62
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	19
Built 2000 to 2009	1,646,490	25,997	24
Built 1990 to 1999	1,495,571	21,767	0
Built 1980 to 1989	2,117,819	22,733	0
Built 1970 to 1979	2,503,688	27,111	3
Built 1960 to 1969	1,871,029	15,500	4
Built 1950 to 1959	1,907,512	13,694	0
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	12

2011-2015 American Community Survey 5-Year Estimates

# MONSON HAMLET PLAN

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Monson was 5.23 persons per household (see Table 12). The average owner occupied household size is 3.45.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Monson	3.45	5.23-

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Monson was 0.0%, which was lower than both Tulare County at 4.2% and the State of California at 4.6%. The homeowner vacancy rate was 0.0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Monson	0.0%	0.0%

2011-2015 American Community Survey 5-Year Estimates

<sup>2</sup> U.S. Department of Housing and Urban Development, "Measuring Overcrowding in Housing" 2007. Page 2 See: [http://www.huduser.org/publications/pdf/Measuring\\_Overcrowding\\_in\\_Hsg.pdf](http://www.huduser.org/publications/pdf/Measuring_Overcrowding_in_Hsg.pdf)

# MONSON HAMLET PLAN

---

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

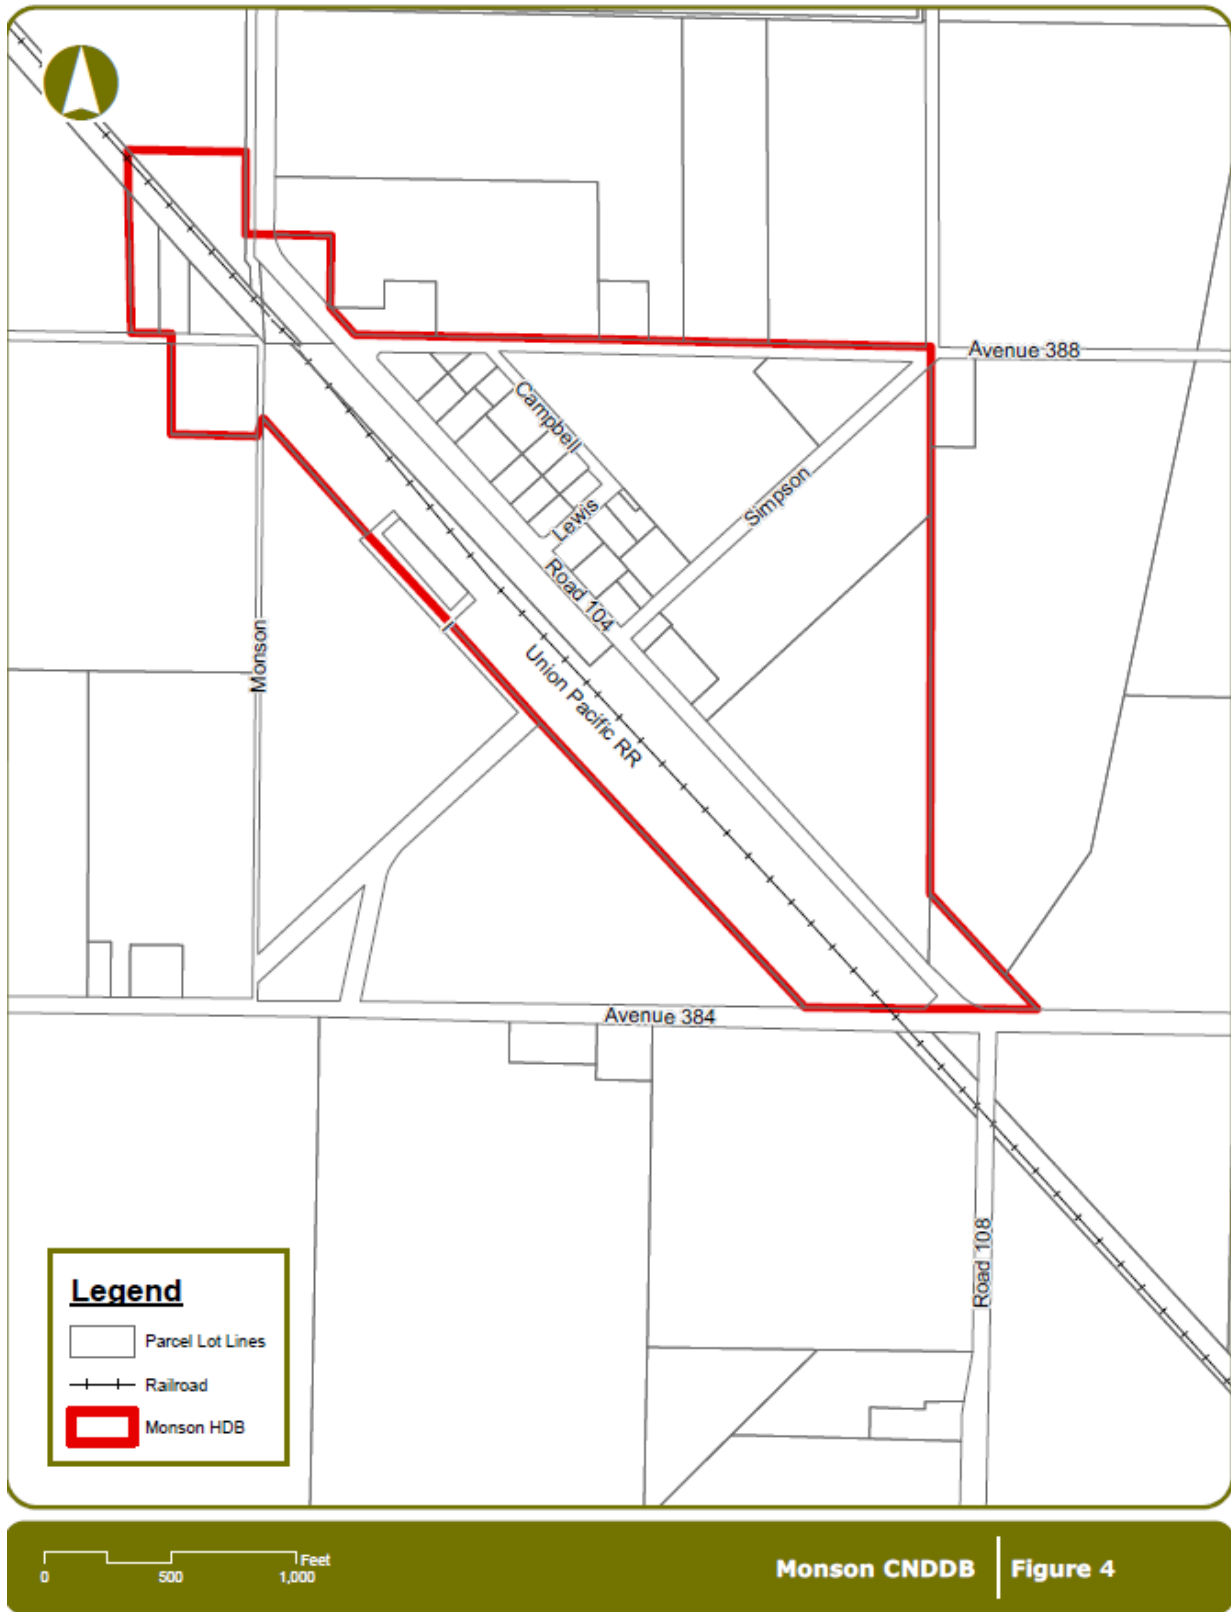

A California Natural Diversity Database (CNDDB) search conducted on November 1, 2016 (**see Figure 4**), indicates there are special status species within the Monson Quadrant Species List (which includes the Monson Planning Study Area) consisting of three (4) animal species and two (2) plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); California tiger salamander (*Ambystoma californiese*, federal and state threatened); Vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened); Vernal pool tadpole shrimp (*Lepidurus packardi*, federal endangered), Hoover's spurge (*Euphorbia hooveri*, federal endangered); and San Joaquin Valley Orcutt grass (*orcuttia inaequalis*, federal threatened and state endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Monson are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, Monson is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Monson (see Figure 5). Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**Calgro- Calgro, saline-Sodic, complex, 0 to 2 percent slopes,** Erosion potential is low to moderate and shrink swell potential low.

**Crosscreek-kai association, 0 to 2 percent slopes,** is formed by the chemical and mechanical alteration of the Kai soil that originally formed in alluvium derived from granitic rock sources. The soil is well drained, and the permeability is moderately slow above the duripan due to sodicity and very slow in the duripan. The available water capacity is moderate to high and the shrink-swell potential is moderate.

The parent material of Kai Soil is alluvium derived mainly from granitic rock sources.

The soil is moderately well drained and the permeability is moderately slow above the duripan and very slow in the duripan. The available water capacity is low to moderate and the shrink-swell potential is moderate.

Building site development management factors include very slow permeability of the duripan, moderate to moderately rapid permeability below the duripan, high corrosivity to steel in both soils and high corrosivity to concrete in the Crosscreek soil. The land capability classification: Crosscreek-unit, 2s-6, irrigated; subclass, 6s, non-irrigated; Kai- unit, 3s-6 irrigated; subclass, 7s, non- irrigated, MLRA17. This is not considered to be prime farmland.

# MONSON HAMLET PLAN

**Hanford sandy loam, 0 to 2 percent slopes,** consists of very deep, well drained soils that formed in moderately coarse textured alluvium dominantly from granite. Hanford soils are on stream bottoms, floodplains, and alluvial fans. Hanford soils are used for growing a wide range of fruits, vegetables, general farm crops, dairies and for urban development.

**Figure 5 - NCRS Soil Map**

# MONSON HAMLET PLAN

---

## PHYSICAL CONDITIONS

### Air Quality

The Monson Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Monson is located near the northwest end of the Valley with prevailing winds from the northwest, it is susceptible to accumulate adversely modified air, particularly

# MONSON HAMLET PLAN

---

when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Monson including agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0630E (**see Figure 6**), Monson is located within Flood Zone X, – Areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood. Monson is also located within the FEMA 500 year flood zone. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). “Floodplain” or “flood-prone area” means any land area susceptible to being inundated by water from any source. “Base Flood” is the flood having a one percent chance of being equaled or exceeded in any given year. “One-hundred-year flood” or “100 year flood” has the same meaning as “Base Flood.” “Special Flood Hazard Area” is the land in the floodplain subject to a one percent or greater chance of flooding in any given year. “Floodway” means the channel of a river or other watercourse and the adjacent land area that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one (1) foot. The floodway is delineated on the Flood Boundary Floodway Map, on maps adopted by the State Reclamation Board when acting within its jurisdiction, and on the County Zoning Map (signified by the F-1 Primary Flood Plain Zone). The F-2 Secondary Flood Plain Combining Zone which is intended for application to those areas of the County which lie within the fringe area or setback of the flood plain and are subject to less severe inundation during flooding conditions than occur in the F-1 Zone.

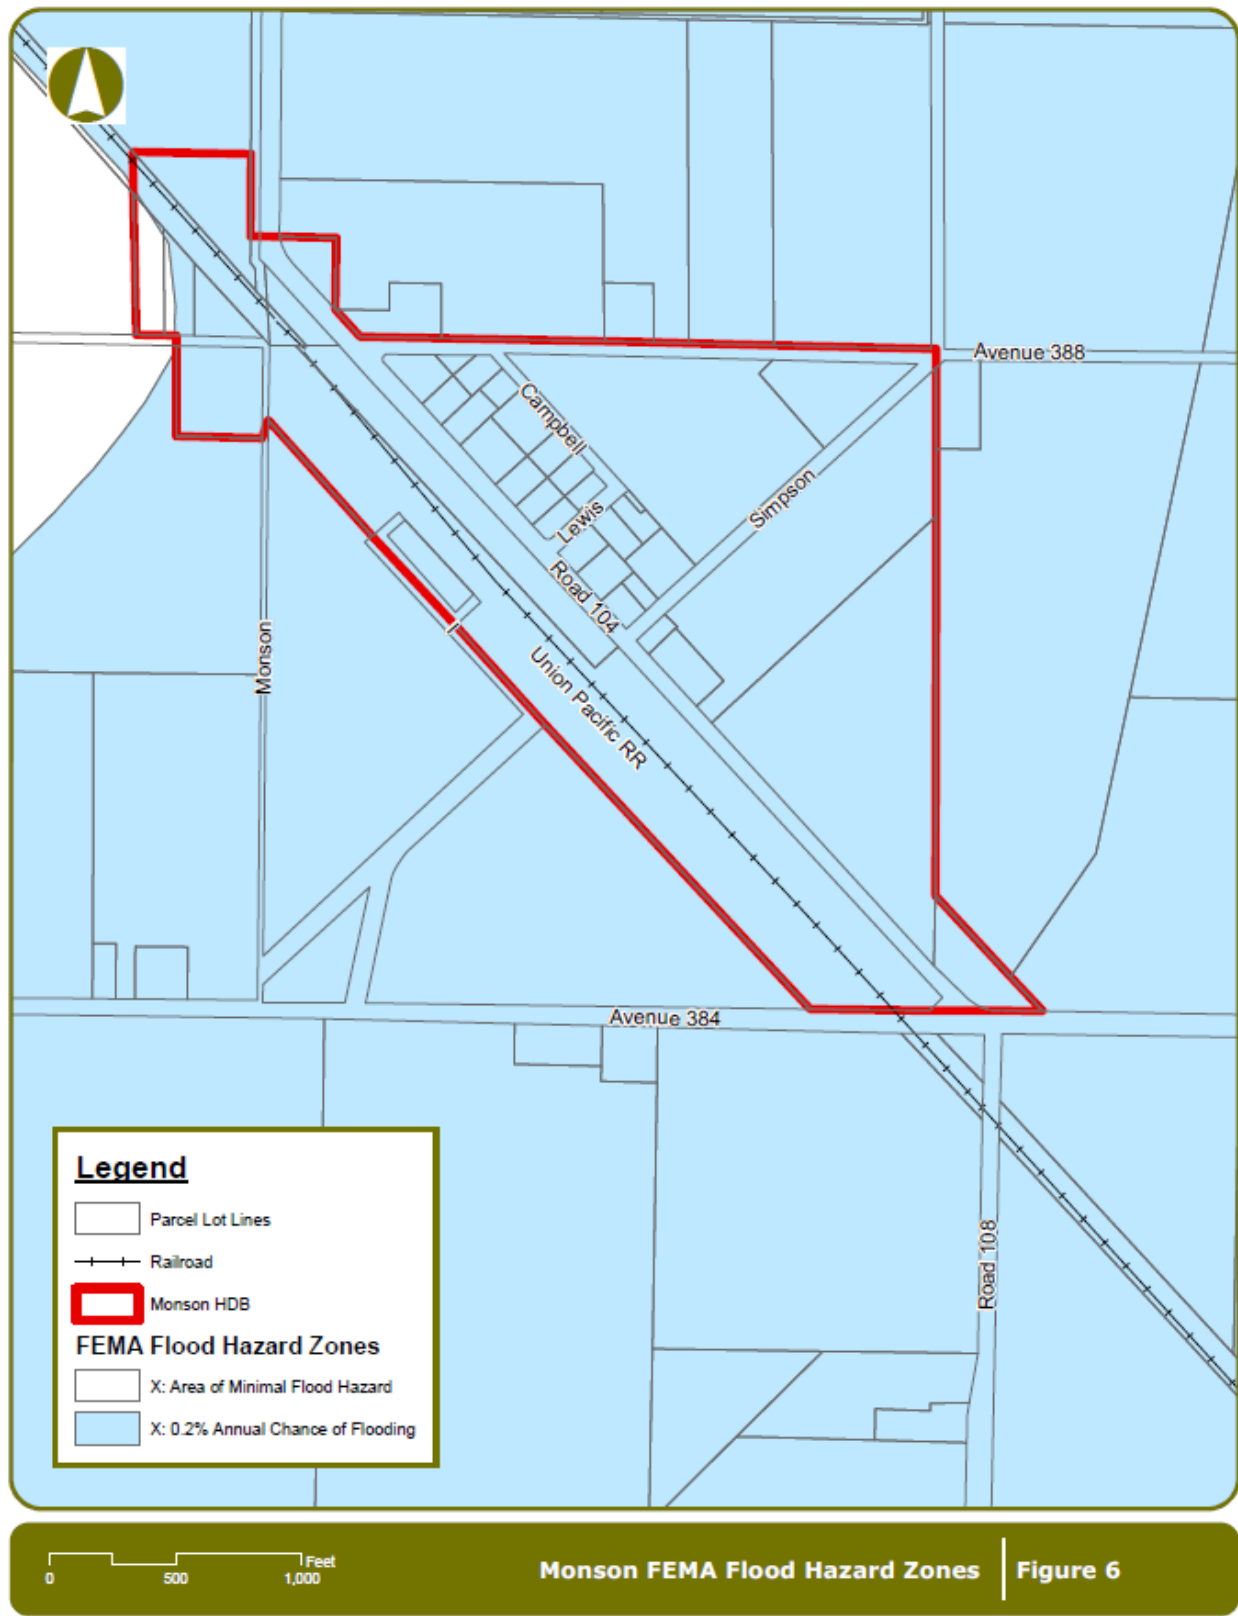

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

<sup>6</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C0630E, Panel Number 630 of 2550, June 16, 2009. <https://msc.fema.gov/portal/> accessed August 17, 2016.

# MONSON HAMLET PLAN

Figure 6 - FEMA Flood Map

# MONSON HAMLET PLAN

## Noise<sup>7</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. **Table 14** summarizes the daily traffic volumes along Avenue 384 from Road 80 to State Route (SR) 63.

Table 14 - Noise Levels					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
Avenue 384 from Road 80 to State Route 63	3,530	25	55	118	253

Source: 2010 General Plan Background Report

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom SCE has arrangements, and rolling blackouts.

# MONSON HAMLET PLAN

---

## Water Quality

Monson until recently was not served by a public water system. Approximately 40 homes in the community of Monson obtained their drinking water from private domestic water wells, many of which are shared between multiple households. Nitrate levels in the area's groundwater have long been known to be high. In 2008, testing of a dozen domestic wells was conducted in the community of Monson. Testing results revealed nitrate levels between 46 and 130 parts per million (ppm), which are all over the EPA and California Maximum Contaminant level (MCL) of 45 ppm. Furthermore, the average level of nitrate contamination among the wells tested was 105 ppm which is over twice the MCL.

The community had been concerned about the quality and safety of their water, it is hard to know how to solve the community's water problems. SGC survey results show that 82% of people (that attended the SGC meeting) would like to be connected to a community water system, 18% did not respond to the question.

Monson is comprised of approximately 37 lots with approximately 40 residential units and a local store. All the residential lots had been served by a private water well and septic tanks. The local store was also served by an individual private water well but is still regulated as Transient Non-Community Water System (TNCWS).

Almost all of the wells had been shallow. Typical wells were 80 feet deep. Data indicate that between Fall of 2011 and Spring of 2014 water levels in one of the wells declined from 19 feet below ground surface to 49 feet - a drop of 30 feet and water levels in well in other wells have declined from 27 feet below ground surface to 63 feet a drop of 36 feet and this drop in the water table is accelerating as the drought continues. In May 2014 and July 2014, the depth to water in a single domestic well in Monson was measured. Results of the measurements show the water level dropped from 54 feet to 63 feet (9 feet) between May and July of 2014.

In 2015-16 funding was obtained by the County and a project was designed (**see Figure 7**) and installed in 2017, for Monson the project consisted of developing a well site to include a well, 50,000-gallon water storage tank, installation of approximately 32 water services (more services were added beyond those originally indicated on the sheet) and the associated distribution piping to serve residents. A layout of the system and the services is shown on the attached drawing. The project was funded by the United States Department of Agriculture Emergency Community Water Assistance Grant, a grant from the State Water Resources Control Board and a grant from the Department of Water Resources. Construction began in March of 2017 and was completed in September of 2017, Sultana CSD will manage the system.

# MONSON HAMLET PLAN

---

## Sewer

No public sewer facilities are available in Monson. Each land owner relies on septic systems for wastewater.

## Storm Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration

Monson does not currently have a storm drainage system.”<sup>8</sup>

## Solid Waste

Solid waste disposal services for the Community of Monson is provided by Pena’s Disposal, a private company. Solid waste generated in Monson can be disposed of at Visalia Landfill, located at 22466 Road 80, Visalia.

## Roads

There are several roadways in Monson that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

---

<sup>8</sup> Action Program 9, Tulare County 2015 Housing Element

# MONSON HAMLET PLAN

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>9</sup>

**Table 15** lists the roadways in need of repair, the limits, and type of maintenance strategy proposed. **Figure 7** graphically displays this information on a map.

**Table 15 - Roads in Need of Major and Medium Repair in Monson**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Avenue 388	Monson Drive to Road 108	CHIP
2	Monson Drive	Simpson Drive to Road 104	CHIP
3	Monson Drive	Avenue 384 to Simpson Drive	GRX
4	Road 104	Avenue 388 to Monsoon Drive	CHIP
5	Simpson Drive	Avenue 384 to Monson Drive	CHIP

OLAY – overlay resurfacing operation	ACST – asphalt reconstruction
CHIP – chip seal	RCST – cold mix reconstruction
GRX – grind and remix	

(Source: County of Tulare Public Works, 2012)

## Street Lights

**Table 16** identifies the location of existing street lights that are maintained by Tulare County, in Monson, as well as their specifications. **Figure 8** also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type “W” represents a wood post for which the light is commonly shared with a Utility provider. Similarly, “M” represents metal and “C” represents concrete.

**Table 16 - Specifications of Existing Street Lights**

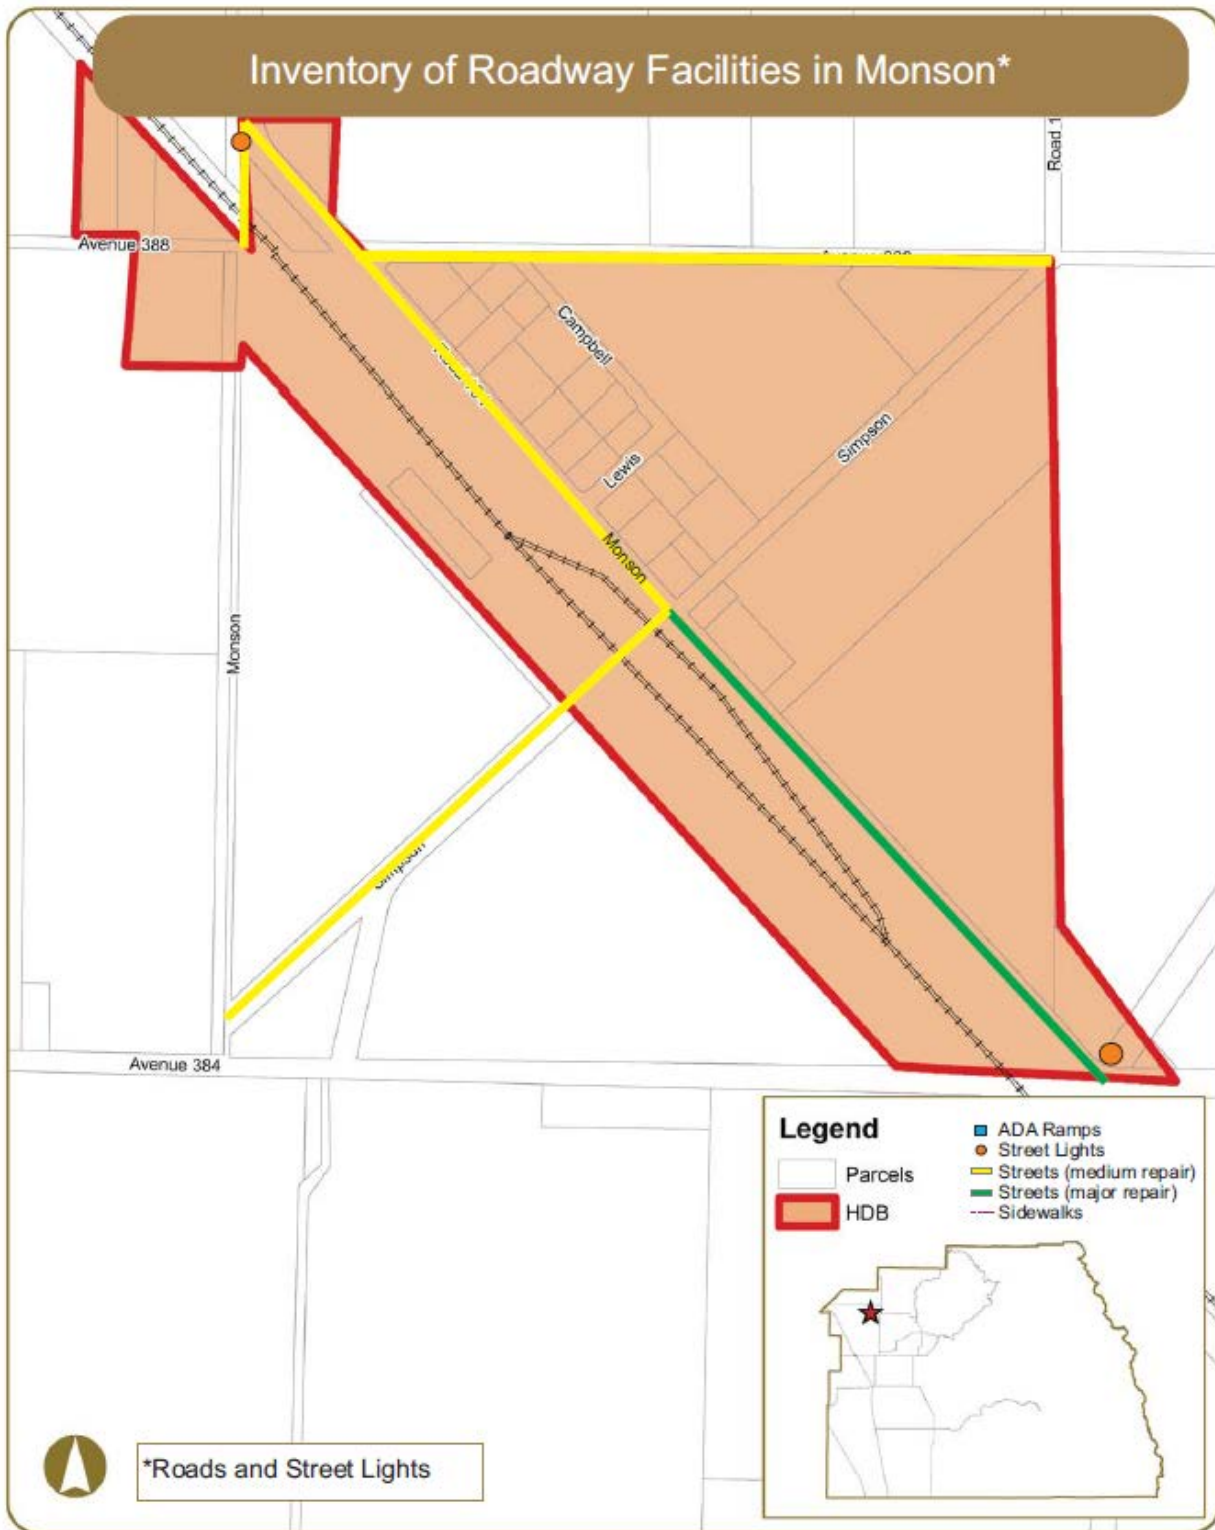

Specifications of Existing Street Lights								
No.	East-West Roadway	North-South Roadway	Location	Pole	Lumens	Pole Type	Arm Direction	Utility
1	Avenue 384	Monson Drive	NE Corner	5	9500	W	S	PG&E
2	Road 104	Monson Drive	NE Corner	2454	9500	W	E	PG&E

(Source: Tulare County Public Works, March 2013)

<sup>9</sup> Action Program 9, Tulare County 2015 Housing Element

# MONSON HAMLET PLAN

Figure 8 - Monson Inventory of Roadway Facilities

# MONSON HAMLET PLAN

---

## Sidewalks

There are currently no sidewalks located within Monson.”<sup>10</sup> Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Monson.”<sup>11</sup>

## Transit and Bus Stops

County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare’s urban transit systems. Public transit is currently not available in Monson. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents.

---

<sup>10</sup> Action Program 9, Tulare County 2015 Housing Element

<sup>11</sup> Action Program 9, Tulare County 2015 Housing Element

# MONSON HAMLET PLAN

---

The low level of auto congestion in Monson, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified Road 80 as a proposed Class III and State Route 63 as a proposed Class II Bike Projects<sup>12</sup>. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely used outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. There are two bike route near the community of Monson, Road 80 and State Route 63.

## AMTRAK

The Hanford AMTRAK station, located approximately 45 miles to the southwest in Kings County, is the closest station to Monson providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport is approximately 25 miles south. Fresno Yosemite International Airport (FAT), approximately 40 miles northeast of Monson, is a principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 90 miles southeast of Monson and offers direct flights to several destinations

## **PUBLIC SERVICES**

### Community Resource Center

The community lacks many resources and needs a place where residents can go to access information and county wide resources. People in Monson expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used by kids for homework help, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service Monson residents. This could also be the place where residents access a reliable internet connection.

### Sheriff

Police protection services are provided in Monson by the Tulare County Sheriff's Department sub-station, located 40765 Road 128, in Culter, approximately five (5) miles northeast of Monson. The substation provides patrol services 24-hours per day, 365 per year. Additional Sheriff resources are available as needed via dispatch from the main Sheriff's Office in Visalia, CA.

---

<sup>12</sup> TCAG Action Element, TCAG 2014 Regional Transportation Plan. Page 3-89.

# MONSON HAMLET PLAN

---

## Fire

There are currently no Fire Hydrants in Monson. Fire protection and emergency medical services are provided for Monson by the Tulare County Fire Department. The community is served by Dinuba Station #3, located at 40404 Road 80, in Dinuba. Parade 1, Engine 3 and Water Tender 3 is assigned to this location.

## Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Monson Hamlet Plan Area is within the Monson-Sultana Joint Union School District. The District provides K-8 grade education at its Monson-Sultana School four (4) miles away. High School students attend high school in Dinuba. Monson is within the Dinuba Union Joint High School District.

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>13</sup> The closest library is located in Dinuba, approximately eight (8) miles to the northwest (see Table 17).

Table 17 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Dinuba	Dinuba Branch Library 150 South I Street Dinuba, CA 93618-2399 (559) 591-5829	Tuesday to Friday: 9:00 a.m. – 1:00 p.m., 2:00 p.m. – 6:00 p.m.

Library hours current as of September 2017

## Parks

Presently there are no County owned/operated public parks in Monson. The closest public park to the community is Dinuba Community Park, located approximately eight (8) miles to the northwest.

# THE MONSOON HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies

---

<sup>13</sup> General Plan Background Report, page 7-96

# MONSON HAMLET PLAN

---

the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>14</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>15</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

Monson is a small agricultural community located near State Route 201. The major rural collector roads is Avenue 308. There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

---

<sup>14</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

<sup>15</sup> Tulare County General Plan Background Report, page 5-7.

# MONSON HAMLET PLAN

---

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

## GOALS, OBJECTIVES AND POLICIES

This Section of the Monson Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Monson to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan, Monson Hamlet Plan, and input received from Monson citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned shopping areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.

# MONSON HAMLET PLAN

---

5. The County shall ensure that solid waste facility sites (for example, landfills) are protected from the encroachment by sensitive and/or incompatible land uses.
6. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
7. The County shall work with the Schools to provide safe routes to school.
8. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Monson Community Plan.
9. The Monson Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.
10. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Monson.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Monson.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

# MONSON HAMLET PLAN

---

## Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

## Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

## Policies:

1. Encourage the Monson to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

## Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## **Environmental Quality and Public Safety**

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Monson citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

## Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

# MONSON HAMLET PLAN

---

Objective: Provide sufficient open space for community recreation needs.

Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

Objective: Protect Agricultural Lands:

Land within the respective Monson, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate.

When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Monson.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Monson.

# MONSON HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 115 acre Monson Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute 86.0% of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 237 by 3.89 urbanized acres (area within the HDB), which equals 61 persons per urbanized acre (**see Tables 18 and 19**) showing population projections). Projecting the population at a 1.3% growth rate adds 51 persons by year 2030.

### Population Growth Forecast

**Table 18 - Monson Population Projections**

Growth Rate	2015	2020	2030
0.013	237	253	288

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The Year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>16</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in year 2015 the community had 62 dwelling units (including vacant dwellings) with a population of 237. At an annual growth rate of 1.3%, the projected housing units are 66 and 75 in years 2020 and 2030, respectively, and projected population is 263 and 288 in years 2020 and 2030, respectively.

**Table 19 - Population Projections**

Year	Population	Growth (%)
2015	237	0.013
2016	240	0.013
2017	243	0.013
2018	246	0.013
2019	250	0.013
2020	253	0.013
2021	256	0.013
2022	259	0.013
2023	263	0.013
2024	266	0.013
2025	270	0.013
2026	273	0.013
2027	277	0.013
2028	280	0.013
2029	284	0.013
2030	288	0.013

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

<sup>16</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# MONSON HAMLET PLAN

---

## Infrastructure

In order for more development to occur, water service levels need to be expanded, for which grant funding will be required.

## Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require a discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

## Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET

Based on the 2011-2015 American Community Survey (**see Table 20**), the educational barrier in Monson begins in grade school. Of the adults age 25 and older, 20.5% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should to begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

<b>Table 20 - Education Attainment</b>			
<b>Educational Attainment</b>	<b>California</b>	<b>Tulare County</b>	<b>Monson</b>
Population 25 years and over	25,257,858	260,964	127
Less than 9th grade	10.0%	20.8%	20.5%
9th to 12th grade, no diploma	8.2%	10.9%	7.9%
High school graduate (& equivalency)	20.7%	25.2%	37.8%
Some college, no degree	21.8%	22.3%	0.0%

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 21**) and Zoning Districts (**see Table 22**) have been updated.

<b>Table 21 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	104.8
Right-of Ways	14.9
Monson HDB	119.7

<b>Table 22 - Proposed Zoning District</b>	
Proposed Zones	Acres
AE-10	43.9
C-2-MU	19.1
M-1	31.6
R-A-43	10.2
Right-of Ways	14.9
Monson HDB	119.7

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations contained in the Monson Hamlet Plan. The following components comprise the Monson Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Monson Hamlet Plan, there are several proposed changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the Uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

### Mixed Use Overlay District

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Monson.

# MONSON HAMLET PLAN

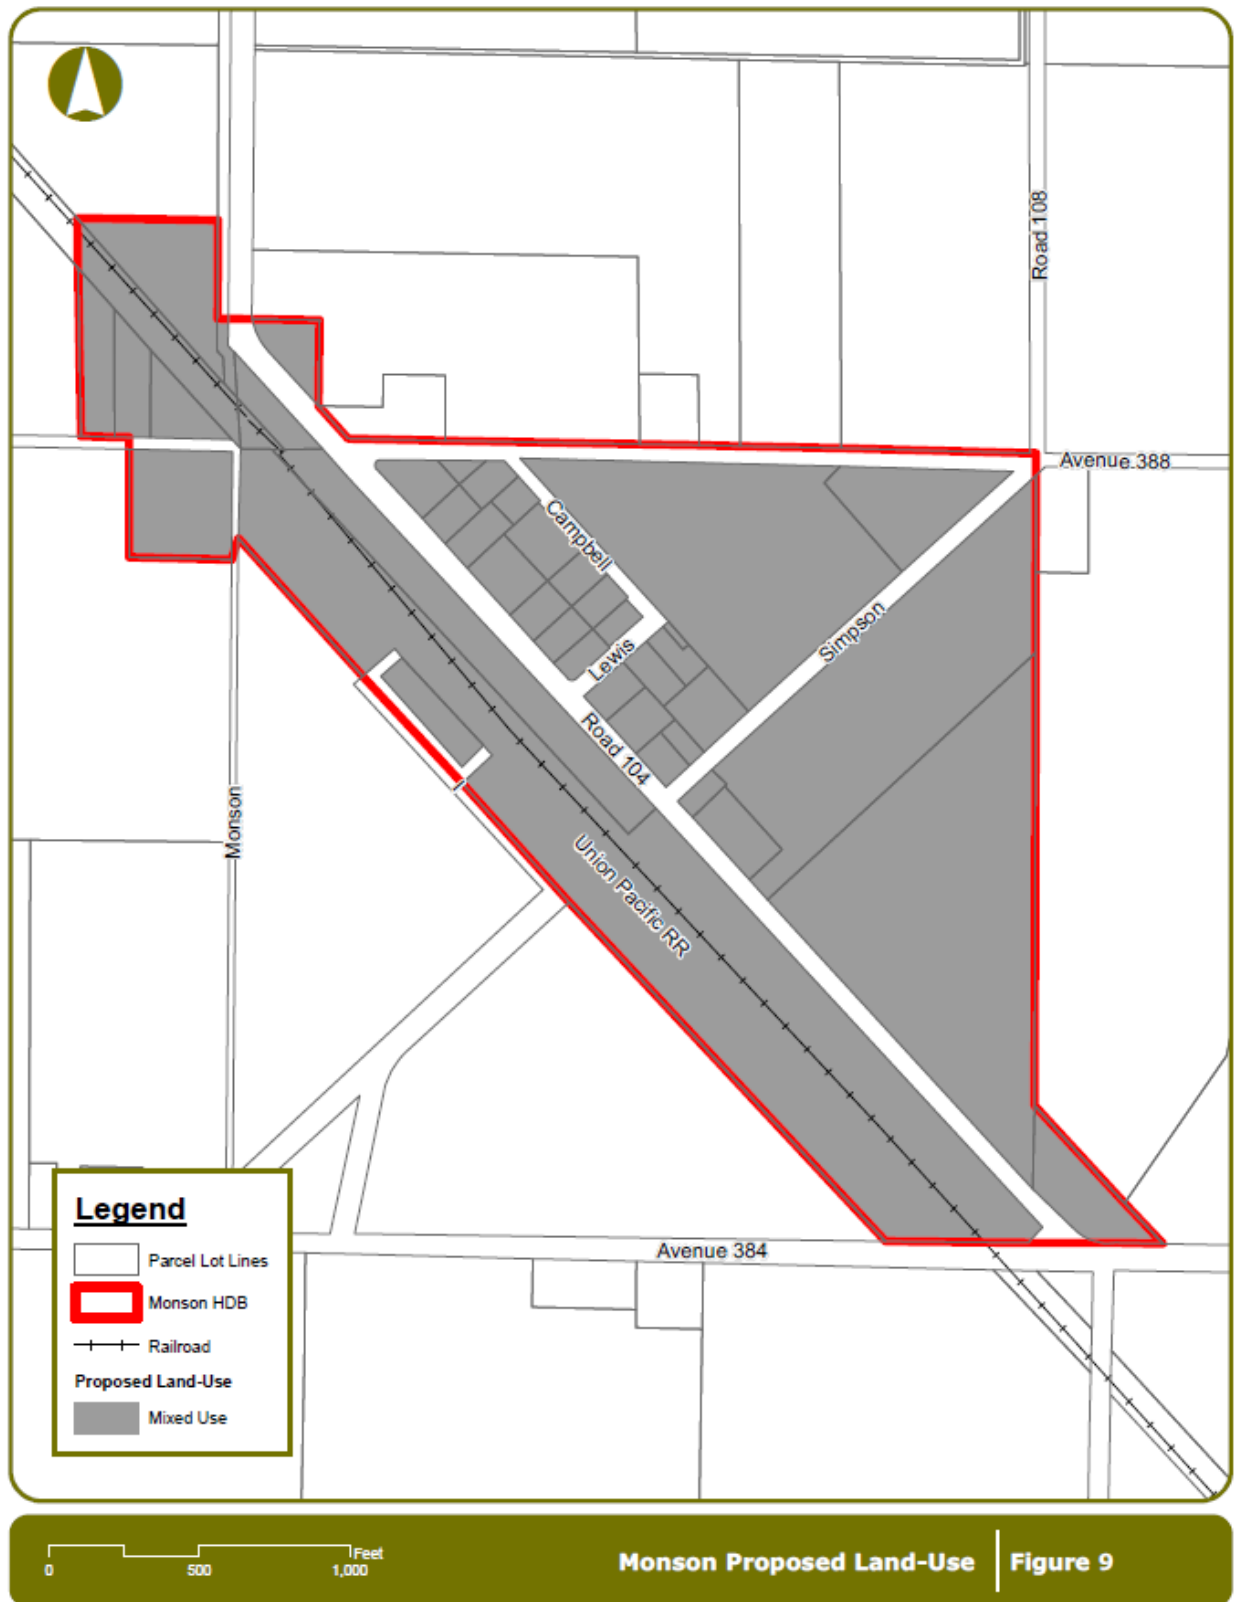

---

## Zoning Map Update

The current Zoning Map for Monson (**see Figure 10**) will be amended to be compatible with the Land Use Map (**see Figure 9**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance (**see Figure 11**) to be in conformity with each other Monson Proposed Zoning. **Figure 12** show the proposed Monson Urban Development Boundary.

# MONSON HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc.) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Arcades, including video. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Assemblage of people for educational or entertainment purposes. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2	
Assembly of electric appliances such as lighting fixtures, irons, fans, toasters and electric toys, refrigerators, washing machines, dryers, dishwashers and similar home appliances. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2	M-1

# MONSON HAMLET PLAN

Assembly of small electrical equipment such as home and television receivers. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	M-1
Assembly of typewriters, business machines, computers, and similar mechanical equipment. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3	M-1
Automated car wash (coin operated only). Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	C-2, C-3, M-1
Automobile parking lots, public parking areas or storage garages. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	
Automobile supply stores.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Automobile washing, including the use of mechanical conveyors, blowers and steam cleaning.	C-2, C-3, M-1, M-2	C-3, M-1
Bakery [employing not more than five (5) persons on premises].	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bakery goods store.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Banks and financial institutions.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Barber shop or beauty parlor.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bed and Breakfast Home with three or more guests rooms (Up to 5). Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3, R-2	R-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Bicycle shops. Structure.	CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Billiard or Pool hall Structure	C-2, C-3, M-1	C-2, C-3, M-1
Bird store or pet shop.	O, CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Blueprinting and Photostatting shop.	CO, C-1, C-2, C-3, M-1, AP	C-2, C-3, M-1
Boat sales and service. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1	C-3, M-1
Book binding. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-3, M-1
Book or stationary store. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Business and professional schools and colleges. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Business, professional and trade schools and colleges. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-3, M-1
Catering Shops. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Ceramic shops. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1

## A-2 *Mixed Use Overlay District (Zone Change Text)*

---

The following regulations shall apply in the community of Monson, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Monson.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Monson.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# MONSON HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# MONSON HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Monson. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# MONSON HAMLET PLAN

---

## **A-3     *Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the Monson Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Monson. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Monson Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Monson. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1     Entries to buildings should be individualized and clearly identifiable.

A-2     Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3     Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4     The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5     Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6     Each building should have a defined base, body, and cap segment

A-7     Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8     Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9     Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10    Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11    Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# MONSON HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# MONSON HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# MONSON HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# MONSON HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# MONSON HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# MONSON HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# MONSON HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# MONSON HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE HAMLET PLANS 2017 ) RESOLUTION NO. 9366  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, AND PART III )  
AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

## COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT )  
TO SECTION 16.H OF ORDINANCE NO. 352 )  
TO ALLOW ADDITIONAL BY-RIGHT USES ) RESOLUTION NO. 9369  
CONSISTENT WITH THE ADOPTED HAMLET )  
PLANS, AS PROPOSED IN CHANGE )  
OF ZONE NO. PZC 17-039 )

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Ordinance No. 352, the Zoning Ordinance as set forth in attached Exhibit "B" Allensworth Rezoning Plan (PZC 17-037), to include the Hamlet Community of Allensworth, consistent with the adopted Allensworth Hamlet Plan 2017 Update, Exhibit "E" Delft Colony Rezoning Plan (PCZ 17-015), to include the Hamlet Community of Delft Colony, consistent with the adopted Delft Colony Hamlet Plan 2017 Update, Exhibit "H" East Tulare Villa Rezoning Plan (PCZ 17-016), to include the Hamlet Community of East Tulare Villa, consistent with the adopted East Tulare Villa Hamlet Plan 2017 Update, Exhibit "K" Lindcove Rezoning Plan (PCZ 17-017), to include the Hamlet Community of Lindcove, consistent with the adopted Lindcove Hamlet Plan 2017 Update, Exhibit "N" Monson Rezoning Plan (PCZ 17-018), to include the Hamlet Community of Monson, consistent with the adopted Monson Hamlet Plan 2017 Update, Exhibit "Q" Seville Rezoning Plan (PZC 17-019), to include the Hamlet Community of Seville, consistent with the adopted Seville Hamlet Plan 2017 Update, Exhibit "T" Teviston Rezoning Plan (PCZ 17-020), to include the Hamlet Community of Teviston, consistent with the adopted Teviston Hamlet Plan 2017 Update, Exhibit "W" Tonyville Rezoning Plan (PCZ 17-021), to include the Hamlet Community of Tonyville, consistent with the adopted Tonyville Hamlet Plan 2017 Update, Exhibit "Z" Waukena Rezoning Plan (PCZ 17-022), to include the Hamlet Community of Waukena, consistent with the adopted Waukena Hamlet Plan 2017 Update, Exhibit "CC" West Goshen Rezoning Plan (PCZ 17-023), to include the Hamlet Community of West Goshen, consistent with the adopted West Goshen Hamlet Plan 2017 Update, Exhibit "FF" Yettem Tract Rezoning Plan (PCZ 17-024), to include the Hamlet Community of Yettem, consistent with the adopted Yettem Hamlet Plan 2017 Update, and

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# SEVILLE HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Seville is to develop a plan which can accurately reflect the needs and priorities of this community. Seville is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks, etc.) and to stimulate economic development within the community.

### Location

Seville is a census-designated place located in the northwest portion of Tulare County (see **Figure 1**). It is generally bounded by Inyo Avenue in the south, Avenue 384 in the north, Road 152 in the west, and east of Road 156, roughly 8.5 miles southwest of Cutler in Tulare County. Seville is in Sections 01, 02 & 35. Townships 16 & 17 South, Range 25 East, MDB&M, and can be found within Ivanhoe United States Geological Survey 7.5 minute topographic quadrangle. Seville is located at an elevation of 354 feet National Geodetic Vertical Datum. The coordinates of Seville are: Latitude: 36.4857, Longitude: -119.2248. Seville is directly served by State Route (SR) 201 (see **Figure 2**).

### Planning Area

The Seville Hamlet Development Boundary (HDB) area consists of 178.5 acres. The Land Uses within the HDB include agriculture (orchards and pasture), which currently occupy 21.5 percent of the 178.5 acres. Urban development, including urbanized uses such as residential, commercial, public and quasi-public facilities, as well as industrial development occupy 67.7 percent of the 178.5 acres. The remaining 21.4 percent are lands dedicated for Right-of-way (See **Table 1**).

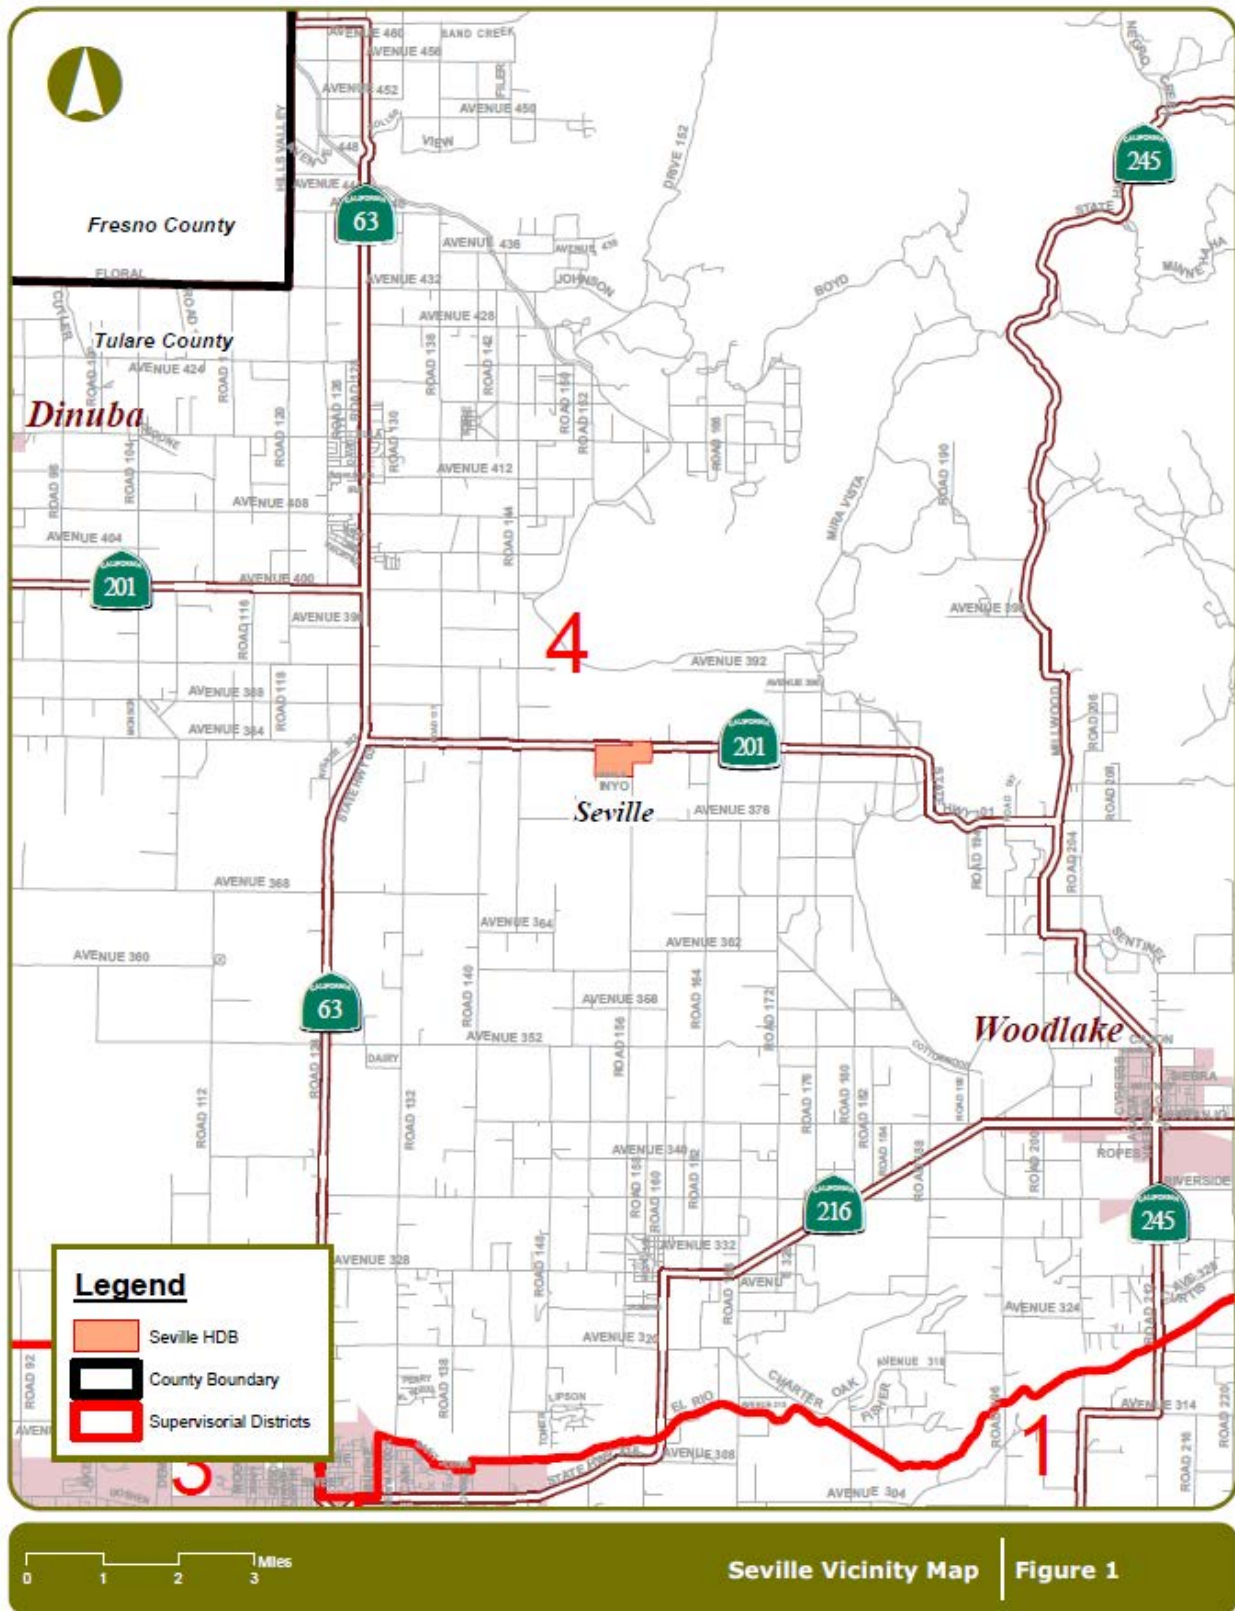

Table 1 - Seville Land Use	
Land Use	Acres
Residential	90.5
Commercial	7.6
Industrial	15.3
Agricultural	38.5
Public/Institutional	7.6
Rights-of-way	38.2
Total	178.5

Source: Tulare County GIS

No change is proposed to the Hamlet Development Boundary (see **Figure 3**).

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the SGC project, Self Help Enterprises (SHE) went door to door throughout the community of Seville to distribute flyers at every home, business and school. SHE emphasized to residents about the importance of participating in this process. SGC partnered with the Stone Corral School and sent meeting flyers home with every student in the school district. Meeting invitation were sent to the members of the Stone Corral School Board Members. Fliers were posted at the local store.

### Community Meeting

The Strategic Growth Council held a community input meeting in Seville on Wednesday, December 9, 2015 at 5:30 pm. The meeting was scheduled in the evening to allow all residents to attend, including those that work during the day. The meeting was held in the cafeteria of the Stone Corral School located at 15590 Ave 383 in Seville. More than 8 surveys and 9 Community Support Petitions were collected in Seville.

### Community Survey

A survey was developed in efforts to gather specific community information about different areas of concern. The survey asked about the following: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and Priority Improvements.

### Priority Concerns

1. Reliable Internet Service
2. Road Conditions
3. Natural Gas Lines
4. Side Walks

# SEVILLE HAMLET PLAN

---

5. Community Park
6. Street Lights
7. Grocery Store

## **Natural Gas**

Residents report that they do not have natural gas in their homes and that they use propane as their source of fuel. This is concerning to them because propane is more expensive than natural gas and the cost to heat their homes with propane is more than they can afford. Survey results show that residents rather have natural gas but cannot afford the cost of extending gas lines to their homes. Seville residents are requesting assistance from the County to help with the cost of extending natural gas lines to Seville. This is the most important issue to all residents that were surveyed.

## **Road Improvements**

Road conditions are a big concern to Seville residents. It is reported that road conditions are poor and some roads need work, streets have potholes, cracks and bumps. Drivers feel unsafe and are worried about damage to their vehicles while driving on most roads. According to residents, Seville roads are not regularly maintained. The following roads reported by the residents to be top priority:

- Inyo Ave
- Road 154
- Ave 383
- Ave 381

## **Street Lights**

Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the sheriff's department seldom patrols Seville. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Side Walks**

The community of Seville has too few sidewalks. The residents that were surveyed reported that the streets they live on do not have sidewalks. People report that this is a problem for kids while walking and for parents who push a stroller through town. The lack of sidewalks becomes an even bigger problem during the rainy season. When it rains, residents and kids are forced to walk around town in the mud and through big puddles of water. The absence of sidewalks to provide a clear separation between walking paths and the road creates a safety hazard for pedestrians.

## **Reliable Internet Access**

Most families in Seville do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or expensive compared to what it costs in nearby cities. Without access to the internet, Seville residents are unable to do things such as online job hunting, apply for resources, or provide homework help to their kids.

# SEVILLE HAMLET PLAN

---

## **Community Park**

In the community of Seville there is no safe public green space for children to play and adults to be physically active. The nearest park is located 8 miles away in the city of Oroquieta. Residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and concerned for the health of their children from lack of physical activity that comes from not having a safe place to be physically active. Residents express that having a community park is a major priority for the

## **Local Market**

The community of Seville is a food desert. This community does not have a local food market that sells fresh produce, meat and dairy. There is one corner gas station that sells mostly highly processed, packaged food that is not considered nutritious. Seville residents regularly travel to Oroquieta (8 miles) or Visalia (14 miles) to buy their groceries.

# SEVILLE HAMLET PLAN

## SEVILLE TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Seville.

#### Population

In 2015, Seville Population was 545. (See Table 2)

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Seville</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	303	55.6%
Female	19,334,329	50.3%	226,607	49.9%	242	44.4%
Total	38,421,464		454,033		545	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Seville's population during the Planning Period (see Table 3).

<b>Table 3 - Projected Annual Growth Rate</b>		
	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.46%	1.3%

<sup>1</sup> Tulare County Regional Blueprint, page 7

# SEVILLE HAMLET PLAN

## Median Age

Seville's population's median age is younger than the median age of both Tulare County, as well as the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Seville	24.3

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 2.8% of Seville's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 0% was two races or more (see Table 5). Approximately 97.2% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community. (see Table 5)

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	Seville	%
Total	38,421,464		454,033		545	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	530	97.2%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	15	2.8%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	0%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Seville

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Seville was about 9.9% while the rate for Tulare County was 13.5%. The unemployment rate for the State of California was 10.1%. Keeping in mind that the 9.9% includes only the employable labor force (that is, not every person of the population) results in about 36 unemployed persons of Seville's person labor force of 227.

# SEVILLE HAMLET PLAN

Table 6 - Employment Status			
Employment Status	California	Tulare County	Seville
Population 16 years & over	30,312,429	325,404	365
In labor force	19,269,449	194,420	227
Civilian labor force	19,137,441	194,102	227
Employed	17,246,360	170,780	191
Unemployed	1,891,081	23,322	36
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	138

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Seville's median household income was \$ 23,750, whereas the State of California's median household income was \$61,818 and \$42,031 for Tulare County. (see Table 7)

Table 7 - 2011-2015 American Community Survey Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Seville CDP	\$23,750	\$19,957	\$6,829

2011-2015 American Community Survey 5-Year Estimates

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, Seville's median household income was \$23,750, whereas the State of California's median household income was \$61,818. Seville's median household income was 38.4% of the State of California's median household income, and therefore it is considered a severely disadvantaged community.

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes) (see Tables 8 and 9).

Table 8 - Housing Tenure			
	California	Tulare County	Seville
Occupied housing units	12,717,801	133,570	111
Owner-occupied	6,909,176	75,685	31
Renter-occupied	5,808,625	57,885	80

2011-2015 American Community Survey 5-Year Estimates

Table 9 - Housing Tenure (%)			
	California	Tulare County	Seville
Owner-occupied	54.3%	56.7%	27.9%
Renter-occupied	45.7%	43.3%	72.1%

2011-2015 American Community Survey 5-Year Estimates

# SEVILLE HAMLET PLAN

## Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Seville	11	33	6	18	8	24	4	12	4	12	33

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Seville indicated that approximately 33% of the housing units were sound. Approximately 54% of Seville's housing units were deteriorated and 12% were dilapidated (**see Table 10**).

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009 (**see Table 11**). The total number of housing units in Tulare County is 144,792.

<b>Table 11 - Year Structure Built</b>			
Year Structure Built	California	Tulare County	Seville
Total housing units	13,845,790	144,792	129
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	17
Built 1990 to 1999	1,495,571	21,767	13
Built 1980 to 1989	2,117,819	22,733	24
Built 1970 to 1979	2,503,688	27,111	23
Built 1960 to 1969	1,871,029	15,500	12
Built 1950 to 1959	1,907,512	13,694	19
Built 1940 to 1949	865,607	7,494	21
Built 1939 or earlier	1,298,438	8,186	0

2011-2015 American Community Survey 5-Year Estimates

# SEVILLE HAMLET PLAN

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Seville was 50.8 persons per household (see Table 12). The average owner occupied household size is 4.48.

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Seville	4.48	5.08

2011-2015 American Community Survey 5-Year Estimates

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Seville was 10.1%, which was lower than both Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 0.0%, which was lower than Tulare County at 1.7% and the State of California at 1.4% (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Seville	0.0%	10.1%

2011-2015 American Community Survey 5-Year Estimates

<sup>2</sup> U.S. Department of Housing and Urban Development, "Measuring Overcrowding in Housing" 2007. Page 2 See: [http://www.huduser.org/publications/pdf/Measuring\\_Overcrowding\\_in\\_Hsg.pdf](http://www.huduser.org/publications/pdf/Measuring_Overcrowding_in_Hsg.pdf)

---

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

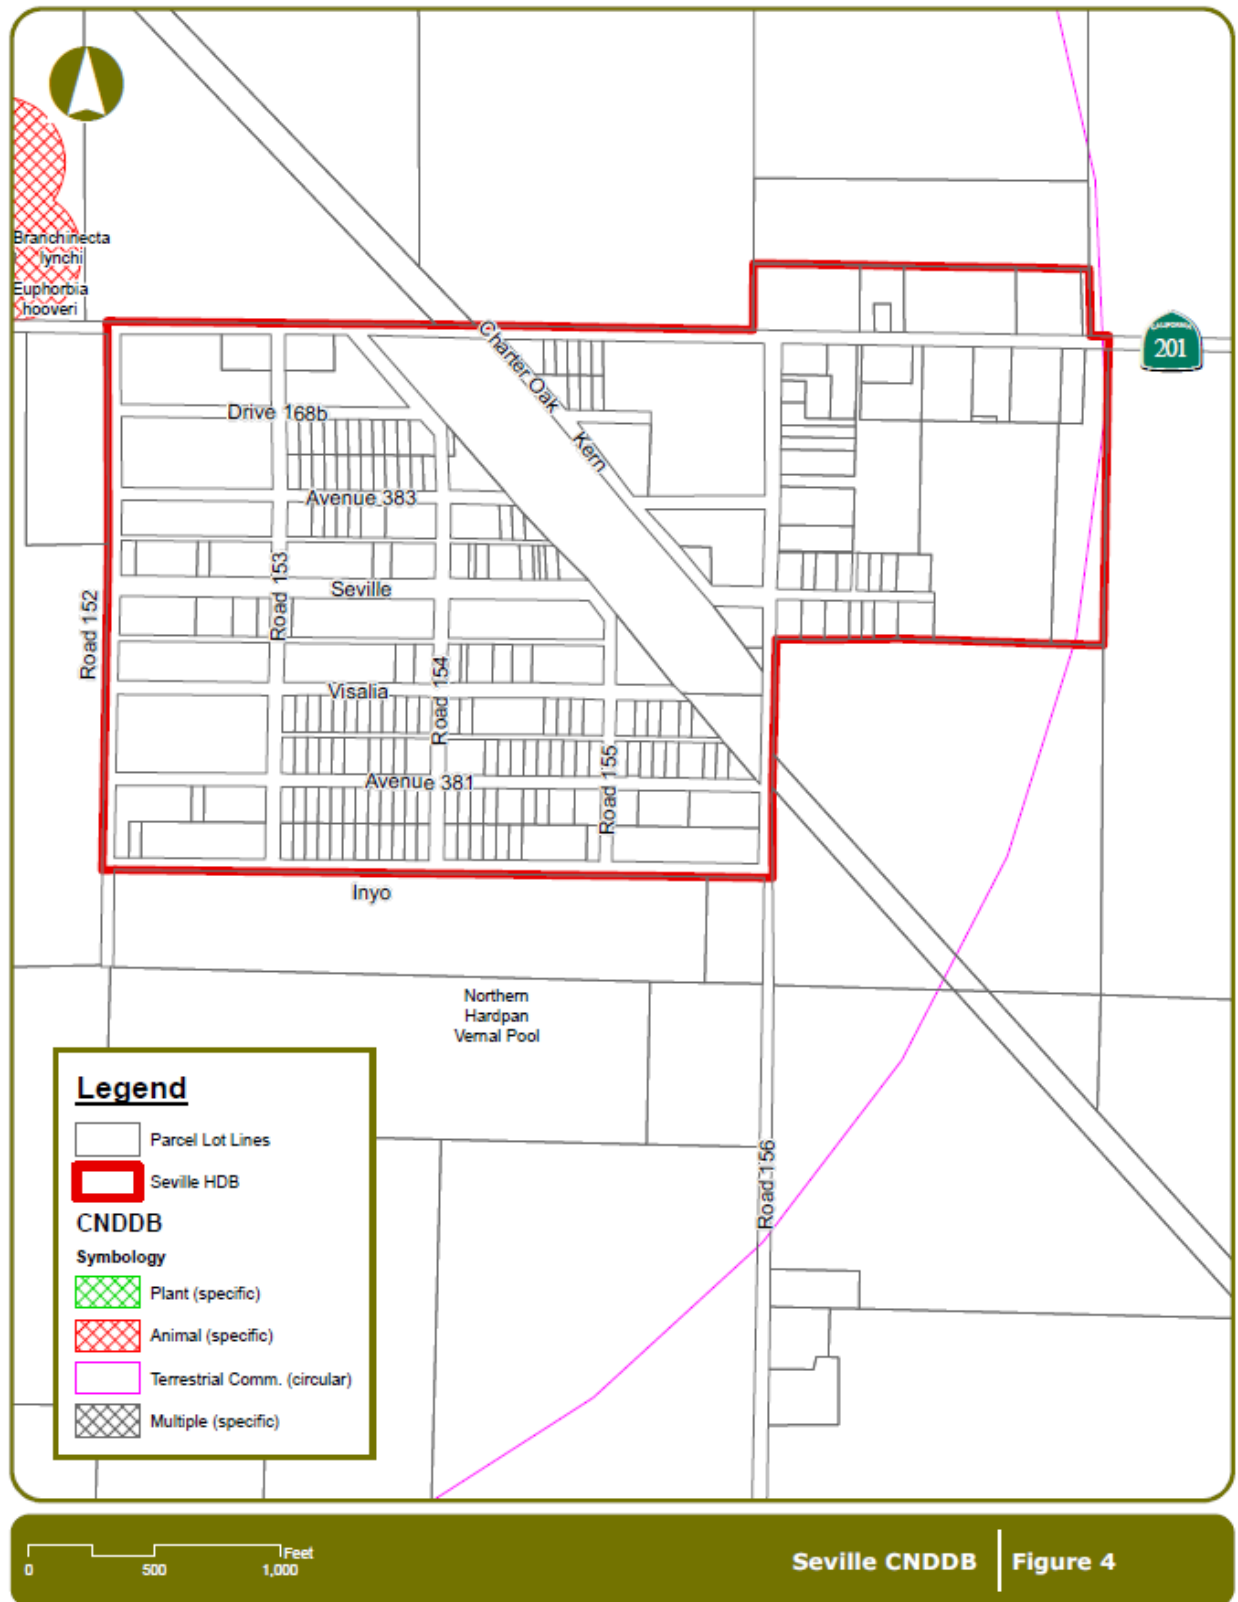

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016 (**see Figure 4**) indicates there are special status species within the Ivanhoe Quadrant Species List (which includes the Seville Planning Study Area) consisting of four animal species and no plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); California tiger salamander (*Ambystoma Californiense*, federal and stated threatened); vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened); vernal pool tadpole shrimp (*Lepidurus packardii*, federal endangered); San Joaquin Valley Orcutt grass (*orcuttia inequalis*, federal threatened and state endangered); Hoover's spurge (*Euphorbia hooveri*, federal threatened). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975, while the adobe starburst is has been determined to be "extirpated" (that is, "A species no longer surviving in regions that were once part of their range") and is no longer within the Seville project area.

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Seville are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Seville] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), (see Figure 3) and the Soil Survey of Tulare County, the following soil types are located in Seville. The following descriptions are provided for the above soil types: Accessed on August 17, 2016

**Centerville clay, 0 to 2 percent slopes**, is moderately deep and well drained. The soil is suitable for orchards, cultivated crops and rangeland. It is not considered suitable for buildings, roads and septic tanks due to the high clay content, slow permeability and inability to support heavy loads.

**Seville clay, 0 to 2 percent slopes, moderately deep**, moderately well drained soils; runoff is ponded to medium; slow permeability. Vegetation is dryland crops, irrigated pasture, row and irrigated field crops.

**Porterville clay, 0 to 2 percent slopes** deep well drained soils that formed in fine textured alluvial material from basic and metabasic igneous rock. Porterville soils are on fans and foothills, used mostly for range pasture. Vegetation is annual grasses, burclove, herbs and widely spaced shrubs. Most cultivated areas are irrigated and planted to oranges, lemons, olive, figs, and some grapes.

## PHYSICAL CONDITIONS

### Air Quality

The Seville Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Seville is located near the southwestern end of the Valley with prevailing winds from the northwest, it is susceptible to accumulate adversely modified air, particularly

# SEVILLE HAMLET PLAN

---

when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Seville and within the community itself include State Highway 201 and agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0655E (**see Figure 6**), Seville is within Flood Zone X, areas of 0.2% chance flood; areas of 1 % annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance of flood. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each Community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use Planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”<sup>7</sup> Although some areas of Tulare County have experienced major flooding along its major rivers, the Seville Plan area has not. There are portions of Seville, however, that are within and adjacent to the FEMA 500 year flood zones.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Seville there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in Special Flood Hazard Areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

# SEVILLE HAMLET PLAN

Figure 6 - FEMA Flood Map

# SEVILLE HAMLET PLAN

## Noise<sup>8</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan background Report Seville lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks.

### Energy: Natural Gas/Electricity

Seville energy source is served by PG&E.

### Domestic Water & Wastewater

Domestic water and sewer service in Seville is provided by Tulare County. **Table 14** shows the number of existing water and sewer connections, the capacity of each system, and the number of additional connections the systems can accommodate for new development (Tulare County, January 2014). Currently, there are plans to hook up Seville to a new pump in Yettem, the plans are contained in **Figure 7**.

**Table 14 - Description of Existing Infrastructure**

Description of Existing Infrastructure					
Drinking Water			Waste Water*		
No. of Existing Connections	Capacity	Available	No. of Existing Connections	Capacity	Available
114	114	0	99	103	4

(\* Data current as of January 2014)

### **Seville's Water Challenges and History of Project**

Most Seville residents get their water supply from the Seville water system (previously the privately-owned Seville Water Company), which has been operated by the County of Tulare since 2009 under a court receivership order. Most of the distribution system is over 50 years old and needs to be fully replaced. The pipes have exceeded their useful life and were not built to current standards. The wells supplying water to the entire community are unable to meet current water demand.

# SEVILLE HAMLET PLAN

---

## **Water Systems Improvements**

The objectives of the Seville-Yettem Water Systems Improvement Project are to:

- Secure a safe and reliable source of drinking water for Seville and Yettem
- Replace old and failing infrastructure in Seville
- Promote water conservation via the installation and use of water meters in both communities
- Address governance challenges and improve economies of scale
- Reduce water systems' vulnerabilities

## **Project Objectives**

To accomplish these objectives, the project includes the following water Systems Improvement:

- Build a completely new water distribution system in Seville
- Drill a New Well (the County of Tulare has purchased property in Yettem for the future well)
- Install Water Meters in Yettem and Seville
- Interconnect the Yettem and Seville Systems

In 2012, the County of Tulare obtained grant funding under Proposition 84 from the State of California, to complete a feasibility study for the Seville water system. The study determined that a new water source for the community was needed, evaluated the consolidation of the Yettem and Seville water systems and funded the preparation of plans, specifications, environmental documents and construction costs estimates for the proposed water systems improvements.

## **Governance Formation**

Self-Help Enterprises and Tulare County will be working with Seville and Yettem to form a Community Services District for both communities to manage the connected systems (formation to be completed November 2018). A detailed formation schedule is available upon request.

# SEVILLE HAMLET PLAN

# SEVILLE HAMLET PLAN

Table 15 - Project Phasing

PROJECT PHASES	
To expedite the construction of proposed water systems improvements and improve water access in Seville, the project has been split into two phases.	
PHASE 1: Seville Water Distribution System	PHASE 2: Seville-Yettem Intertie
<p>Includes the construction of a completely new water distribution system in Seville, installation of water meters in Seville and, if enough funding is available, a water storage tank.</p> <p><u>Anticipated Project Schedule</u> Design, Plans, and Specifications and Environmental Documents</p> <ul style="list-style-type: none"> <li>Water System Design and Environmental documents have been completed</li> <li>Project Plans and Specifications are expected to be completed by Fall 2017</li> </ul> <p><u>Construction</u></p> <ul style="list-style-type: none"> <li>Begin Construction by early 2018</li> <li>Complete Construction by the end of 2018</li> </ul> <p><u>Estimated Project Cost</u></p> <ul style="list-style-type: none"> <li>Phase 1: \$5 million</li> <li>Lateral Connections : \$199,300</li> </ul> <p><u>Funding Secured to Date</u></p> <ul style="list-style-type: none"> <li>\$5 million – State Water Resources Control Board for Phase 1</li> <li>\$199,300 – Department of Water Resources for Laterals Connections</li> </ul>	<p>Includes the connection (intertie) of the Seville and Yettem water systems, water meters in Yettem, drilling of the new well in Yettem and the storage tank if it is not part of the Phase 1.</p> <p><u>Anticipated Project Schedule</u> Design, Plans, Specifications, and Environmental Documents to be completed by 2019.</p> <p><u>Construction</u></p> <ul style="list-style-type: none"> <li>To begin in late 2019</li> </ul> <p><u>Estimated Project Cost</u></p> <ul style="list-style-type: none"> <li>Phase 2: \$3.5 million</li> </ul>
PROJECT TEAM	

## Sewer

Domestic sewer service in Seville is provided by Tulare County. **Table 14** shows the number of existing water and sewer connections, the capacity of each system, and the number of additional connections the systems can accommodate for new development (Tulare County, January 2014). Mapping of the sewer systems is currently unavailable.

## Storm Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and

# SEVILLE HAMLET PLAN

---

cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

Seville does not currently have a storm drainage system.”<sup>9</sup>

## Solid Waste

Solid waste disposal services for the Community of Seville is provided by Pena’s Disposal, a private company. Solid waste generated in Seville can be disposed of at the Visalia Landfill, located at 22466 Road 80, Visalia.

## Roads

“There are several roadways in Seville that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt

---

<sup>9</sup> Action Program 9, Tulare County 2015 Housing Element

# SEVILLE HAMLET PLAN

- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads”<sup>10</sup>

**Table 16 - Roads in Need of Major and Medium Repair in Seville**

<b>Road Maintenance Strategies</b>			
<b>No.</b>	<b>Roadway</b>	<b>Limits</b>	<b>Repair Code</b>
1	Avenue 383	Road 153 to Road 155	CHIP
2	Inyo Avenue	Road 153 to Road 156	CHIP

# SEVILLE HAMLET PLAN

Figure 8 - Inventory of Roadway Facilities in Seville

# SEVILLE HAMLET PLAN

## Street Lights

**Table 17** identifies the location of existing street lights that are maintained by Tulare County, in Seville, as well as their specifications. **Figure 8** also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type "W" represents a wood post for which the light is commonly shared with a Utility provider. Similarly, "M" represents metal and "C" represents concrete."<sup>11</sup>

**Table 17 - Specifications of Existing Street Lights**

Specifications of Existing Street Lights								
No.	East-West	North-South	Location	Pole	Lumens	Pole Type	Arm Direction	Utility
1	Avenue 383	Road 156	NE Corner	2	5800	W	W	PG&E
2	Seville	Road 156	NE Corner	N/A	5800	W	N	PG&E
3	SR 201	Road 156	NE Corner	11	9500	W	S	PG&E

(Source: Tulare County Public Works, March 2013)

## Sidewalks

There are currently no sidewalks located within Seville. Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

"The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

<sup>11</sup> Action Program 9, Tulare County 2015 Housing Element

# SEVILLE HAMLET PLAN

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there is one ADA compliant curb ramps located within Seville and are listed in **(Table 18)** and displayed in **(Figure 8)**.<sup>12</sup>

**Table 18 - Location of Existing ADA Ramps**

Location of Existing ADA Ramps			
No.	East-West Roadway	North-South Roadway	Location
1	Avenue 383	Road 156	NW Corner

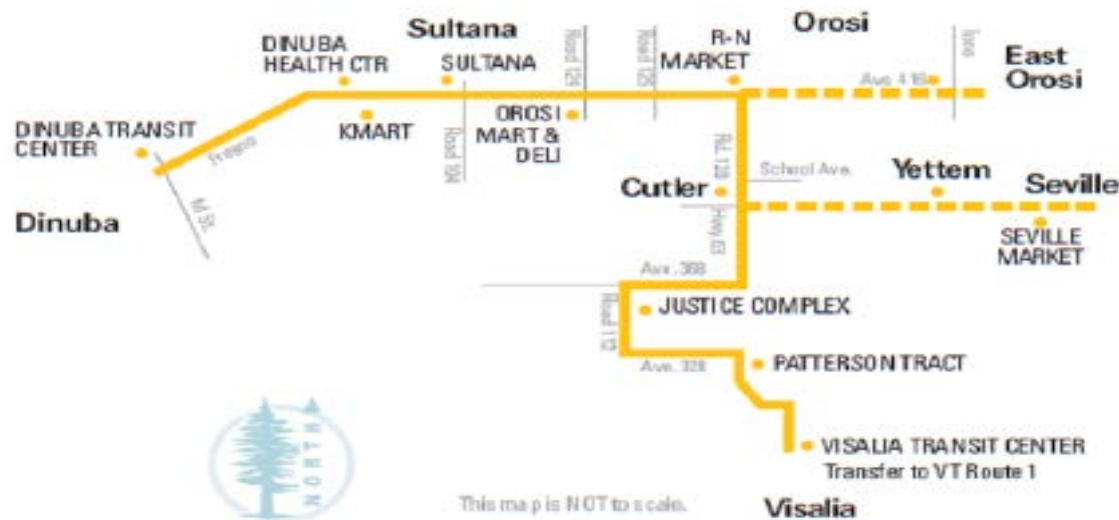

(Source: County of Tulare Public Works, August 2013)

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare's urban transit systems. Seville is currently connected via TCAT Route 10/North County (Seville Market) to Visalia and Dinuba's transit centers **(see Figure 9)**. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Seville, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

**Figure 9 - TCAT - Fixed Route Service for Seville**

<sup>12</sup> Action Program 9, Tulare County 2015 Housing Element

# SEVILLE HAMLET PLAN

---

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified State Route (SR) 63 as a proposed Class III Bike Project<sup>13</sup>. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely used outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. The only bike route within or near the community is SR 63.

## AMTRAK

The Hanford AMTRAK station, located approximately 60 miles to the southwest in Kings County, is the closest station to Seville providing passenger rail service. The San Joaquin Joint Powers Authority (SJPPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport is approximately 30 miles south. Fresno Yosemite International Airport (FAT), approximately 45 miles northwest of Seville, is a principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 90 miles southeast of Seville and offers direct flights to several destinations

## **PUBLIC SERVICES**

### Sheriff

Police protection services are provided in Seville by the Tulare County Sheriff's Department sub-station, located 40765 Road 128, in Culter, approximately 6.5 miles northwest of Seville. The substation provides patrol services 24-hours per day, 365 per year. Additional Sheriff resources are available as needed via dispatch from the main Sheriff's Office in Visalia, CA.

### Fire

No fire Hydrants are found in Seville. Fire protection and emergency medical services are provided for Seville by the Tulare County Fire Department. The community is served by Cutler-Orosi Fire Station #4, located at 40779 Road 128, in Culter. Patrol 4, Engine 4 and Engine 204 are assigned to this location.

### Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Seville Hamlet Plan Area is within the Stone Corral Elementary School District. The District provides K-8 grade education in Seville. High School students attend high school in Visalia. Seville is within the Visalia Unified School District.

---

<sup>13</sup> TCAG Action Element, TCAG 2014 Regional Transportation Plan. Page 3-89.

# SEVILLE HAMLET PLAN

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>14</sup> The closest library is located in Orosi, four miles to the northeast and the Ivanhoe Branch is four miles to the south (see Table 19)

Table 19 - Library Location & Hours		
Branch	Address	Service Hours (2016)
Orosi	Orosi Branch 12646 Avenue 416 Orosi, CA 936471	Wednesday, Thursday, Friday 9:00 am - 1:00 pm 2:00 p.m. – 6:00 p.m.
Ivanhoe	Ivanhoe Branch 15964 Heather Ivanhoe, CA 93235	Tuesday and Friday 9:00 a.m. – 1:00 p.m. 2:00 p.m. – 6:00 p.m.

Library hours current as of September 2017

## Parks

In the community of Seville there is no safe public green space for children to play and adults to be physically active. The nearest park is located 8 miles away in the city of Orosi. Residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and concerned for the health of their children from lack of physical activity that comes from not having a safe place to be physically active. Residents expresses that having a community park is a major priority for them.

Presently there are no County owned/operated public parks in Seville. The closest public park to the community is Ledbetter Park, located one mile northwest of Culter on Road 124/State Route 63.

# THE SEVILLE HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get

<sup>14</sup> General Plan Background Report, page 7-96

# SEVILLE HAMLET PLAN

---

products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>15</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>16</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

Seville is a small agricultural community located near State Route 63 and 201. The major rural collector roads is Avenue 308. There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# SEVILLE HAMLET PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the Seville Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Seville to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Seville Hamlet Plan, and input received from Seville citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan.

2. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned shopping areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
5. The County shall ensure that solid waste facility sites (for example, landfills) are protected from the encroachment by sensitive and/or incompatible land uses.
6. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.  
The County shall work with the Schools to provide safe routes to school.
7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Seville Community Plan.
8. The Seville Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.

# SEVILLE HAMLET PLAN

---

9. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

**Housing**

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Seville.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Seville.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

# SEVILLE HAMLET PLAN

---

## Economic Base

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

#### Policies:

1. Encourage the Seville to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

#### Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.

2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## Environmental Quality and Public Safety

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Seville citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

#### Objective: Protect Agricultural Lands:

Land within the respective Seville, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate.

# SEVILLE HAMLET PLAN

---

When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Seville.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Seville.

# SEVILLE HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 178.5 acres Seville Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute % of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 545 by .25 urbanized acres (area within the HDB), which equals 117 persons per urbanized acre (**see Tables 20 and 21**) showing population projections). Projecting the population at a 1.3% growth rate adds 145 persons by year 2030.

### Population Growth Forecast

Table 20 - Seville Population Projections			
Growth Rate	2015	2020	2030
0.013	545	597	662

Table 21 - Population Projections		
Year	Population	Growth (%)
2015	545	0.013
2016	552	0.013
2017	559	0.013
2018	567	0.013
2019	574	0.013
2020	581	0.013
2021	589	0.013
2022	597	0.013
2023	604	0.013
2024	612	0.013
2025	620	0.013
2026	628	0.013
2027	636	0.013
2028	645	0.013
2029	653	0.013
2030	662	0.013

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The Year 2015 baseline population and was determined by projecting the 2013 American Community Survey (Survey)<sup>17</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in Year 2015 the community had 129 dwelling units (including vacant dwellings) with a population of 545. At an annual growth rate of 1.3%, the projected housing units are 138 and 662 in years 2020 and 2030, respectively, and projected population is 597 and 662 in years 2020 and 2030, respectively.

The total land area developed in these existing residential units was provided by the Tulare County Resource Management Agency Geographic Information System (GIS) division. There are currently approximately 178.5 acres within the HDB that are developed for residential uses.

<sup>17</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# SEVILLE HAMLET PLAN

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, water service levels need to be expanded, for which grant funding will be required.

### Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

### Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Based on the 2011-2015 American Community Survey (see Table 22), the educational barrier in Seville begins in grade school. Of the adults age 25 and older,

20.8% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

Table 22 - Education Attainment			
Educational Attainment	California	Tulare County	Seville
Population 25 years and over	25,257,858	260,964	250
Less than 9th grade	10.0%	20.8%	40.8%
9th to 12th grade, no diploma	8.2%	10.9%	20.8%
High school graduate (& equivalency)	20.7%	25.2%	24.8%
Some college, no degree	21.8%	22.3%	10.0%
Associate's degree	7.8%	7.0%	2.4%
Bachelor's degree	19.8%	9.5%	0.8%
Graduate or professional degree	11.6%	4.3%	0.4%

2011-2015 American Community Survey 5-Year Estimates

### Health Care

Health care is important for economic development as businesses need healthy employees. The other nearest medical offices are in Porterville.

# SEVILLE HAMLET PLAN

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (see **Table 23**) and Zoning Plan map (see **Table 24**) have been updated.

<b>Proposed Land Use</b>	
<b>Table 23 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	140.3
Unclassified (Right-of Ways)	38.2
Seville HDB	178.5

<b>Table 24 - Proposed Zoning</b>	
Proposed Zones	Acres
C-2-MU	26.9
M-1-MU	15.3
P-O	7.6
R-1	63.2
R-A-12.5	27.3
Unclassified (Right-of Ways)	38.2
Seville HDB	178.5

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations contained in the Seville Hamlet Plan. The following components comprise the Seville Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Seville Hamlet Plan, there are several proposed changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the Uses that require a Use Permit. As part of the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

# SEVILLE HAMLET PLAN

---

## Mixed Use Overlay District

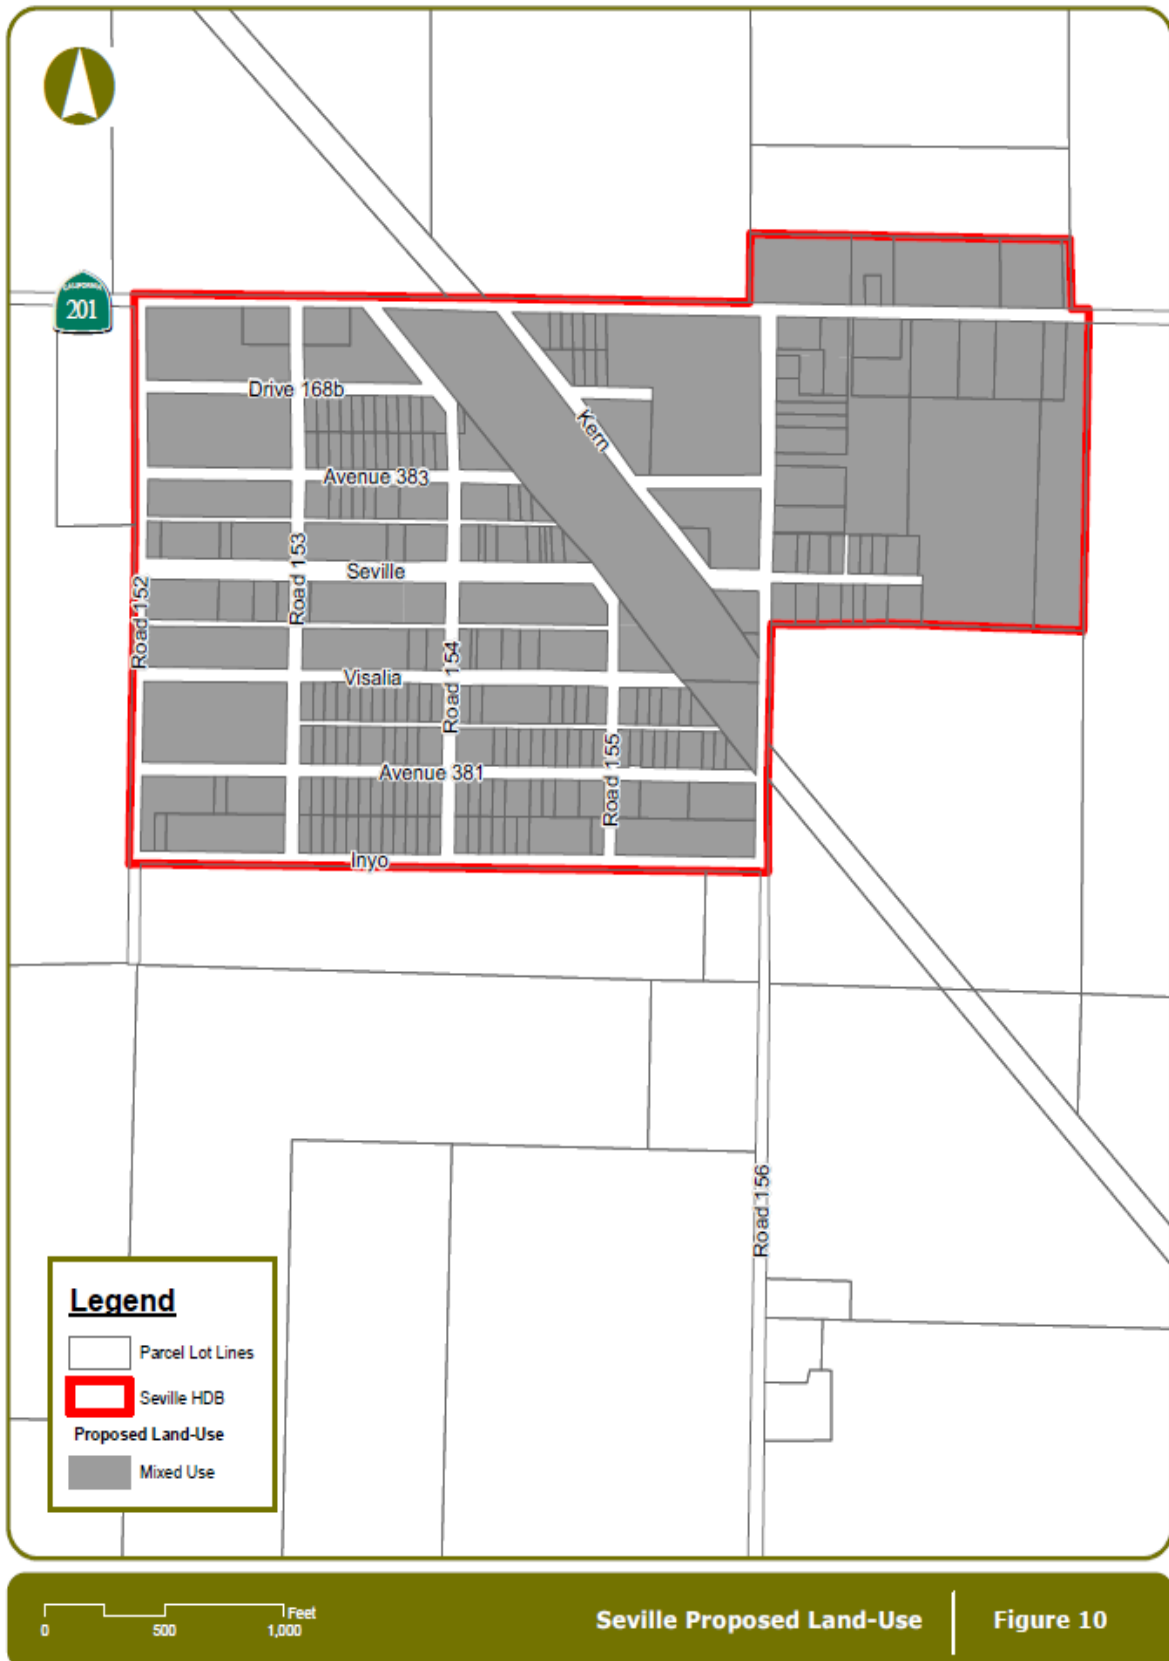

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Seville.

## Zoning Map Update

The current Zoning Map for Seville (**see Figure 11**) will be amended to be compatible with the Land Use Map (**see Figure 10**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance (**see Figure 12**) to be in conformity with each other Seville Proposed Zoning.

A-3 – Development Standards (Mixed Use Zoning Districts)

# SEVILLE HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1

## A-2 *Mixed Use Overlay District (Zone Change Text)*

---

The following regulations shall apply in the community of Seville, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Seville.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Seville.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Autowrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planing Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# SEVILLE HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# SEVILLE HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Seville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# SEVILLE HAMLET PLAN

---

## ***A-3 Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the Seville Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Seville. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Seville Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Seville. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# SEVILLE HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# SEVILLE HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# SEVILLE HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# SEVILLE HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# SEVILLE HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# SEVILLE HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# SEVILLE HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# SEVILLE HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Teviston is to develop a plan which can accurately reflect the needs and priorities of this community. Teviston is currently designated as a Hamlet in the 2030 Tulare County (the County) General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks) and to stimulate economic development within the community.

### Location

The community of Teviston (**see Figure 1**) is located in Tulare County on the eastern side of the San Joaquin Valley and along State Route 99. Teviston is a census-designated place located in the southwest portion of the County, southwest of Porterville. Teviston (**see Figure 2**) is bounded by south of Avenue 72 in the south, Avenue 84 in the north, Road 126 in the west, and Road 136 in the east and encompasses 2.2 square miles of land. Teviston is an agriculturally oriented service community surrounded on the north, west and south by lands in agricultural production and on the east by scattered rural residential, agricultural, and vacant land. Recently, the northern Urban Development Boundary for the Community of Earlimart was adopted along Deer Creek just south of Teviston's southern Hamlet Development Boundary. In 2015, the Population of Teviston was 1,623. Medium Household Income is \$24,267, and is comprised of approximately 424 residences.

Teviston is located in Section 08, 09, 16, 17, 21, 22 Township 23 South, Range 25 East, MDB&M, and can be found within Pixley United States Geological Survey 7.5 minute topographic quadrangle. Teviston is located at an elevation of 272 feet National Geodetic Vertical Datum. The coordinates of Teviston are: Latitude: 36°55'44"N and Longitude: 119°16'42"W.

### Planning Area

The Teviston Hamlet Development Boundary (HDB) was approved in the 2012 Tulare County General Plan with an area that consists of 1,443.2 acres (**See Figure 3**). The Land Uses within the HDB are Mixed Use activities that occupy 1,312 acres of the buildable land. The remaining 130.8 acres of lands are dedicated for Right-of-Way (**See Table 1**).

Table 1 - Teviston Land Use	
Land Use	Acres
Mixed Use	1,312.4
Rights-of-way	130.8
<b>Total</b>	<b>1,443.2</b>

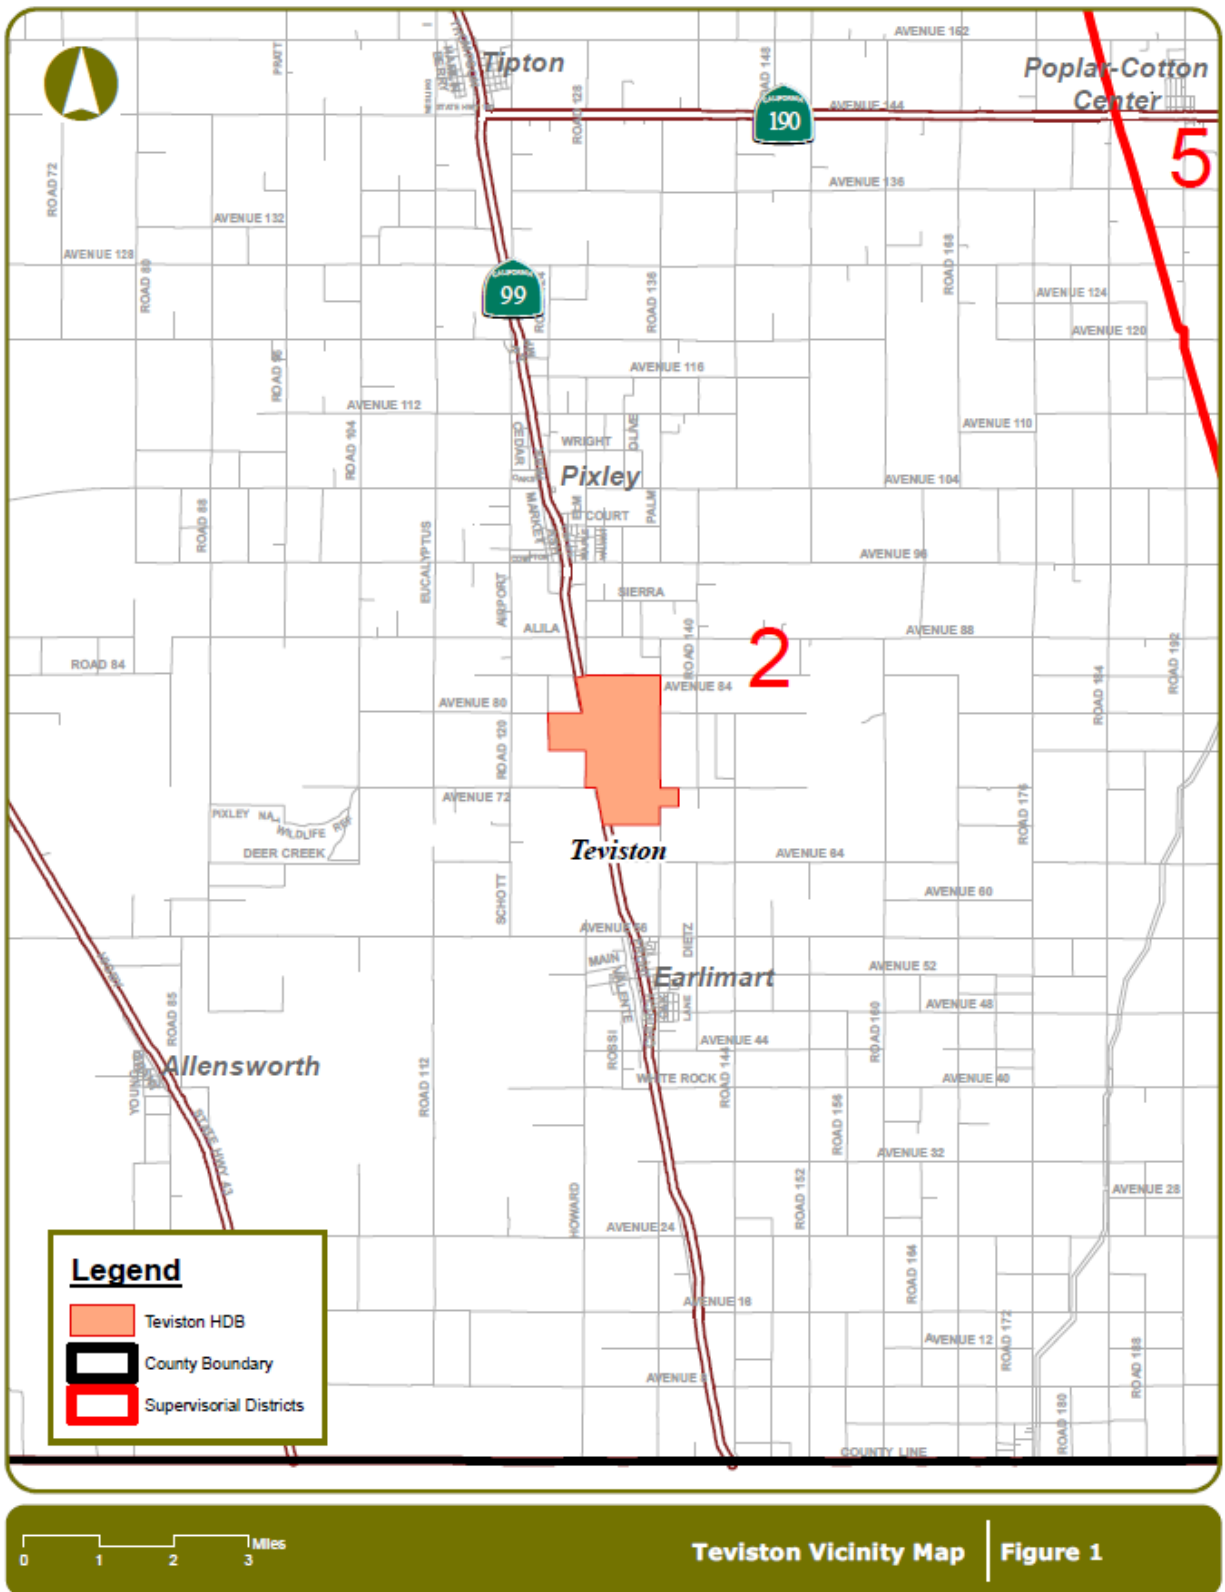

Source: Tulare County GIS

No change is proposed to the Hamlet Development Boundary.

## SUSTAINABLE COMMUNITIES STRATEGY

### OUTREACH REPORT

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the SGC project, Self Help Enterprises (SHE) went door to door, throughout the community of Teviston to distribute flyers at homes and businesses. SHE improvised the importance of participating in this process.

#### Community Outreach and Invitation Process

Self-Help Enterprises (SHE) performed various outreach methods to promote community participation and create awareness of the (SGC) project.

- 1.) An informational flyer was developed.
- 2.) SHE staff went door to door to distribute flyers to every home and business. Door to door outreach was done on Wednesday December 2 and Tuesday December 8, 2015
- 3.) SHE staff distributed flyers at local churches
- 4.) SHE partnered with Teviston Betterment Association to do outreach for our community meeting.
- 5.) Throughout the community outreach process, SHE staff explained the goals of the project and emphasized the importance and benefits of participating in the SGC community meeting.

#### Community Meetings

Self-Help Enterprises held a community meeting with two staff in Teviston on Thursday December 10, 2015 at 5:30 pm. The meeting was scheduled in the evening to make it easier for working residents to attend. The meeting was held at the Teviston Community Center 12934 Ave 80 in Teviston. The purpose of the meeting was to discuss Teviston improvement needs, gather community data, and report the findings of the meeting in a final report. More than 30 residence attended the meeting and 22 community surveys were collected. Present were representatives from the Teviston Betterment Association were present.

A second meeting was held on December 8, 2016 at 6:30. More than 20 residents attended the meeting, and the community survey results were reported back to them. In addition, the community planning process was discussed and several residents expressed their desire for the opportunity to change the

# TEVISTON HAMLET PLAN

---

zoning plan for the community. At that time, Teviston did not have any water capacity to provide will serve letters for new projects. At the meeting, the Chairperson for the Teviston Community Services District stated they had received a grant to “sink a new well” and that the water well would provide more capacity than they had previously. Although still high on the priority for the community, sewer issues were discussed, but the residents also stated they were very much concerned about the conditions of the roads and lighting. Residents generally agreed with the remaining survey report findings, and one resident wanted to verify that the environmental process would be completed. County staff assured them that it would.

## Community Survey

A survey was developed as a tool to gather a variety of community information about multiple topics. The survey asks about the following community related topics: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation Options, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Infrastructure, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and the priority of various improvement needs. Residents were encouraged to add information and comments to the survey.

After careful discussion at the Teviston SGC community input meeting, residents concluded that the following is a list of Teviston priority improvement needs:

## The Community's Priority Improvements

1. Sewer
2. Affordable Housing
3. Home Repairs
4. New Housing
5. Road Conditions and Street Safety
6. Street Lights
7. Public Transportation
8. Renovate the Community Center

## **Sewer**

There is no community wide sewer system in Teviston. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent. SGC

# TEVISTON HAMLET PLAN

---

survey results indicate that the Teviston residents are in favor of creating a community wide sewer system.

## **Affordable Housing**

Teviston residents want new affordable housing to be built in town. Many people expressed that they would buy a new home in town if it were available to them. Residents would like to see the town grow. Residents feel that this is a priority and necessary for the advancement of the community, without new home development the community will lose residents to neighboring communities such as Tulare and Delano.

## **Home Repairs**

Teviston residents are concerned because many homes in the community need of significant repairs. It was reported that some of the community members are living in houses and trailers that are substandard and are not up to building code. Some old homes have deteriorated and are facing situations such as: bad flooring, no functioning heat or cooling system, and no running water or sewer. Home owners and landlords are requesting resources that will help with the home repair costs.

## **Road Conditions and Street Safety**

It is reported that road conditions in Teviston are poor and most roads need work, as they have potholes, cracks and bumps. Drivers report feeling unsafe and are worried about damage caused to their vehicles while driving on the roads. According to residents, Teviston roads are not regularly maintained and the few times that roads have been serviced, they considered the repair work to be poor because the roads were patched and not actually repaired.

## **Street Lights**

Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the sheriff's department seldom patrols Teviston. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Public Transportation**

Teviston lacks access to public transportation. Residents that do not drive find it hard to travel outside of town. Often Teviston residents need to travel to Delano or Tulare for doctors' appointments and shopping needs. Many residents expressed the need for a bus route that goes through Teviston, this would help many residents with their daily travel needs. The nearest bus stops are three miles away in Earlimart and Pixley.

## **Renovate Community Center**

In Teviston, there is a building that is used as the local community center. The building is old and in need of repairs. If repaired, this community center is an ideal location for a multi-purpose center that could be used by kids for homework help, afterschool programs and as a computer lab, it also be available for use by outside organizations that need office space to service residents. This could also be the place where residents access a reliable internet connection. Teviston residents see this as a

# TEVISTON HAMLET PLAN

---

priority need and are asking for the County's assistance in identifying resources to improve and repair their local community center.

## **Internet Access**

Most families in Teviston do not have internet access at their homes. Any available internet service is unreliable and cost prohibited. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. Without access to the internet, they are unable to do online job hunting, applying for resources, or provide homework help to their kids.

## TEVISTON HAMLET TECHNICAL BACKGROUND REPORT

### **DEMOGRAPHICS**

An important part of planning is having information that describes the characteristics of a Hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a Hamlet Plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a Hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of Hamlet such as Teviston.

### Population

In 2015, the Population of Teviston was 1,623. (See Table 2)

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Teviston</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	734	45.2%
Female	19,334,329	50.3%	226,607	49.9%	889	54.8%
Total	38,421,464		454,033		1,623	

2011-2015 American Community Survey 5-Year Estimates

# TEVISTON HAMLET PLAN

## Growth Rate

As noted in the (2010) General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Teviston's population during the Planning Period (see Table 3). This would result in a total increase of 325 persons by 2030 (21 to 25 persons per year). Note: however, there are recent uncertified surveys that show a lower growth rate, or even a net migration out of the unincorporated County, but those numbers have not been verified.

Table 3 - Projected Annual Growth Rate		
	Historic Growth Rates 1990-2007	Projected Growth Rates 2007-2030
County Total	1.9%	2.4%
Incorporated	2.8%	2.9%
Unincorporated	0.4%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

## Median Age

Teviston's population's median age is younger than the median age of both Tulare County and the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Teviston	18.5

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 14.5% of Teviston's population was White, 4.4% was African American, 0% was Native American, 0.7% was Asian, and 0% was two races or more (see Table 5). Approximately 80.3% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	Teviston	%
Total	38,421,464		454,033		1623	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	1,304	80.3%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	236	14.5%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	71	4.4%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	12	0.7%

Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	0%

2011-2015 American Community Survey 5-Year Estimates

# TEVISTON HAMLET PLAN

## Employment in Teviston

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Teviston was about 9.5% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 9.5% includes only the employable labor force (that is, not every person of the population) results in about 89 unemployed persons of Teviston's person labor force of 429.

Table 6 - Employment Status			
Employment Status	California	Tulare County	Teviston
Population 16 years & over	30,312,429	325,404	938
In labor force	19,269,449	194,420	429
Civilian labor force	19,137,441	194,102	429
Employed	17,246,360	170,780	340
Unemployed	1,891,081	23,322	89
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	509

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Teviston's median household income was \$24,181 compared to \$61,818 for the State of California and \$42,031 for Tulare County. (see Table 7)

Table 7 - 2011-2015 American Community Survey			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Teviston CDP	\$24,181	\$22,740	\$9,098

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, Teviston's median household income was \$24,181, whereas the State of California's median household income was \$61,818. Teviston's median household income was 39% of the State of California's median household income, and therefore it is considered a severely disadvantaged community.

# TEVISTON HAMLET PLAN

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes).

Table 8 - Housing Tenure			
	California	Tulare County	Teviston
Occupied housing units	12,717,801	133,570	363
Owner-occupied	6,909,176	75,685	153
Renter-occupied	5,808,625	57,885	210

2011-2015 American Community Survey 5-Year Estimates

Table 9 - Housing Tenure (%)			
	California	Tulare County	Teviston
Owner-occupied	54.3%	56.7%	42.1%
Renter-occupied	45.7%	43.3%	57.9%

2011-2015 American Community Survey 5-Year Estimates

### Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Teviston	2	13	1	7	3	20	4	27	5	33	15

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Teviston indicated that approximately 13% of the housing units were sound. Approximately 54% of Teviston's housing units were deteriorated and 33% were dilapidated (see Table 10).

# TEVISTON HAMLET PLAN

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009. (see Table 11) The total number of housing units in Tulare County is 144,792.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Teviston
Total housing units	13,845,790	144,792	424
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	86
Built 1990 to 1999	1,495,571	21,767	28
Built 1980 to 1989	2,117,819	22,733	117
Built 1970 to 1979	2,503,688	27,111	126
Built 1960 to 1969	1,871,029	15,500	42
Built 1950 to 1959	1,907,512	13,694	0
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	25

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Teviston was 4.90 persons per household (see Table 12). The average owner occupied household size is 3.88.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Teviston	3.88	4.90

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Teviston was 0%, which was lower than Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDB) search conducted on November 1, 2016 (**see Figure 4**) indicates there are special status species within the Pixley Quadrant Species List (which includes the Teviston Planning Study Area) consisting of four animal species and two plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Tipton kangaroo rat (*Dipodomys nitratoideus*, federal endangered); Blunt-nosed leopard lizard (*Gambelia sila*, federal endangered); Vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened); San Joaquin woollythreads (*Monolopia congdonii* federal endangered) and Kern mallow (*Eremalche kernensis*, federal endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975, while the adobe starburst is has been determined to be “extirpated” (that is, “A species no longer surviving in regions that were once part of their range”) and is no longer within the Teviston project area.

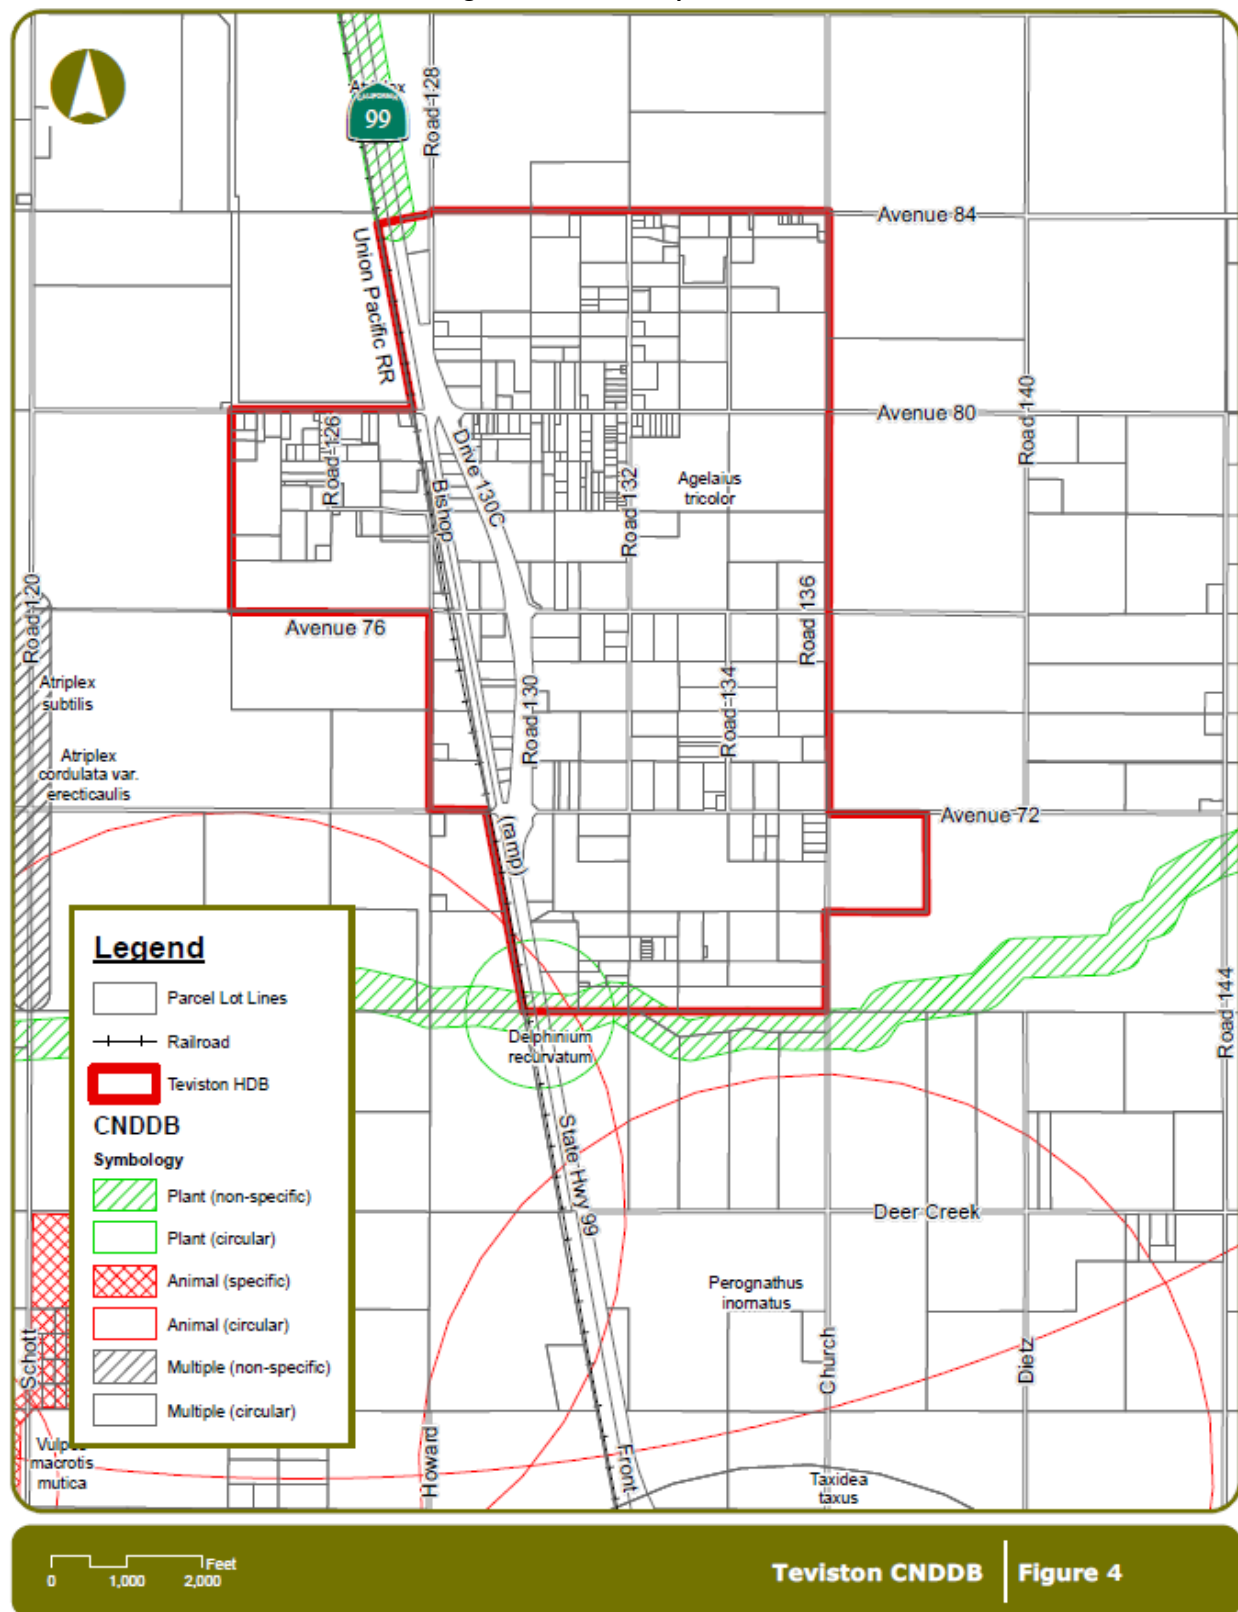

The Pixley National Wildlife Refuge was established in 1959 by executive order to provide wetland habitat for migratory waterfowl and shorebirds. Of the 6,939 acres that comprise the Refuge, approximately 5,350 is upland habitat made up of grassland, alkali playa, and vernal pool habitat, 755 acres consists of seasonal wetlands, and 15 acres consist of riparian habitat. The Pixley National Wildlife Refuge is located 3 miles to the northwest.

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Teviston are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Teviston] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>4</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Teviston (see Figure 5). Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**Akers-Akers, saline-Sodic, complex, 0 to 2 percent slopes**, is very deep, well drained soils formed in alluvium derived from granitic rock. Well drained; negligible runoff; moderate permeability. Saline-sodic phases have moderately slow permeability. This soil is used for irrigated cropland to grow cotton, corn, wheat, table grapes, walnuts, plums, and alfalfa. It is also used for dairy and cattle production and building site development.

### **Dumps – Not rated**

**Gareck-Garces association, 0 to 2 percent slopes**, is very deep and well drained, medium or high runoff, some areas are ponded; very slow permeability. The soil is suitable for livestock grazing. Vegetation is scattered saltbush with annual grasses and forbs.

**Hanford sandy loam, 0 to 2 percent slopes**, consists of very deep, well drained soils that formed in moderately coarse textured alluvium dominantly from granite. Hanford soils are on stream bottoms, floodplains, and alluvial fans. Hanford soils are used for growing a wide range of fruits, vegetables, and general farm crops. They are also used for urban development and dairies.

### **Riverwash – Not rated**

## PHYSICAL CONDITIONS

### Air Quality

The Teviston Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between land use and air quality; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Teviston is located near the southwestern end of the Valley with prevailing winds from the northwest, it is in a vulnerable position to accommodate adversely

# TEVISTON HAMLET PLAN

---

modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of Teviston and within the community itself include State Highway 99 and industrial uses emitting dust and odors, and agricultural activities.

## Flooding<sup>5</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C1925E, 100 year flood zone meanders along the east portion of Teviston (see **Figure 6**). The expected source of this flooding hazard is Deer Creek along the southern boundary with flooding begin caused northward. Zone A areas are subject to inundation by the 1-percent-annual-chance flood event generally determined using approximate methodologies. Because detailed hydraulic analyses have not been performed, no Base Flood Elevations (BFEs) or flood depths are shown. Mandatory flood insurance purchase requirements and floodplain management standards apply. The remaining areas are within Flood Zone X. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). “Floodplain” or “flood-prone area” means any land area susceptible to being inundated by water from any source. “Base Flood” is the flood having a one percent chance of being equaled or exceeded in any given year. “One-hundred-year flood” or “100 year flood” has the same meaning as “base flood.” “Special flood hazard area” is the land in the floodplain subject to a one percent or greater chance of flooding in any given year. “Floodway” means the channel of a river or other watercourse and the adjacent land area that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one (1) foot. The floodway is delineated on the Flood Boundary Floodway Map, on maps adopted by the State Reclamation Board when acting within its jurisdiction, and on the County Zoning Map (signified by the F-1 Primary Flood Plain Zone). The F-2 Secondary Flood Plain Combining Zone which is intended for application to those areas of the County which lie within the fringe area or setback of the flood plain and are subject to less severe inundation during flooding conditions than occur in the F-1 Zone.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Teviston there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set

---

<sup>5</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C1925E, Panel Number 1925 of 2550, June 16, 2009. <https://msc.fema.gov/portal/>

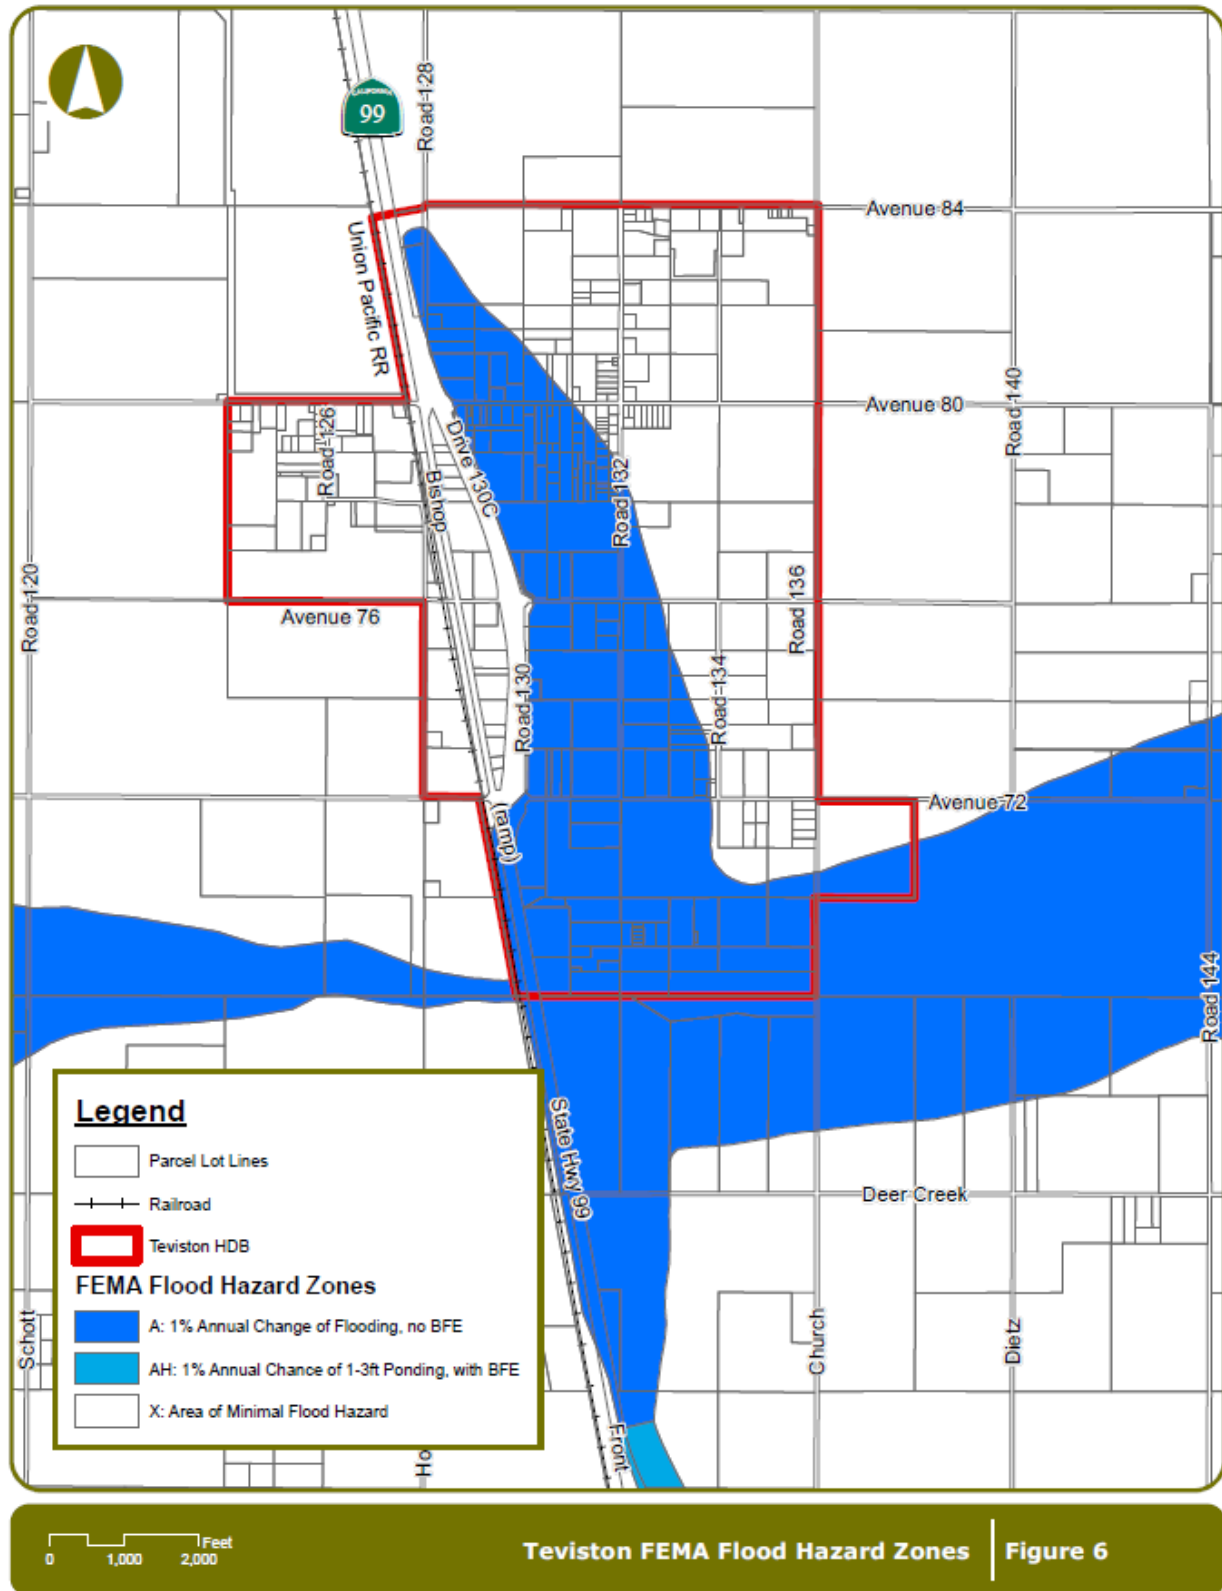

# TEVISTON HAMLET PLAN

---

forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

# TEVISTON HAMLET PLAN

Figure 6 - FEMA Flood Map

# TEVISTON HAMLET PLAN

## Noise<sup>6</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBa) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy summarizes the daily traffic volumes along State Route (SR) 99 from Avenue 76 to Avenue 96 (see Table 14).

Table 14 - Noise Levels					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
State Route 99 from Avenue 76 to Avenue 96	38,500	324	698	1,503	3,239

Source: 2010 General Plan Background Report

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan serves to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

Southern California Edison provides service to Teviston.

### Domestic Water & Wastewater

There is no community wide sewer system in Teviston. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent. SGC survey results indicate that the Teviston residents are in favor of creating a community wide sewer system.

# TEVISTON HAMLET PLAN

---

“Domestic water service in Teviston is provided by the Teviston Community Services District (CSD), which was formed in November 1956. Teviston lacks a sanitary sewer system and is served by individual or community septic systems. Table 16 shows the number of existing water connections, the capacity of the system, and the number of additional connections the system can accommodate for new development (Housing Element, May 2012). Mapping of the water system is currently unavailable.

According to the Municipal Service Review 2006 (MSR), Teviston’s water supply is derived from two existing deep underground wells that provide an ample clean water supply requiring no chlorination or treatment. The two wells have a total maximum production efficiency of approximately 900 gallons per minute (GPM).

The Teviston CSD water system supports 105 total connections including 99 residential connections, 4 church connections, 1 school connection, and 1 connection to the community center. In 1998, the District completed several improvements to its water system including replacing old deteriorating water lines, construction of new water lines, installation of fire hydrants throughout the system, installation of meters for all connections, and improvements to the north well site.

The *Preliminary Engineering Report Water System Rehabilitation Project* (Roberts Engineering, November 1995) estimates that the two wells have adequate water supply to support a population of approximately 460 residents, or approximately 125 equivalent dwelling units (EDUs) at a dwelling unit occupancy rate of 3.7 persons per household. It is recommended that the District plan for future water system improvements as the current system reaches its capacity, perhaps through a meter plan, or updated water system study. Potential funding sources should also be identified during the planning process.

Assuming 105 EDUs, in order to meet Tulare County Improvement Standards the Teviston CSD water system would need to be capable of delivering a combined flow rate (from all source and storage facilities) of 857 GPM (500 GPM fire flow and 357 GPM domestic demand) for a period of two hours while maintaining a minimum pressure of 25 pounds per square inch (PSI) to each lot served. The District’s water system is capable of delivering a source flow of 900 GPM, and includes pneumatic pressure tanks for storage, indicating that the system currently meets the requirements of the Tulare County Improvement Standards.”<sup>7</sup> As of the date of this plan, there were no connections available, but it was understood that the Teviston CSD had received a grant and were expanding their capacity. Once installed, the County will know what the capacity available is.

Table 15 - Existing Water Connections		
Number of Existing Connections	Capacity	Available
105	125	20

Source: Action Program 9, Tulare County Housing Element. Data current as of January 2011

## Sewer

There is no community wide sewer system in Teviston. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent.

---

## Storm Drainage

Teviston does not currently have a storm drainage system. A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

## Solid Waste

Solid waste disposal services for the Community of Teviston is provided by Tule Trash, a private company. Solid waste generated in Teviston can be disposed of at Teapot Dome Landfill, located at 21063 Avenue 128, Porterville, California.

## Roads

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used.

# TEVISTON HAMLET PLAN

It is commonly used as patching material and on lower volume service roads”<sup>8</sup>

OLAY – overlay resurfacing operation  
CHIP – chip seal  
GRX – grind and remix

ACST – asphalt reconstruction  
RCST – cold mix reconstruction

## Street Lights

Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

**Table 17** identifies the location of existing street lights that are maintained by Tulare County, in Teviston, as well as their specifications. **Figure 7** also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light).

<sup>8</sup> Action Program 9, Tulare County 2015 Housing Element

# TEVISTON HAMLET PLAN

The pole type “W” represents a wood post for which the light is commonly shared with a Utility provider. Similarly, "M" represents metal and "C" represents concrete.”<sup>9</sup>

**Table 17 - Specifications of Existing Street Lights**

# TEVISTON HAMLET PLAN

Figure 7 - Teviston Inventory of Roadway Facilities

# TEVISTON HAMLET PLAN

---

## Sidewalks

There are currently no sidewalks located within Teviston. Sidewalks are typically separated from a roadway by a curb and accommodate pedestrian travel. They improve mobility for those with disabilities and are also an important part of walking routes to schools. They provide the space for pedestrians to travel within the public right-of-way while being separated from vehicles and bicycles.

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Teviston.”<sup>10</sup>

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

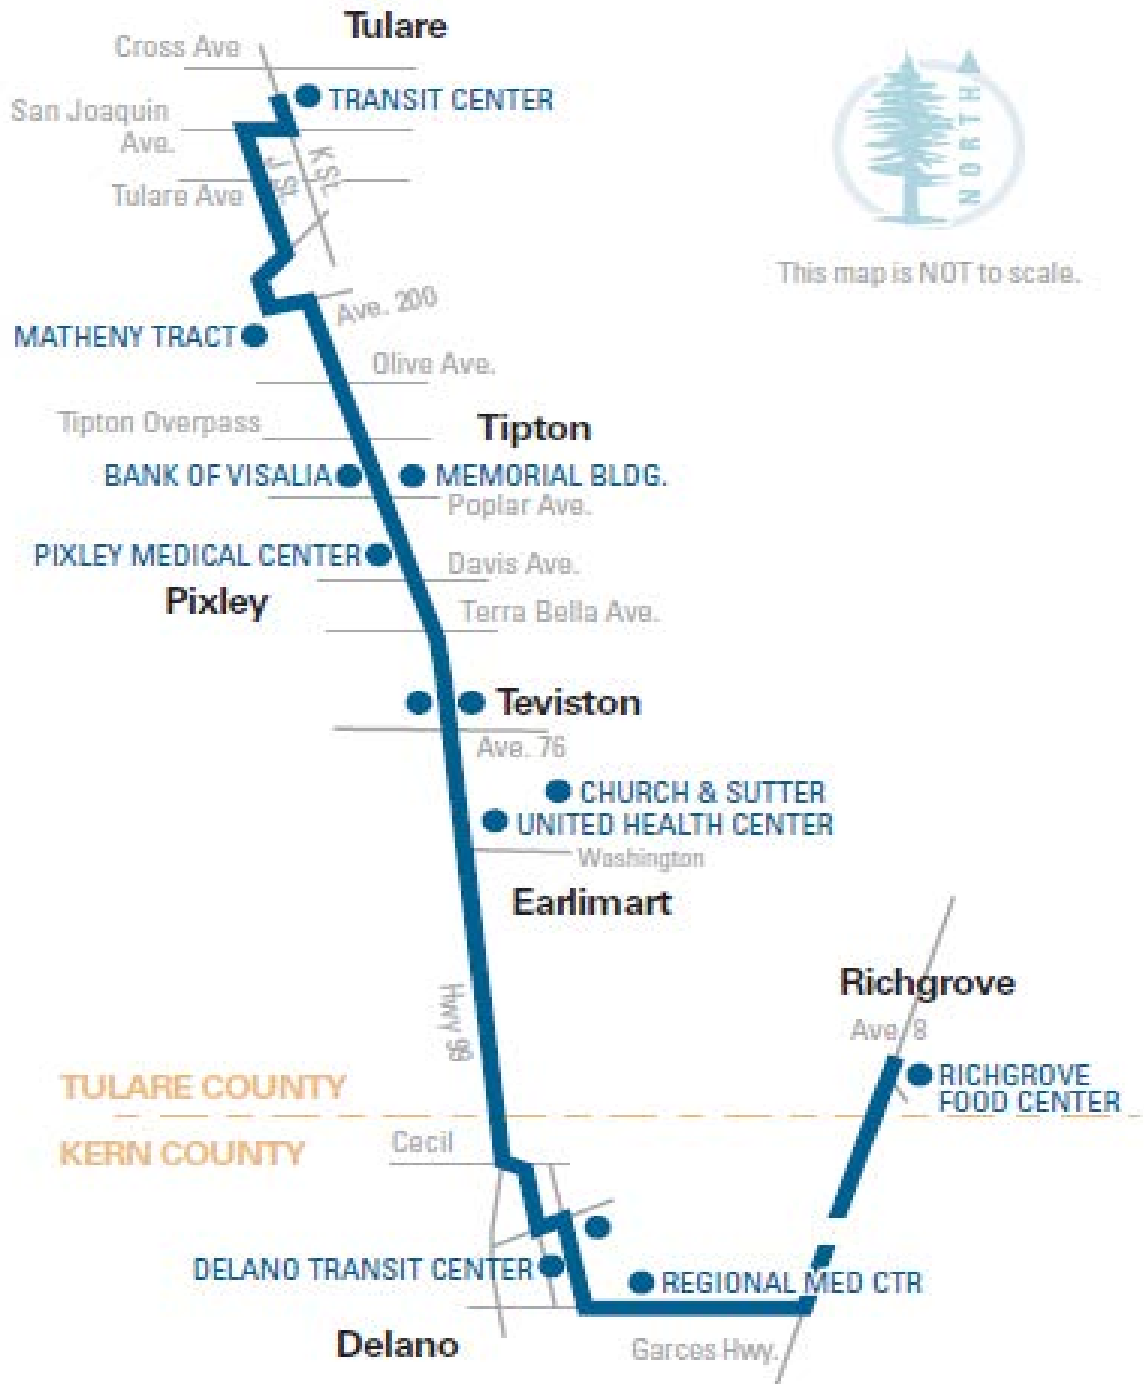

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare’s urban transit systems. Teviston (Ave. 76 stop) is currently connected via TCAT Route 20/South Valley County to Tulare and Delano transit centers (**see Figure 8**). Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Teviston, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## Bicycle Facilities:

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified Road 120 as a proposed Class II Bike Project<sup>11</sup>. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely seen outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. The only bike route within or near the community is Road 120.

<sup>11</sup> TCAG Action Element, TCAG 2014 Regional Transportation Plan. Page 3-89.

# TEVISTON HAMLET PLAN

---

## AMTRAK

The Corcoran AMTRAK station, located 25 miles to the northwest in Kings County, is the closest station to Teviston providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

## Aviation

The nearest operational general aviation airport is Meadows Field, Bakersfield's principal commercial airport, is approximately 30 miles south of Teviston and offers direct flights to several destinations.

Fresno Yosemite International Airport (FAT), approximately 70 miles northwest of Teviston, is the principal passenger and airfreight airport in the central San Joaquin Valley. Visalia Municipal Airport, approximately 40 miles north.

## State Route 99

State Route (SR) 99 is a major route between cities within the Central Valley. SR 99 is the primary route between the City of Fresno to the North and the City of Bakersfield to the South.

## **PUBLIC SERVICES**

### Community Resource Center

In Teviston, there is a building used as the Community Center at 12934 Avenue. 80 that is used as the local community center.

# TEVISTON HAMLET PLAN

---

## Sheriff

The Tulare County Sheriff's Department has a Pixley Substation covering 552 square miles and serving a rural population to include the unincorporated communities of Alpaugh, Allensworth, Teviston, Earlimart, Pixley and Tipton which holds approximately 45,000 people. The Substation runs a four shift operation which includes 16 deputies, five sergeants and one lieutenant. There are a minimum of three deputies and one sergeant in the field at all times. The substation is open for walk-ins from 8:00 am to 5:00 pm. After hours, there is a phone provided outside the substation that calls directly into our dispatch center.

## Fire

Fire protection and emergency medical services are provided for Teviston by the Earlimart Fire Station Tulare County Fire Department. The community is served by Tulare County Fire Department Station #27, located at 200 N. Park Drive, in Earlimart. Patrol 27, Engine 27 and Water Tender 27 are assigned to this location. Nineteen fire hydrants (**see Table 18**) are found within Teviston. These fire hydrants are located within the County right-of-way. **Figure 10** display Existing Fire Hydrants in Teviston.

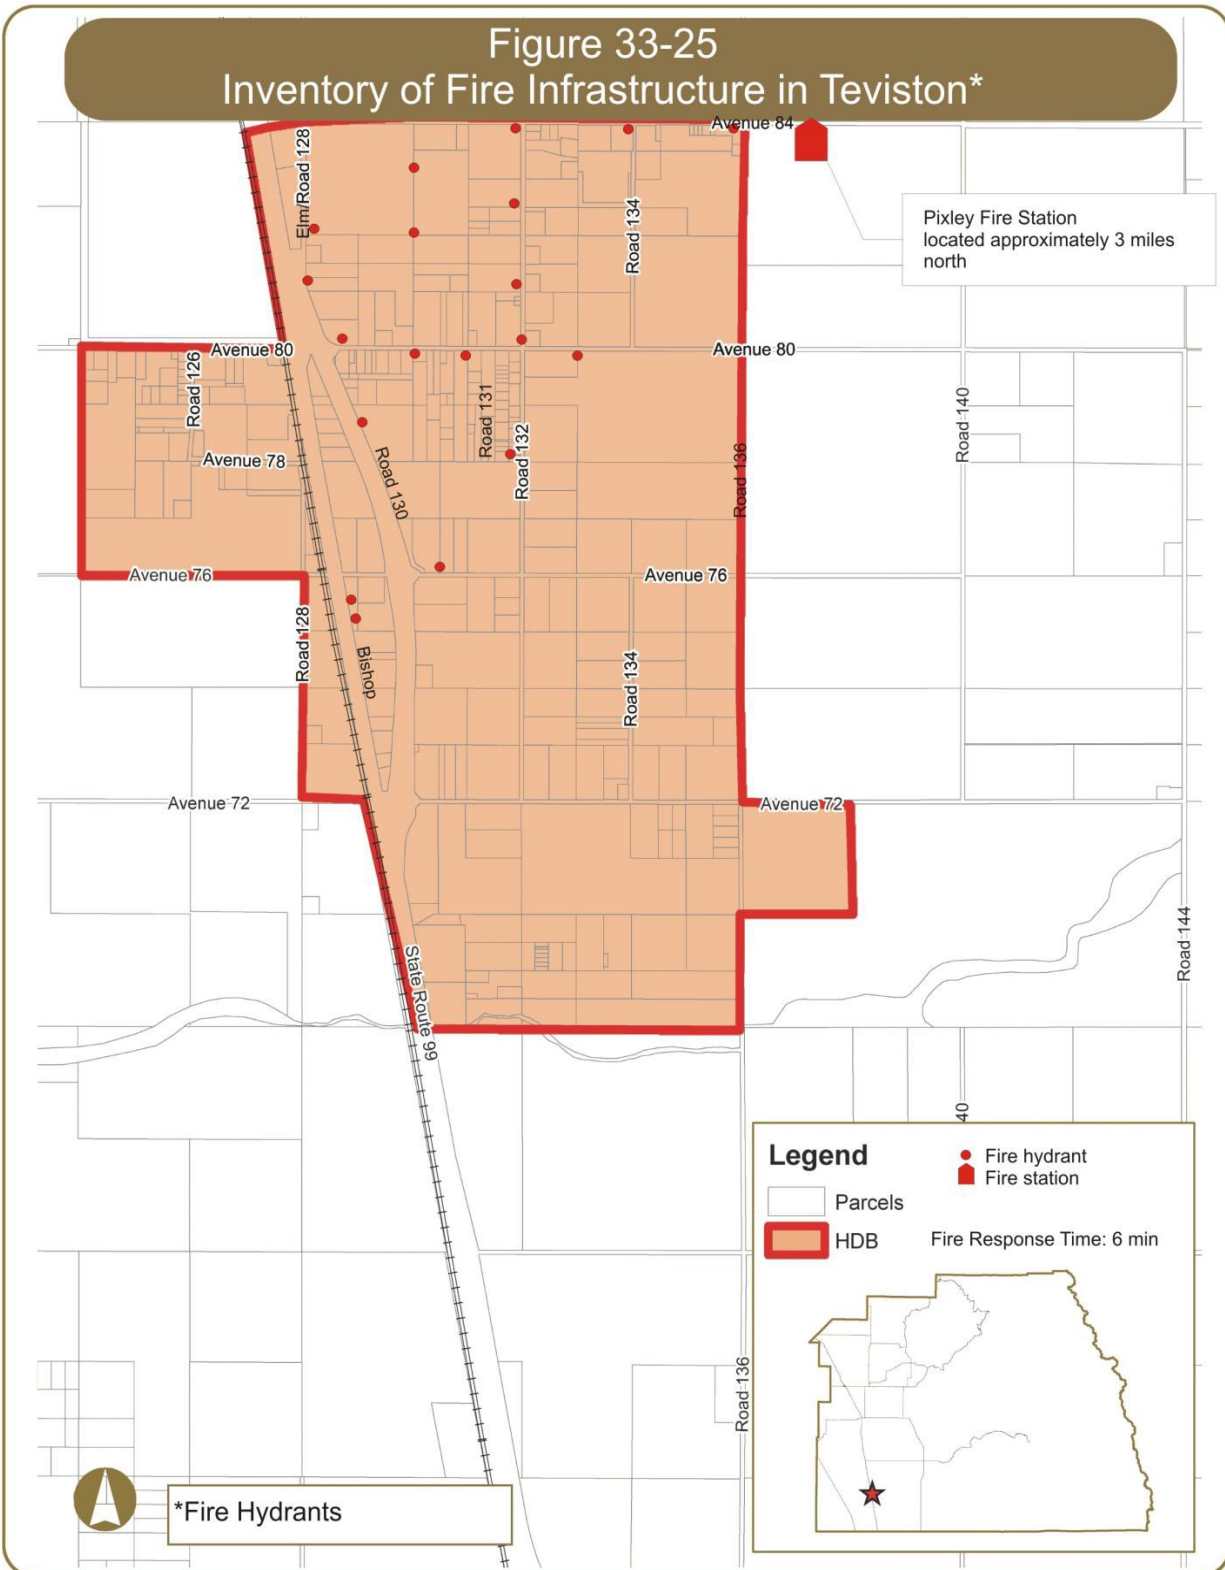

**Table 18 - Existing Fire Hydrants**

Existing Fire Hydrants	
No.	Location
1	Avenue 84 and Road 132

---

## Schools

The Teviston Hamlet Plan Area is within two school districts: 1) North of Avenue 80, the Pixley Union Elementary provides K-8 grade education and high school students attend high school in the Tulare Joint High School District; and 2) south of Avenue 80, Earlimart Elementary provides K-8 grade education and high school students attend high school in the Delano Joint Union High School District.

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>12</sup> The closest library is located in Earlimart 2 miles away. (see Table 19)

Table 19 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Earlimart	Earlimart Branch 780 East Washington Earlimart, CA 93219	Tuesday – Friday: 9:00 a.m. – 1:00 p.m. 2:00 p.m. – 5:00 p.m.

Library hours current as of September 2017

## Parks

Presently there are no County owned/operated public parks in Teviston. The closest public park to the community is Pixley County Park, located three miles north of Teviston. This facility is operated by the County of Tulare and features large grassy areas with shade trees. There are also parks in the Community of Earlimart, located three miles south of Teviston.

# THE TEVISTON HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

The 2014 Regional Transportation Plan and projections for Year 2040 traffic volumes do not exceed the LOS “C” threshold. Less than significant impacts will occur to SR 43 as a result of the Project primarily because increased traffic loads on SR 43, and its various entry and exit point, is more associated with growth in the Central Valley and the increased need for Californians to be able to travel north and south. Both the Highway Capacity Manual (HCM) and the Tulare County General Plan (TCGP) LOS remain at B or C through Year 2040 projections while the build-out time frame of the Community Plan is Year 2030.

---

<sup>12</sup> General Plan Background Report, page 7-96

# TEVISTON HAMLET PLAN

---

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>13</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>14</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation

Teviston is a small agricultural community located near Highway 99. The major rural collector roads are Avenue 80 and Road 130/Ave 76. There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

---

## County Complete Streets / ATP Program

The County has two Programs for Complete Streets for implementing multi-modal (all forms of transportation for all type of users) transportation policies for the Tulare County General Plan and for gaining Active Transportation Project funding from the State and Federal Programs. The County has received over \$6 Million in funding through these programs to date.

## GOALS, OBJECTIVES AND POLICIES

This Section of the Teviston Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Teviston to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Teviston Hamlet Plan, and input received from Teviston citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Create a mix of uses with easy access to major roads**

Objective: Promote mixed use zoning and land uses.

#### Policies:

1. Locate high density residential uses near planned commercial areas.
2. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
3. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
4. The County shall work with the Schools to provide safe routes to school.
5. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Teviston Hamlet Plan.

# TEVISTON HAMLET PLAN

---

6. The Teviston Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

**Housing**

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Teviston.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate-income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Teviston.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

**Economic Base**

**GOAL I: Develop a strong and diversified economy.**

# TEVISTON HAMLET PLAN

---

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

Policies:

1. Encourage the Teviston to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## *Environmental Quality and Public Safety*

**GOAL I: Preserve and enhance the quality of life for present and future generation of Teviston citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

## Objective: Protect Agricultural Lands:

Land within the respective Teviston, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

# TEVISTON HAMLET PLAN

---

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Teviston.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Teviston.

# TEVISTON HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 19.5 acres of Teviston Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute of approximately 57 percent of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 565 by 1,051.4 urbanized acres (area within the HDB), which equals 1.8 persons per urbanized acre (**see Tables 20 and 21**) showing population projections). Projecting the population at a 1.3% growth rate adds 118 persons in Year 2030.

### Population Growth Forecast

**Table 20 - Teviston Population Projections**

Growth Rate	2015	2020	2030
0.013	1,623	1,731	1,970

**Demand Forecast** To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in Year 2030 were compared to the vacant land available within the HDB.

**Population and Housing Units** The Year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>15</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in Year 2013 the community had 424 dwelling units (including vacant dwellings) with a population of 1,623. At an annual growth rate of 1.3%, the projected housing units are 603 and 683 in Years 2020 and 2030, respectively, and projected population is 603 and 683 in years 2020 and 2030, respectively.

<b>Table 21 - Population Projections</b>		
Year	Population	Growth (%)
2015	1,623	0.013
2016	1,644	0.013
2017	1,665	0.013
2018	1,687	0.013
2019	1,709	0.013
2020	1,731	0.013
2021	1,754	0.013
2022	1,777	0.013
2023	1,800	0.013
2024	1,823	0.013
2025	1,847	0.013
2026	1,871	0.013
2027	1,895	0.013
2028	1,920	0.013
2029	1,945	0.013
2030	1,970	0.013

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, water service levels need to be expanded, for which Grant funding is needed.

<sup>15</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# TEVISTON HAMLET PLAN

---

## Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

## Education

Tulare County has five satellite campuses for four-year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

## Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices are in the Communities of Pixley or Earlimart and the Cities of Tulare and Delano.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 22**) and Zoning Districts Plan (**see Table 23**).

<b>Table 22 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	17.1

Teviston HDB	19.5

<b>Table 23 - Proposed Zoning</b>	
Proposed Zones	Acres
C-2-MU	2.5
R-A-43	14.7
Right-of Ways	2.4
Teviston HDB	19.5

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations found in the Teviston Hamlet Plan. The following components comprise the Teviston Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Teviston Hamlet Plan, there are a several changes to existing zoning districts. These changes are described below.

# TEVISTON HAMLET PLAN

---

## Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision-making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

## Mixed Use Overlay District

This alternative involves the creation of a Mixed-Use Zoning Designation for the Community of Teviston.

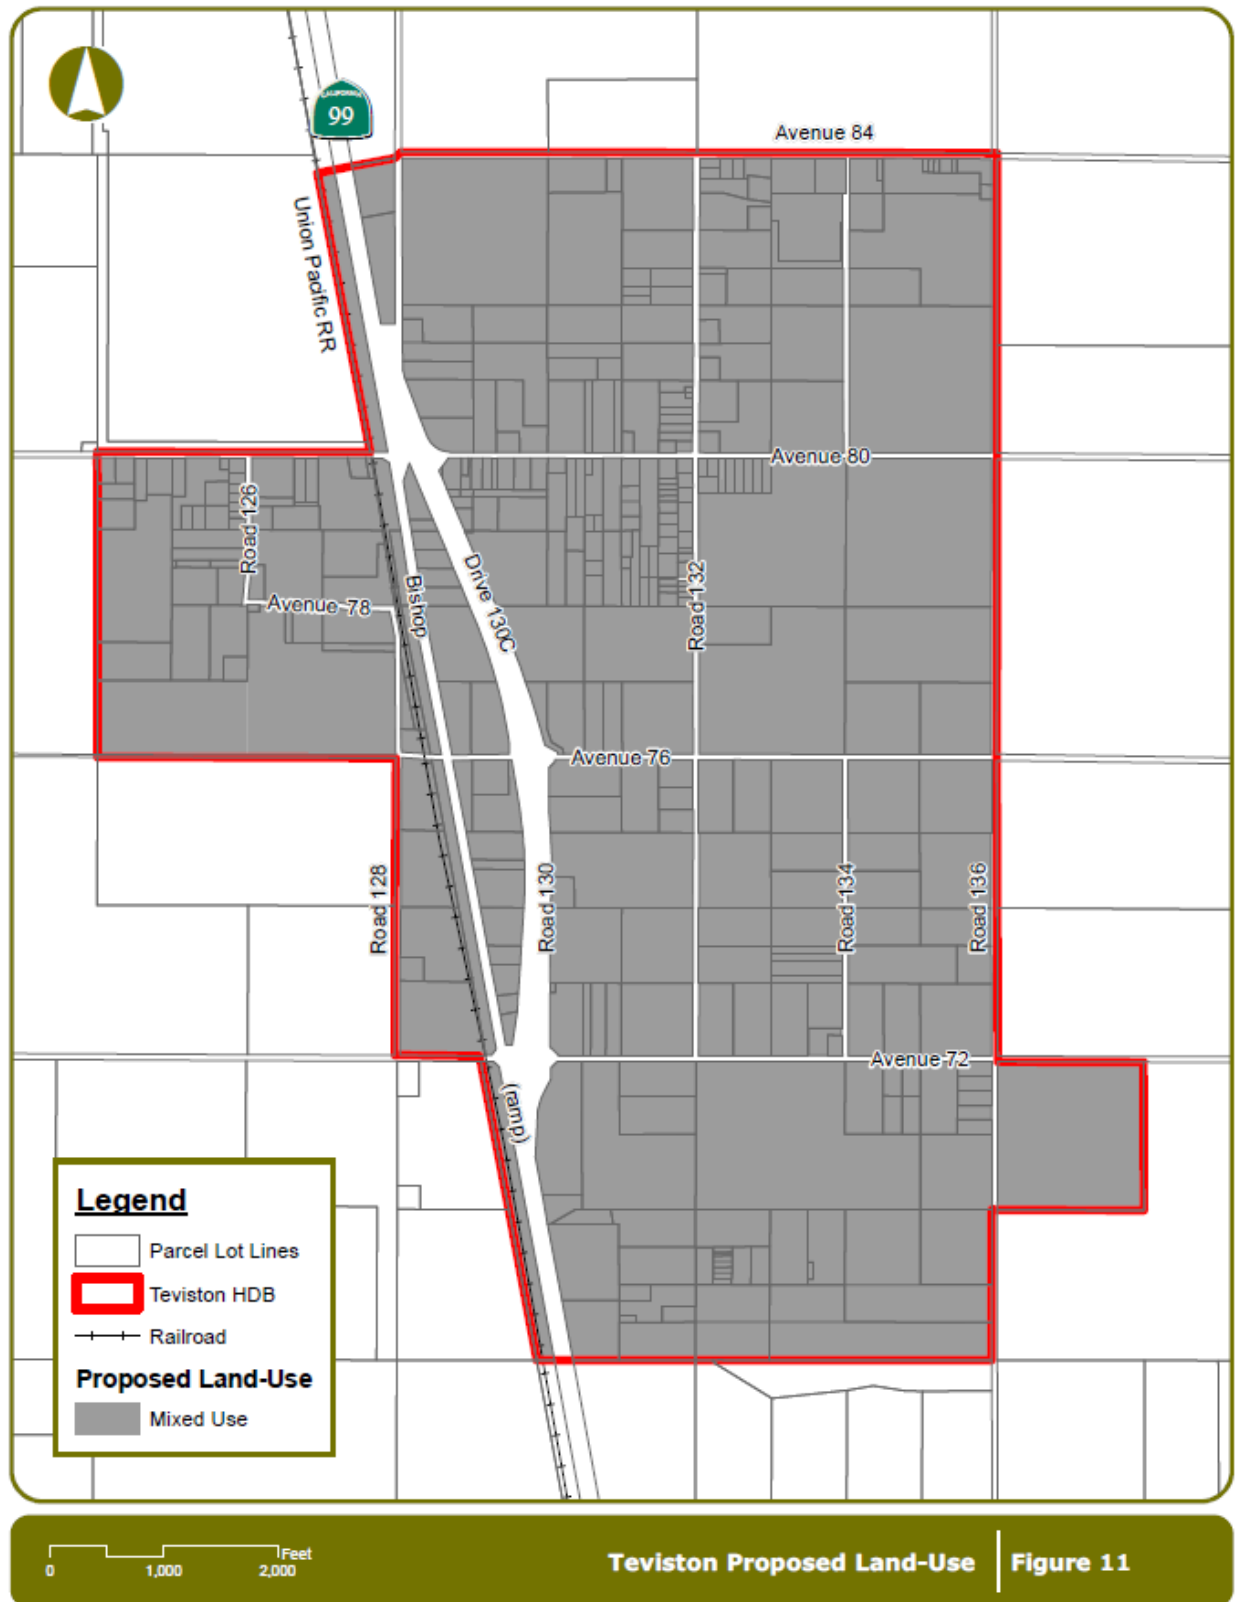

## Zoning Map Update

The current Zoning Map (**see Figure 12**) for Teviston will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 11**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 13**) Teviston proposed Zoning.

A-2 – Mixed Use Overlay District (Zone Change Text)

A-3 – Development Standards (Mixed Use Zoning Districts)

# TEVISTON HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

## A-2 Mixed Use Overlay District (Zone Change Text)

The following regulations shall apply in the community of Teviston, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Teviston.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Teviston.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Autowrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# TEVISTON HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# TEVISTON HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Teviston. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# TEVISTON HAMLET PLAN

---

## A-3 Development Standards (Mixed Use Zoning District)

---

To promote Economic Development within the Teviston Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Teviston. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Teviston Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Teviston. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### ARCHITECTURE

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# TEVISTON HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# TEVISTON HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# TEVISTON HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# TEVISTON HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# TEVISTON HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# TEVISTON HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# TEVISTON HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# TEVISTON HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT	)	
TO SECTION 16.H OF ORDINANCE NO. 352	)	
TO ALLOW ADDITIONAL BY-RIGHT USES	)	RESOLUTION NO. 9369
CONSISTENT WITH THE ADOPTED HAMLET	)	
PLANS, AS PROPOSED IN CHANGE	)	
OF ZONE NO. PZC 17-039	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

PZC 17-022, PZC 17-023, AND PZC 17-024	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Ordinance No. 352, the Zoning Ordinance as set forth in attached Exhibit "B" Allensworth Rezoning Plan (PZC 17-037), to include the Hamlet Community of Allensworth, consistent with the adopted Allensworth Hamlet Plan 2017 Update, Exhibit "E" Delft Colony Rezoning Plan (PCZ 17-015), to include the Hamlet Community of Delft Colony, consistent with the adopted Delft Colony Hamlet Plan 2017 Update, Exhibit "H" East Tulare Villa Rezoning Plan (PCZ 17-016), to include the Hamlet Community of East Tulare Villa, consistent with the adopted East Tulare Villa Hamlet Plan 2017 Update, Exhibit "K" Lindcove Rezoning Plan (PCZ 17-017), to include the Hamlet Community of Lindcove, consistent with the adopted Lindcove Hamlet Plan 2017 Update, Exhibit "N" Monson Rezoning Plan (PCZ 17-018), to include the Hamlet Community of Monson, consistent with the adopted Monson Hamlet Plan 2017 Update, Exhibit "Q" Seville Rezoning Plan (PZC 17-019), to include the Hamlet Community of Seville, consistent with the adopted Seville Hamlet Plan 2017 Update, Exhibit "T" Teviston Rezoning Plan (PCZ 17-020), to include the Hamlet Community of Teviston, consistent with the adopted Teviston Hamlet Plan 2017 Update, Exhibit "W" Tonyville Rezoning Plan (PCZ 17-021), to include the Hamlet Community of Tonyville, consistent with the adopted Tonyville Hamlet Plan 2017 Update, Exhibit "Z" Waukena Rezoning Plan (PCZ 17-022), to include the Hamlet Community of Waukena, consistent with the adopted Waukena Hamlet Plan 2017 Update, Exhibit "CC" West Goshen Rezoning Plan (PCZ 17-023), to include the Hamlet Community of West Goshen, consistent with the adopted West Goshen Hamlet Plan 2017 Update, Exhibit "FF" Yettem Tract Rezoning Plan (PCZ 17-024), to include the Hamlet Community of Yettem, consistent with the adopted Yettem Hamlet Plan 2017 Update, and

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# TONYVILLE HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Tonyville is to develop a plan which can accurately reflect the needs and priorities of this community. Tonyville is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, sidewalks, etc.) and to stimulate economic development within the community.

### Location

The community of Tonyville (**see Figure 1**) is located on the east side of the San Joaquin Valley and is a census-designated place located in the western portion of Tulare County. It is bounded by Avenue 252 in the south, Avenue 254 in the north, and Road 216 in the west and encompasses 0.05 square miles of land. It is not directly served by any State Route (**See Figure 2**). Tonyville is in Section 30 Township 19 South, Range 27 East, MDB&M, and can be found within Rocky Hill United States Geological Survey 7.5 minute topographic quadrangle. Tonyville is located at an elevation of 361 feet National Geodetic Vertical Datum. The coordinates of Tonyville are: Latitude: 36.248561 Longitude: -119.090660.

### Planning Area

The Tonyville Hamlet Development Boundary (HDB) was approved in the 2012 Tulare County General Plan with an area that consists of 34.2 acres (**See Figure 3**). The Land Uses within the HDB are Mixed Use which occupy 29.7 acres of the buildable land. The remaining 4.5 acres are lands dedicated for Right-of-way (**See Table 1**).

No change is proposed to the Hamlet Development Boundary.

<b>Table 1 - Tonyville Land Use</b>	
<b>Existing Land-Use</b>	<b>Acres</b>
Mixed Use	29.7
Unclassified (Right-of-Way)	4.5
<b>TOTAL</b>	<b>34.2</b>

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### Community Outreach and Invitation Process

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the SGC project, Self-Help Enterprises went door to door throughout the community of Tonyville to distribute flyers to homes, businesses, and schools. Fliers were posted at local stores and gas stations.

### Community Outreach Steps

The Leadership Council and SHE performed various outreach methods to promote community participation and increase awareness of the SGC project:

1. An informational flyer was developed.
2. To ensure that residents had multiple opportunities to be made aware of the meeting, flyers were posted at the local corner store and all businesses.

### Internet Access

Most families in Tonyville do not have internet access at their homes. Any available internet service is unreliable and cost prohibited. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. Without access to the internet, Tonyville residents are unable to go online job hunting, applying for resources, or provide homework help to their kids.

**Leadership Council for Justice & Accountability and TULARE COUNTY**  
invites you to participate in a  
**COMMUNITY MEETING**  
to  
**DISCUSS IMPROVEMENT NEEDS**  
in  
**Tonyville**

The Sustainable Communities Strategy Project (SCS) seeks to document the following needs: Sewer, Water, Water Quality & Quantity, Storm Water Drainage, Fire, Access to Transportation, Housing, Schools, Libraries, Parks, Access to Healthy Foods and Shopping Opportunities, Access to Medical Facilities, Internet Access and more.

The information that you provide at this meeting will help Tulare County create a plan and identify resources for future infrastructure improvements, land use changes, and zoning changes where possible.

**When:** February 4th, 2016  
**Location:** St. Anthony Mission Church  
21631 Brooks Ave  
Tonyville, CA 93274  
**Time:** 6:00pm - 7:00pm

**For more info please call: Merced at 310-499-8034 or Ashley at 415-686-1368**

**Tonyville**

El Proyecto de Compendio de Comunidades Sostenibles (SCS) está documentando las siguientes necesidades: alcantarillado, agua, calidad y cantidad del agua, drenaje pluvial, agua, fuego, el acceso al transporte, vivienda, escuelas, bibliotecas, parques, acceso a alimentos y tiendas, acceso a servicios médicos, acceso al internet y mucho más!

La información que usted proporcione en esta junta ayudará al condado a crear un plan e identificar recursos para mejorar la infraestructura de La Villa donde sea posible. También ayudará a planificar el uso de la tierra y los cambios de zonificación.

# TONYVILLE HAMLET PLAN

Self Help Enterprises and Tulare County invites you  
to a community meeting to review the  
**Tonyville Community Plan**  
**Wednesday, February 22, 2017 at 5:00pm at**  
**21626 Brookside Ave, Tonyville CA**

A few months ago Tulare County and Self Help Enterprises came to your community to seek input on a planning analysis of your community. Surveys were distributed and collected. Tulare County invites you to attend a community meeting to see the findings from the study. A thorough examination and inventory of existing land uses will suggest infrastructure improvements, land use changes and possibly zoning changes, where feasible.

For more information, call: Abigail at 559-802-1659

The work upon which this publication is based was funded in whole or in part through a grant awarded by the California Strategic Growth Council.

Self Help Enterprises y El Condado de Tulare  
le invita a la Junta Comunitaria para revisar  
**El Plan Comunitario de Tonyville**  
**Miercoles 22 de febrero 2017 a las 5 de la tarde**  
**21626 Brookside Ave, Tonyville CA**

Hace unos meses, el Condado de Tulare y Self Help Enterprises vino a su comunidad para buscar la opinión de la comunidad sobre un análisis de planificación de su comunidad. Encuestas fueron distribuidas y recolectadas. El Condado de Tulare le invita a asistir a una junta comunitaria para ver los resultados del estudio. Un examen completo y la organización de los usos existentes de la tierra sugerirán mejoras en la infraestructura, cambios en el uso de la tierra y posiblemente cambios de zonificación, donde sea factible.

# TONYVILLE HAMLET PLAN

## TONYVILLE HAMLET TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Tonyville.

#### Population

In 2015, the Population for Tonyville was 572 (see Table 2).

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Tonyville</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	387	67.7%
Female	19,334,329	50.3%	226,607	49.9%	185	32.3%
Total	38,421,464		454,033		572	

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Tonyville's population during the Planning Period (see Table 3). This would result in a total increase of 122 persons by 2030 (7 to 9 persons per year). Note: however, there are recent uncertified surveys that show a lower growth rate, or even a net migration out of the unincorporated County, but those numbers have not been verified.

**Table 3 - Projected Annual Growth Rate**

	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.4%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

# TONYVILLE HAMLET PLAN

## Median Age

Tonyville's population's median age is younger than the median age of both Tulare County and the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Tonyville	23.0

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 0% of Tonyville's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 0% was two races or more (see Table 5). Approximately 100% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	Tonyville	%
Total	38,421,464		454,033		572	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	572	100%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	0	%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Tonyville

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

According to the California Department of Finance, the 2011-2015 American Community Survey the unemployment rate for Tonyville was about 9.7% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 9.7% includes only the employable labor force (that is, not every person of the population) results in about 42 unemployed persons of Tonyville's person labor force of 306.

# TONYVILLE HAMLET PLAN

Table 6 - Employment Status			
Employment Status	California	Tulare County	Tonyville
Population 16 years & over	30,312,429	325,404	435
In labor force	19,269,449	194,420	306
Civilian labor force	19,137,441	194,102	306
Employed	17,246,360	170,780	264
Unemployed	1,891,081	23,322	42
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	129

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

In 2015, Tonyville's median household income was not available.

Table 7 - 2011-2015 American Community Survey Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Tonyville CDP	(not available)	\$53,189	\$11,614

## Severely Disadvantaged Community

Tonyville is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes).

Table 8 - Housing Tenure			
	California	Tulare County	Tonyville
Occupied housing units	12,717,801	133,570	96
Owner-occupied	6,909,176	75,685	28
Renter-occupied	5,808,625	57,885	68

2011-2015 American Community Survey 5-Year Estimates

Table 9 - Housing Tenure (%)			
	California	Tulare County	Tonyville
Owner-occupied	54.3%	56.7%	29.2%
Renter-occupied	45.7%	43.3%	70.8%

2011-2015 American Community Survey 5-Year Estimates

# TONYVILLE HAMLET PLAN

## Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Tonyville	3	13	0	0	9	38	2	8	10	42	24

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Tonyville indicated that approximately 13% of the housing units were sound. Approximately 46% of Tonyville's housing units were deteriorated and 42% were dilapidated (see Table 10).

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009. (see Table 11) The total number of housing units in Tulare County is 144,792.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Tonyville
Total housing units	13,845,790	144,792	96
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	0
Built 1990 to 1999	1,495,571	21,767	0
Built 1980 to 1989	2,117,819	22,733	34
Built 1970 to 1979	2,503,688	27,111	12
Built 1960 to 1969	1,871,029	15,500	0
Built 1950 to 1959	1,907,512	13,694	30
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	20

2011-2015 American Community Survey 5-Year Estimates

# TONYVILLE HAMLET PLAN

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Tonyville was 5.72 persons per household (see Table 12). The average owner occupied household size is 6.54.

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Tonyville	6.54	5.72

2011-2015 American Community Survey 5-Year Estimates

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% reflect affordability or housing conditions. In 2015, the rental vacancy rate in Tonyville was 0%, which was lower than Tulare County at 3.7% and the State of California at 4.1%. This is probably not an accurate reflection of the Community's vacancy rates. The homeowner vacancy rate was 0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Tonyville	0%	0%

2011-2015 American Community Survey 5-Year Estimates

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016 (see Figure 4) indicates there are special status species within the Rocky Hill Quadrant Species List (which includes the Tonyville Planning Study Area) consisting of one animal species and two plant species: Vernal Pool fairy shrimp (*Branchinecta lynchi*, federal threatened, Striped adobe-lily (*Fritillaria striata*, state threatened, and San Joaquin adobe sunburst, *pesudobahia peirsonii*, federal threatened and state endangered).

<sup>1</sup> U.S. Department of Housing and Urban Development, "Measuring Overcrowding in Housing" 2007. Page 2 See: [http://www.huduser.org/publications/pdf/Measuring\\_Overcrowding\\_in\\_Hsg.pdf](http://www.huduser.org/publications/pdf/Measuring_Overcrowding_in_Hsg.pdf)

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Tonyville are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Tonyville] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>4</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County (see **Figure 5**), the following soil types are located in Tonyville. Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**Exeter loam, 0 to 2 percent slopes**, moderately deep to a duripan, moderately well drained, very slow to medium runoff, moderately slow permeability above the duripan. The soils that formed in alluvium mainly from granitic sources. Exeter soils are on alluvial fans and stream terraces. The soil is used for irrigated cropland growing oranges, olives and deciduous orchards, vineyards and row crops.

**Porterville clay, 0 to 2 percent slopes**, deep well drained soils that formed in fine textured alluvial material from basic and metabasic igneous rock. Porterville soils are on fans and foothills, used mostly for range pasture. Vegetation is annual grasses, burclove, herbs and widely spaced shrubs. Most cultivated areas are irrigated and planted to oranges, lemons, olive, figs, and some grapes.

## Physical Conditions

### Air Quality

The Tonyville Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies
- Adopt Local Air Quality Mitigation Fee Program
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations
- Fugitive dust regulation enforcement coordinated with SJVUAPCD
- Energy efficiency incentive programs
- Local alternative fuels programs
- Coordinate location of land uses to separate odor generators and sensitive receptors

There is a correlation between land use and air quality; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Tonyville is located near the southeast end of the Valley with prevailing winds from the northwest, it is in a vulnerable position to accumulate of adversely modified

# TONYVILLE HAMLET PLAN

---

air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Tonyville include agricultural activities.

## Flooding<sup>5</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C1305E, show Tonyville (**see Figure 6**) within Flood Zoned X, areas of 0.2% chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance of flood. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy. The areas of 2%, or 500-year, flood events it is suggested that Structures located in a shaded X zone are recommended to be elevated one foot above natural ground.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each Community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use Planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”<sup>6</sup> Although some areas of Tulare County have experienced major flooding along its major rivers, the Tonyville Plan area has not. There are portions of Tonyville, however, that are within and adjacent to the FEMA 500 year flood zones.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Tonyville there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in Special Flood Hazard Areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows:

---

# TONYVILLE HAMLET PLAN

---

## Noise<sup>7</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan Background Report Tonyville lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan is intended to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

Southern California Edison provides service to Tonyville.

### Domestic Water & Wastewater

Domestic water service in Tonyville is provided by the Lindsay-Strathmore Irrigation District (LSID) and sanitary sewer service is provided by Tulare County. **Table 14** shows the number of existing sewer connections, the capacity of the system, and the number of additional connections the system can accommodate for new development (Housing Element, May 2012). The capacity and number of connections for the water system is unavailable. **Figure 7** graphically displays the approximate location of water wells and water lines.

No. of Existing Connections	Capacity	Available	No. of Existing Connections	Capacity	Available
N/A	N/A	N/A	79	170	91

\* Data current as of May 2012

## Sewer

Domestic sewer service in Tonyville is provided by Tulare County. **Table 14** shows the number of existing water and sewer connections, the capacity of each system, and the number of additional connections the systems can accommodate for new development (Tulare County, January 2014). Mapping of the sewer and water systems is currently unavailable.

## Storm Drainage

Tonyville does not currently have a storm drainage system. A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

## Solid Waste

Solid waste disposal services for the Community of Tonyville is provided by USA Waste, a private company. Solid waste generated in Tonyville can be disposed of at Visalia Landfill, located at 22466 Road 80, Visalia.

## Roads

“There are several roadways in Tonyville that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

# TONYVILLE HAMLET PLAN

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>8</sup>

**Table 15** lists the roadways in need of repair, the limits, and type of maintenance strategy proposed. **Figure 8** graphically displays this information on a map.

**Table 15 - Road Maintenance Strategies**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Avenue 254	Parkside Avenue to Road 217 (End)	CHIP
2	Parkside Avenue	Brooks Avenue to Avenue 39	CHIP

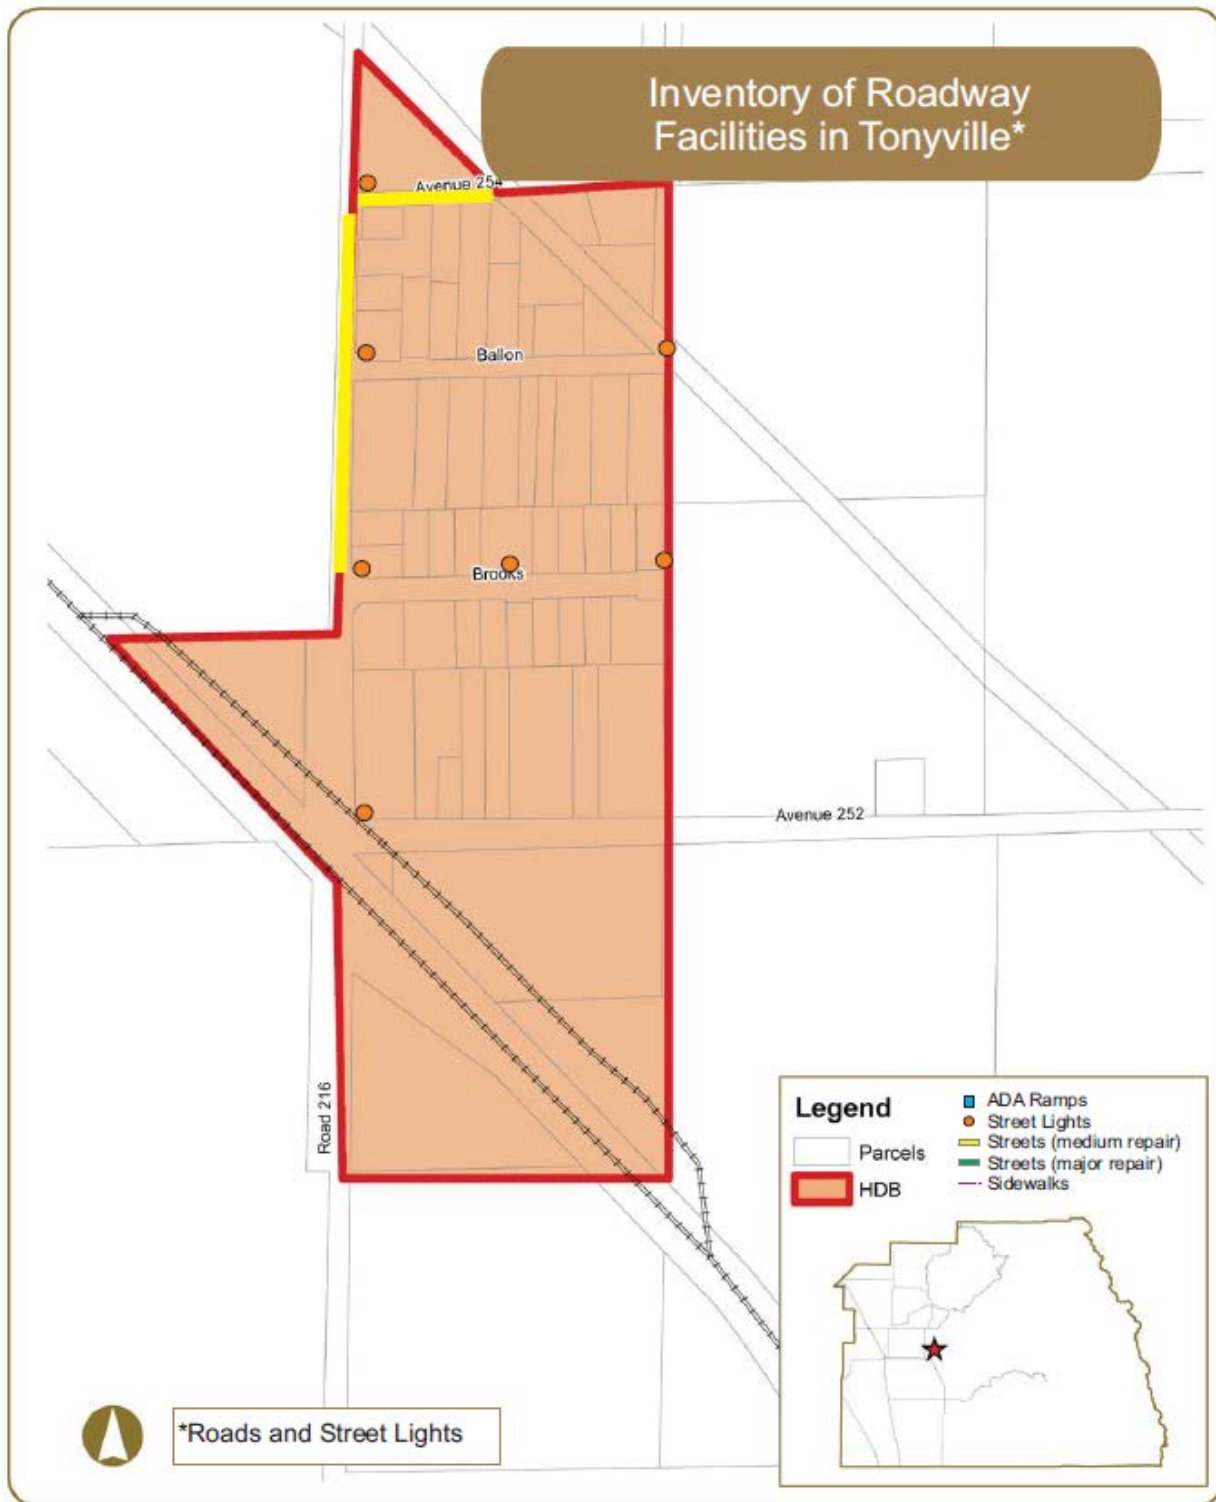

OLAY – overlay resurfacing operation  
CHIP – chip seal  
GRX – grind and remix

ACST – asphalt reconstruction  
RCST – cold mix reconstruction

Figure 8 - Tonyville Inventory of Roadway Facilities

# TONYVILLE HAMLET PLAN

## Street Lights

Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

**Table 16** identifies the location of existing street lights that are maintained by Tulare County, in Tonyville, as well as their specifications. **Figure 8** also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type "W" represents a wood post for which the light is commonly shared with a Utility provider. Similarly, "M" represents metal and "C" represents concrete.”<sup>9</sup>

**Table 16 - Specifications of Existing Street Lights**

Specifications of Existing Street Lights								
No.	East-West	North-South	Location	Pole	Lumens	Pole Type	Arm Direction	Utility
1	Avenue 252	Road 216	NW Corner	227280E	5800	W	W	SCE
2	Avenue 254	Road 216	NE Corner	N/A	5800	W	W	SCE

(Source: Tulare County Public Works, March 2013)

## Sidewalks

There are currently no sidewalks located within Tonyville. The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

<sup>9</sup> Action Program 9, Tulare County 2015 Housing Element

# TONYVILLE HAMLET PLAN

---

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Tonyville.”<sup>10</sup>

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare’s urban transit systems. Public transit is currently not available in Tonyville. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Tonyville, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified SR 65 as a proposed Class III Bike Project<sup>11</sup>. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are rarely seen outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. The only bike route within or near the community is State Route 65.

## PUBLIC SERVICES

### Sheriff

Police protection services are provided in Tonyville by the Tulare County Sheriff's Department main Sheriff's Office located at 2404 W. Burrel Avenue, in Visalia, approximately 20 miles west of Tonyville.

### Fire

Fire protection and emergency medical services are provided for Tonyville by the Lindsay Fire Station [fire hydrants]. The Community is served by Tulare County Fire Department Station #15, located at 19603 Avenue 228, in Lindsay. Engine 15 is assigned to this location. Fire Station #16 is located in Strathmore. Fire Station #11 is located in Exeter.

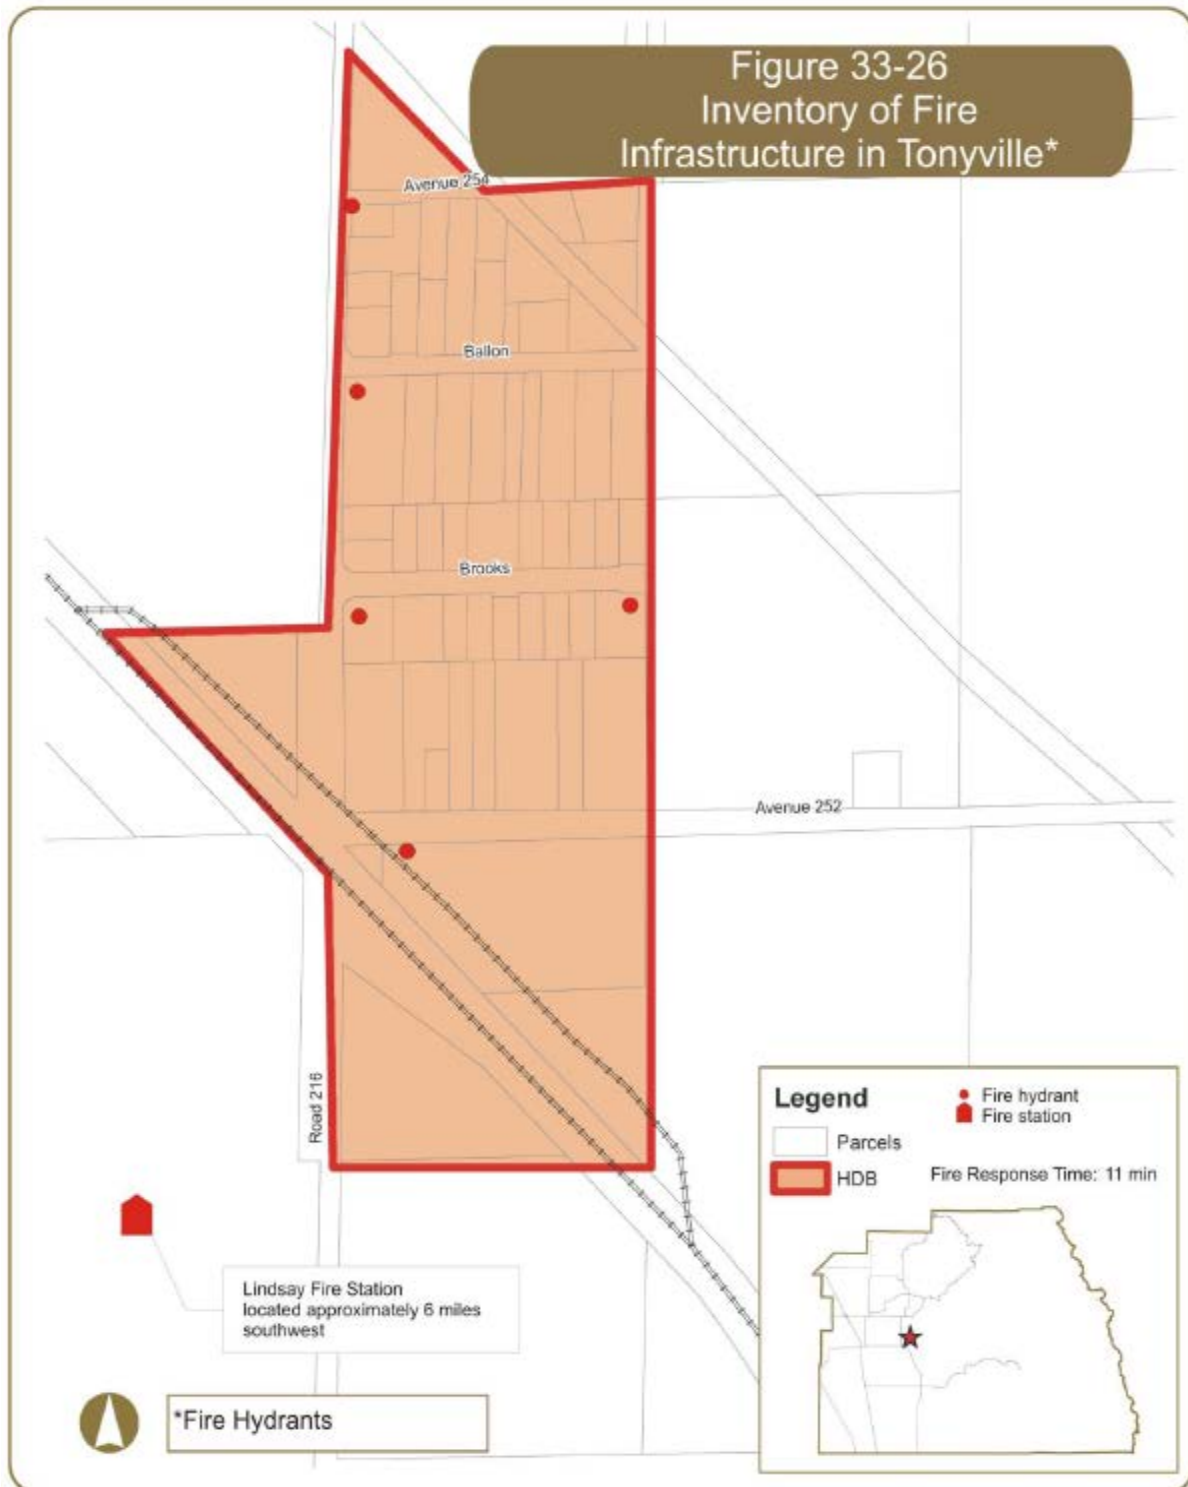

Five fire hydrants (**see Table 17**) are found within Tonyville. These fire hydrants are located within the County right-of-way. **Figure 9** displays Existing Fire Hydrants in Tonyville.

**Table 17 - Existing Fire Infrastructure in Tonyville**

Existing Fire Hydrants	
No.	Location
1	Avenue 254 and Road 216
2	Ballon Avenue and Road 216
3	Brooks Avenue and Road 216
4	Brooks Avenue east of Road 216
5	Avenue 252 east of Road 216

# TONYVILLE HAMLET PLAN

Figure 9 - Inventory of Fire Infrastructure in Tonyville

# TONYVILLE HAMLET PLAN

## Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Tonyville Hamlet Plan Area is within the Lindsay Unified School District. The District provides K-8 grade education in Lindsay. High School students attend high school in Lindsay. Tonyville is within the Lindsay Unified High School District.

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>12</sup> The closest library is located in Lindsay, approximately three (3) miles to the south and the Exeter Branch is located approximately four (4) miles to the northwest. (see Table 17)

Table 18 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Lindsay	Lindsay Branch 165 N. Gale Hill Street Lindsay, CA 93247	Tuesday & Thursday: 11:00 a.m. - 5:00 pm Wednesday & Friday 9:00 a.m. – 6:00 p.m.
Exeter	Exeter Branch 230 E Chestnut Exeter, CA 93221	Tuesday & Wednesday 11:00 a.m. – 5:00 p.m. 6:00 p.m. – 8:00 p.m. Thursday – Friday 9:00 a.m. – 1:00 p.m. 2:00 p.m. – 6:00 p.m.

Library hours current as of September 2017

## Parks

Presently there are no County owned/operated public parks in Tonyville. The closest public park to the community is Mooney Grove Park, located in Visalia. There are also parks in the City of Lindsay located three miles to the south.

# THE TONYVILLE HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

The 2014 Regional Transportation Plan and projections for Year 2040 traffic volumes do not exceed the LOS “C” threshold. Less than significant impacts will occur to SR 43 as a result of the Project primarily because increased traffic loads on SR 43, and its various entry and exit point, is more associated with growth in the Central Valley and the increased need for Californians to be able to travel north and south. Both the Highway Capacity Manual (HCM) and the Tulare County General Plan (TCGP) LOS remain at B or C through Year 2040 projections while the build-out time frame of the Community Plan is Year 2030.

<sup>12</sup> General Plan Background Report, page 7-96

# TONYVILLE HAMLET PLAN

---

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>13</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>14</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation

Tonyville is a small agricultural community located along the Orange Belt Highway and north of SR 137, near Road 256 and Road 204. The major rural collector road is Avenue 308. There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

<sup>14</sup> Tulare County General Plan, Background Report, page 5-7.

# TONYVILLE HAMLET PLAN

---

## County Complete Streets / ATP Program

The County has two Programs for Complete Streets for implementing multi-modal (all forms of transportation for all type of users) transportation policies for the Tulare County General Plan and for gaining Active Transportation Project funding from the State and Federal Programs. The County has received over \$6 Million in funding through these programs to date.

## **GOALS, OBJECTIVES AND POLICIES**

This Section of the Tonyville Hamlet Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Tonyville to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Tonyville Hamlet Plan, and input received from Tonyville citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### **Community Development**

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Create a mix of uses with easy access to major roads**

Objective: Promote mixed use zoning and land uses.

### **Policies:**

1. Locate high density residential uses near planned commercial areas.
2. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
3. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
4. The County shall work with the Schools to provide safe routes to school.
5. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Tonyville Hamlet Plan.
6. The Tonyville Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.

# TONYVILLE HAMLET PLAN

---

7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Tonyville Community Plan.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Tonyville.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Tonyville.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

# TONYVILLE HAMLET PLAN

---

## Economic Base

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

#### Policies:

1. Encourage the Tonyville to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

#### Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## Environmental Quality and Public Safety

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Tonyville citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

#### Objective: Protect Agricultural Lands:

Land within the respective Tonyville, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County

# TONYVILLE HAMLET PLAN

---

General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Tonyville.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Tonyville.

# TONYVILLE HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Tonyville Hamlet Development Boundary consists of 34.2. The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 572 by urbanized acres (area within the HDB), which equals 19 persons per urbanized acre (see **Tables 19 and 20**) showing population projections). Projecting the population at a 1.3% growth rate adds 122 persons by year 2030.

### Population Growth Forecast

**Table 19 - Tonyville Population Projections**

Growth Rate	2015	2020	2030
0.013	572	610	694

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>15</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in Year 2013 the community had 96 dwelling units (including vacant dwellings) with a population of 572. At an annual growth rate of 1.3%, the projected housing units are 102 and 117 in years 2020 and 2030, respectively, and projected population is 610 and 694 in years 2020 and 2030, respectively.

Table 20 - Population Projections		
Year	Population	Growth (%)
2015	572	0.013
2016	579	0.013
2017	587	0.013
2018	595	0.013
2019	602	0.013
2020	610	0.013
2021	618	0.013
2022	626	0.013
2023	634	0.013
2024	643	0.013
2025	651	0.013
2026	659	0.013
2027	668	0.013
2028	677	0.013
2029	685	0.013
2030	694	0.013

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, water service levels need to be expanded, for which Grant funding is needed.

<sup>15</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# TONYVILLE HAMLET PLAN

---

## Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require a discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

## Education

Tulare County has five satellite campuses for four-year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

## Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices is in the City of Exeter.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 21**) and Zoning Districts Plan (**see Table 22**).

<b>Table 21 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	29.7
Right-of Ways	4.5
Tonyville HDB	34.2

<b>Table 22 - Proposed Zoning</b>	
Proposed Zones	Acres
C-2-MU	8.6
M-1	2.9
M-1-MU	4.2
R-A	14.0
Right-of Ways	4.5
Tonyville HDB	34.2

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations found in the Tonyville Hamlet Plan. The following components comprise the Tonyville Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overly District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Tonyville Hamlet Plan, there are a several of changes to existing zoning districts. These changes are described below.

# TONYVILLE HAMLET PLAN

---

## Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

## Mixed Use Overlay District

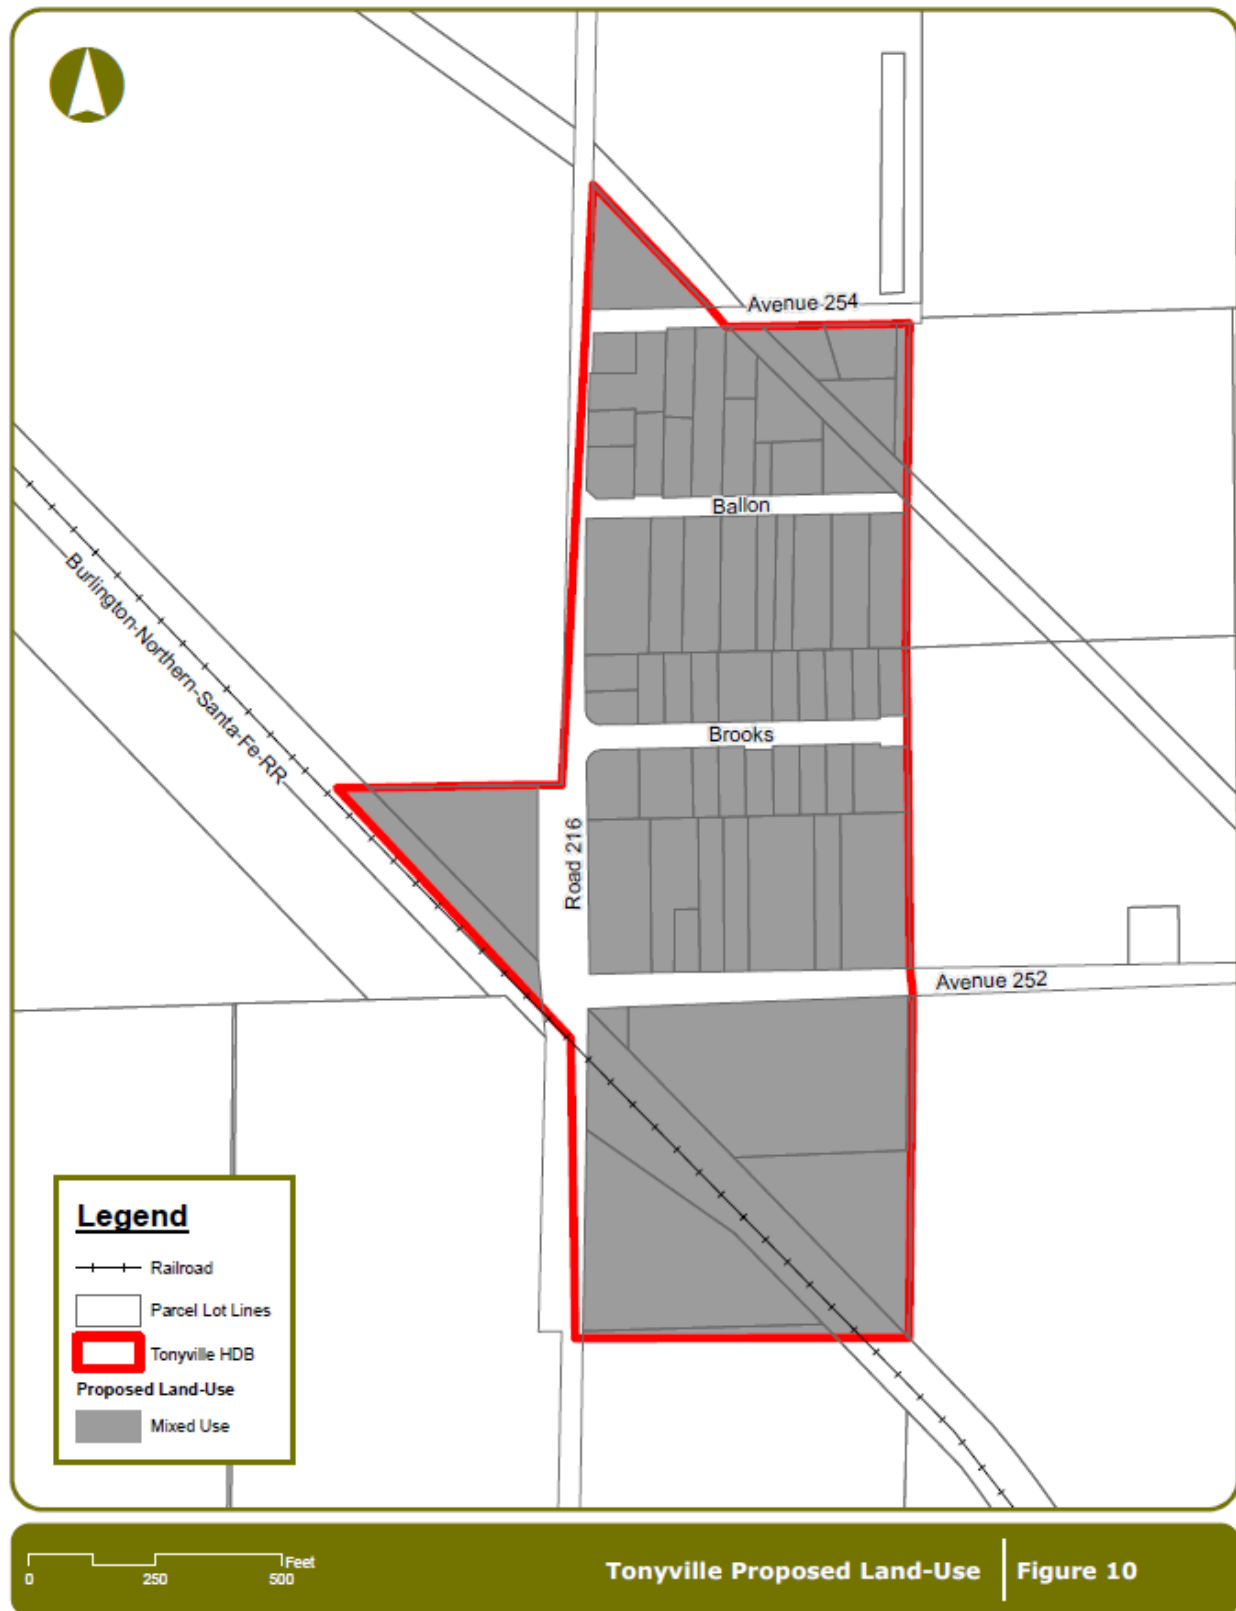

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Tonyville.

## Zoning Map Update

The current Zoning Map (**see Figure 11**) for Tonyville will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 10**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 12**) Tonyville proposed Zoning.

A-2 – Mixed Use Overlay District (Zone Change Text)

A-3 – Development Standards (Mixed Use Zoning Districts)

# TONYVILLE HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

# TONYVILLE HAMLET PLAN

## A-2 *Mixed Use Overlay District (Zone Change Text)*

The following regulations shall apply in the community of Tonyville, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Tonyville.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Tonyville.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# TONYVILLE HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# TONYVILLE HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Tonyville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# TONYVILLE HAMLET PLAN

---

## **A-3     *Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the Tonyville Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Tonyville. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Tonyville Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Tonyville. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1     Entries to buildings should be individualized and clearly identifiable.

A-2     Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3     Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4     The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5     Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6     Each building should have a defined base, body, and cap segment

A-7     Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8     Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9     Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10    Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11    Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# TONYVILLE HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# TONYVILLE HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# TONYVILLE HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# TONYVILLE HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# TONYVILLE HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# TONYVILLE HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# TONYVILLE HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# TONYVILLE HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

# WAUKENA HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Waukena is to develop a plan which can accurately reflect the needs and priorities of this community. Waukena is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks) and to stimulate economic development within the community.

### Location

The community of Waukena (**see Figure 1**) is located on the east side of the San Joaquin Valley and is a census-designated place located in the southwest portion of Tulare County on California State Route 137, approximately 4 miles northeast of Corcoran and approximately 13.5 miles southwest of Tulare. It is bounded by Road 24 in the west, Curti Road in the east, and north and south of Avenue 192 and encompasses 0.9 square miles of land. It is directly served by State Route (SR) 137 (**see Figure 2**). Waukena is in Section 31 and 32 Township 20 South, Range 23 East, and Section 05 Township 21 South, Range 23 East MDB&M, and can be found within Waukena United States Geological Survey 7.5 minute topographic quadrangle. Waukena is located at an elevation of 226 feet National Geodetic Vertical Datum. The coordinates of Waukena are: Latitude: 36.138238 Longitude: -119.509886.

### Planning Area

The Waukena Hamlet Development Boundary (HDB) area consists of 119.3 acres (**see Figure 3**). The Land Uses within the HDB are Mixed Use activities that occupy 104.4 acres. The remaining 14.9 percent are lands dedicated for Right-of-way (**see Table 1**).

No change is proposed to the Hamlet Development Boundary.

Table 1 - Waukena Land Use	
Land Use	Acres
Mixed Use	104.4
Rights-of-way	14.9
Total	119.3

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### Community Outreach and Invitation Process

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. Self-Help Enterprises (SHE) staff performed various outreach methods to promote community participation and make local residents aware of the Strategic Growth Council (SGC) project.

- 1.) An informational flyer was developed.
- 2.) SHE staff went door to door to distribute flyers to every home and business in Waukena during the day and in the evening on Saturday February 13, 2016 and Thursday February 18, 2016
- 3.) SHE partnered with the Waukena School District (WSD) to distribute flyers to their students. Meeting flyers were sent home from school with each of the 250 students of the WSD.
- 4.) Throughout the community outreach process, SHE staff explained the goals of the project and expressed the importance and the community benefits of participating in the SGC community meeting.
- 5.) Flyers were posted at the local corner store and the local post office.

### Community Meeting

Self-Help Enterprises conducted a community meeting in Waukena on Saturday February 20, 2016, at 3:00 pm. The meeting was scheduled during the weekend to make it easier for working residents to attend. The meeting was held at Waukena School. The purpose of the meeting was to discuss Waukena improvement needs, gather community data, and report the findings of the meeting in a final report. Ten residents attended the meeting. Nine (9) community surveys were collected.

### Community Survey

A survey was developed as a tool to gather a variety of community information about multiple topics. The survey inquires about the following community related topics: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation Options, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Infrastructure, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and the priority of various improvement needs. Residents were encouraged to add information and comments to the survey.

# WAUKENA HAMLET PLAN

---

Tulare County Staff has conducted two meetings at Waukena in regard to the Community Plan and Active Transportation Plan, since the SHE conducted their meeting. The first meeting was completed on April 20, 2017, and the second follow up meeting was on Monday, May 15, at the School Board Meeting to present the Zoning Plan, and to see how the County could incorporate the school's planning efforts. The County was informed there would be traffic calming lights installed by the end of the 2017 summer south of and north of the school on Ave. 28.

On April 20, 2017 a community meeting was held in the Community of Waukena. Approximately 4 members of the community attended and voiced their concerns with routes regarding safety improvements. Approximately 250 English and Spanish flyers were distributed to Waukena Joint Union School students to take home to their guardians, notifying them of the meeting that was going to take place. Translation services were provided at the meeting. Power Point presentation was held in English and Spanish.

## Map Assessments

County staff created writable maps of each community in Tulare County Being assessed for the plan. The maps were distributed at the community meetings. Residents were asked to draw areas they felt needed improvements in their communities. County staff translated the maps in English and Spanish and made user friendly by adding school locations on the maps. The maps were taken from Google Earth and formatted to have street locations making it easier for residents to identify their place of residence and future improvements.

Some of the Communities concerns were vehicle's drove past speed limit on road 173. A "slow down" blinker was suggested on highway 137 and Rd 28 when school bus has their flashing red lights on, vehicles still don't stop. A stop sign was highly recommended by the community.

The Waukena Community was very thankful to see they were included in the plan. A PowerPoint presentation was presented in English and Spanish and the County Chief Planner explained the Land use and Zoning for community of Waukena and assisted Waukena community members on the Map survey

# WAUKENA HAMLET PLAN

---

After careful discussion at the Waukena SGC community input meeting, residents concluded that the following is a list of priority improvements Waukena needs:

1. Waukena School Improvements
2. School Traffic Safety
3. Waukena Schools
4. Road Conditions
5. Public Services

## **Waukena School Improvements**

The residents expressed concern for the condition of the Waukena School and said that repairing the school is the priority improvement need in town. Waukena School is a small K-8 school district with approximately 260 students, residents said that the school desperately needs repairs and modernization. Additionally, the building has an asbestos problem. The community is looking for funds to help the school because the district lacks the resources and funding opportunities to cover the cost of repairs. The residents in attendance agreed that the safety and condition of the school for their kids is a priority.

## **School Traffic Safety**

Parents expressed concern for the speed of traffic that travels in front of the school house. Residents are requesting assistance to slow down the traffic, whether it be a speed bump, flashing lights or caution signs warning drivers of the school zone and children crossing, parents are concerned for the safety of their students.

## **Waukena Schools**

The Waukena School District water well has continuously exceeded the MCL for Nitrates, the district has had to provide bottled water to students for many years. Currently they are receiving grant funds to cover the costs of the bottle water through a grant for 36 months grant.

## **Road Conditions**

Residents expressed a need for improvement to Waukena residential roads, the main road gets repaired but the other roads are over looked. The residents are requesting repairs to the following streets:

- Road 28
- Road 36
- Road 42
- Road 32
- Avenue 176
- Avenue 192

## **Public Services**

- Sheriff – Waukena is in the jurisdiction of Tulare County Sheriff's Department (TCSD). The nearest Sheriff sub-station is in Pixley.
- Fire –Tulare County Fire
- Schools –Waukena School District (K-8)
- Libraries – The nearest Library is Corcoran
- Parks – The nearest Park is in Corcoran

# WAUKENA HAMLET PLAN

---

## **Community Resource Center**

The community lacks many resources and needs a place where residents can go to access information and county wide resources. People in Waukena expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used by kids for homework help, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service Waukena residents. This could also be the place where residents access a reliable internet connection.

Please join us for the Community Safe Routes to School meeting. The meeting will dive deeper into the goals of the Safe Routes to School plan. We encourage all the members of the community to attend. We seek and welcome your input!

**Highlights:** What is Safe Routes to School, the need for the safe routes to school plan, identification of project areas, discussion of future funding and more!

**Date: Thursday, April 20, 2017**

**Time: 5:00p.m.**

**Location: Waukena Joint Union – Cafeteria  
19113 Road 28 Tulare, CA 93274**

For more information call: Rosa Sanchez at 559-624-7144

Por favor, acompáñenos a la reunión comunitaria para informarse acerca del programa "Safe Routes to School" (Rutas Seguras a la Escuela). La reunión se enfocará en los objetivos y metas que tiene el plan "Safe Routes to School." Todos los miembros de la comunidad están invitados a asistir. ¡Agradecemos su ayuda y opinión!

**Aspectos destacados:** ¿Que es "Safe Routes to School"?, la necesidad de rutas seguras a la escuela, la identificación de áreas de proyectos, un análisis de finanzas futuras y mucho más!

**Fecha: Jueves, 6 de Abril del 2017**

**Hora: 5:00p.m.**

**Localidad: Waukena Joint Union – Cafetería  
19113 Road 28 Tulare, CA 93274**

Para más información llame a: Rosa Sanchez al 559-624-7144

# WAUKENA HAMLET PLAN

## WAUKENA HAMLET TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Waukena.

#### Population

In 2010, the Population in Waukena was 108 (see Table 2).

Table 2 - Population						
	California	%	Tulare County	%	Waukena	%
Male	19,087,135	49.7%	227,426	50.1%	60	60%
Female	19,334,329	50.3%	226,607	49.9%	48	44.4%
Total	38,421,464		454,033		108	

2010 Census

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns is how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Waukena's population during the Planning Period (see Table 3).

Table 3 - Projected Annual Growth Rate		
	Historic Growth Rates 1990-2007	Projected Growth Rates 2007-2030
County Total	1.9%	2.4%
Incorporated	2.8%	2.9%
Unincorporated	0.46%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

<sup>1</sup> Tulare County Regional Blueprint, page 7

# WAUKENA HAMLET PLAN

## Median Age

Waukena's population's median age is younger than the median age of both Tulare County and the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Waukena	20.4

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 56.5% of Waukena's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 1.0% was two races or more (see Table 4). Approximately 42.4% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues, which may affect their community (see Table 5).

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	Waukena	%
Total	38,421,464		454,033		191	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	81	42.4%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	108	56.5%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	2	1.0%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Waukena

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production.

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Waukena was about 1.6% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 1.6% includes only the employable labor force (that is, not every person of the population), results in about 2 unemployed people of Waukena's person labor force of 56 (see Table 6).

# WAUKENA HAMLET PLAN

---

Table 6 - Employment Status			
Employment Status	California	Tulare County	Waukena
Population 16 years & over	30,312,429	325,404	122
In labor force	19,269,449	194,420	56
Civilian labor force	19,137,441	194,102	56
Employed	17,246,360	170,780	54
Unemployed	1,891,081	23,322	2
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	66

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Median income in Waukena was lower than the State of California and the County of Tulare. Waukena's median household income was \$36,750, compared to \$61,818 for the State of California and \$42,031 for Tulare County (see Table 7).

Table 7 - 2011-2015 American Community Survey Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Waukena CDP	\$36,750	\$45,750	\$16,062

## Severely Disadvantaged Community

Waukena is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, Waukena's median household income was \$36,750, whereas the State of California's median household income was \$61,818. Waukena's median household income was 59% of the State of California's median household income, therefore it is considered a severely disadvantaged community.

# WAUKENA HAMLET PLAN

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, to allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes) (see Tables 8 and 9).

Housing Tenure Table 8 - Housing Tenure			
	California	Tulare County	Waukena
Occupied housing units	12,717,801	133,570	52
Owner-occupied	6,909,176	75,685	18
Renter-occupied	5,808,625	57,885	34

2011-2015 American Community Survey 5-Year Estimates

Table 9 - Housing Tenure (%)			
	California	Tulare County	Waukena
Owner-occupied	54.3%	56.7%	34.6%
Renter-occupied	45.7%	43.3%	65.4%

2011-2015 American Community Survey 5-Year Estimates

### Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in; without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Waukena	3	18	5	29	5	29	3	18	1	6	17

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Waukena indicated that approximately 18% of the housing units were sound. Approximately 76% of Waukena's housing units were deteriorated and 6% were dilapidated (see Table 10).

### Age of Structures

According to the U.S. Census, the 2011 – 2015 Community Survey noted that most of the housing structures in Waukena were built between 1950 and 2009, (see Table 11). In 2015, the total number of housing units in Tulare County were 144,792.

# WAUKENA HAMLET PLAN

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Waukena
Total housing units	13,845,790	144,792	59
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	11
Built 1990 to 1999	1,495,571	21,767	12
Built 1980 to 1989	2,117,819	22,733	3
Built 1970 to 1979	2,503,688	27,111	2
Built 1960 to 1969	1,871,029	15,500	0
Built 1950 to 1959	1,907,512	13,694	23
Built 1940 to 1949	865,607	7,494	2
Built 1939 or earlier	1,298,438	8,186	6

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015, the average renter occupied household size in Waukena was 3.36 persons per household (see Table 12). The average owner occupied household size is 3.41.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
Waukena	4.33	3.32

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition.

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Waukena	0%	0%

2011-2015 American Community Survey 5-Year Estimates

In 2015, the rental vacancy rate in Waukena was 0%, which was lower than Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

<sup>2</sup> U.S. Department of Housing and Urban Development, "Measuring Overcrowding in Housing" 2007. Page 2 See: [http://www.huduser.org/publications/pdf/Measuring\\_Overcrowding\\_in\\_Hsg.pdf](http://www.huduser.org/publications/pdf/Measuring_Overcrowding_in_Hsg.pdf)

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

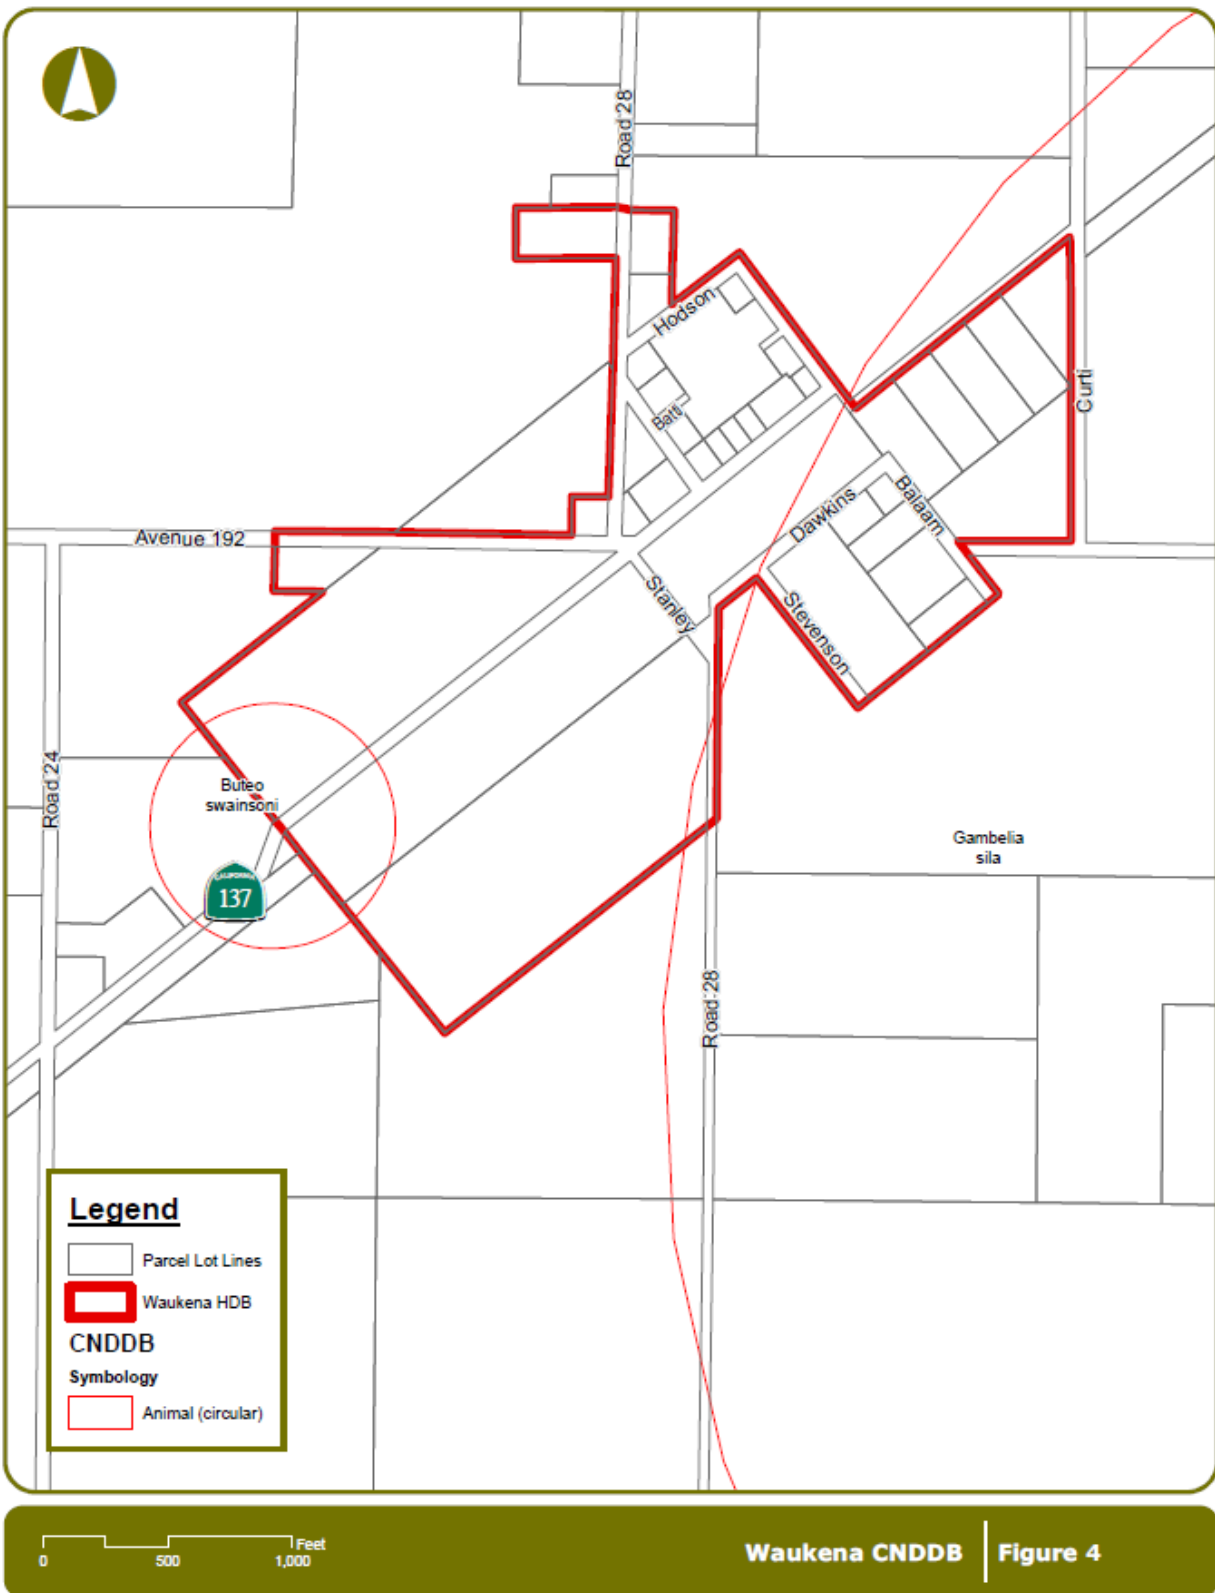

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016, (**see Figure 4**) indicates there are special status species within the Waukena Quadrant Species List (which includes the Waukena Planning Study Area) consisting of three animal species and no plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Swainson's hawk (*Buteo swainsoni*, state threatened); and Blunt-nosed leopard lizard (*Gambelia sila*, federal endangered). The California Department of Fish and Wildlife (CDFW)

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Waukena are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest).

According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Waukena] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the Soil Survey of Tulare County, California, Western Part (2003), prepared by the United States Department of Agriculture (USDA), Soil Conservation Service, (**see Figure 5**), the following soil type is located in Waukena:

**Colpien loam, 0 to 2 percent slopes**, is very deep and well drained, medium or high runoff, some areas are ponded; very slow permeability. The soil is suitable for livestock grazing. Vegetation is scattered saltbush with annual grasses and forbs.

## Physical Conditions

### Air Quality

The Waukena Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Waukena is located near the southwestern end of the Valley with prevailing winds from the northwest, it is susceptible to the accumulation of adversely modified

# WAUKENA HAMLET PLAN

---

air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Waukena include agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C1225E, most of Waukena is in flood zone A. The 100 year flood zone meanders along the southern portion and the northeast portion of Waukena (**see Figure 6**). The expected source of this flooding hazard is Cameron Creek and its distributary channels. FEMA requires development in Flood Zone A to be constructed so that a building's ground floor elevation is above the flood contour line existing in the flood area. In addition, there are portions of Waukena, within the FEMA 500 year flood zone.

"Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA)." "Floodplain" or "flood-prone area" means any land area susceptible to being inundated by water from any source. "Base Flood" is the flood having a one percent chance of being equaled or exceeded in any given year. "One-hundred-year flood" or "100 year flood" has the same meaning as "Base Flood." "Special Flood Hazard Area" is the land in the floodplain subject to a one percent or greater chance of flooding in any given year. "Floodway" means the channel of a river or other watercourse and the adjacent land area that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one (1) foot. The floodway is delineated on the Flood Boundary Floodway Map, on maps adopted by the State Reclamation Board when acting within its jurisdiction, and on the County Zoning Map (signified by the F-1 Primary Flood Plain Zone). The F-2 Secondary Flood Plain Combining Zone which is intended for application to those areas of the County which lie within the fringe area or setback of the flood plain and are subject to less severe inundation during flooding conditions than occur in the F-1 Zone.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Waukena there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in Special Flood Hazard Areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Future flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood->

---

<sup>6</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C1225E, Panel Number 1225 of 2550, June 16, 2009. <https://msc.fema.gov/portal/>

# WAUKENA HAMLET PLAN

[hazard-information/flood-control-information/](http://hazard-information/flood-control-information/). On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

Figure 6 - FEMA Flood Waukena

# WAUKENA HAMLET PLAN

## Noise

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. **Table 14** summarizes the daily traffic volumes along State Route 137 from the Kings County Line to Road 68. Together, these noise sources place a portion of Waukena's urbanized areas within the 60 dB Ldn noise contour. The Noise Element includes performance standards for new residential or other noise-sensitive land uses which are to be located near noise-impacted areas. The Element indicates that these uses will not be permitted unless effective design measures can be integrated into the development to mitigate the impact of noise.<sup>7</sup>

Table 14 - Noise Levels					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
State Route 137 from King County Line to Road 68	3,350	38	81	175	376

Source: 2010 General Plan Background Report

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks). The prioritize concerns of the Community include:

### Natural Gas/Electricity

PG&E provides service to Waukena.

### Water

Domestic water service in Waukena is provided by individual wells.

### Sewer

There is no community wide sewer system in Waukena. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent. No public sewer facilities are available in Waukena, each land owner relies on septic systems for wastewater.

<sup>7</sup> Tulare County General Plan 2030 Update, August 2012; United States Department of Transportation, Federal Transit Administration. Transit Noise and Vibration Impact Assessment, FTA-VA-90-1003-06; May, 2006.

# WAUKENA HAMLET PLAN

---

## Storm Water Drainage

Waukena does not currently have a storm drainage system. “A storm drainage system is designed to drain excess rain and groundwater from (roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.”<sup>8</sup>

## Solid Waste

Solid waste disposal services for the Community of Waukena is provided by Tule Trash, a private company. Solid waste generated in Waukena can be disposed at Road 80 Landfill, located at 8614 Avenue 328 in Visalia, California.

## Roads

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting

---

<sup>8</sup> Action Program 9, Tulare County 2015 Housing Element

# WAUKENA HAMLET PLAN

- rock beneath the roadway, and placing and compacting hot mix asphalt
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. “It is commonly used as patching material and on lower volume service roads”<sup>9</sup>

**Table 15** lists the roadways in need of repair, the limits, and type of maintenance strategy proposed. **Figure 8** graphically displays this information on a map.

**Table 15 - Roads in Need of Major and Medium Repair**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Balaam Drive	Dawkins Drive to Avenue 192	GRX
2	Dawkins Drive	Stanley Drive to Balaam Drive	CHIP
3	Road 28	Avenue 192 to Stevenson Drive	GRX

OLAY – overlay resurfacing operation  
CHIP – chip seal  
GRX – grind and remix

ACST – asphalt reconstruction  
RCST – cold mix reconstruction

(Source: County of Tulare Public Works, 2012)

## Street Lights

Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian accidents by increasing the awareness of drivers relative to pedestrians.

**Table 16** identifies the location of existing street lights that are maintained by Tulare County, in Waukena, as well as their specifications. Figure 6 also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type “W” represents a wood post for which the light is commonly shared with a Utility provider. Similarly, “M” represents metal and “C” represents concrete.”<sup>10</sup>

**Table 16 - Specifications of Existing Street Lights**

No.	East-West	North-South	Location	Pole	Lumens	Pole Type	Arm Direction	Utility

- Streets (medium repair)
- Streets (major repair)
- Sidewalks
- Parcels
- HDB

\*Roads, Sidewalks, ADA Curbs, Street Lights

# WAUKENA HAMLET PLAN

## Sidewalks

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

The County and VRPA Technologies surveyed existing sidewalks within the Community. **Table 17** identifies the location of existing sidewalks in Waukena. **Figure 8** also displays this information graphically. The sidewalks represented in **Table 17** and **Figure 8** do not distinguish between ADA compliant sidewalks and noncompliant sidewalks.

**Table 17 - Existing Sidewalks**

Location of Existing Sidewalks			
No.	Roadway	Limits	Location
1	Harmon Road	Stanley Drive to 300' south	West side
2	Stanley Drive	Dawkins Drive to Harmon Road	South side

(Source: County of Tulare Public Works and VRPA Technologies, February 2014)

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there is one ADA compliant curb ramp located within Waukena and is listed in **Table 18** and displayed in **Figure 8**.<sup>11</sup>

**Table 18 - Location of Existing ADA Ramps**

# WAUKENA HAMLET PLAN

---

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare's urban transit systems. Public transit is currently not available in Tonyville. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Tonyville, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. In Tulare County, bicycle travel is not a major mode of transportation and bicycles are not seen outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. Currently no bike routes are within or near the community of Waukena.

## AMTRAK

The Hanford AMTRAK station, located approximately 10 miles to the northwest in Kings County, is the closest station to Waukena providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 15 miles northeast. Fresno Yosemite International Airport (FAT), approximately 70 miles northeast of Waukena is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 80 miles southeast of Waukena and offers direct flights to several destinations.

# WAUKENA HAMLET PLAN

---

## PUBLIC SERVICES

### Sheriff

Police protection services are provided in Waukena by the Tulare County Sheriff's Department sub-station, located at 161 North Pine Street, in Pixley, approximately 20 miles southwest of Waukena. The substation provides patrol services 24-hours per day, 365 per year. Additional Sheriff resources are available as needed via dispatch from the main Sheriff's Office in Visalia, CA.

### Fire

Fire protection and emergency medical services are provided for Waukena by the Tulare County Fire Department. The community is served by Tulare County Fire Department Station #25, located at 2082 Foster Drive, in Tulare, California. Engine 25 is assigned to this location. The fire department personnel also provide emergency medical aid.

There are currently no fire hydrants in Waukena.

### Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Waukena Hamlet Plan Area is within the Waukena Joint School District. The District provides K-8 grade education at its Waukena School. High School students attend Tulare Joint Union High School District located ten (10) miles east.

### Library

"The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch."<sup>12</sup> Waukena does not have a public library; the nearest library is located in Corcoran, Kings County, California, approximately five (5) miles southwest of Waukena. Tulare Public Library is located approximately ten (10) miles to the northeast, in the City of Tulare,

### Parks

There are no County owned/operated public parks in Waukena. The closest public is located in Kings County, approximately five (5) miles southwest in the City of Corcoran. A number of parks are located in the City of Tulare and are operated by the City.

## THE WAUKENA HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

---

<sup>12</sup> General Plan Background Report, page 7-96

# WAUKENA HAMLET PLAN

---

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>13</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>14</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing circulation and Transportation Conditions

Waukena is a small agricultural community, it is directly served by State Route 137. There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

<sup>13</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

<sup>14</sup> Tulare County General Plan Background Report, page 5-7.

# WAUKENA HAMLET PLAN

---

## County Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

## **GOALS, OBJECTIVES AND POLICIES**

This Section of the Waukena Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Waukena to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Based on the Waukena Hamlet Plan, and input received from Waukena citizens during the public outreach process, the goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Create a mix of uses with easy access to major roads**

Objective: Promote mixed use zoning and land uses.

#### Policies:

1. Locate high density residential uses near planned commercial areas.
2. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
3. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.

# WAUKENA HAMLET PLAN

---

4. The County shall work with the Schools to provide safe routes to school.
5. The Teviston Legacy Plan should be reviewed every five years to determine if amendments are appropriate.
6. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Teviston Community Plan.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Waukena.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Waukena.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

# WAUKENA HAMLET PLAN

---

## Economic Base

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

#### Policies:

1. Encourage the Waukena to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

#### Policies:

1. Assure that commercial and industrial

developments are designed so that traffic will not impact upon residential areas.

2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## Environmental Quality and Public Safety

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Waukena citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

#### Objective: Protect Agricultural Lands:

Land within the respective Waukena, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the

# WAUKENA HAMLET PLAN

---

reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.

1. Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Waukena.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Waukena.

# WAUKENA HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 119.3 acre Waukena Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute 88 percent of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 108 by 119.3 urbanized acres (area within the HDB), which equals 0.9 persons per urbanized acre (see **Tables 16 and 17**) showing population projections). Projecting the population at a 1.3% growth rate adds 23 persons in year 2030. Multiplying the 23 persons by the 1/3 ratio suggests an additional 0.3 acres of land will be required to accommodate development by the year 2030.

### Population Growth Forecast

**Table 19 - Waukena Population Projects**

Growth Rate	2015	2020	2030
0.013	108	115	131

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in Year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>15</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in year 2015 the community had 52 dwelling units (including vacant dwellings) with a population of 108. At an annual growth rate of 1.3%, the projected housing units are 55 and 63 in years 2020 and 2030, respectively, and projected population is 115 and 131 in years 2020 and 2030, respectively.

Table 20 - Population Projects		
Year	Population	Growth (%)
2015	108	0.013
2016	109	0.013
2017	111	0.013

2029	129	0.013
2030	131	0.013

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

<sup>15</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# WAUKENA HAMLET PLAN

---

## Infrastructure

In order for more development to occur, water service level needs to be expanded, for which grant funding will be required.

## Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require a discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

## Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

## Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices are in the City of Tulare.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (see **Table 21**) and Proposed Zoning Plan map (see **Table 22**) have been updated.

<b>Table 21 - Proposed Land Use</b>

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the general plan recommendations contained in the Waukena Legacy Plan. The following components comprise the Waukena Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Waukena Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

### Mixed Use Overlay District

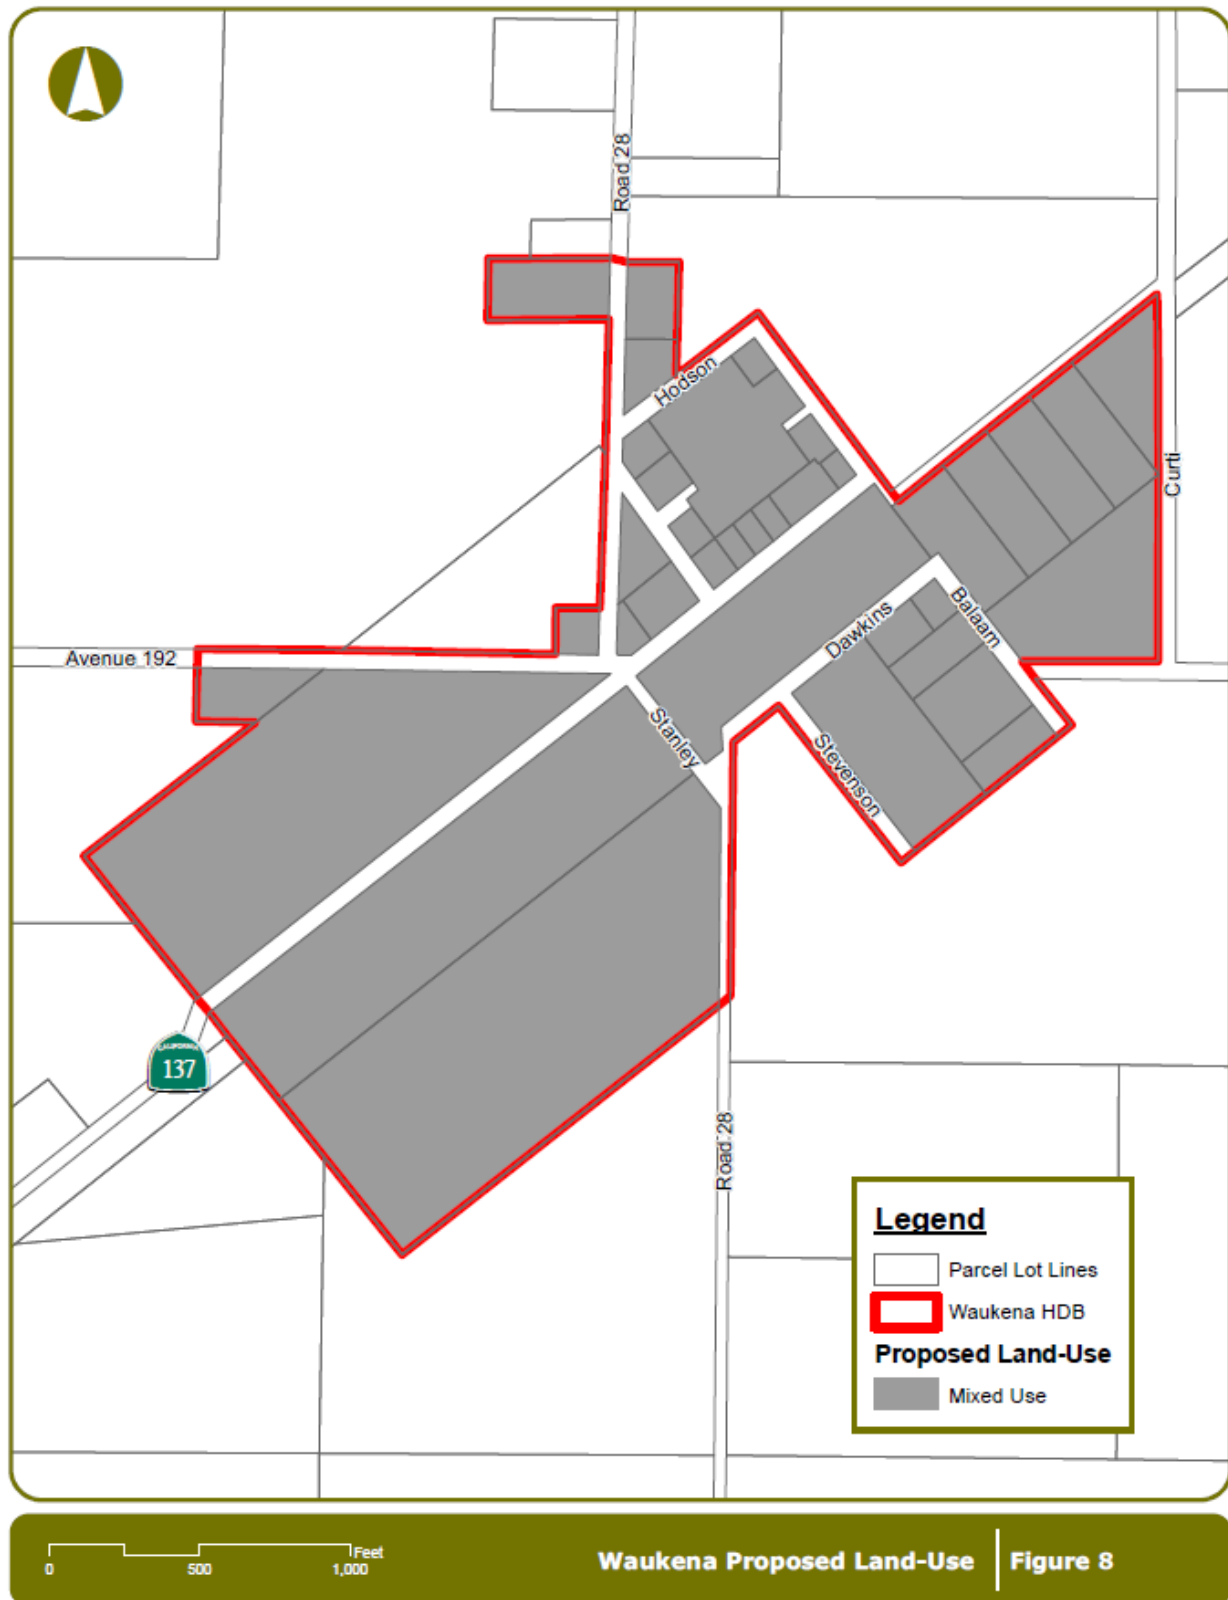

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Waukena.

### Zoning and Land Use Maps Updated

The current Zoning Map (**see Figure 9**) for Waukena will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 8**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 10**) Waukena Proposed Zoning District.

A-2 – Mixed Use Overlay District (Zone Change Text)

A-3 – Development Standards (Mixed Use Zoning Districts)

# WAUKENA HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1

# WAUKENA HAMLET PLAN

## A-2 *Mixed Use Overlay District (Zone Change Text)*

The following regulations shall apply in the community of Waukena, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Waukena.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Waukena.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# WAUKENA HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# WAUKENA HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Waukena. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# WAUKENA HAMLET PLAN

---

## **A-3     *Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the Waukena Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Waukena. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Waukena Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Waukena. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1     Entries to buildings should be individualized and clearly identifiable.

A-2     Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3     Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4     The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5     Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6     Each building should have a defined base, body, and cap segment

A-7     Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8     Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9     Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10    Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11    Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# WAUKENA HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# WAUKENA HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# WAUKENA HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# WAUKENA HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# WAUKENA HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# WAUKENA HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# WAUKENA HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# WAUKENA HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE HAMLET PLANS 2017 ) RESOLUTION NO. 9366  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, AND PART III )  
AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT                     )  
TO SECTION 16.H OF ORDINANCE NO. 352            )  
TO ALLOW ADDITIONAL BY-RIGHT USES             )       RESOLUTION NO. 9369  
CONSISTENT WITH THE ADOPTED HAMLET            )  
PLANS, AS PROPOSED IN CHANGE                    )  
OF ZONE NO. PZC 17-039                            )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

CLERK, BOARD OF SUPERVISORS

BY:

  
Deputy Clerk

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# WEST GOSHEN HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for West Goshen is to develop a plan which can accurately reflect the needs and priorities of this community. West Goshen is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [water distribution piping, and storage tanks], curbs, gutters, and sidewalks) and to stimulate economic development within the community.

### Location

The community of West Goshen (**see Figure 1**) is located on the east side of the San Joaquin Valley and is a census-designated place located approximately 1.5 miles of the west of the community of Goshen along Ave. 308, just east of Kings County. It is bounded by Avenue 304 in the south, railroad tracks in the north, 1st Avenue in the west, and west of Markham Road in the east and encompasses 1.2 square miles of land. It is not directly served by any State Route. West Goshen is situated approximately 1.5 miles west of Highway 99 and 1-mile north of Highway 198 (**see Figure 2**). West Goshen is located in Section 22 and 23 Township 18 South, Range 23 East, MDB&M, and can be found within Goshen United States Geological Survey 7.5 minute topographic quadrangle. West Goshen is located at an elevation of 443 feet National Geodetic Vertical Datum. The coordinates of West Goshen are: Latitude: 36°20'57"5119 Longitude: 119°27'27".

### Planning Area

The West Goshen Hamlet Development Boundary (HDB) area consists of 477.2 acres (**see Figure 3**). The Land Uses within the HDB are described include agricultural activities (orchards and pasture), which currently occupy 92 percent of the 477.2 acres. Urban development, including urbanized uses such as residential development occupy 9.6 percent of the 477.2 acres. The remaining 5.7 percent are lands dedicated for Right-of-way (**see Table 1**).

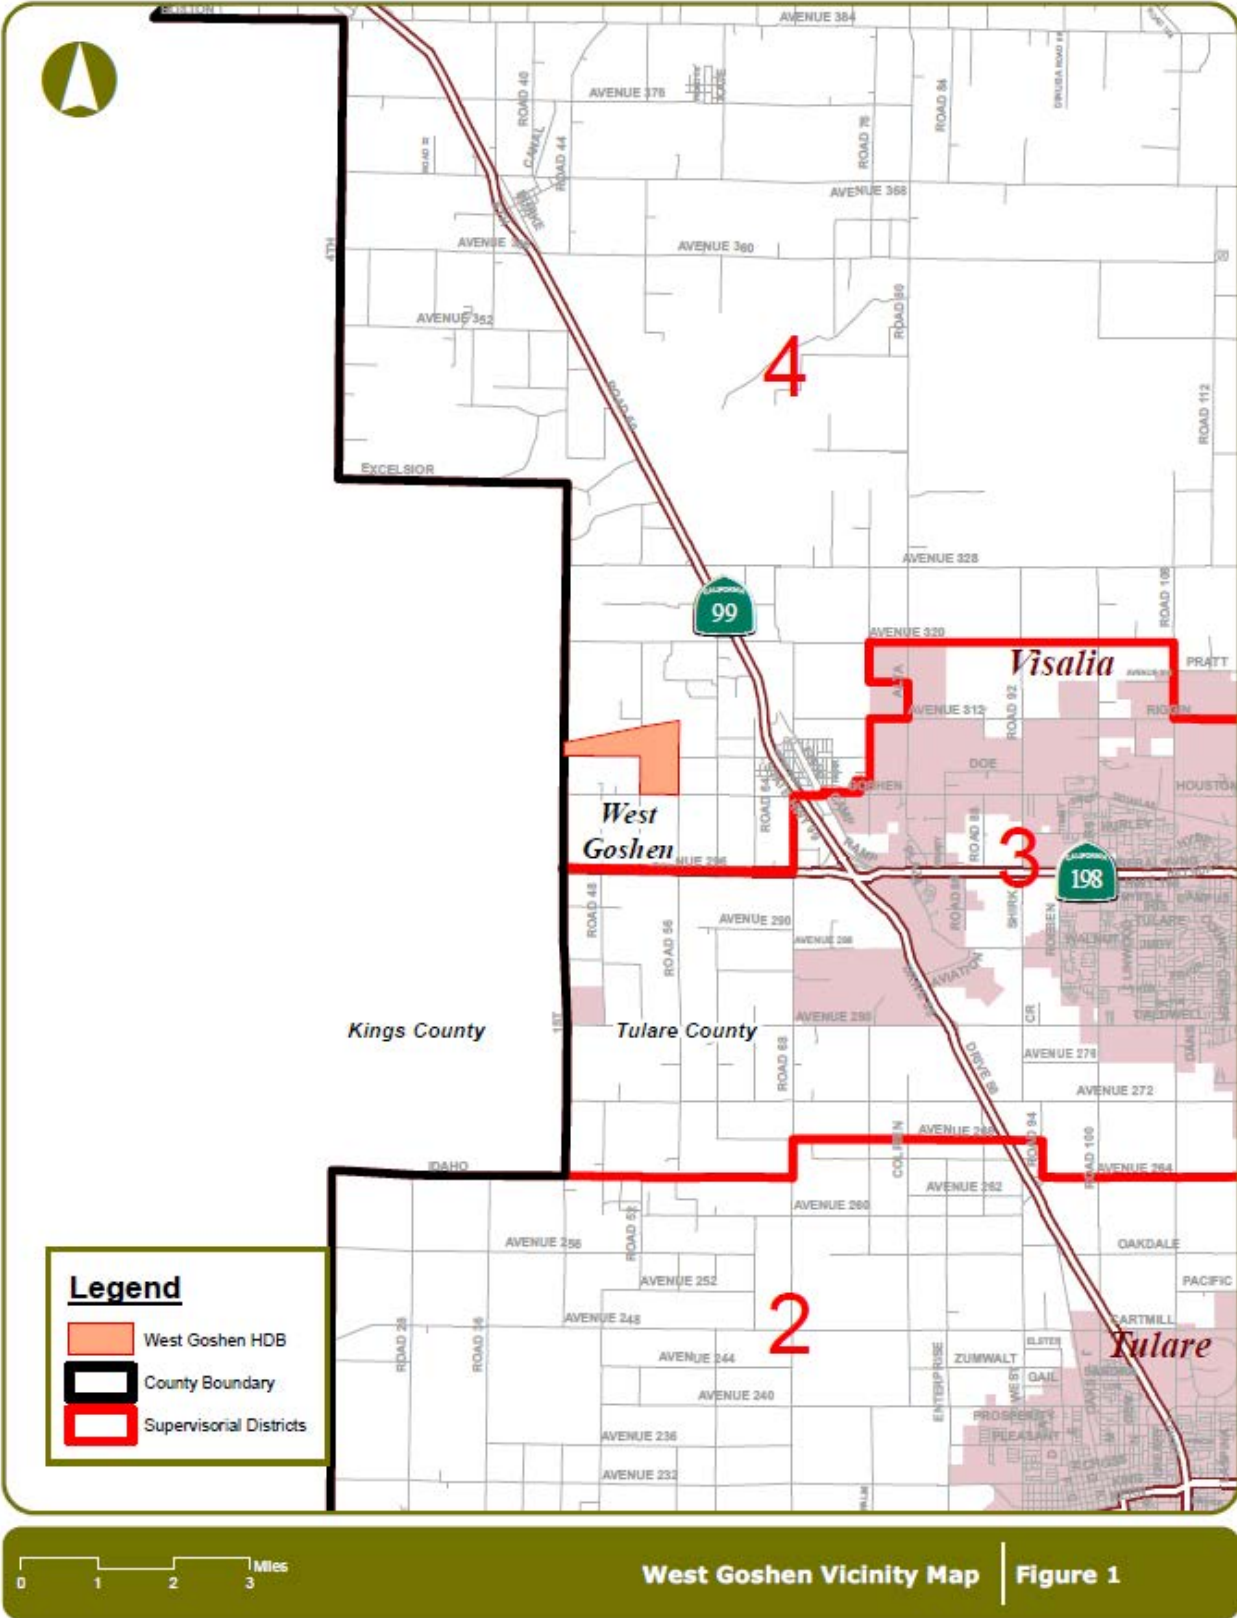

Table 1 - West Goshen Land Use	
Land Use	Acres
Agricultural	440.0
Residential	9.6
Rights-of-way	27.6
Total	477.2

Source: Tulare County GIS

No change is proposed to the Hamlet Development Boundary.

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### Community Outreach and Invitation Process

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the SGC project, Self Help Enterprises (SHE) went door to door throughout the community of West Goshen to distribute flyers at every homes, businesses, and schools. SHE emphasized with residents about the importance of participating in this process. SGC partnered with the Goshen School to send flyers home with every student. Meeting invitations were sent to the members of the West Goshen Mutual Water Company.

### Community Outreach Steps

Self-Help Enterprises (SHE) utilized various outreach methods to promote community participation and increase awareness of the SGC project:

1. An informational flyer was developed.
2. On September 13 and 14, 2015 SHE staff went door to door to distribute flyers to homes.
3. SHE staff partnered with members of the West Goshen Water Mutual Company to encourage community involvement. This group distributed fliers on September 15 and 16, 2015
4. SHE made phone calls to local residents.
5. Throughout the community outreach process, SHE staff explained the goals of the project and emphasized the importance benefits of participating in the SGC community meeting.
6. To ensure that residents had multiple opportunities to be made aware of the meeting, flyers were posted at the local corner store and all businesses.

### Community Meeting

The Strategic Growth Council held a community input meeting in W. Goshen on Thursday, September 17, 2015 at 6:00 pm. The meeting was scheduled in the evening to allow all residents to attend, including those that work during the day. The meeting was held in the cafeteria of the Goshen school located at 6505 Ave 308 Visalia CA. More than 21 West Goshen residents attended the meeting. 20 surveys were collected.

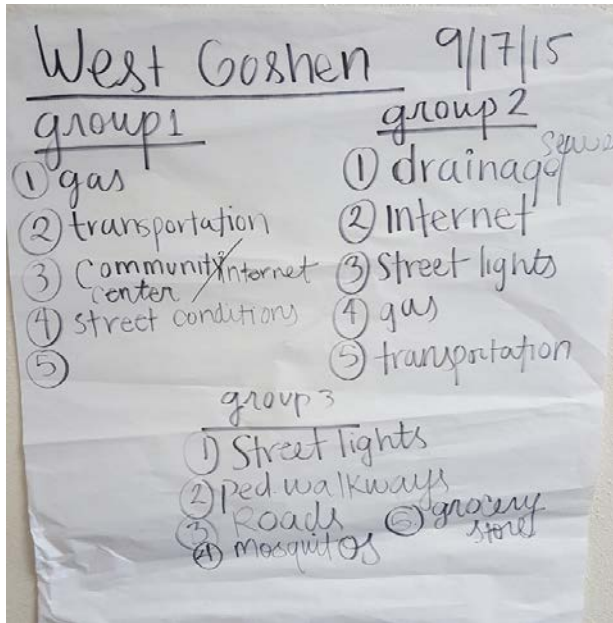

# WEST GOSHEN HAMLET PLAN

---

## Community Survey

A detailed survey was developed in efforts to gather specific community information about different areas of concern. The survey asked about the following: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and Priority Improvements.

A second meeting was held on November 21, 2016 in Goshen at the Elementary School. More than 16 West Goshen residents attended. Both SHE and Tulare County staff were present to discuss the results of the survey and to explain the Community Planning process.

1. Natural Gas
2. Sewer
3. Street Conditions
4. Street lights
5. Transportation/Bus Stops
6. Internet
7. Community Center

## **Natural Gas**

Some residents report that they do not have natural gas in their homes and that they use propane as their source of fuel. This is concerning to them because propane is more expensive than natural gas and the cost to heat their homes with propane is more than they can afford. Survey results show that the residents that do not have natural gas would like to have it but cannot afford the cost of extending gas lines to their homes. Residents are requesting assistance from Tulare County to access resources to help them cover the cost of extending gas lines to their homes.

# WEST GOSHEN HAMLET PLAN

---

## **Water**

West Goshen Mutual Water Company, a small mutual made up of approximately 90 water customers is in the process of dissolving as they are now fully consolidated with Calwater. A few private wells in the area were also able to join in on the consolidation.

## **Sewer**

There is no community wide sewer system in West Goshen. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent. SGC survey results indicate that the West Goshen residents are in favor of creating a community wide sewer system.

## **Storm Water Drainage**

Residents report that the community does not have adequate storm water drainage. Large puddles form when it rains and the water does not drain because there is nowhere for the water to go. Residents report that some streets flood during the rainy season especially Road 308 and Road 309. The stagnant water attracts insects and mosquitos which adds another problem to the issue.

## **Road Conditions**

Roads conditions are a huge concern to the residents of W. Goshen. It is reported that road conditions are poor and most roads need work. The roads have potholes, cracks and bumps. This makes residents concerned about both driving conditions and walkability. Drivers feel unsafe and are constantly worried about damage to their vehicles while driving. West Goshen roads are not regularly maintained and the few times that roads have been serviced, the repair work was poor because the roads were patched and not repaired. The following roads are a priority to the residents:

- Avenue 308
- Avenue 309
- \*Road 52
- Road 50
- Road 48
- Markham

## **Street Lights**

Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the sheriff's department seldom patrols West Goshen. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Sidewalks**

The community of West Goshen has too few sidewalks. Residents that were surveyed reported that the streets they live on do not have sidewalks. People report that this is a problem for kids and parents who push a stroller through town. The lack of sidewalks becomes an even bigger problem during the rainy season. When it rains, residents and kids are forced to walk in the mud and through big puddles of water. West Goshen traffic travels at a high rate of speed (see next section), and the absence of

# WEST GOSHEN HAMLET PLAN

---

sidewalks to provide a clear separation between walking paths and the road creates a safety hazard for pedestrians.

## **Traffic Rules Enforcement to Slow Traffic**

The area of West Goshen has a problem with speeding traffic. Residents expressed that many vehicles travel at an unsafe rate of speed and there are no speed limit signs to enforce the speed limit. Residents believe that by installing speed limit signs to clearly display the legal speed limit, this issue could be improved. A speed limit sign is especially needed on West Goshen's main road, Road 9. Along with speed limit signs, residents feel traffic law enforcement is needed. The California Highway Patrol and the Tulare County Sheriff's Department are rarely seen in West Goshen, the result of this is that people are rarely cited for violating traffic laws.

## **Internet Access**

Most families in West Goshen do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. Without access to the internet, they are unable to do things such as online job hunting, applying for resources, and or provide homework help to their kids.

## **Community Resource Center**

The community lacks resources and needs a facility where residents can access information and county services. People in West Goshen expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used for homework assistance, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service West Goshen residents. This could also be the place where residents access a reliable internet connection.

## **Community Resources**

Sheriff –West Goshen is in the jurisdiction of Tulare County Sheriff's Department (TCSD). The TCSD is responsible for patrolling the area of West Goshen.

Fire –Tulare County Fire

Schools – Goshen School is part of the Visalia Unified School District.

# WEST GOSHEN HAMLET PLAN

## WEST GOSHEN TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as West Goshen.

#### Population

In 2015, the population of West Goshen was 675 (see Table 2).

Table 2 - Population						
	California	%	Tulare County	%	West Goshen	%
Male	19,087,135	49.7%	227,426	50.1%	305	45.2%
Female	19,334,329	50.3%	226,607	49.9%	370	54.8%
Total	38,421,464		454,033		675	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project West Goshen's population during the Planning Period (see Table 3).

Table 3 - Projected Annual Growth Rates		
	Historic Growth Rates 1990-2007	Projected Growth Rates 2007-2030
County Total	1.9%	2.4%
Incorporated	2.8%	2.9%
Unincorporated	0.46%	1.3%

<sup>1</sup> Tulare County Regional Blueprint, page 7

# WEST GOSHEN HAMLET PLAN

## Median Age

West Goshen's median age of 23.2 is younger than the median age of both Tulare County and of the State of California (see Table 4).

<b>Table 4 - Median Age</b>	
<b>Geography</b>	<b>Median Age (years)</b>
California	35.8
Tulare County	30.3
West Goshen	23.2

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 21.3% of West Goshen's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 0% was two races or more (see Table 5). Approximately 78.7% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

<b>Table 5 - Race &amp; Ethnicity</b>						
	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>West Goshen</b>	<b>%</b>
Total	38,421,464		454,033		675	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	531	78.7%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	144	21.3%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	0%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in West Goshen

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production (see Table 6).

# WEST GOSHEN HAMLET PLAN

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for West Goshen was about 3.6% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 3.6% includes only the employable labor force (that is, not every person of the population) results in about 16 unemployed persons of West Goshen's person labor force of 275.

<b>Table 6 - Employment Status</b>			
<b>Employment Status</b>	<b>California</b>	<b>Tulare County</b>	<b>West Goshen</b>
Population 16 years & over	30,312,429	325,404	441
In labor force	19,269,449	194,420	275
Civilian labor force	19,137,441	194,102	275
Employed	17,246,360	170,780	259
Unemployed	1,891,081	23,322	16
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	166

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

West Goshen's median household income was \$20,700, compared to \$42,708 for Tulare County and \$61,818 for the State of California (see Table 7).

<b>Table 7 - 2011-2015 American Community Survey: Income</b>			
<b>Geography</b>	<b>Median household income (dollars)</b>	<b>Median family income (dollars)</b>	<b>Per capita income (dollars)</b>
<b>California</b>	\$61,818	\$70,720	\$30,318
<b>Tulare County</b>	\$42,031	\$44,814	\$17,876
<b>West Goshen CDP</b>	\$20,700	\$14,756	\$20,808

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

In 2015, West Goshen's median household income was \$20,700, whereas the State of California's median household income was \$61,818. West Goshen's median household income was 33.4% of the State of California's median household income, and therefore it is considered a severely disadvantaged community.

# WEST GOSHEN HAMLET PLAN

## HOUSING CHARACTERISTICS

### Tenure

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the percentage of housing units that were owner occupied was 22.7% in West Goshen, 56.7% in Tulare County, and 54.3% in the State of California (see Tables 8 and 9).

Table 9 - Housing Tenure			
	California	Tulare County	West Goshen
Occupied housing units	12,717,801	133,570	172
Owner-occupied	6,909,176	75,685	39
Renter-occupied	5,808,625	57,885	133

2011-2015 American Community Survey 5-Year Estimates

Table 8 - Housing Tenure (%)			
	California	Tulare County	West Goshen
Owner-occupied	54.3%	56.7%	22.7%
Renter-occupied	45.7%	43.3%	77.3%

2011-2015 American Community Survey 5-Year Estimates

### Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
West Goshen	10	23%	11	26%	22	51%	0	0%	0	0%	43

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in West Goshen indicated that approximately 23% of the housing units were sound. Approximately 77% of West Goshen's housing units were deteriorated and 0% were dilapidated (see Table 10).

# WEST GOSHEN HAMLET PLAN

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009 (see Table 11). The total number of housing units in West Goshen is 179.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	West Goshen
Total housing units	13,845,790	144,792	179
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	8
Built 2000 to 2009	1,646,490	25,997	25
Built 1990 to 1999	1,495,571	21,767	0
Built 1980 to 1989	2,117,819	22,733	50
Built 1970 to 1979	2,503,688	27,111	22
Built 1960 to 1969	1,871,029	15,500	0
Built 1950 to 1959	1,907,512	13,694	57
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	17

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in West Goshen was 3.83 persons per household (see Table 12). The average owner occupied household size is 4.26.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	3.00	2.91
Tulare County	3.24	3.50
West Goshen	4.26	3.83

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in West Goshen was 0%, which was lower than both Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate was 0%, which was lower than Tulare County at 1.7% and the State of California at 1.4%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
West Goshen	0%	0%

## ENVIRONMENTAL CONDITIONS

### Wildlife:<sup>3</sup>

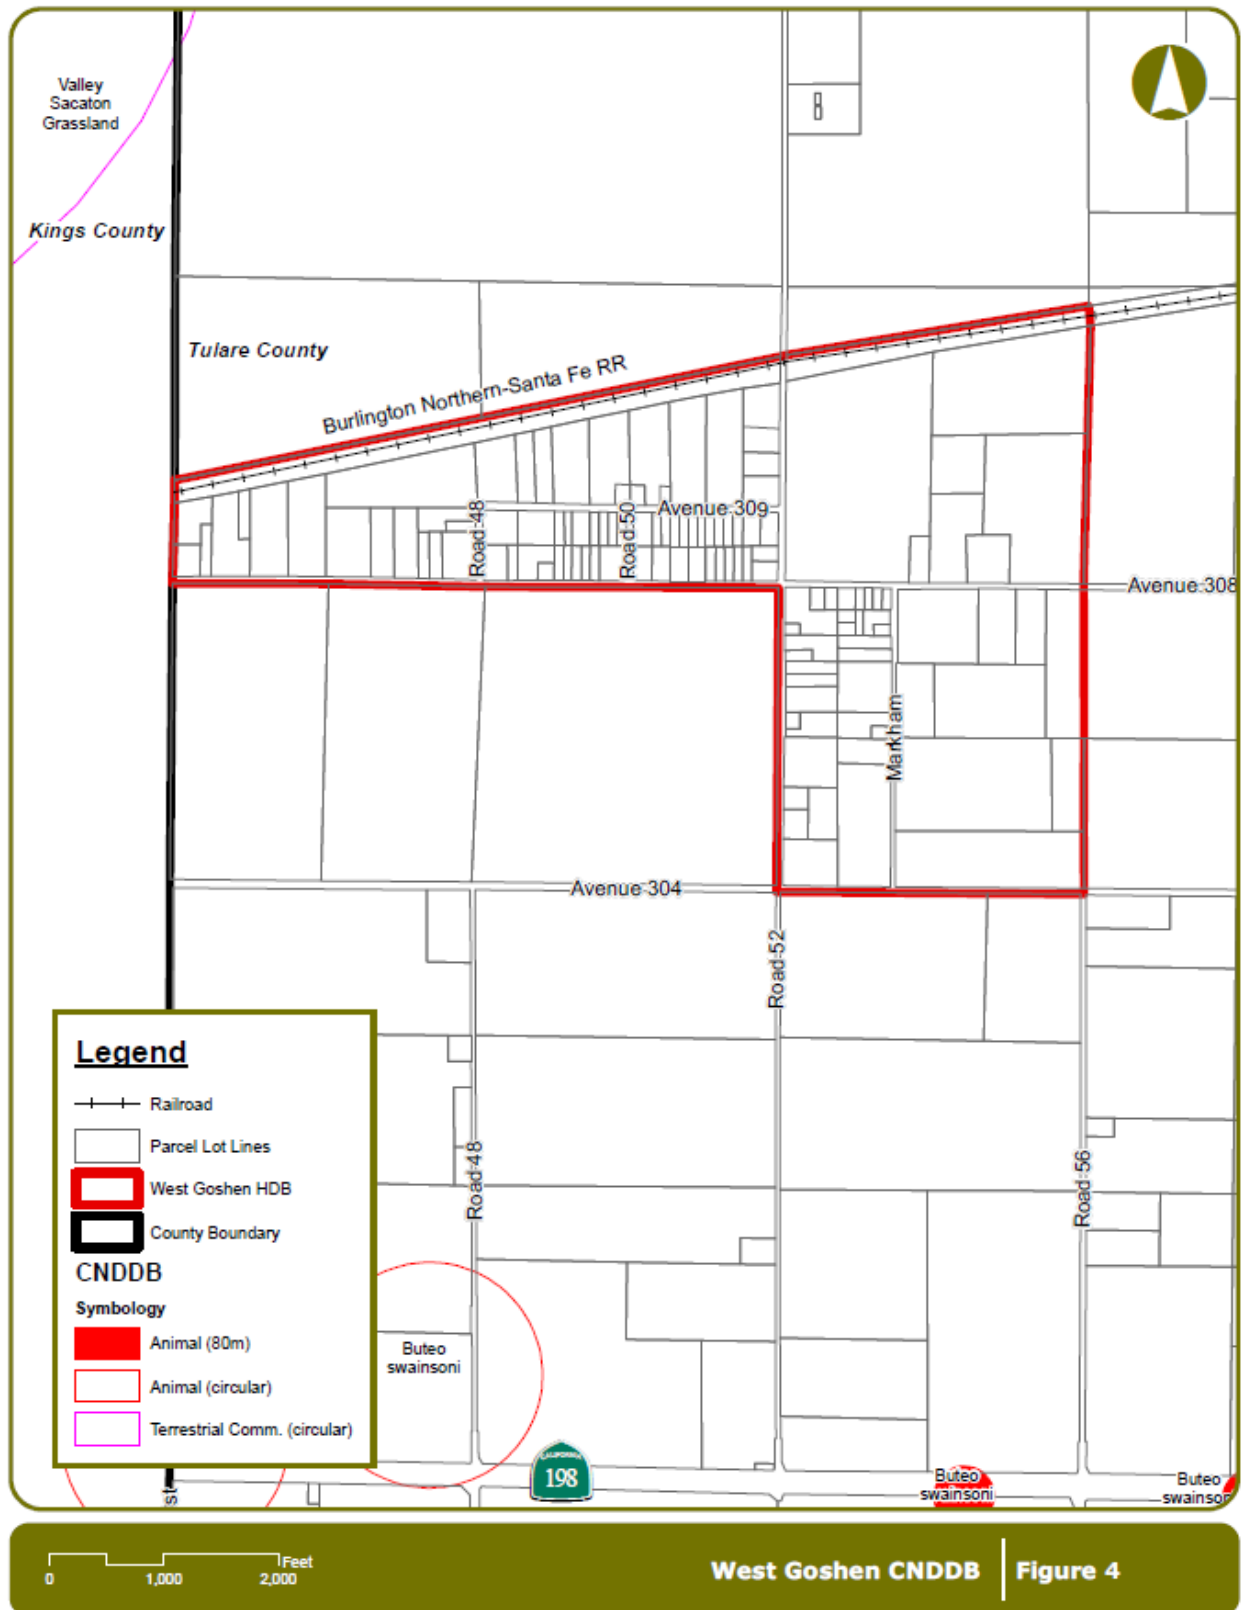

A California Natural Diversity Database (CNDDDB) search conducted on November 3, 2016, (**see Figure 4**) indicates there are special status species within the Goshen Quadrant Species List (which includes the West Goshen Planning Study Area) consisting of three animals species and one plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Swainson's hawk (*Buteo swainsoni*, state endangered); vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened), Valley Sacaton Grassland. The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect West Goshen are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [West Goshen] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in West Goshen (**see Figure 5**). Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Hamlet Development Boundary (HDB). The following descriptions are provided for the above soil types:

**Colpien Loam, 0 to 2 percent slopes**, the parent material is alluvium derived from granitic rock sources. The soil is moderately well drained and the permeability is moderately slow. The available water capacity is very high and the shrink-swell potential is moderate. The soil is suitable for irrigated crops, building site development and farmstead dairies. For building site development the major limitation is rare flooding hazard as well as a high corrosivity to steel. The land capability classification: Class, 1, irrigated; subclass, 4c, non-irrigated MLRA: 17. This is considered prime farmland.

**Akers-Akers, saline-Sodic, complex, 0 to 2 percent slopes**, The parent material of the Akers soil is alluvium derived from granitic rock sources. The soil is very deep and well drained. The available water capacity is high and the shrink-swell potential is low.

For building site development, the soil is highly corrosive to steel and concrete. The land capability classification is: Akers-1, irrigated, and 4c, non-irrigated; Akers, saline-sodic -2s-6, irrigated, and 4s-6, non-irrigated. The areas not saline-sodic are considered prime farmland.

**Calgro-Galgro, saline-Sodic, complex, 0 to 2 percent slopes**, shrink swell potential low, erosion potential low to moderate.

# WEST GOSHEN HAMLET PLAN

---

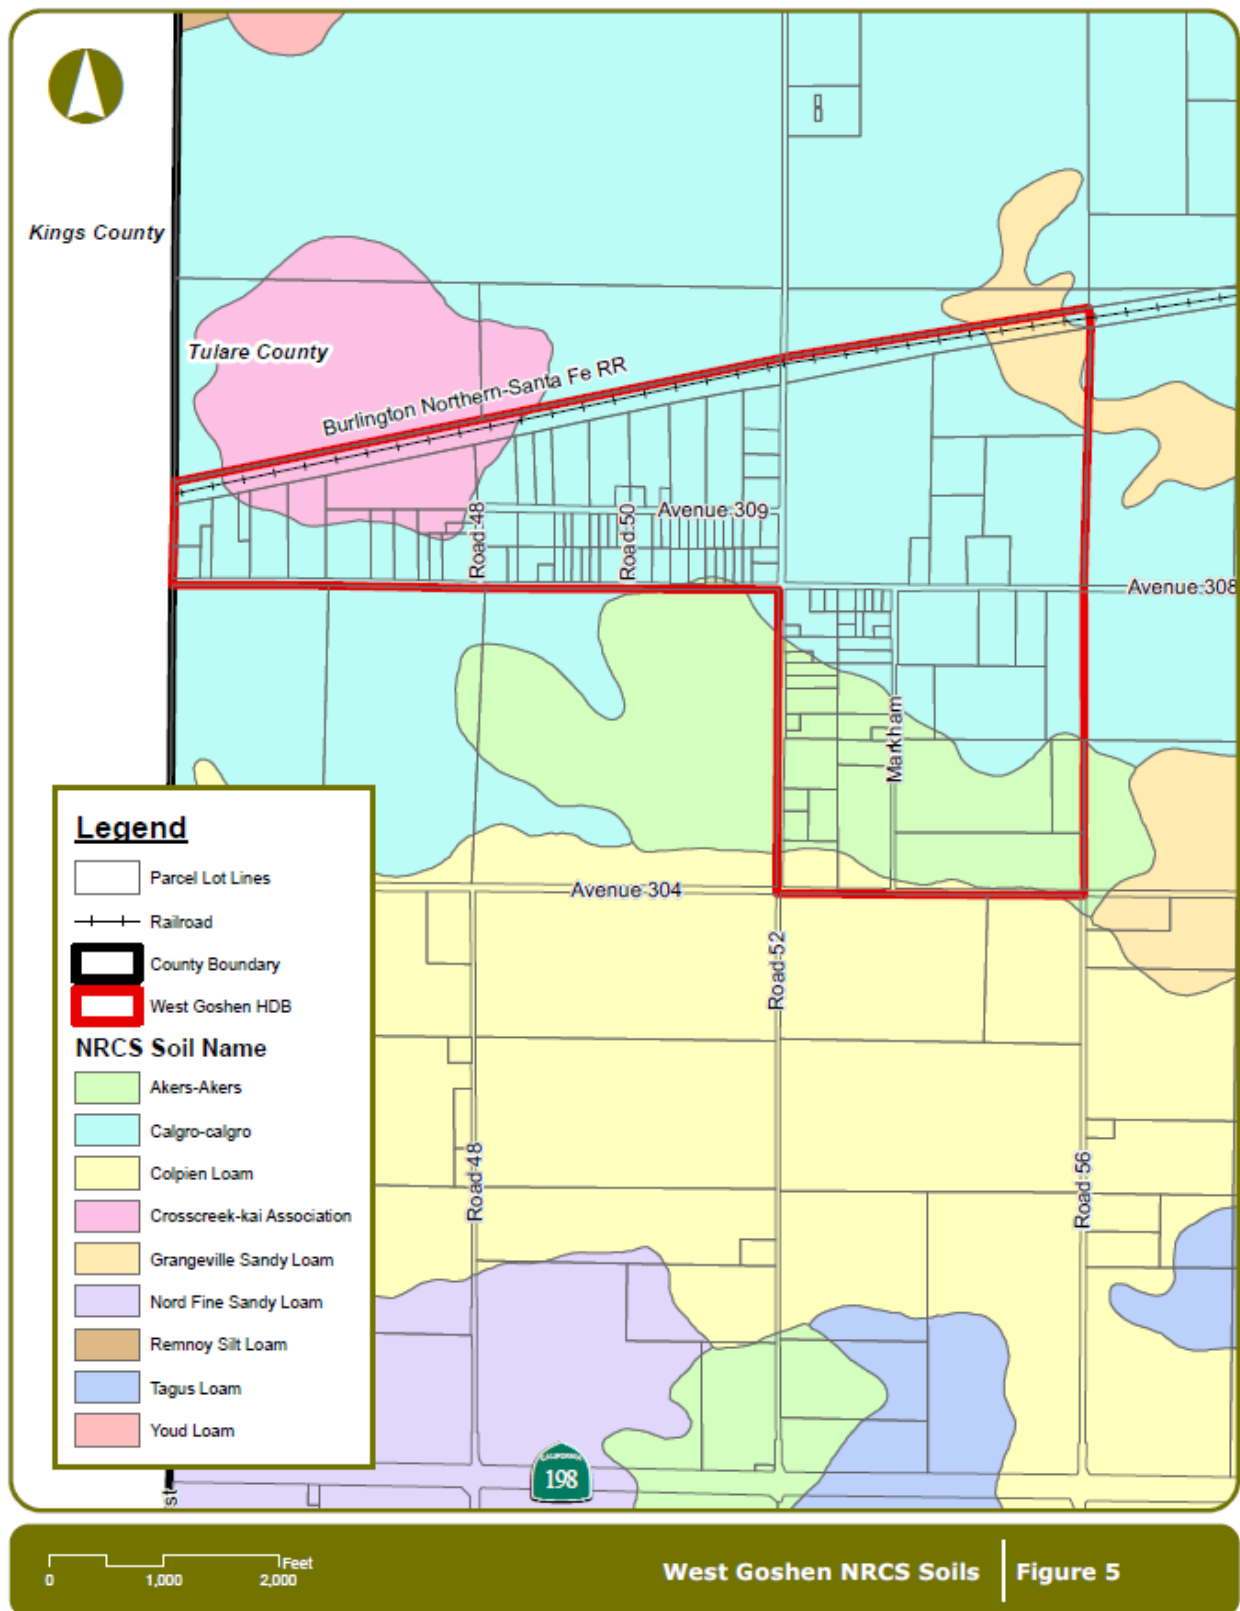

**Crosscreek-Kai association, 0 to 2 percent slopes,** is formed by the chemical and mechanical alteration of the Kai soil that originally formed in alluvium derived from granitic rock sources. The soil is well drained, and the permeability is moderately slow above the duripan due to sodicity and very slow in the duripan. The available water capacity is moderate to high and the shrink-swell potential is moderate. The parent material of Kai Soil is alluvium derived mainly from granitic rock sources. The soil is moderately well drained and the permeability is moderately slow above the duripan and very slow in the duripan. The available water capacity is low to moderate and the shrink-swell potential is moderate.

Building site development management factors include very slow permeability of the duripan, moderate to moderately rapid permeability below the duripan, high corrosivity to steel in both soils and high corrosivity to concrete in the Crosscreek soil. The land capability classification: Crosscreek-unit, 2s-6, irrigated; subclass, 6s, non-irrigated; Kai- unit, 3s-6 irrigated; subclass, 7s, non- irrigated, MLRA17. This is not considered to be prime farmland.

**Grangeville sandy loam drained, 0 to 2 percent slopes,** prime farmland if irrigated shrink swell potential low, erosion potential moderate

## PHYSICAL CONDITIONS

### Air Quality

The West Goshen Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because West Goshen is located near the west side of the Valley with prevailing winds from the northwest, it is susceptible to the accumulation of adversely modified air,

# WEST GOSHEN HAMLET PLAN

---

particularly when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of West Goshen include agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C905E, A substantial portion of the planning area in West Goshen is subject to Flood Zone A, which meanders through West Goshen (**see Figure 6**). The majority of the Community is within flood zone X. The expected source of this flooding hazard is Kaweah River and its distributary channels, located about five miles south of West Goshen. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each Community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use Planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”<sup>7</sup> Although some areas of Tulare County have experienced major flooding along its major rivers, the West Goshen Plan Area has not. There are portions outside of West Goshen, that are within and adjacent to the FEMA 500 and 100 year flood zones. According to the Tulare County General Plan Update, substantial flooding could occur in Tulare County if the two (2) major dams were to experience failure.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within West Goshen there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new

Figure 6 - FEMA Flood Map

# WEST GOSHEN HAMLET PLAN

## Noise<sup>8</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan background Report West Goshen lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks). The prioritized concerns of the Community include:

### Energy: Natural Gas/Electricity

Southern California Edison provides service to West Goshen.

### Water

Domestic water service in West Goshen is provided by the California Water Service Company (Cal Water). “Cal Water's Visalia District was formed in 1926 with the purchase of the Visalia Water Company. We proactively maintain and upgrade our facilities to ensure a reliable, high-quality supply.”<sup>9</sup>

Table 14 - Existing Water Connections		
Number of Existing Connections	Capacity	Available
88	70	0

Source: Action Program 9, Tulare County Housing Element. Data current as of January 2014

**Table 15** shows the number of existing water connections, the capacity of the system, and the number of additional connections the system can accommodate for new development (Tulare County, January 2014). Mapping of the water system is currently unavailable.”<sup>10</sup>

### Sewer

There is no community wide sewer system in West Goshen. The community depends on individual on-site septic tank systems for wastewater disposal. No public sewer facilities are available in West Goshen. Each land owner relies on septic systems for wastewater.

---

## Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

West Goshen does not currently have a storm drainage system.”<sup>11</sup>

## Solid Waste

Solid waste generated in West Goshen can be disposed of at Visalia Landfill, located at 8614 Avenue 328. The landfill opened in 1950 and the estimated closure date was anticipated in 2012. The design capacity is 6.5 million cubic yards. Future development to accommodate projected growth as proposed in the Community Plan, including commercial and industrial development within the Project Area, will increase the amount of waste requiring disposal at landfills. To meet the required 50% diversion rate required by the State of California, each community will need to implement further programs, such as composting or establishing a location for the further separation and recovery of recyclable and other materials from the waste stream.

## Roads

“There are several roadways in West Goshen that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

---

<sup>11</sup> Action Program 9, Tulare County 2015 Housing Element

# WEST GOSHEN HAMLET PLAN

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>12</sup>

**Table 14** lists the roadways in need of repair, the limits, and type of maintenance strategy proposed. **Figure 7** graphically displays this information on a map.

**Table 15 - Road Maintenance Strategies**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Avenue 308	Road 48 to Road 52	GRX
2	Road 48	Avenue 308 to Avenue 309	GRX
3	Road 52	Avenue 308 to Avenue 309	CHIP

OLAY – overlay resurfacing operation

ACST – asphalt reconstruction

CHIP – chip seal

RCST – cold mix reconstruction

(Source: County of Tulare Public Works, 2012)

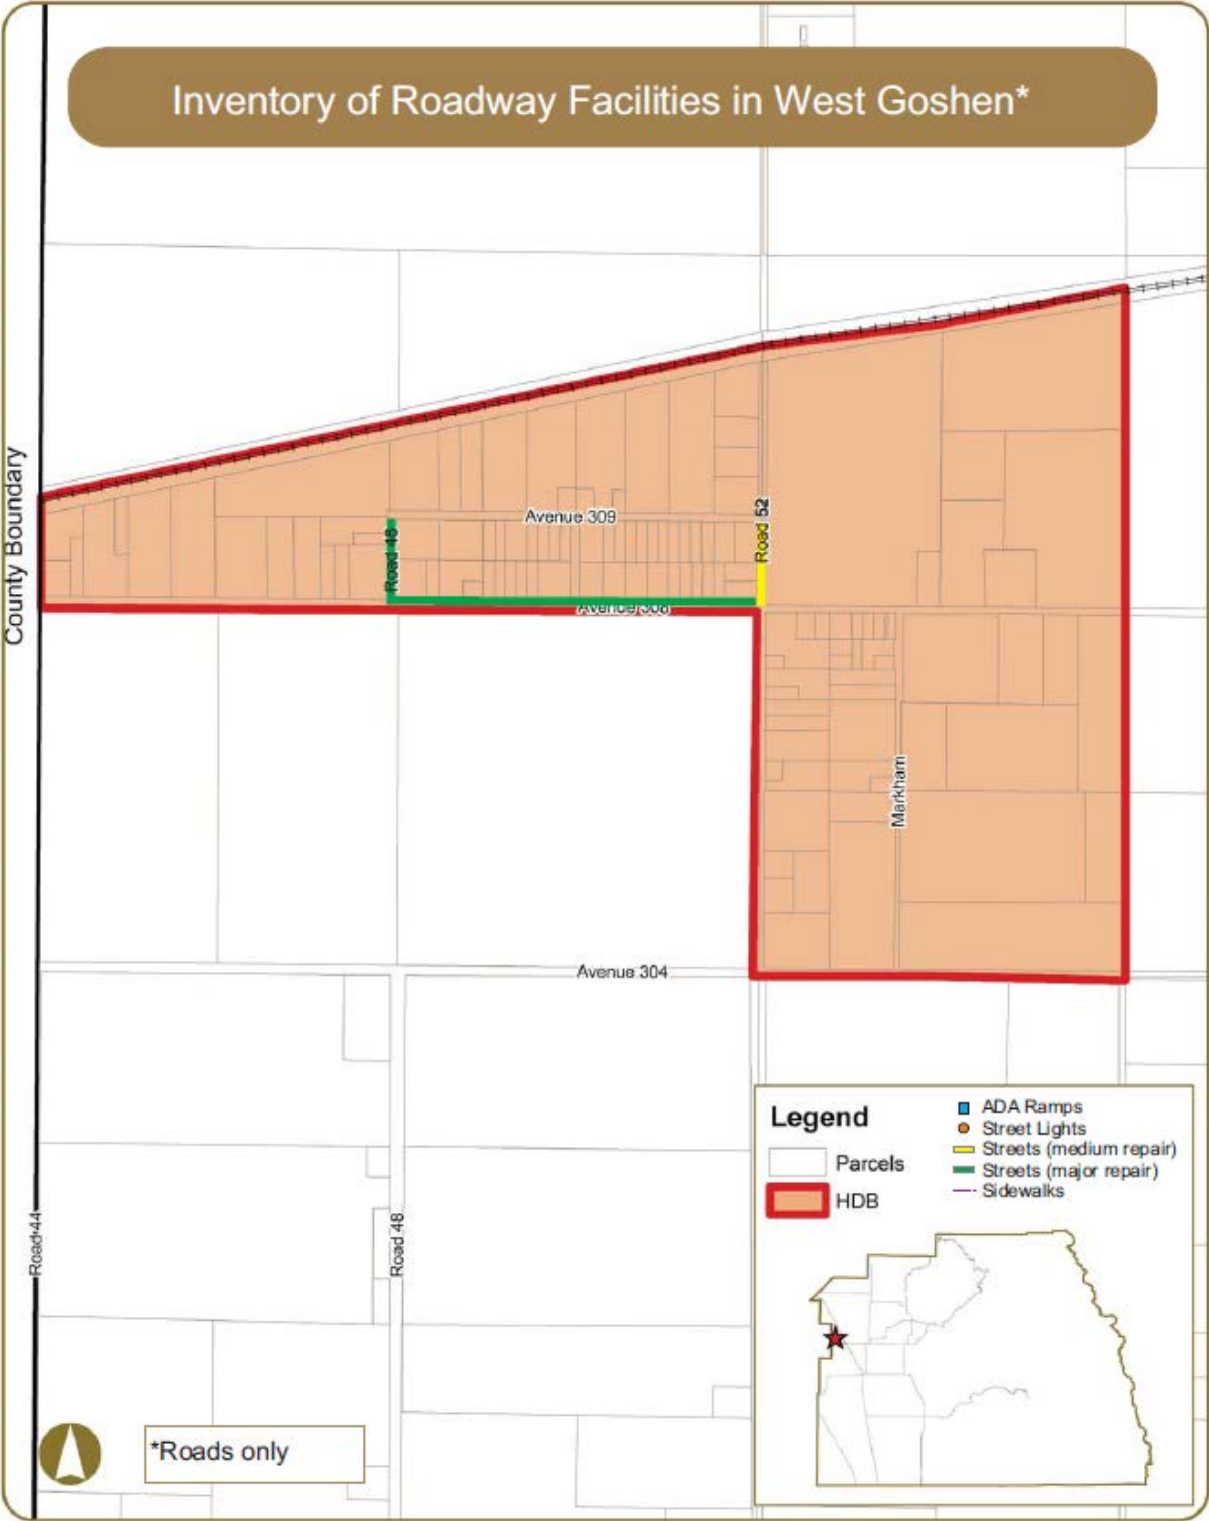

## Street Lights

There are currently no street lights located within West Goshen. Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

<sup>12</sup> Action Program 9, Tulare County 2015 Housing Element

# WEST GOSHEN HAMLET PLAN

Figure 7 - Inventory of Roadway Facilities in West Goshen

# WEST GOSHEN HAMLET PLAN

---

## Sidewalks

There are currently no sidewalks located within West Goshen. The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within West Goshen.”<sup>13</sup>

## Transit and Bus Stops

Recognizing the need to provide transportation services to those who are disadvantaged, the City of Visalia provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation. Public transit is currently not available in West Goshen. However, the City of Visalia operates fixed-route services currently available Sunday through Saturday on a fixed route bus service. City of Visalia provides round-trip transportation for Goshen residents to Visalia via the Number 6 – Downtown, Visalia Medical Clinic, Goshen Route at Frontage Road/Betty Drive.

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. In Tulare County, bicycle travel is not yet considered a major mode of transportation and bicycles are rarely seen outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future.

---

<sup>13</sup> Ibid

# WEST GOSHEN HAMLET PLAN

---

## AMTRAK

The Hanford AMTRAK station, located approximately 10 miles to the west in Kings County, is the closest station to West Goshen providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 10 miles southeast. Fresno Yosemite International Airport (FAT), approximately 65 miles northwest of West Goshen, is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 75 miles southwest of West Goshen and offers direct flights to several destinations.

## Burlington Northern-Santa Fe Railroad

West Goshen is bound on the west side by the Burlington Northern-Santa Fe Railroad line running through Tulare County.

## **PUBLIC SERVICES**

### Community Resource Center

The community lacks sources and needs a facility where residents can access information and county services. People in West Goshen expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used for homework assistance, afterschool programs and as a computer lab. It was also suggested that the center should also be available for use by outside organizations that need a place to service West Goshen residents. This could also be the place where residents access a reliable internet connection.

### Sheriff

Police protection services are provided in West Goshen by the Tulare County Sheriff's Department main Sheriff's Office located at 2404 W. Burrell Avenue, in Visalia, approximately 10 miles east of West Goshen.

### Fire

There are currently no Fire Hydrants in West Goshen. Fire protection and emergency medical services are provided for West Goshen by the Tulare County Fire Department. The community is served by Tulare County Fire Department Station #7, located at 30901 Road 67 in Goshen. The station is staffed by patrol 7 and Engine 7.

### Schools

Schools are an essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The West Goshen Hamlet Plan Area is within the Visalia Unified School District Area 4 (8 miles away). The nearest elementary school (K-6) is in Goshen. Students in Junior High and High School attend schools in Visalia.

# WEST GOSHEN HAMLET PLAN

---

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>14</sup> The closest library is located in Visalia 8 miles away. (see Table 16).

Table 16 - Library Location & Hours		
Branch	Address	Service Hours (2003)
Visalia	Main Branch 200 West Oak Avenue Visalia, CA 93291-4993	Tuesday: 9 am - 8 pm Wednesday: 9 am - 8 pm Thursday: 9 am - 8 pm Friday: 12 pm - 6 pm Saturday: 9 am - 5 pm

Library hours current as of February 2010 Source: General Plan Background Report

## Parks

There are no County owned/operated public parks in West Goshen.

# THE WEST GOSHEN HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

West Goshen is a small agricultural community located near Highway 99 and 198. The major rural collector roads is Avenue 308. There are no proposed major streets as part of this Hamlet Plan. The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>15</sup>

---

<sup>14</sup> General Plan Background Report, page 7-96

<sup>15</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

# WEST GOSHEN HAMLET PLAN

---

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>16</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

West Goshen is a small agricultural community located east of the Burlington Northern Santa Fe Railroad and west of Avenue 304. There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# WEST GOSHEN HAMLET PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the West Goshen Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for West Goshen to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

West Goshen Hamlet Plan, and input received from West Goshen citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### **Community Development**

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Create a mix of uses with easy access to major roads**

Objective: Promote mixed use zoning and land uses.

Policies:

1. Locate high density residential uses near planned commercial areas.

2. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
3. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
4. The County shall work with the Schools to provide safe routes to school.
5. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Hypericum Legacy Plan.
6. The Teviston Legacy Plan should be reviewed every five years to determine if amendments are appropriate.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.

# WEST GOSHEN HAMLET PLAN

---

2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

### Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in West Goshen.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

### Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in West Goshen.

3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

### Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## Economic Base

**GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

# WEST GOSHEN HAMLET PLAN

---

## Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

## Policies:

1. Encourage the West Goshen to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

## Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## **Environmental Quality and Public Safety**

**GOAL I: Preserve and enhance the quality of life for present and future generation of West Goshen citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

## Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

## Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

## Objective: Protect Agricultural Lands:

Land within the respective West Goshen, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;

# WEST GOSHEN HAMLET PLAN

---

- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and
- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of West Goshen.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of West Goshen.

# WEST GOSHEN HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 477.2 acre West Goshen Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute 93 percent of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 675 by 242.1 urbanized acres (area within the HDB), which equals 2.78 persons per urbanized acre (see **Tables 17 and 18** showing population projections). Projecting the population at a 1.3% growth rate adds 144 persons in Year 2030. Multiplying the 144 persons by the 1/3 ratio suggests an additional 1.87 acres of land will be required to accommodate development by the year 2030 if projections are realized.

### Population Growth Forecast

**Table 17 - West Goshen Population Projections**

<b>Growth Rate</b>	<b>2015</b>	<b>2020</b>	<b>2030</b>
0.013	633	720	819

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The Year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>17</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in year 2015 the community had 175 dwelling units (including vacant dwellings) with a population of 675. At an annual growth rate of 1.3%, the projected housing units are 187 and 212 in years 2020 and 2030, respectively, and projected population is 729 and 819 in years 2020 and 2030, respectively.

**Table 18 - Population Projections**

<b>Year</b>	<b>Population</b>	<b>Growth (%)</b>
2015	675	0.013
2016	684	0.013
2017	693	0.013
2018	702	0.013
2019	711	0.013

# WEST GOSHEN HAMLET PLAN

---

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, water service levels to be expanded, for which grant funding will be required.

### Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily require a discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

### Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Table 19 - Educational Attainment			
Educational Attainment	California	Tulare County	West Goshen
Population 25 years and over	25,257,858	260,964	316
Less than 9th grade	10.0%	20.8%	44.3%
9th to 12th grade, no diploma	8.2%	10.9%	6.6%
High school graduate (& equivalency)	20.7%	25.2%	13.9%
Some college, no degree	21.8%	22.3%	30.4%
Associate's degree	7.8%	7.0%	2.2%
Bachelor's degree	19.8%	9.5%	2.5%
Graduate or professional degree	11.6%	4.3%	0.0%

2011-2015 American Community Survey 5-Year Estimates

Based on the 2011-2015 American Community Survey (**see Table 19**), the educational barrier in West Goshen begins in grade school. Of the adults age 25 and older, 44.3% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

### Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices are located in Visalia.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (see **Table 20**) and Zoning Districts Plan (see **Table 21**) have been updated.

<b>Table 20 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	449.6
Right-of Ways	27.6
West Goshen HDB	477.2

<b>Table 21 - Proposed Zoning Districts</b>	
Proposed Zones	Acres
A-40	136.2
C-2-MU	34.4
M-1	36.8
R-A-12.5	242.1
Right-of Ways	27.6
West Goshen HDB	477.2

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the General Plan recommendations contained in the West Goshen Legacy Plan. The following components comprise the West Goshen Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the West Goshen Legacy Plan, there are a several proposed changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

### Mixed Use Overlay District

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of West Goshen.

# WEST GOSHEN HAMLET PLAN

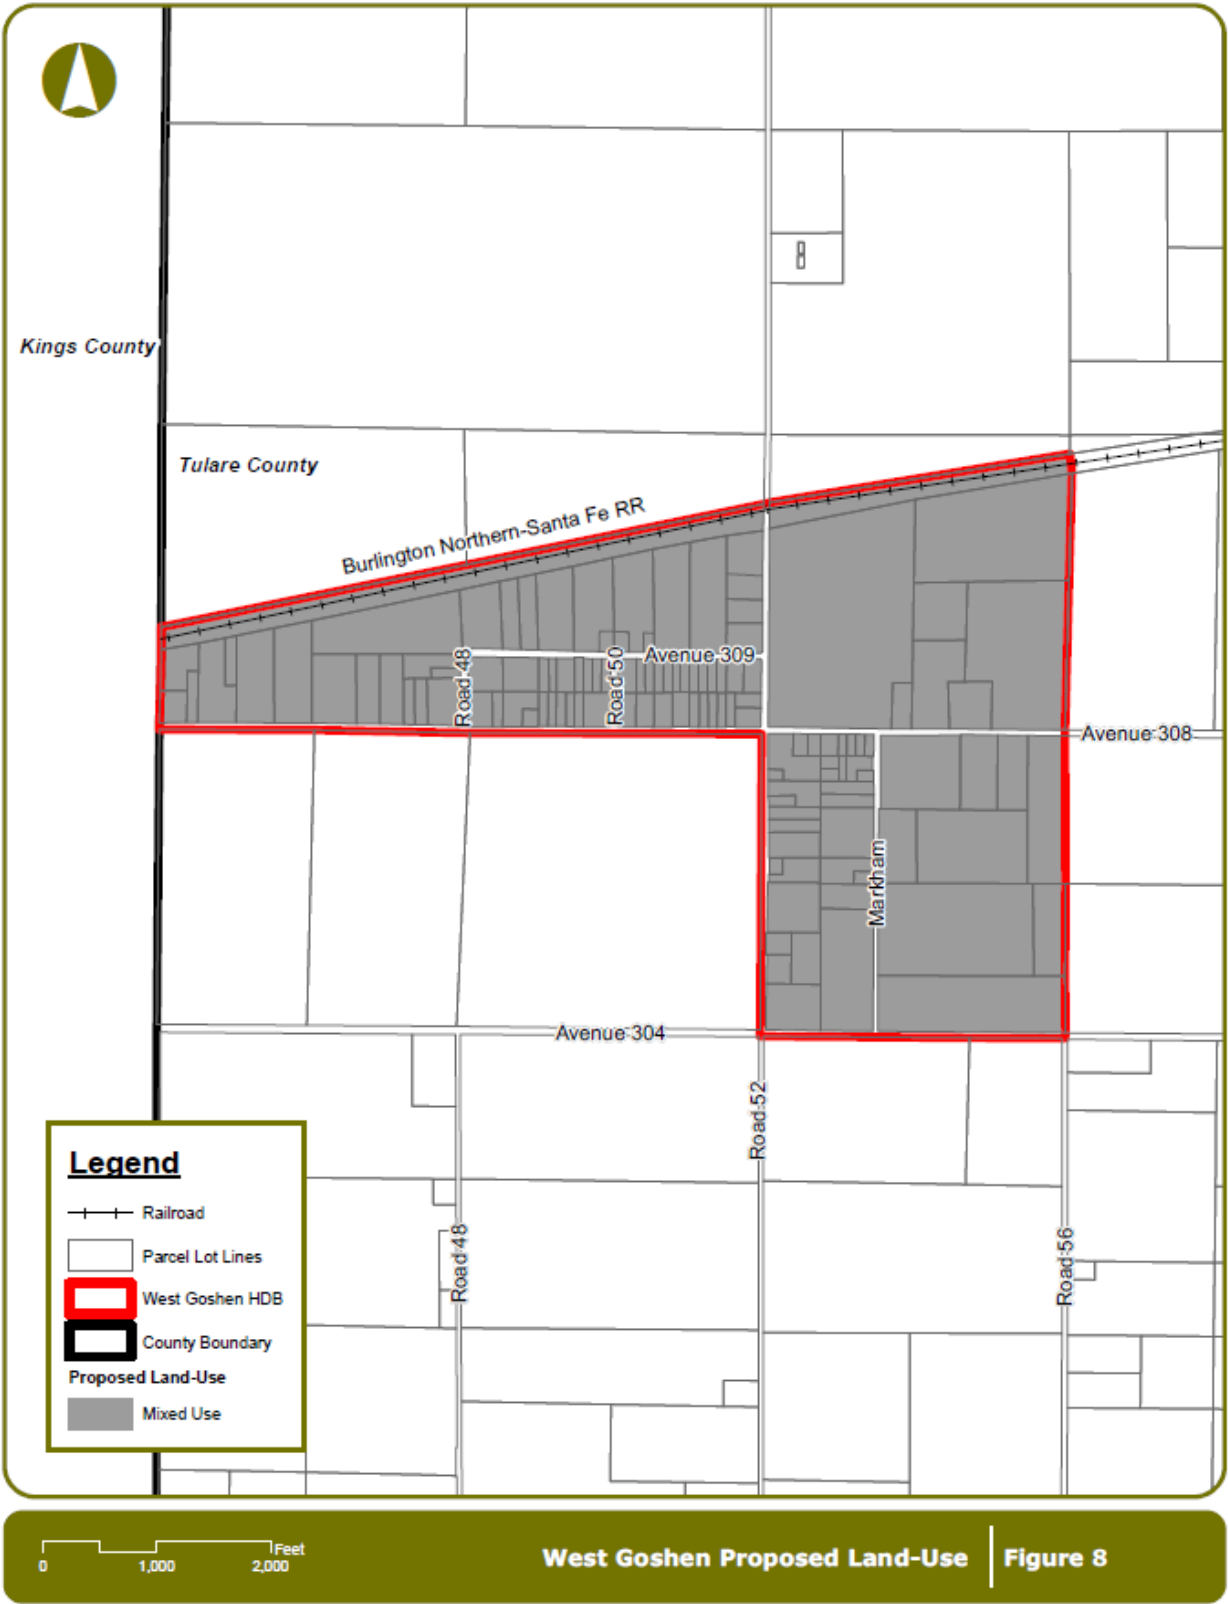

---

## Zoning Map Update

The current Zoning Map (**see Figure 9**) for West Goshen will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 8**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 10**) West Goshen Proposed Zoning).

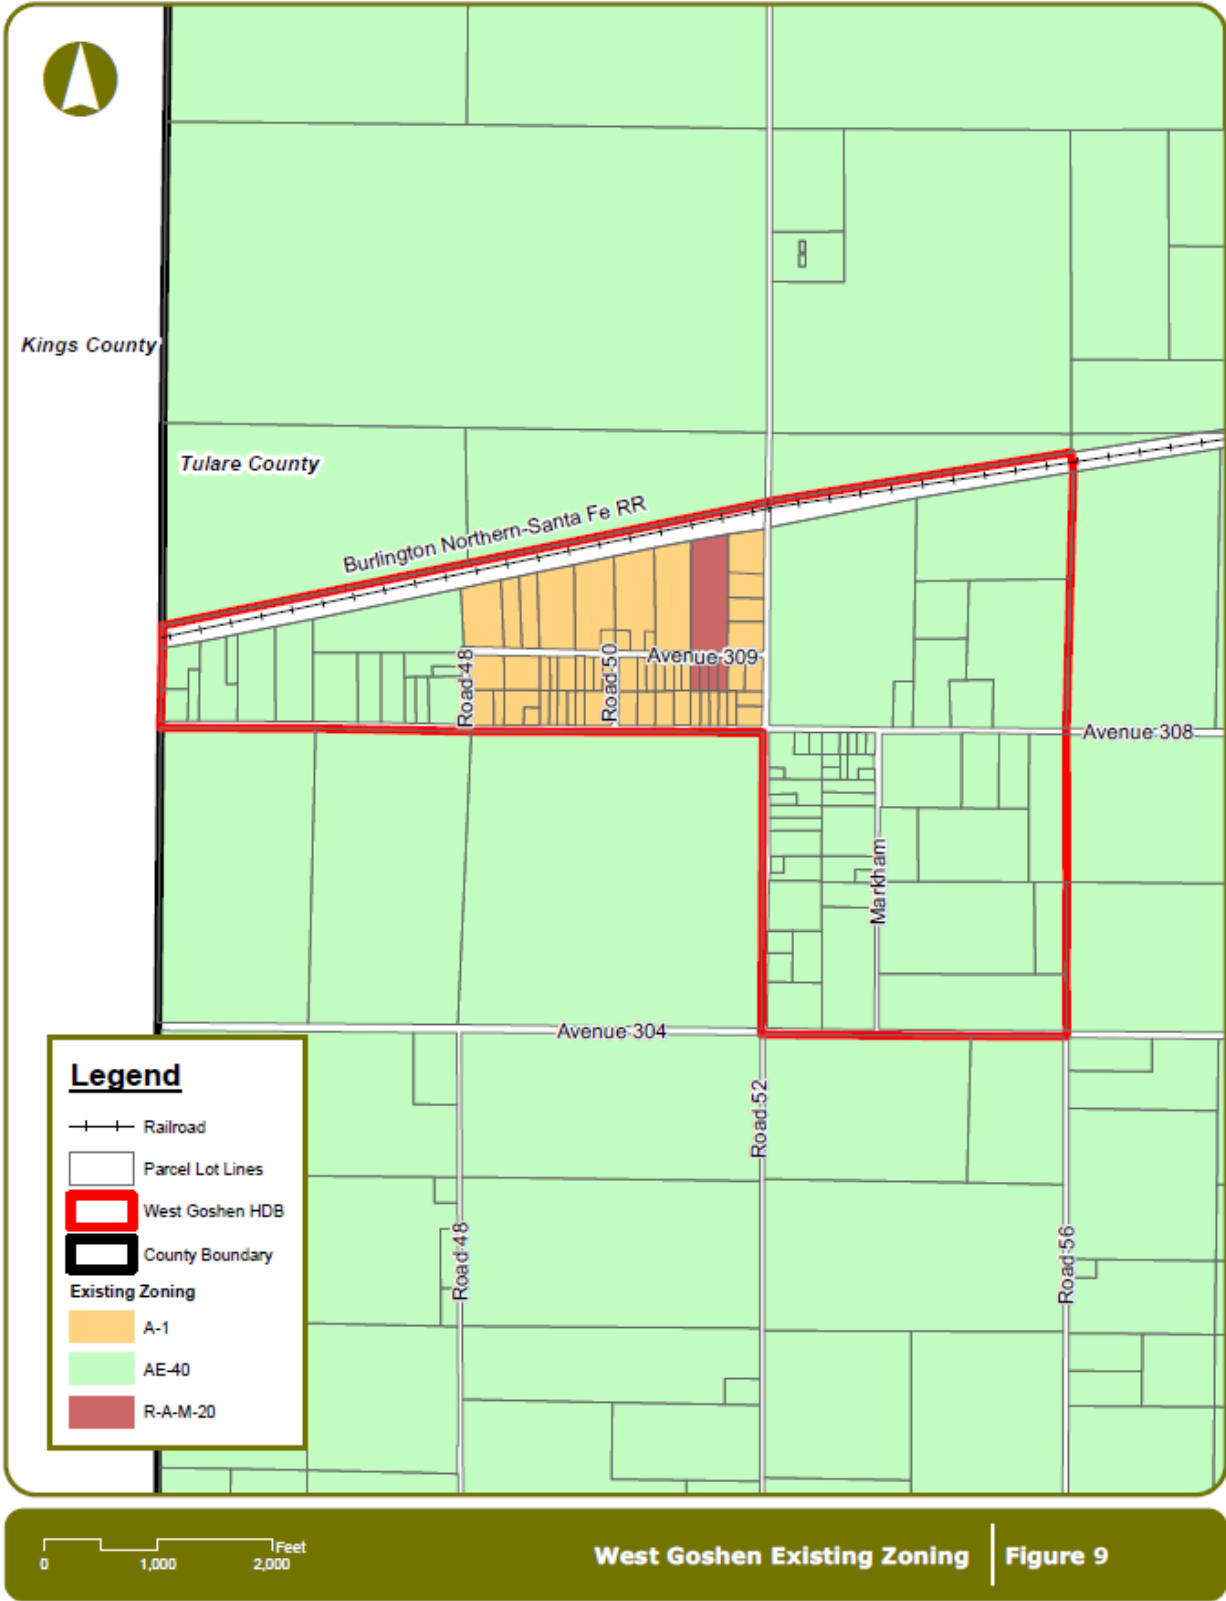

# WEST GOSHEN HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

# WEST GOSHEN HAMLET PLAN

## A-2 *Mixed Use Overlay District (Zone Change Text)*

The following regulations shall apply in the community of West Goshen, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**    The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**    This overlay zone only applies to the community of West Goshen.

**USE**                   **C.**    No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for West Goshen.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the

# WEST GOSHEN HAMLET PLAN

---

neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for

# WEST GOSHEN HAMLET PLAN

---

buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for West Goshen. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# WEST GOSHEN HAMLET PLAN

---

## **A-3     *Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the West Goshen Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within West Goshen. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the West Goshen Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within West Goshen. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1     Entries to buildings should be individualized and clearly identifiable.

A-2     Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3     Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4     The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5     Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6     Each building should have a defined base, body, and cap segment

A-7     Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8     Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to

sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9     Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10    Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11    Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

A-12    Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

# WEST GOSHEN HAMLET PLAN

---

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public

areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

# WEST GOSHEN HAMLET PLAN

---

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

# WEST GOSHEN HAMLET PLAN

---

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance. Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

# WEST GOSHEN HAMLET PLAN

---

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

# WEST GOSHEN HAMLET PLAN

---

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

# WEST GOSHEN HAMLET PLAN

---

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or “lollipop signs.”
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

# WEST GOSHEN HAMLET PLAN

---

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateways signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

# WEST GOSHEN HAMLET PLAN

---

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

PLANS, AS PROPOSED IN CHANGE                     )  
OF ZONE NO. PZC 17-039                             )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

\* \* \* \* \*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# YETTEM HAMLET PLAN

---

## INTRODUCTION

The primary objective in preparing a Hamlet Plan for Yettem is to develop a plan which can accurately reflect the needs and priorities of this community. Yettem is currently designated as a Hamlet in the 2030 Tulare County General Plan (2012). A more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [wells, water distribution piping, and storage tanks], curbs, gutters, and sidewalks, etc.) and to stimulate economic development within the community.

### Location

The community of Yettem (**see Figure 1**) is located on the east side of the San Joaquin Valley and is a census-designated place located in the northeast portion of Tulare County. It is bounded by Road 140 in the west, Road 144 in the east, and north and south of Avenue 384 and encompasses 0.2 square miles of land. Yettem is directly served by State Route 201 (**see Figure 2**). Yettem is location in Section 34 and 35 Township 16 South, Range 25 East, MDB&M, and can be found within Reedley United States Geological Survey 7.5 minute topographic quadrangle. Yettem is located at an elevation of 348 feet National Geodetic Vertical Datum. The coordinates of Yettem are: Latitude: 36.486313 Longitude: -119.259026.

### Planning Area

The Yettem Hamlet Development Boundary (HDB) area consists of 59.9 acres (**see Figure 3**). The Land Uses within the HDB are Mixed Use activities which occupy 55.1 acres. The remaining 1 percent are lands dedicated for Right-of-way (**See Table 1**).

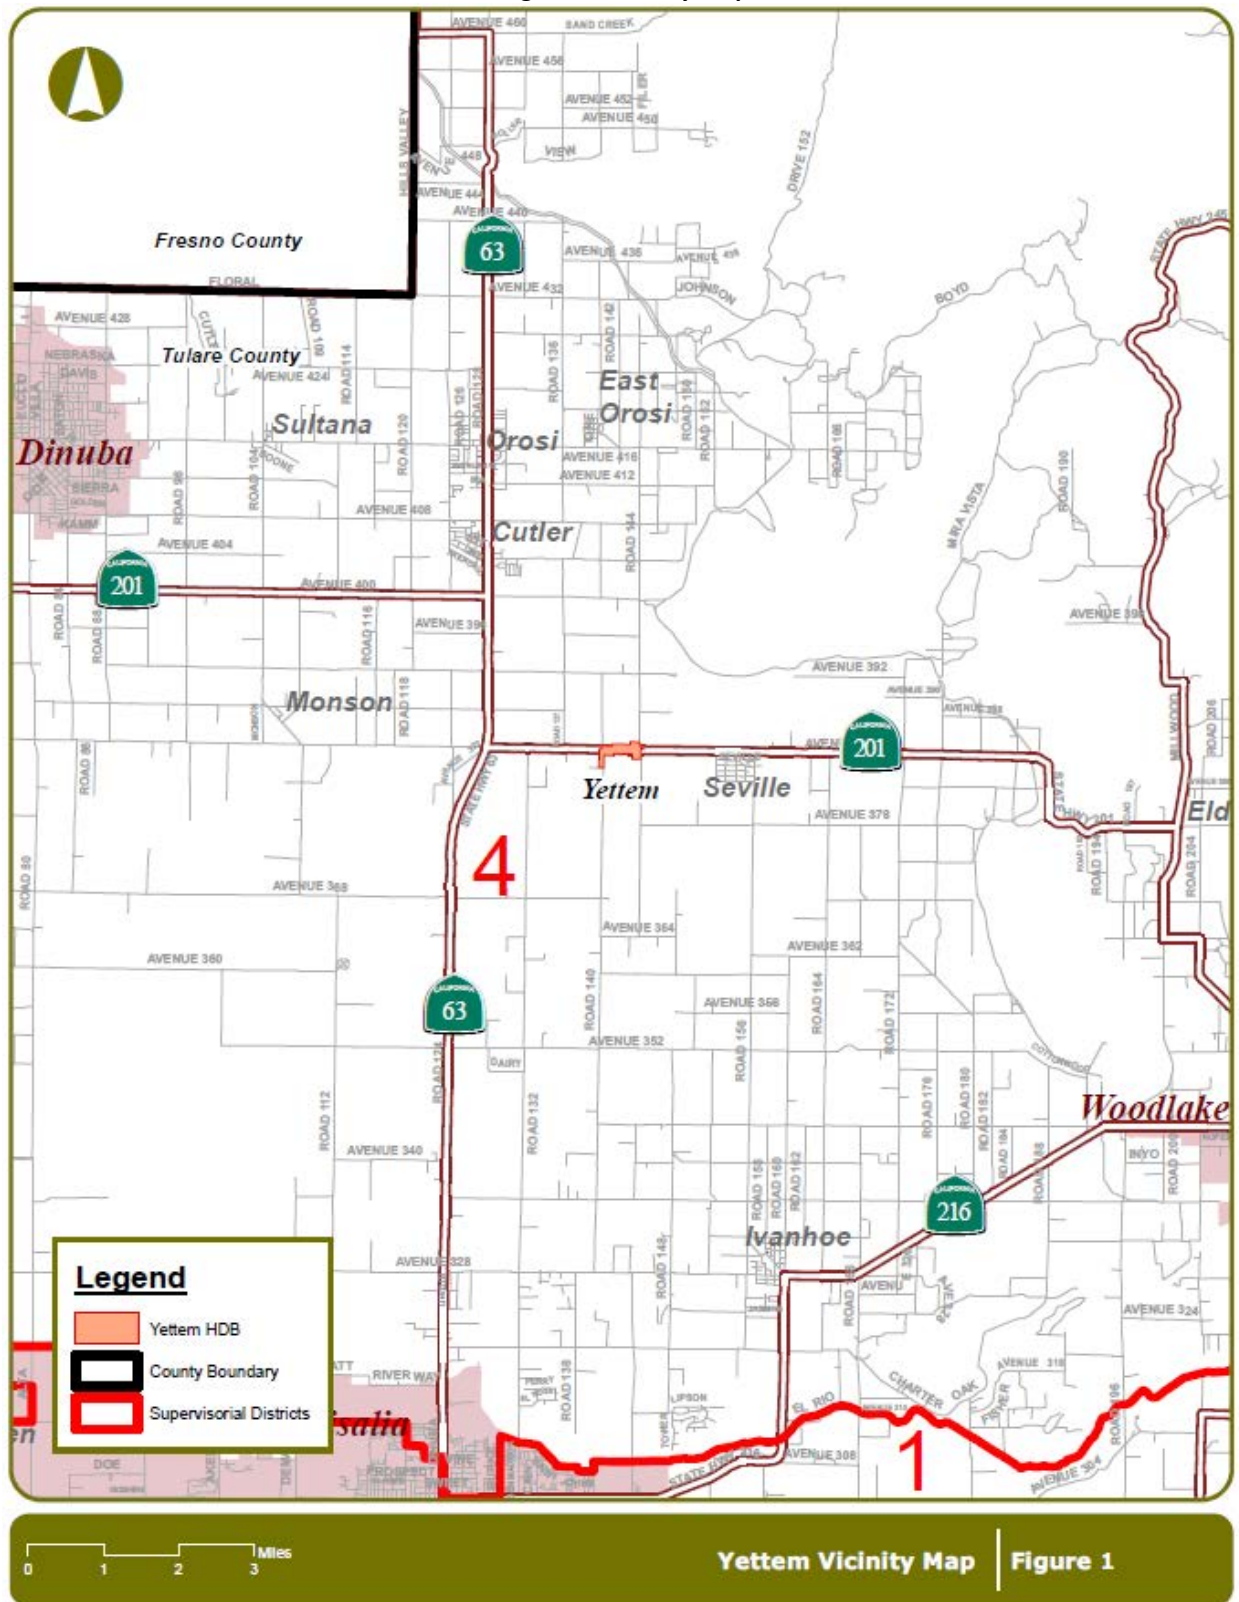

No change is proposed to the Hamlet Development Boundary.

Table 1 - Yettem Land Use	
Land Use	Acres
Mixed Use	55.1
Rights-of-way	4.8
Total	59.9

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

The County of Tulare obtained a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Hamlet Plan. In efforts to invite and make local residents aware of the Strategic Growth Council (SGC) project, Self Help Enterprises (SHE) went door to door throughout the community of Yettem to gather the information needed for this study, SHE conducted door to door surveys throughout the community of Yettem. Nine (9) surveys were collected.

### Community Outreach Steps

Self-Help Enterprises (SHE) utilized various outreach methods to promote community participation and increase awareness of the SGC project:

- 1.) An informational flyer was developed.
- 2.) On October 1, October 3 and October 5, 2015 SHE staff went door to door to distribute flyers to homes.
- 3.) Throughout the community outreach process, SHE staff explained the goals of the project and emphasized the importance and benefits of participating in the SGC community meeting.
- 4.) SHE partnered with the Stone Corral, located in neighboring Seville to spread the word about the meeting; meeting flyers were sent home from school with each student including those students that live in Yettem.
- 5.) To ensure that residents had multiple opportunities to be made aware of the meeting, flyers were posted at the local stores and local businesses.

### Community Meeting

The Strategic Growth Council held a community for input meeting for Yettem and Seville residents in Seville on Wednesday, December 9, 2015 at 5:30 pm. The meeting was scheduled in the evening to allow all residents to attend, including those that work during the day. The meeting was held in the cafeteria of the Stone Corral School located at 15590 Ave 383 in Seville. One Yettem resident attended this meeting.

### Community Survey

A survey was developed in efforts to gather specific community information about different areas of concern. The survey asked about the following: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Water Quality & Quantity, Waste Water, Storm Water Drainage, Multimodal Opportunities, and Priority Improvements.

### Priority Concerns

1. Road Conditions
2. Street lighting
3. Sidewalks
4. Speed Bumps
5. Public Transportation

# YETTEM HAMLET PLAN

---

6. Internet Access
7. Community resource center
8. Community Park

## **Road Conditions**

Yettem survey results show that most residents are not satisfied with road conditions. It is reported that road conditions are poor and most roads need work, most streets have potholes, cracks and bumps. Drivers feel unsafe and are constantly worried about damage to their vehicles while driving on their roads. Yettem roads are not regularly maintained and the few times that roads have been serviced, the repair work was poor because the roads were patched and not actually repaired. The following roads reported by the residents to be a top priority:

- Road 383
- Road 153
- Road 142

## **Street Lights**

Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the Sheriff's Department seldom patrols Yettem. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

## **Side Walks**

The community of Yettem has too few sidewalks. The residents that were surveyed reported that the street they live on does not have a sidewalk. People report that this is a problem for kids while walking to school and for parents who push a stroller through town. The lack of sidewalks becomes an even bigger problem during the rainy season. When it rains, residents and kids are forced to walk to school in the mud and through big puddles of water. Yettem traffic travels at a high rate of speed and the absence of sidewalks to provide a clear separation between walking paths and the road creates a safety hazard for pedestrians.

## **Speed Bumps**

Residents reported that they are concerned for the safety of their children while they are outside because traffic travels at a high speed in remote areas of the County such as Yettem. Parents are requesting that the County install speed bumps to help slow traffic.

## **Additional Bus Stop**

Residents report that the TCAT has one bus stop in Yettem. This location is too far for some people to walk to. Residents are requesting an additional bus stop location in town.

## **Community Resource Center**

Yettem does not have a community hub. The community lacks many resources and needs a place where residents can access information and county resources. People surveyed in Yettem, expressed the need for a Community Resource Center. This center would be a multi-purpose building that could be used by kids for homework help, afterschool programs and as a computer lab. It was also

# YETTEM HAMLET PLAN

---

suggested that the center should also be available for use by outside organizations that need a place to service Yettem residents. This could also be the place where residents access a reliable internet connection.

## **Community Park**

In the community of Yettem there is no safe public green space for children to play and adults to be physically active. The nearest park is located 6 miles away in the city of Orosi. Residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and concerned for the health of their children from lack of physical activity that comes from not having a safe place to be physically active. Residents expresses that having a community park is a major priority for them.

## **Internet Access**

Most families in Yettem do not have internet access at their homes. Any available internet service is unreliable and cost prohibitive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or expensive compared to what it costs in nearby cities. Without access to the internet, Yettem residents are unable to do things such as online job hunting, apply for resources, or provide homework help to their kids.

# YETTEM HAMLET PLAN

## YETTEM TECHNICAL BACKGROUND REPORT

### DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a hamlet's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a hamlet plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a hamlet allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a hamlet. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller hamlet such as Yettem.

#### Population

In 2015, the population of Yettem was 300 (see Table 2).

**Table 2 - Population**

	<b>California</b>	<b>%</b>	<b>Tulare County</b>	<b>%</b>	<b>Yettem</b>	<b>%</b>
Male	19,087,135	49.7%	227,426	50.1%	300	53.7%
Female	19,334,329	50.3%	226,607	49.9%	161	46.3%
Total	38,421,464		454,033		139	

2011-2015 American Community Survey 5-Year Estimates

#### Projected Population

"The San Joaquin Valley faces major challenges. One concerns how to handle future growth. Population in the Valley is expected to nearly triple by 2050, from 3.6 million to 9.4 million people, the equivalent of adding 11 new towns the size of Fresno to the area. Tulare County is expected to grow to over 1,000,000 residents by 2050, well over doubling its current population."<sup>1</sup>

#### Growth Rate

As noted in the 2010 General Plan Background Report, the unincorporated areas of Tulare County have a 1.3% projected annual growth rate from 2007 to 2030. This 1.3% annual growth rate has been used to project Yettem's population during the Planning Period (see Table 3).

<b>Table 3 - Projected Annual Growth Rate</b>		
	<b>Historic Growth Rates 1990-2007</b>	<b>Projected Growth Rates 2007-2030</b>
<b>County Total</b>	1.9%	2.4%
<b>Incorporated</b>	2.8%	2.9%
<b>Unincorporated</b>	0.46%	1.3%

Source: DOF, 2007; TCAG, 2008, 2010 General Plan Background Report

<sup>1</sup> Tulare County Regional Blueprint, page 7

# YETTEM HAMLET PLAN

## Median Age

Yettem's population's median age is younger than the median age of both Tulare County, as well as the State of California (see Table 4).

Table 4 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Yettem	22.0

2011-2015 American Community Survey 5-Year Estimates

## Ethnicity and Race

In 2015, approximately 0% of Yettem's population was White, 0% was African American, 0% was Native American, 0% was Asian, and 0% was two races or more. Approximately 100% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community. (see Table 5)

Table 5 - Race & Ethnicity						
	California	%	Tulare County	%	Yettem	%
Total	38,421,464		454,033		300	
Hispanic or Latino (of any race)	14,750,686	38.4%	283,533	62.4%	300	100%
White (Not Hispanic)	14,879,258	38.7%	139,581	30.7%	0	0%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5%	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	0	0%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	0%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Yettem

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production. (see Table 6)

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Yettem was about 0.0% while the rate for Tulare County was 7.813.5%. The unemployment rate for the State of California was 10.1%. Keeping in mind that the 0.0% includes only the employable labor force (that is, not every person of the population) results in about 0 unemployed persons of Yettem's person labor force of 149.

# YETTEM HAMLET PLAN

Table 6 - Employment Status			
Employment Status	California	Tulare County	Yetttem
Population 16 years & over	30,312,429	325,404	220
In labor force	19,269,449	194,420	149
Civilian labor force	19,137,441	194,102	149
Employed	17,246,360	170,780	149
Unemployed	1,891,081	23,322	0
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	71

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Although Yetttem's median household income is unavailable the Per Capita income was \$8,544 for 2015. Whereas the Per Capita income for both Tulare County and the State of California was higher (see Table 7).

Table 7 - 2011-2015 American Community Survey Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Yetttem CDP	-	-	\$8,544

## Severely Disadvantaged Community

Public Resources Code 75005. (g) states that a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom), and allow various housing types (such as mobile homes).

Table 8 - Housing Tenure			
	California	Tulare County	Yetttem
Occupied housing units	12,617,280	132,706	61
Owner-occupied	6,908,925	75,974	0
Renter-occupied	5,708,355	56,732	61

2011-2015 American Community Survey 5-Year Estimates

# YETTEM HAMLET PLAN

Tulare County has an estimated 131,642 occupied housing units. Within the communities along Highway 99, the number of occupied housing units ranges from 208 in Traver to 1,891 in Earlimart. The total occupied housing units are lower than the total built housing units, as not all housing units are occupied.

Table 9 - Housing Tenure (%)			
	California	Tulare County	Yettem
Owner-occupied	54.8%	57.2%	0%
Renter-occupied	45.2%	42.8%	100%

2011-2015 American Community Survey 5-Year Estimates

## Housing Conditions

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

Table 10 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Yettem	2	10	0	0	2	10	4	20	12	60	20

Source: Tulare County 2015 Housing Element

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Yettem indicated that approximately 10% of the housing units were sound. Approximately 30% of Yettem's housing units were deteriorated and 60% were dilapidated (see Table 10).

## Age of Structures

Most of the homes in Tulare County were built between 1950 and 2009. (see Table 11) The total number of housing units in Tulare County is 144,792.

Table 11 - Year Structure Built			
Year Structure Built	California	Tulare County	Yettem
Total housing units	13,845,790	144,792	80
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	0
Built 1990 to 1999	1,495,571	21,767	0
Built 1980 to 1989	2,117,819	22,733	24
Built 1970 to 1979	2,503,688	27,111	56
Built 1960 to 1969	1,871,029	15,500	0
Built 1950 to 1959	1,907,512	13,694	0
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	0

2011-2015 American Community Survey 5-Year Estimates

# YETTEM HAMLET PLAN

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Yettem was 4.66 persons per household (see Table 12).

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>2</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

Table 12 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	2.99	2.01
Tulare County	3.23	3.52
Yettem	0	4.66

2011-2015 American Community Survey 5-Year Estimates

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. A vacancy rate of about 5-6% is considered typical; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2014, the rental vacancy rate in Yettem was 0%, which was lower than both Tulare County at 4.2% and the State of California at 4.6%. The homeowner vacancy rate was 0%, which was lower than Tulare County at 1.8% and the State of California at 81.6%, (see Table 13).

Table 13 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.6%	4.6%
Tulare County	1.8%	4.2%
Yettem	0%	0%

2011-2015 American Community Survey 5-Year Estimates

## ENVIRONMENTAL CONDITIONS

### Wildlife<sup>3</sup>

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016 (see Figure 4) indicates there are special status species within the Ivanhoe Quadrant Species List (which includes the Yettem Planning Study Area) consisting of four animal species and no plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Tipton kangaroo rat (*Dipodomys nitratoideus*, federal endangered); Nelson antelope squirrel (*Ammospermophilus nelsoni*, state threatened); and Blunt-nosed leopard lizard (*Gambelia sila*, federal endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

## Geology & Seismic Hazards<sup>4</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Yettem are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Yettem] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>5</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County (see Figure 3 ). The following descriptions are provided for the below soil types:

**Seville clay, 0 to 2 percent slopes,** is very deep and well drained, medium or high runoff, some areas are ponded; very slow permeability. The soil is suitable for livestock grazing. Vegetation is scattered saltbush with annual grasses and forbs.

**San Joaquin loam, 0 to 2 percent slopes,** is moderately deep to a hardpan, well drained and nearly level. This soil is suitable for orchards, vineyards, and cultivated crops but is somewhat limited by the presence of hardpan which restricts root growth. This problem can be alleviated by ripping and shattering the hardpan. The soil is poorly suited to urban uses because of a high clay content, very slow permeability and a cemented hardpan. Septic tank filter fields are severely limited for these reasons.

## PHYSICAL CONDITIONS

### Air Quality

The Yettem Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

There is a correlation between air quality and land use. It is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Yettem is located near the southwestern end of the Valley with prevailing winds from the northwest, it is susceptible to accumulate adversely modified air, particularly

# YETTEM HAMLET PLAN

---

when a temperature inversion occurs which holds down surface air along with its pollutants. Local air pollution sources within the general vicinity of Yettem and within the community itself include State Highway 201 and agricultural activities.

## Flooding<sup>6</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0635E, Yettem is within Flood Zone X (see **Figure 6**). The west portion of Yettem is within Flood Zone X, an area of 0.2% chance flood; areas of 1 % annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance of flood. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

“Official floodplain maps are maintained by the Federal Emergency Management Agency (FEMA). FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each Community, known as the Flood Insurance Rate Map (FIRM). A 100-year flood is considered for purposes of land use Planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms.”<sup>7</sup> Although some areas of Tulare County have experienced major flooding along its major rivers, the Yettem Plan area has not. There are portions of Yettem, however, that are within and adjacent to the FEMA 500 year flood zones.

FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). These areas are designated as Zone A, AO, A1-A30, AE, A99, or AH on the FIRM. A 100-year flood is considered for purposes of land use planning and protection of property and human safety. The boundaries of the 100-year floodplain are delineated by FEMA on the basis of hydrology, topography, and modeling of flow during predicted rainstorms. Within Yettem there are areas of localized ponding and puddling that occur during heavy rainfall events. Additional projects will be required in the future to further expand storm water drainage capacity. The elevation of building pads should eliminate the potential for loss of property should flooding occur.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), by agreeing to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in Special Flood Hazard Areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available at the County of Tulare Resource Management Agency at the following website: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

# YETTEM HAMLET PLAN

Figure 6 - FEMA Flood Map

# YETTEM HAMLET PLAN

## Noise<sup>8</sup>

Tulare County adopted a noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan background Report Yettem lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” This Hamlet Plan seeks to address deficiencies and the need for improvements to the drinking water system improvements, (wells, water distribution piping, and storage tanks), curbs, gutters, streets, and sidewalks).

### Energy: Natural Gas/Electricity

PG&E provides service to Yettem.

### Domestic Water & Wastewater

Domestic water and sewer service in Yettem is provided by Tulare County. **Table 14** shows the number of existing water and sewer connections, the capacity of each system, and the number of additional connections the systems can accommodate for new development (Tulare County, January 2014 and Housing Element, May 2012). Currently, there are plans to hook up Seville to a new pump in Yettem, the plans are contained in **Figure 7**.

**Table 14 - Existing Water & Wastewater Connections in Yettem**

# YETTEM HAMLET PLAN

---

## **Seville's Water Challenges and History of Project**

Most Seville residents get their water supply from the Seville water system (previously the privately-owned Seville Water Company), which has been operated by the County of Tulare since 2009 under a court receivership order. Most of the distribution system is over 50 years old and needs to be fully replaced. The pipes have exceeded their useful life and were not built to current standards. The wells supplying water to the entire community are unable to meet current water demand.

## **Water Systems Improvements**

The objectives of the Seville-Yetter Water Systems Improvement Project are to:

- Secure a safe and reliable source of drinking water for Seville and Yettem
- Replace old and failing infrastructure in Seville
- Promote water conservation via the installation and use of water meters in both communities
- Address governance challenges and improve economies of scale
- Reduce water systems' vulnerabilities

## **Project Objectives**

To accomplish these objectives, the project includes the following Water Systems Improvements:

- Build a completely new water distribution system in Seville
- Drill a New Well (the County of Tulare has purchased property in Yettem for the future well)
- Install Water Meters in Yettem and Seville
- Interconnect the Yettem and Seville Systems

In 2012, the County of Tulare obtained grant funding under Proposition 84 from the State of California, to complete a feasibility study for the Seville water system. The study determined that a new water source for the community was needed, evaluated the consolidation of the Yettem and Seville water systems and funded the preparation of plans, specifications, environmental documents and construction costs estimates for the proposed water systems improvements.

## **Governance Formation**

Self-Help Enterprises and Tulare County will be working with Seville and Yettem to form a Community Services District for both communities to manage the connected systems (formation to be completed November 2018). A detailed formation schedule is available upon request.

# YETTEM HAMLET PLAN

Table 15 - Project Phasing

PROJECT PHASES	
To expedite the construction of proposed water systems improvements and improve water access in Seville, the project has been split into two phases.	
<b><u>PHASE 1: Seville Water Distribution System</u></b>	<b><u>PHASE 2: Seville-Yettem Intertie</u></b>
<p>Includes the construction of a completely new water distribution system in Seville, installation of water meters in Seville and, if enough funding is available, a water storage tank.</p> <p><b><u>Anticipated Project Schedule</u></b> Design, Plans, and Specifications and Environmental Documents</p> <ul style="list-style-type: none"> <li>• Water System Design and Environmental documents have been completed</li> <li>• Project Plans and Specifications are expected to be completed by Fall 2017</li> </ul> <p><b><u>Construction</u></b></p> <ul style="list-style-type: none"> <li>• Begin Construction by early 2018</li> <li>• Complete Construction by the end of 2018</li> </ul> <p><b><u>Estimated Project Cost</u></b></p> <ul style="list-style-type: none"> <li>• Phase 1: \$5 million</li> <li>• Lateral Connections : \$199,300</li> </ul> <p><b><u>Funding Secured to Date</u></b></p> <ul style="list-style-type: none"> <li>• \$5 million – State Water Resources Control Board for Phase 1</li> <li>• \$199,300 – Department of Water Resources for Laterals Connections</li> </ul>	<p>Includes the connection (intertie) of the Seville and Yettem water systems, water meters in Yettem, drilling of the new well in Yettem and the storage tank if it is not part of the Phase 1.</p> <p><b><u>Anticipated Project Schedule</u></b> Design, Plans, Specifications, and Environmental Documents to be completed by 2019.</p> <p><b><u>Construction</u></b></p> <ul style="list-style-type: none"> <li>• To begin in late 2019</li> </ul> <p><b><u>Estimated Project Cost</u></b></p> <ul style="list-style-type: none"> <li>• Phase 2: \$3.5 million</li> </ul>
PROJECT TEAM	

# YETTEM HAMLET PLAN

---

## Sewer

Domestic sewer service in Yettem is provided by Tulare County (**see Table 14**) show the existing sewer connection, the capacity of each system, and the number of additional connections the system can accommodate for new development (Tulare County; January 2014 and Housing Element, May 2012). Mapping of the sewer systems is currently unavailable.

## Storm Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

Yettem does not currently have a storm drainage system.”<sup>9</sup>

## Solid Waste

Solid waste disposal services for the Community of Yettem is provided by Pena’s Disposal, a private company. Solid waste generated in Yettem can be disposed of at Visalia Landfill, located at 22466 Road 80, Visalia

## Roads

“There are several roadways in Yettem that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

---

<sup>9</sup> Action Program 9, Tulare County 2015 Housing Element

# YETTEM HAMLET PLAN

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>10</sup>

**Table 16 - Roads in Need of Major and Medium Repair in Yettem**

Road Maintenance Strategies			
No.	Roadway	Limits	Repair Code
1	Road 140	Avenue 380 to SR 210	RCST
2	Road 140	SR 201 to Avenue 392	GRX

OLAY – overlay resurfacing operation  
CHIP – chip seal  
GRX – grind and remix

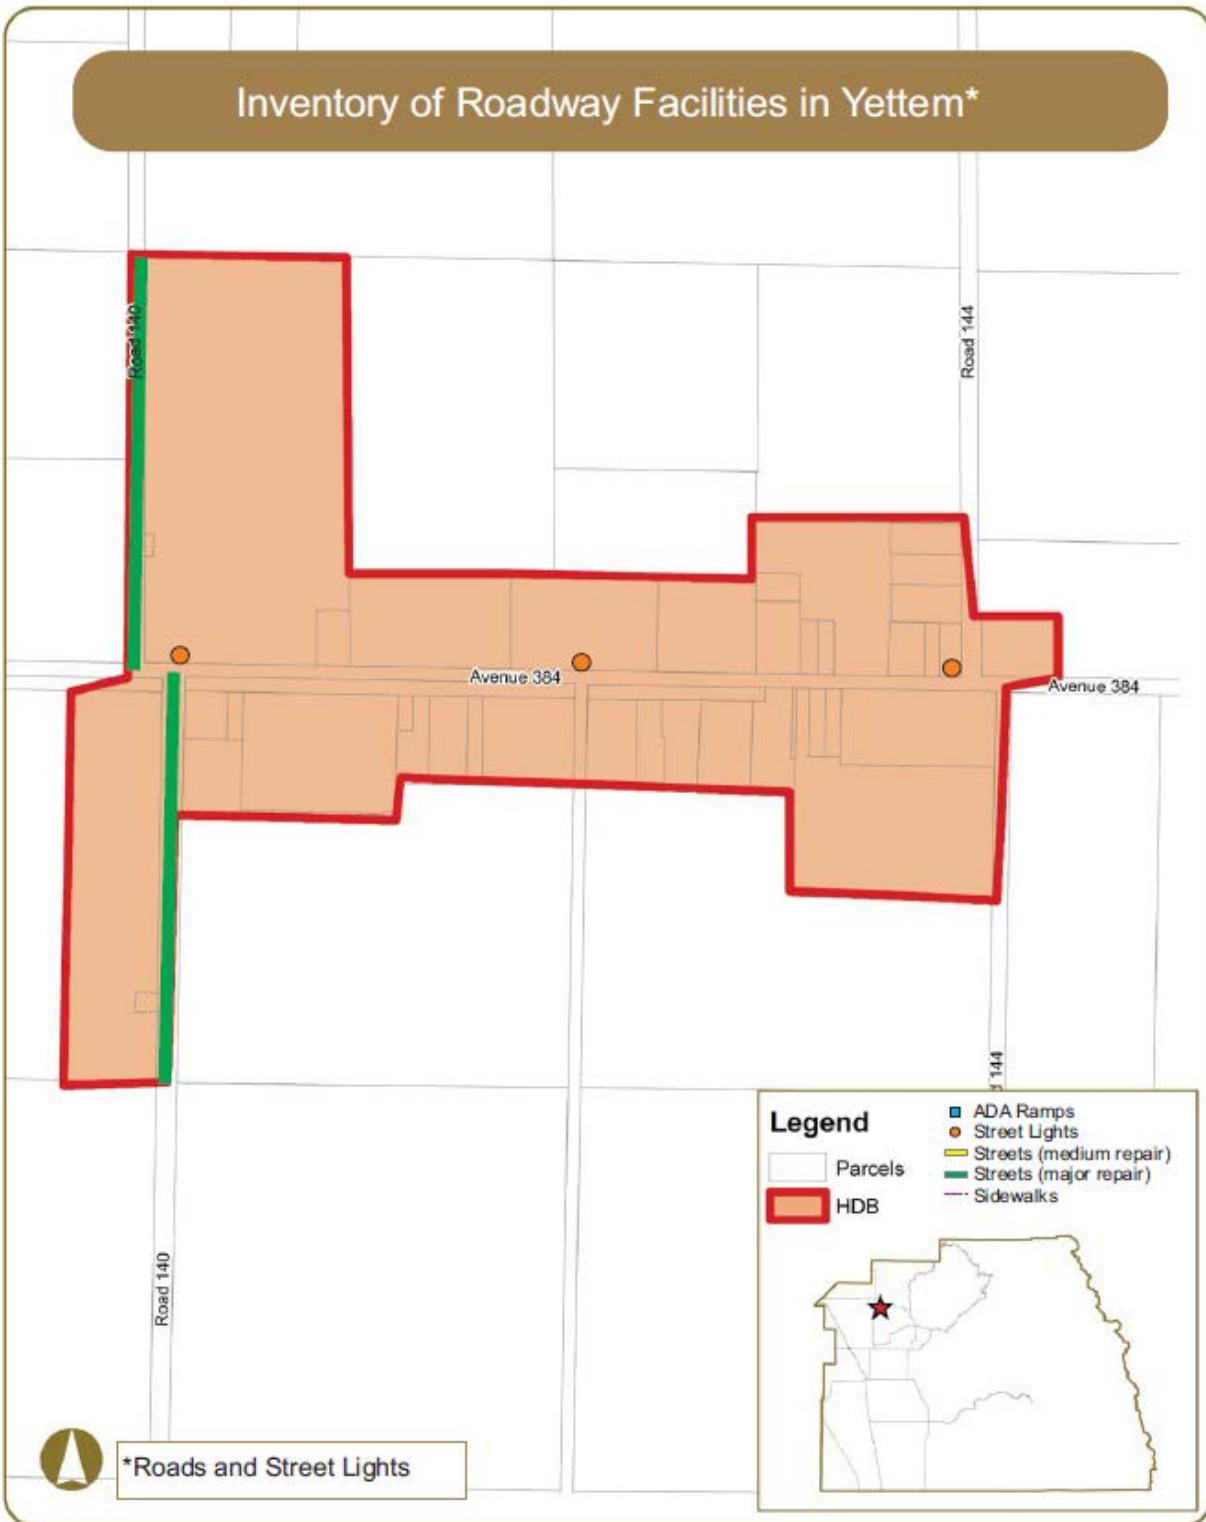

ACST – asphalt reconstruction  
RCST – cold mix reconstruction

<sup>10</sup> Action Program 9, Tulare County 2015 Housing Element

# YETTEM HAMLET PLAN

Figure 8 - Yettem Inventory of Roadway Facilities

# YETTEM HAMLET PLAN

## Street Lights

**Table 17** identifies the location of existing street lights that are maintained by Tulare County, in Yettem, as well as their specifications. **Figure 8** also displays this information graphically. The below table specifies the locations, the pole number, lumens, pole type, arm direction and utility provider. Pole numbers can be arbitrary and are used to match the pole specifications with its location. Lumens measure the amount of light emitted from the bulb (the more lumens the brighter the light). The pole type "W" represents a wood post for which the light is commonly shared with a Utility provider. Similarly, "M" represents metal and "C" represents concrete."<sup>11</sup>

**Table 17 - Existing Street Lights**

<b>Specifications of Existing Street Lights</b>								
No.	East-West Roadway	North-South Roadway	Location	Pole	Lumens	Pole Type	Arm Direction	Utility
1	SR 201	Road 149	North Side	1460	9500	W	S	PG&E
2	SR 201	Road 142	North Side	N/A	9500	W	S	PG&E
3	SR 201	Road 144	NW corner	1459	9500	W	S	PG&E

(Source: Tulare County Public Works, March 2013)

## Sidewalks

There are currently no sidewalks located within Yettem. The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

## ADA Curb Ramps

"The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities. The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Yettem."<sup>12</sup>

<sup>11</sup> Action Program 9, Tulare County 2015 Housing Element

<sup>12</sup> Action Program 9, Tulare County 2015 Housing Element

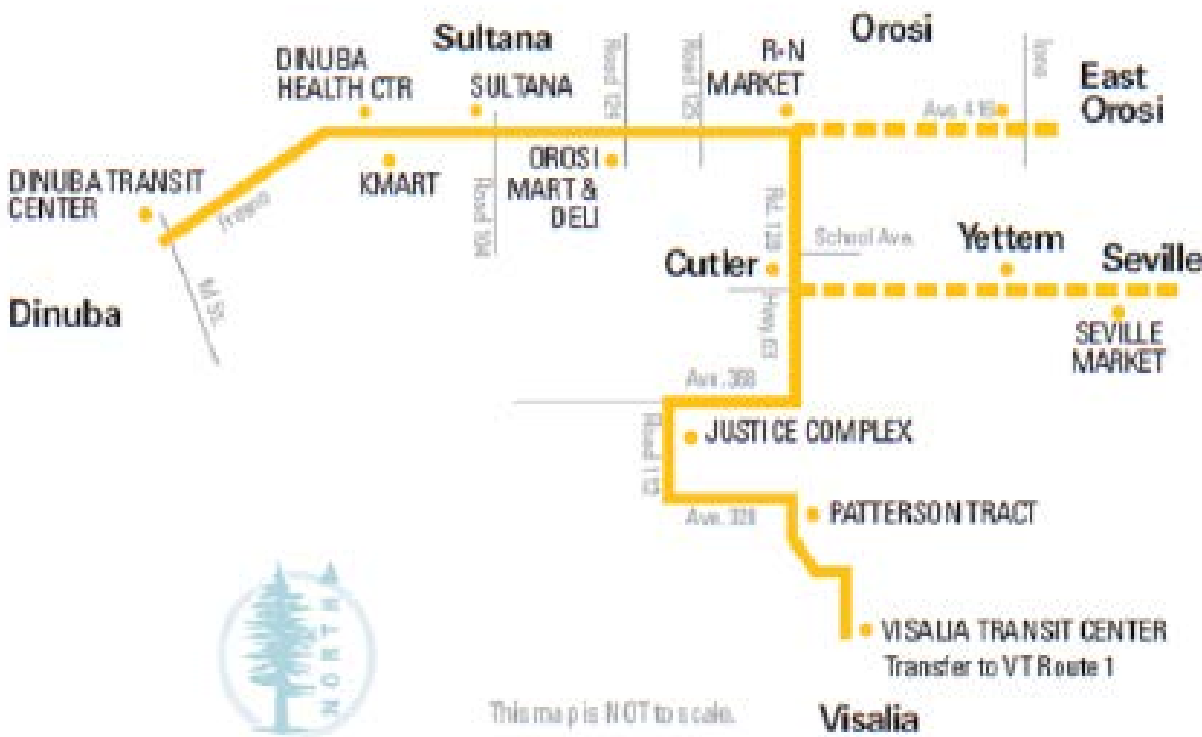

# YETTEM HAMLET PLAN

## Transit and Bus Stops

The County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare's urban transit systems. Yettem is currently connected via TCAT Route 10/North County (locate just east at the Seville Market) to the City of Dinuba and the City of Visalia transit centers (**see Figure 9**). Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday.

**Figure 9 - TCAT - Fixed Route Service for Yettem**

Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Yettem, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

# YETTEM HAMLET PLAN

---

## Bicycle Facilities

The 2014 Regional Transportation Plan (adopted June 30, 2014) prepared by the Tulare County Association of Governments (TCAG) provides for a regional bicycle network intended to provide a safe alternative mode of travel. The 2014 RTP identified State Route 63 as a proposed Class II Bike Project<sup>13</sup>. In Tulare County, bicycle travel is not yet considered a major mode of transportation and bicycles are used seen outside of cities and towns. The current bicycle plan provides for connections between the major urban areas and recreation facilities in the County and is expected to be satisfactory for the foreseeable future. The only bike route within or near the community is SR 63.

## AMTRAK

The Hanford AMTRAK station, located approximately 60 miles to the southwest in Kings County, is the closest station to Yettem providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 30 miles south. Fresno Yosemite International Airport (FAT), approximately 45 miles northwest of Yettem, is a principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field (BFL), Bakersfield's principal commercial airport, is approximately 90 miles southeast of Yettem and offers direct flights to several destinations

## State Route 99

State Route (SR) 99 is a major route between cities within the Central Valley. SR 99 is the primary route between the City of Fresno to the North and the City of Bakersfield to the South. Yettem is located approximately 15 miles east of SR 99

## State Route 201

State Route (SR) 201 is a state highway in the Central Valley of California, United States. It connects SR 99 in Kingsburg with State Route (SR) 63 and SR 245 in Elderwood. SR 201 traverse Yettem east to west.

## **PUBLIC SERVICES**

### Sheriff

Police protection services are provided in Yettem by the Tulare County Sheriff's Department substation, located at 40765 Road 128, in Culter, approximately 8 miles northwest of Yettem. The substation provides patrol services 24-hours per day, 365 per year. Additional Sheriff resources are available as needed via dispatch from the main Sheriff's Office in Visalia, CA.

---

<sup>13</sup> TCAG Action Element, TCAG 2014 Regional Transportation Plan. Page 3-89.

# YETTEM HAMLET PLAN

---

## Fire

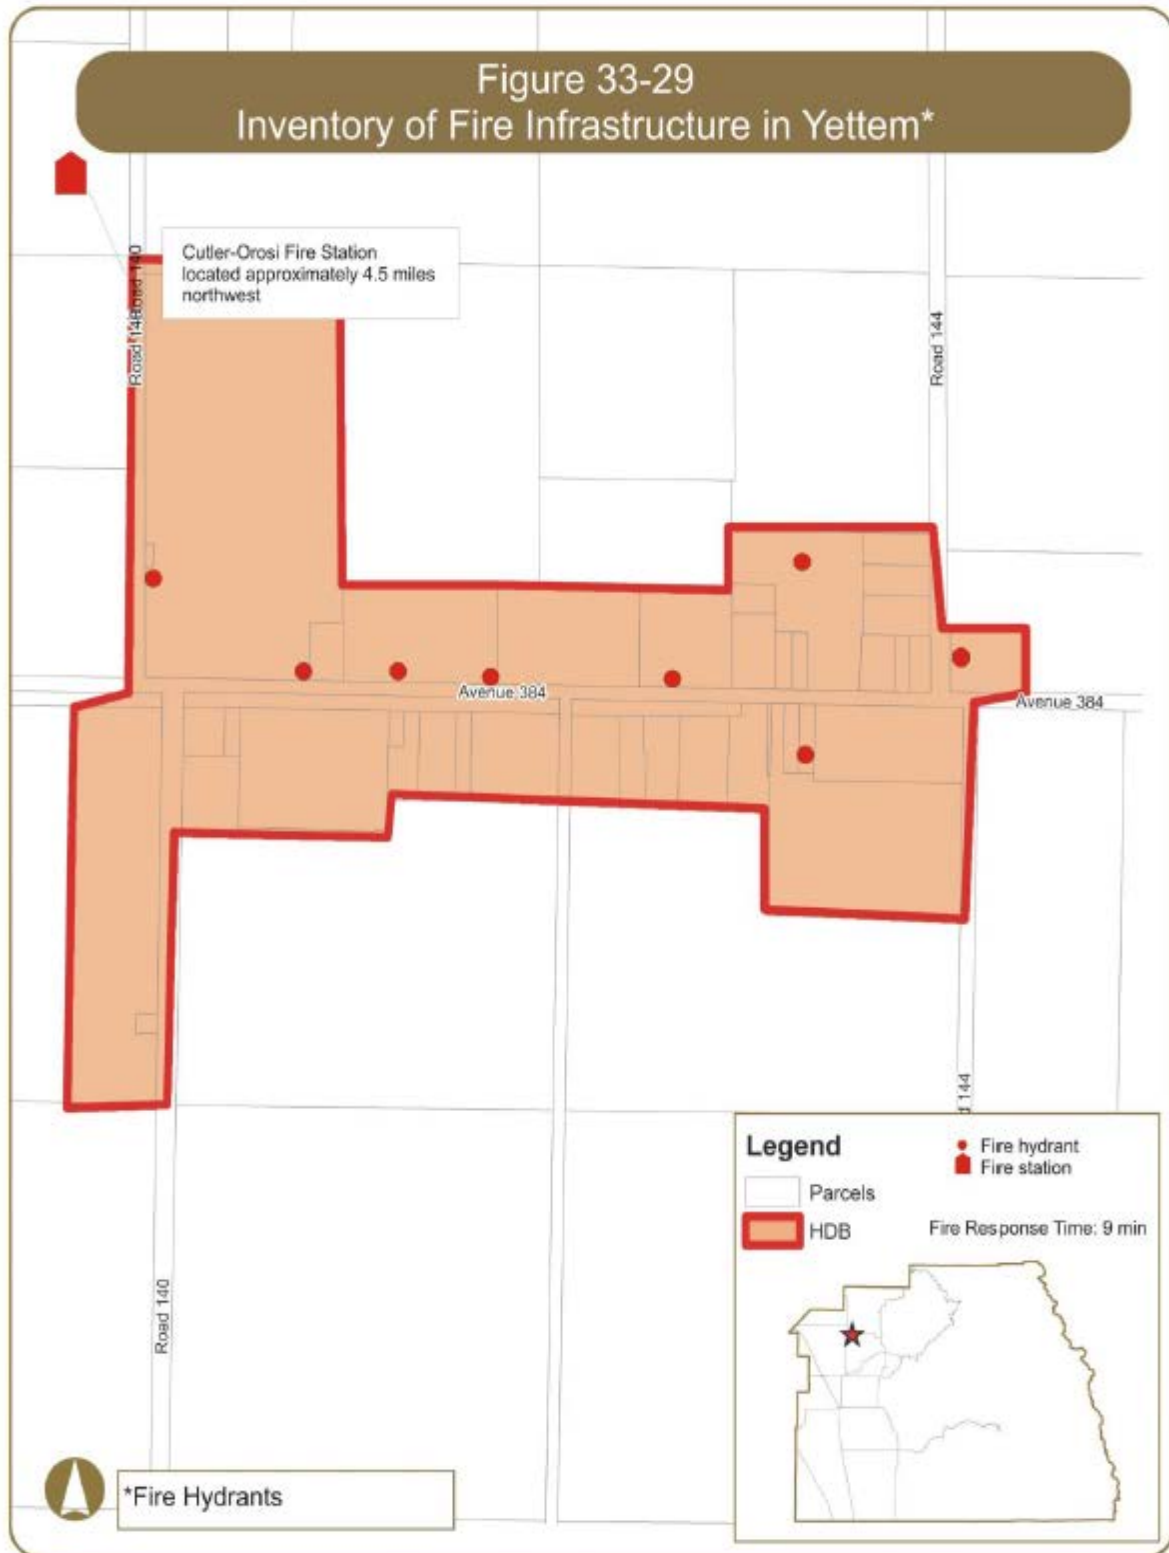

Fire protection and emergency medical services are provided for Yettem by the Tulare County Fire Department. The community is served by Tulare Fire Station #4, located at 40779 Road 128, in Culter. Patrol 4, Engine 4 and Engine 204 is assigned to this location.

Eight fire hydrants are found within Yettem. These fire hydrants are located within the County right-of-way. (see **Table 18**). **Figure 10** displays Existing Fire Hydrants in Yettem.

<b>Table 18 - Existing Fire Hydrants</b>	
<b>No.</b>	<b>Location</b>
1	Road 140 north of Avenue 384
2	Avenue 384 east of Road 140
3	Avenue 384 west of Road 144
4	Road 144 north of Avenue 384

# YETTEM HAMLET PLAN

Figure 10 - Inventory of Fire Infrastructure In Yettem

# YETTEM HAMLET PLAN

## Schools

Schools are essential component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Yettem Hamlet Plan Area is within the Stone Corral Elementary School District. The District provides K-8 grade education in Seville. High School students attend high school in Delano. Yettem is within the Visalia Unified School District.

## Libraries

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>14</sup> The closest library is located in Orosi, four miles to the northeast and the Ivanhoe Branch, four miles to the south. (see Table 19)

Table 19 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Orosi	Orosi Branch 12646 Avenue 416 Orosi, CA 93647	Wednesday, Thursday, Friday 9:00 am - 1:00 pm 2:00 p.m. – 6:00 p.m.
Ivanhoe	Ivanhoe Branch 15964 Heather Ivanhoe, CA 93235	Tuesday and Friday 9:00 a.m. – 1:00 p.m. 2:00 p.m. – 6:00 p.m.

Library hours current as of September 2017

## Parks

In the community of Yettem there is no safe public green space for children to play and adults to be physically active. The nearest park is located 6 miles away in the city of Orosi. Residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and concerned for the health of their children from lack of physical activity that comes from not having a safe place to be physically active. Residents expresses that having a community park is a major priority for them.

Presently there are no County owned/operated public parks in Yettem. The closest public park to the community is Ledbetter Park, located one mile northwest of Culter on Road 124/State Route 63.

# THE YETTEM HAMLET PLAN

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets

<sup>14</sup> General Plan Background Report, page 7-96

# YETTEM HAMLET PLAN

---

and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>15</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>16</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

Yettem is a small agricultural community located near State Route 63 and 201. The major rural collector road is Avenue 384 (SR 201). There are no proposed major streets as part of this Hamlet Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

# YETTEM HAMLET PLAN

---

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

## **GOALS, OBJECTIVES AND POLICIES**

This Section of the Yettem Hamlet Plan describes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Hamlet Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Yettem to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Yettem Hamlet Plan, and input received from Yettem citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### **Community Development**

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned shopping areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.

# YETTEM HAMLET PLAN

---

5. The County shall ensure that solid waste facility sites (for example, landfills) are protected from the encroachment by sensitive and/or incompatible land uses.
6. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
7. The County shall work with the Schools to provide safe routes to school.
8. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Yettem Community Plan.
9. The Yettem Hamlet Plan should be reviewed every five years to determine if amendments are appropriate.
10. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to initiate home maintenance/repair programs in Yettem.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Yettem.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

# YETTEM HAMLET PLAN

---

## Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

## Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Zone an area for a community shopping center in the northeastern portion of the community to meet local consumer needs.
3. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

## Policies:

1. Encourage the Yettem to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

## Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## **Environmental Quality and Public Safety**

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Yettem citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

## Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

# YETTEM HAMLET PLAN

---

Objective: Provide sufficient open space for community recreation needs.

Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

Objective: Protect Agricultural Lands:

Land within the respective Yettem, which is designated as residential reserve, commercial reserve, or industrial reserve shall be retained in agricultural use until such time as conversion to urban use (as defined in the Tulare County General Plan) is appropriate. When a rezoning occurs without a general plan amendment, the reserve designation shall be removed from the parcel.

The following criteria shall be used to determine when conversion to urban use is appropriate:

- The property is not subject to an agricultural preserve contract;
- Full urban services, schools, and infrastructure sufficient to serve urban development either are available or can be made available; and

- At least 30 % the property boundaries are contiguous on at least one side to existing urban development.
- Until productive agricultural lands are ready to be developed they shall be retained in parcels of sufficient size to allow agricultural uses.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Yettem.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Yettem.

# YETTEM HAMLET PLAN

## ASSESSMENT OF LAND NEEDS

Within the existing 312 acre Yettem Hamlet Development Boundary, agricultural activities, such as orchards and pasture, currently constitute (7%) of the HDB Area.

The ratio of urbanized acres per person is calculated by dividing the year 2015 population of 300 by 55.9 urbanized acres (area within the HDB), which equals 5.3 persons per urbanized acre (see **Tables 20 and 21**) showing population projections). Projecting the population at a 1.3% growth rate adds 64 persons by year 2030.

### Population Growth Forecast

Table 20 - Yettem Population Projections			
Growth Rate	2015	2020	2030
0.013	300	320	364

### Demand Forecast

To determine whether there is enough land within the exiting HDB to accommodate anticipated growth within the community, the population growth and land use projections in Year 2030 were compared to the vacant land available within the HDB.

### Population and Housing Units

The year 2015 baseline population and was determined by projecting the 2015 American Community Survey (Survey)<sup>17</sup> data population by an annual growth rate of 1.3% annually. The Survey indicated that in Year 2015 the community had 80 dwelling units (including vacant dwellings) with a population of 300. At an annual growth rate of 1.3%, the projected housing units are 85 and 97 in years 2020 and 2030, respectively, and projected population is 324 and 364 in years 2020 and 2030, respectively.

Table 21 - Population Projections		
Year	Population	Growth (%)
2015	300	0.013
2016	304	0.013
2017	308	0.013
2018	312	0.013
2019	316	0.013
2020	320	0.013
2021	324	0.013
2022	328	0.013
2023	333	0.013
2024	337	0.013
2025	341	0.013
2026	346	0.013
2027	350	0.013
2028	355	0.013
2029	359	0.013
2030	364	0.013

The total land area developed in these existing residential units was provided by the Tulare County Resource Management Agency Geographic Information System (GIS) division. There are currently approximately 312 acres within the HDB that are developed for residential uses. Assuming that the land area needed to accommodate future population increases is consistent with annual population growth projections, the land use growth projections are also assessed at an annual growth rate of 1.3%.

<sup>17</sup> See: [http://factfinder.census.gov/faces/nav/jsf/pages/community\\_facts.xhtml](http://factfinder.census.gov/faces/nav/jsf/pages/community_facts.xhtml).

# YETTEM HAMLET PLAN

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

### Infrastructure

In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

### Use Permits

There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

### Education

Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Table 22 - Education Attainment			
Educational Attainment	California	Tulare County	Yettem
Population 25 years and over	25,257,858	260,964	149
Less than 9th grade	10.0%	20.8%	63.8%
9th to 12th grade, no diploma	8.2%	10.9%	16.1%
High school graduate (& equivalency)	20.7%	25.2%	20.1%
Some college, no degree	21.8%	22.3%	0.0%
Associate's degree	7.8%	7.0%	0.0%
Bachelor's degree	19.8%	9.5%	0.0%
Graduate or professional degree	11.6%	4.3%	0.0%

2011-2015 American Community Survey 5-Year Estimates

Based on the 2011-2015 American Community Survey (see Table 22), the educational barrier in Yettem begins in grade school. Of the adults age 25 and older, 63.8% had an educational level of less than 9<sup>th</sup> grade. A lack of education could limit the types of jobs that these adults would be qualified to undertake. Improving educational attainment should begin in elementary school. As part of the Safe Routes to Schools, Tulare County will provide pedestrian facilities for children to walk or bike to school. This would provide a safer and easier route for children to get to and from school.

### Health Care

Health care is important for economic development as businesses need healthy employees. The nearest medical offices are located in Cutler/Orosi.

# YETTEM HAMLET PLAN

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

Based on the forecasted growth and the recommended Hamlet Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (see **Table 23**) and Zoning Plan map (see **Table 24**) have been updated.

<b>Table 23 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	55.1
Right-of Ways	4.8
Yettem HDB	59.9

<b>Table 24 - Proposed Zoning Districts</b>	
Proposed Zones	Acres
A-40	6.5
C-2-MU	29.9
P-O	5.5
R-A	13.1
Unclassified (right-of-Way)	
Yettem HDB	59.9

## IMPLEMENTATION STRATEGY

The purpose of this section is to describe a proposed approach to implement the general plan recommendations contained in the Yettem Hamlet Plan. The following components comprise the Yettem Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

### Zoning District Changes

As part of this Implementation Program for the Yettem Hamlet Plan, there are several proposed changes to existing zoning districts. These changes are described below.

### Chapter 16 of the Zoning Code

Revise Chapter 16 of the zoning code to limit the uses that require a use permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

### Mixed Use Overlay District

This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Yettem.

# YETTEM HAMLET PLAN

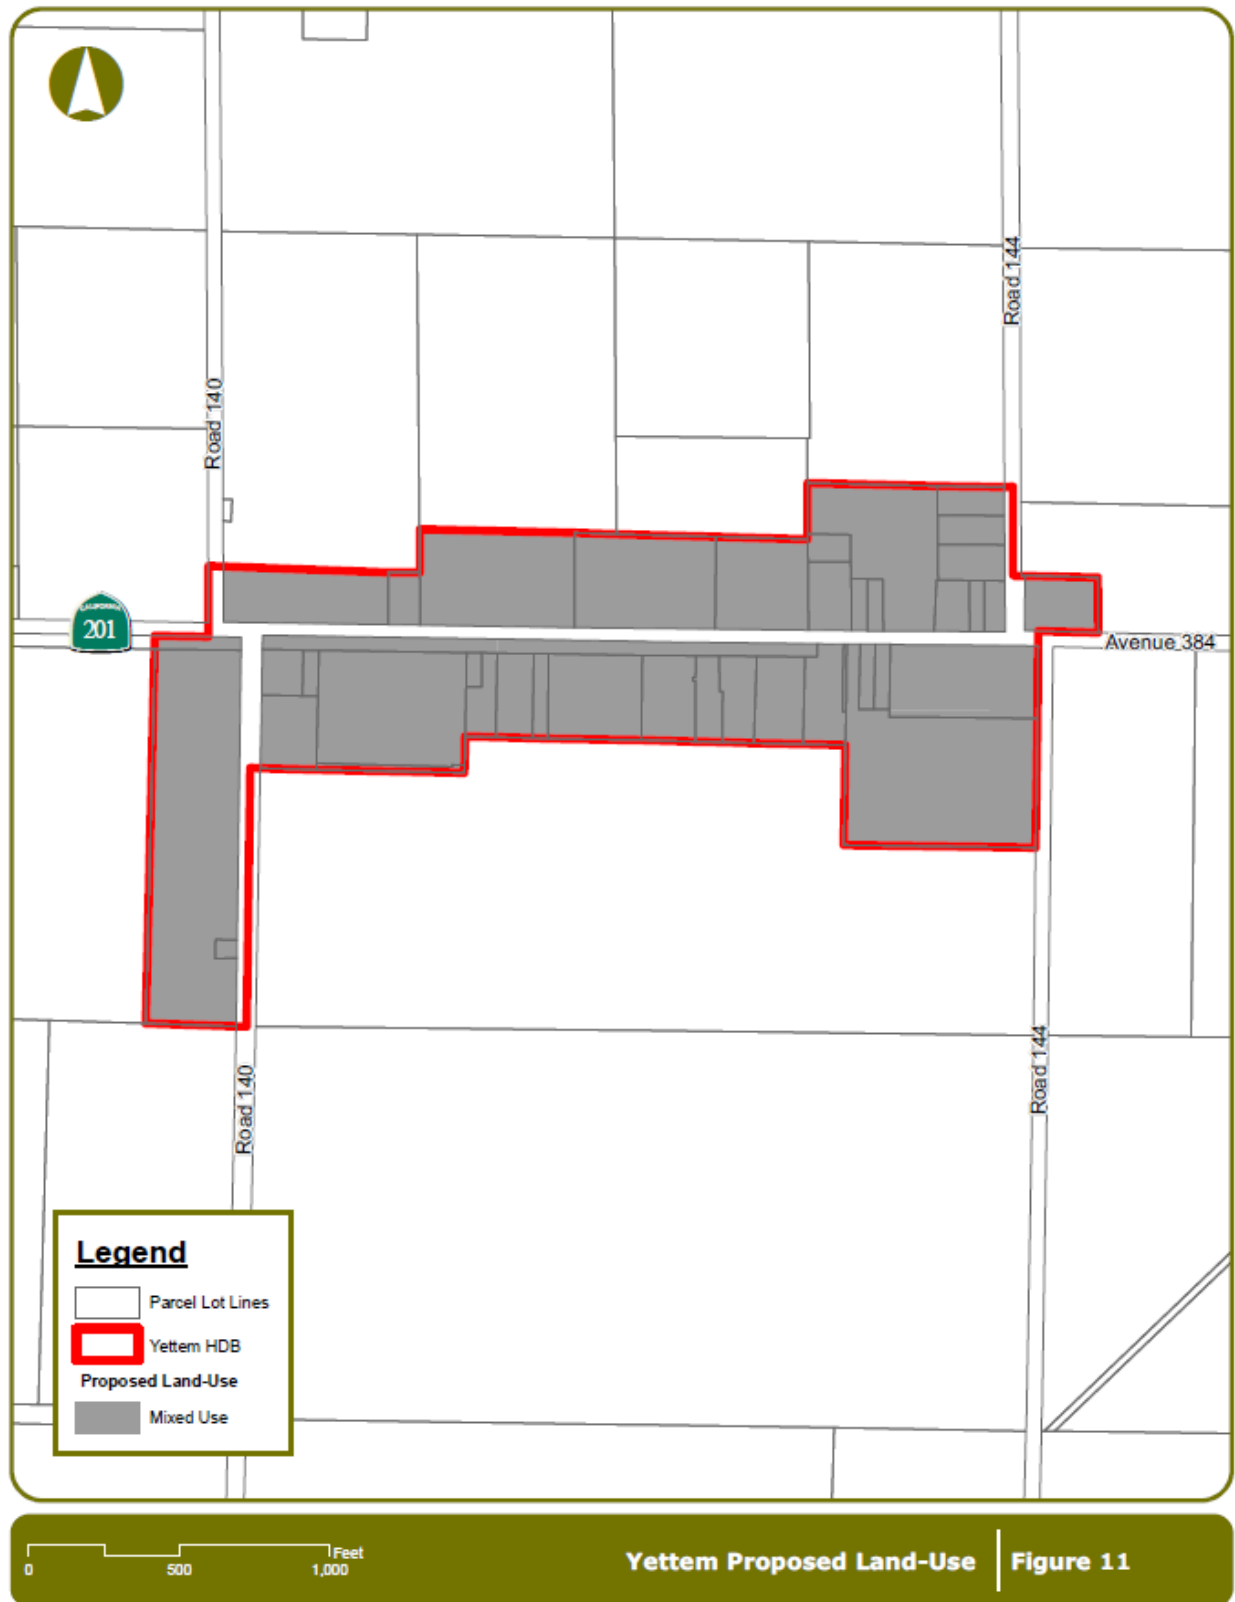

---

## Zoning Map Update

The current Zoning Map for Yettem (**see Figure 12**) will be amended to be compatible with the Land Use Map (**see Figure 11**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**See Figure 13**) Yettem Proposed Zoning Districts.

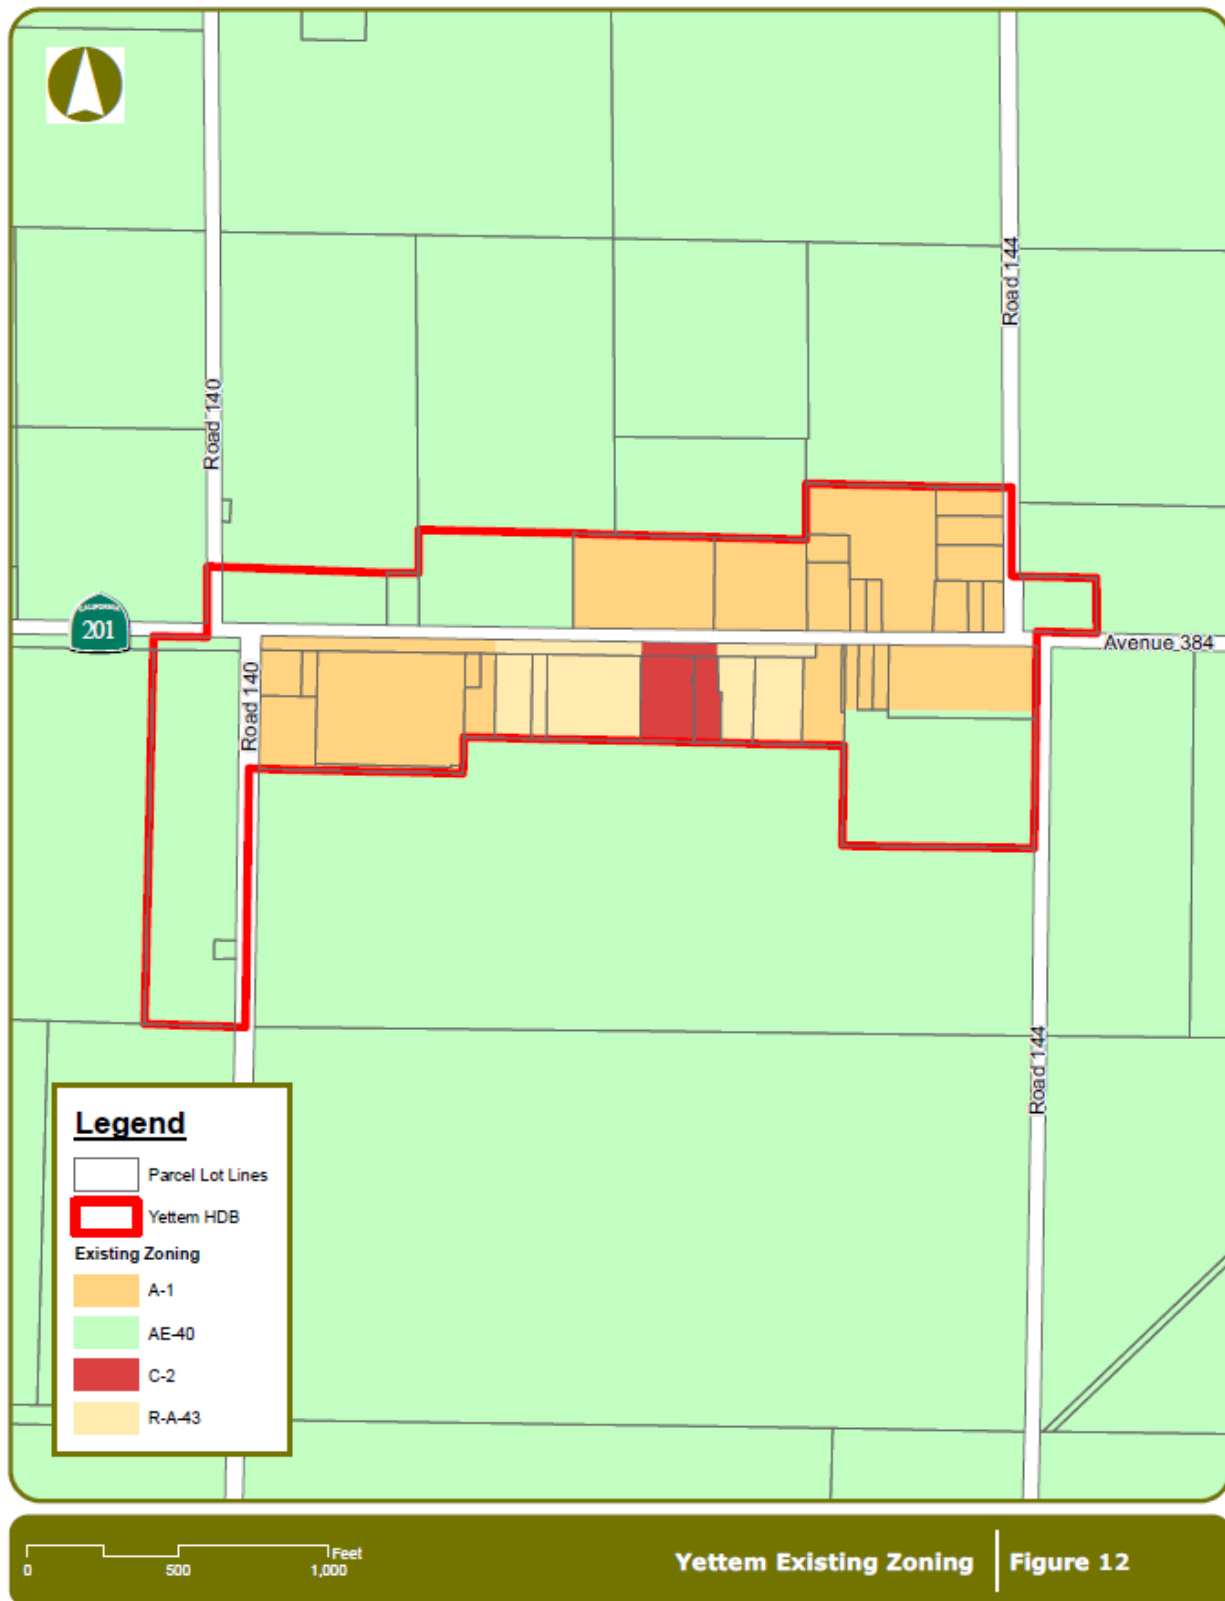

# YETTEM HAMLET PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### H. Permitted Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1

## A-2 *Mixed Use Overlay District (Zone Change Text)*

---

The following regulations shall apply in the community of Yettem, unless otherwise provided in this Ordinance.

**PURPOSE**            **A.**     The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

**APPLICATION**       **B.**     This overlay zone only applies to the community of Yettem.

**USE**                   **C.**     No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Yettem.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust,

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# YETTEM HAMLET PLAN

---

All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## DEVELOPMENT

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet

# YETTEM HAMLET PLAN

---

in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

All other Development Standards are outlined in the Community Plan for Yettem. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

# YETTEM HAMLET PLAN

---

## **A-3     *Development Standards (Mixed Use Zoning District)***

---

To promote Economic Development within the Yettem Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Yettem. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district. To promote Economic Development within the Yettem Urban Development Boundary, a Mixed Use Overlay zoning district is being established to allow for flexibility in the allowed uses within Yettem. In addition, the use permit restriction is updated to allow for ministerial approval [by the Planning Director]. Development standards are established to ensure high quality development within this mixed use overlay district.

### **ARCHITECTURE**

A-1     Entries to buildings should be individualized and clearly identifiable.

A-2     Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3     Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4     The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5     Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6     Each building should have a defined base, body, and cap segment

A-7     Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8     Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9     Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10    Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11    Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

# YETTEM HAMLET PLAN

---

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# YETTEM HAMLET PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# YETTEM HAMLET PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance.

Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# YETTEM HAMLET PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# YETTEM HAMLET PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# YETTEM HAMLET PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

# YETTEM HAMLET PLAN

---

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# YETTEM HAMLET PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

AMENDMENTS (GPA 17-035) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Hamlet Plans 2017 Update which consists of General Plan Amendment No. GPA 17-035 amendment to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), and Transportation and Circulation, and Part III amending the Tulare County General Plan to adopt Hamlet Plans and Hamlet Development Boundaries, (Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024), Change of Zones (Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map), for an amendment PZC 17-039 to Section 16 of Ordinance No. 352, to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundary, and Zone Ordinance Amendment No. PZC 17-038 establishing a Mixed Use Combining Zone in Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem (incorporated by reference herein). The unincorporated Hamlet Communities are located within the Mount Diablo Base & Meridian as follows: Allensworth, Sections, 4, 5, 8, 9, 15, & 16, Township 24S, Range 25E, Delft Colony, Sections 22, 23, 26, & 27 Township 16S, Range 23E, East Tulare Villa, Sections 8, & 9, Township 20S, Range 25E, Lindcove, Section 17, Township 18S, Range 27E, Monson Sections 34, & 35, Township 16 south, Range 24 East. Seville, Sections 1, 2 & 35, Township 17S, Range 25E,

Teviston, Sections 8, 9, 16, 17, 21, & 22, Township 23S, Range 25E, Tonyville, Section 30, Township 23S, Range 25E, Waukena, Sections 5, 31, & 32 Township 21S, Range 23E, West Goshen Sections 22 & 23, Township 18 south, Range 23 East, Yettem, Sections 3, 4, 33, & 34 Townships, 16S & 17S Range 25E; and,

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element (Open Space), and Transportation & Circulation Element; (2) add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Hamlet Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Hamlet Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-035 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management (Open Space) and the Transportation and Circulation Element; Change of Zone No. PZC 17-038 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for Allensworth Change of Zone No. PZC 17-037 (Zoning District Map), Delft Colony Change of Zone No. PZC 17-015 (Zoning District Map), East Tulare Villa Change of Zone No. PZC 17-016 (Zoning District Map), Lindcove Change of Zone No. PZC 17-017 (Zoning District Map), Monson Change of Zone No. PZC 17-018 (Zoning District Map), Seville Change of Zone No. PZC 17-019 (Zoning District Map), Teviston Change of Zone No. PZC 17-020 (Zoning District Map), Tonyville Change of Zone No. PZC 17-021 (Zoning District Map), Waukena Change of Zone No. PZC 17-022 (Zoning District Map), West Goshen Change of Zone No. PZC 17-023 (Zoning

District Map, Yettem Change of Zone No. PZC 17-024 (Zoning District Map) within the respective Hamlet Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-039 an amendment to Section 16 to allow additional by-right uses in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Hamlet Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Hamlet Plans;
  - b. Encourage infill development within Hamlet Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Hamlet Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The Hamlet planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;

- b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on October 26, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Hamlet Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Hamlet Plans 2017 Update General Plan Amendment 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014; Change of Zone No. PZC 17-037 (Zoning District Map); Delft Colony General Plan Amendment No. GPA 17-015; Change of Zone No. PZC 17-015 (Zoning District Map); East Tulare Villa General Plan Amendment No. GPA 17-016; Change of Zone No. PZC 17-016 (Zoning District Map); Lindcove General Plan Amendment No. GPA 17-017; Change of Zone No. PZC 17-017 (Zoning District Map); Monson General Plan Amendment No. GPA 17-018; Change of Zone No. PZC 17-018 (Zoning District Map); Seville General Plan Amendment No. GPA 17-019; Change of Zone No. PZC 17-019 (Zoning District Map); Teviston General Plan Amendment No. GPA 17-020; Change of Zone No. PZC 17-020 (Zoning District Map); Tonyville General Plan Amendment No. GPA 17-021; Change of Zone No. PZC 17-021 (Zoning District Map); Waukena General Plan Amendment No. GPA 17-022; Change of Zone No. PZC 17-022 (Zoning

District Map); West Goshen General Plan Amendment No. GPA 17-023; Change of Zone No. PZC 17-023 (Zoning District Map); Yettem General Plan Amendment No. GPA 17-024; Change of Zone No. PZC 17-024 (Zoning District Map); Change of Zone No. PZC 17-038 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-039 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Planning Framework, Environmental Resources Management (Open Space), Transportation & Circulation, and Part III (Hamlet Plans) has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,

2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,
4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit “B” that are restrictive and applied only to the Hamlet Plans 2017 Update. Therefore, the public will benefit from the Hamlet Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Aguilar, seconded by Commissioner Gong, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Framework Element; Land Use Elements, , Environmental Resources Management (Open Space) Transportation & Circulation and Part III Hamlet Plan of the Tulare County General Plan as set forth in Exhibits "A to K" for the Hamlet Plans 2017 Update General Plan Amendment No. GPA 17-035; inclusive of Allensworth General Plan Amendment No. GPA 17-014, Delft Colony General Plan Amendment No. GPA 17-015, East Tulare Villa General Plan Amendment No. GPA 17-016, Lindcove General Plan Amendment No. GPA 17-017, Monson General Plan Amendment No. GPA 17-018, Seville General Plan Amendment No. GPA 17-019, Teviston General Plan Amendment No. GPA 17-020, Tonyville General Plan Amendment No. GPA 17-021, Waukena General Plan Amendment No. GPA 17-022, West Goshen General Plan Amendment No. GPA 17-023, Yettem General Plan Amendment No. GPA 17-024 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Hamlet communities as part of the Hamlet Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on October 26, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Hamlet Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017 and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation & Circulation and Part III Hamlet Plans of the Tulare County General Plan for the Hamlet Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Hamlet Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Hamlet Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to adopt Hamlet Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;
4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the

adoption of Hamlet development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;

5. The Amendment to Part I Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Hamlet Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the Hamlet community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Planning Framework, Land Use, Environmental Resources Management, Transportation & Circulation and Public Facilities & Services Elements, and Part III Hamlet Plans of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-035 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-035 the Hamlet Plans 2017 Update set forth in attached Exhibits "A-K" which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Millies, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT TO )  
SECTION 18.9 "MU" MIXED USE COMBINING )  
ZONE OF ORDINANCE NO. 352 CONSISTENT ) RESOLUTION NO. 9368  
WITH THE ADOPTED HAMLET PLANS 2017 )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE )  
NO. PZC 17-038 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella, Ducor, El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable

Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano, Elliot

PLANS, AS PROPOSED IN CHANGE                    )  
OF ZONE NO. PZC 17-039                            )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem, consistent with the adopted Hamlet Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on October 26, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on November 8, 2017, and

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Hamlet Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem ;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the Hamlet Communities of Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem , consistent with the adopted Hamlet Plans 2017 Update, consistent with the Hamlet Communities 2017.

The foregoing was adopted upon motion of Commissioner Gong, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on November 8, 2017, by the following roll call vote:

WHEREAS, at the Tulare County Planning Commission meeting, a public hearing was held and public testimony was presented by two Allensworth residents and a representative from Leadership Council who supported the project was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Hamlet Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Hamlet Plans 2017 Update (GPA 17-035) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Communities;

3. The proposed changes in zone district designations identified in the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the Allensworth Change of Zone No. PZC 17-037, Delft Colony Change of Zone No. PZC 17-015, East Tulare Villa Change of Zone No. PZC 17-016, Lindcove Change of Zone No. PZC 17-017, Monson Change of Zone No. PZC 17-018, Seville Change of Zone No. PZC 17-019, Teviston Change of Zone No. PZC 17-020, Tonyville Change of Zone No. PZC 17-021, Waukena Change of Zone No. PZC 17-022, West Goshen Change of Zone No. PZC 17-023, Yettem Change of Zone No. PZC 17-024 an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" "N" "Q" "T" "W" "Z" "CC" "FF" Rezoning Plans consistent with the adopted Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Plans 2017 Update (GPA 17-035).

Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Hamlet and Community Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Hamlet and Community Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Hamlet and Community Plans 2017 Update (GPA 17-035); and

3. Adopted one General Plan Amendment No. GPA 17-035, for the Hamlet and Community Plans 2017 Update inclusive of the Allensworth Hamlet Plan (GPA 17-014), Delft Colony Hamlet Plan (GPA 17-015), East Tulare Villa Hamlet Plan (GPA 17-016), Lindcove Hamlet Plan (GPA 17-017), Monson Hamlet Plan (GPA 17-018), Seville Hamlet Plan (GPA 17-019), Teviston Hamlet Plan (GPA 17-020), Tonyville Hamlet Plan (GPA 17-021), Waukena Hamlet Plan (GPA 17-022), West Goshen Hamlet Plan (GPA 17-023), Yettem Hamlet Plan (GPA 17-024), Alpaugh Community Plan (GPA 17-004), East Orosi Community Plan (GPA 17-034), London Community Plan (GPA 17-008), Richgrove Community Plan (GPA 17-011), Sultana Community Plan (GPA 17-012), and Amendments to Part III of the Tulare County General Plan to adopt Hamlet and Community Plans, and to Part I General Plan Amendment to the Planning Framework, Land Use, Environmental Resources Management (Open Space), Transportation and Circulation Elements, consistent with the Hamlet Plans 2017 Update; and
4. Waived the final reading and adopt Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Hamlet and Community Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-038) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-039) to Section 16 to allow additional by-right uses within the Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, and Yettem Hamlet Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Allensworth (PZC 17-037), Delft Colony (PZC 17-015), East Tulare Villa (PZC 17-016) Lindcove (PZC 17-017), Monson (PZC 17-018), Seville (PZC 17-019), Teviston (PZC 17-020), Tonyville (PZC 17-021), Waukena (PZC 17-022), West Goshen (PZC 17-023), Yettem (PZC 17-024), consistent with the Hamlet Plans 2017 Update.
  - D. Zone Ordinance Amendment (PZC 17-041) to Section 18.9 to adopt a Mixed-Use Combining Zone within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - E. Zone Ordinance Amendment (PZC 17-042) to Section 16 to allow additional by-right uses within the Alpaugh, East Orosi, London, Richgrove, and Sultana Urban Development Boundaries.
  - F. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for Alpaugh (PZC 17-004), East Orosi (No. PZC 17-005), London (PZC 17-008), Richgrove (PZC 17-011), Sultana (PZC 17-012), consistent with the Community Plans 2017 Update; and
5. Adopted the findings of approval set forth for Hamlets in Planning Commission Resolution No. 9366 (Addendum to EIR), Planning Commission Resolution No.

9367 (Hamlet Plans 2017 Update), Planning Commission Resolution No. 9368 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9369 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9370 (Zoning District Ordinance Maps), and Communities in Planning Commission Resolution No. 9371 (Addendum to EIR), Planning Commission Resolution No. 9372 (Community Plans 2017 Update), Planning Commission Resolution No. 9373 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9374 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9375 (Zoning District Ordinance Maps); and

6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add Allensworth, Delft Colony, East Tulare Villa, Lindcove, Monson, Seville, Teviston, Tonyville, Waukena, West Goshen, Yettem, Alpaugh, East Orosi, London, Richgrove, and Sultana to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. Seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Hamlet and Community Plans, and associated project documents; and
10. Adopted the findings of approval set forth in Planning Commission Resolution 9376 and approved the Strategic Growth Council Final Report; and
11. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## INTRODUCTION

An important objective in preparing a Legacy Plan for the El Monte Mobile Village is to develop a plan which can accurately reflect the needs and priorities of the El Monte Mobile Village community. El Monte Mobile Village was designated in the 2030 Tulare County General Plan (2012) through the SB 244 Study under GPA 2015-D. It has become apparent that a more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [for example wells, water distribution piping, and storage tanks], curbs, gutters, sidewalks, etc.) and to stimulate economic development within the community.

### Location

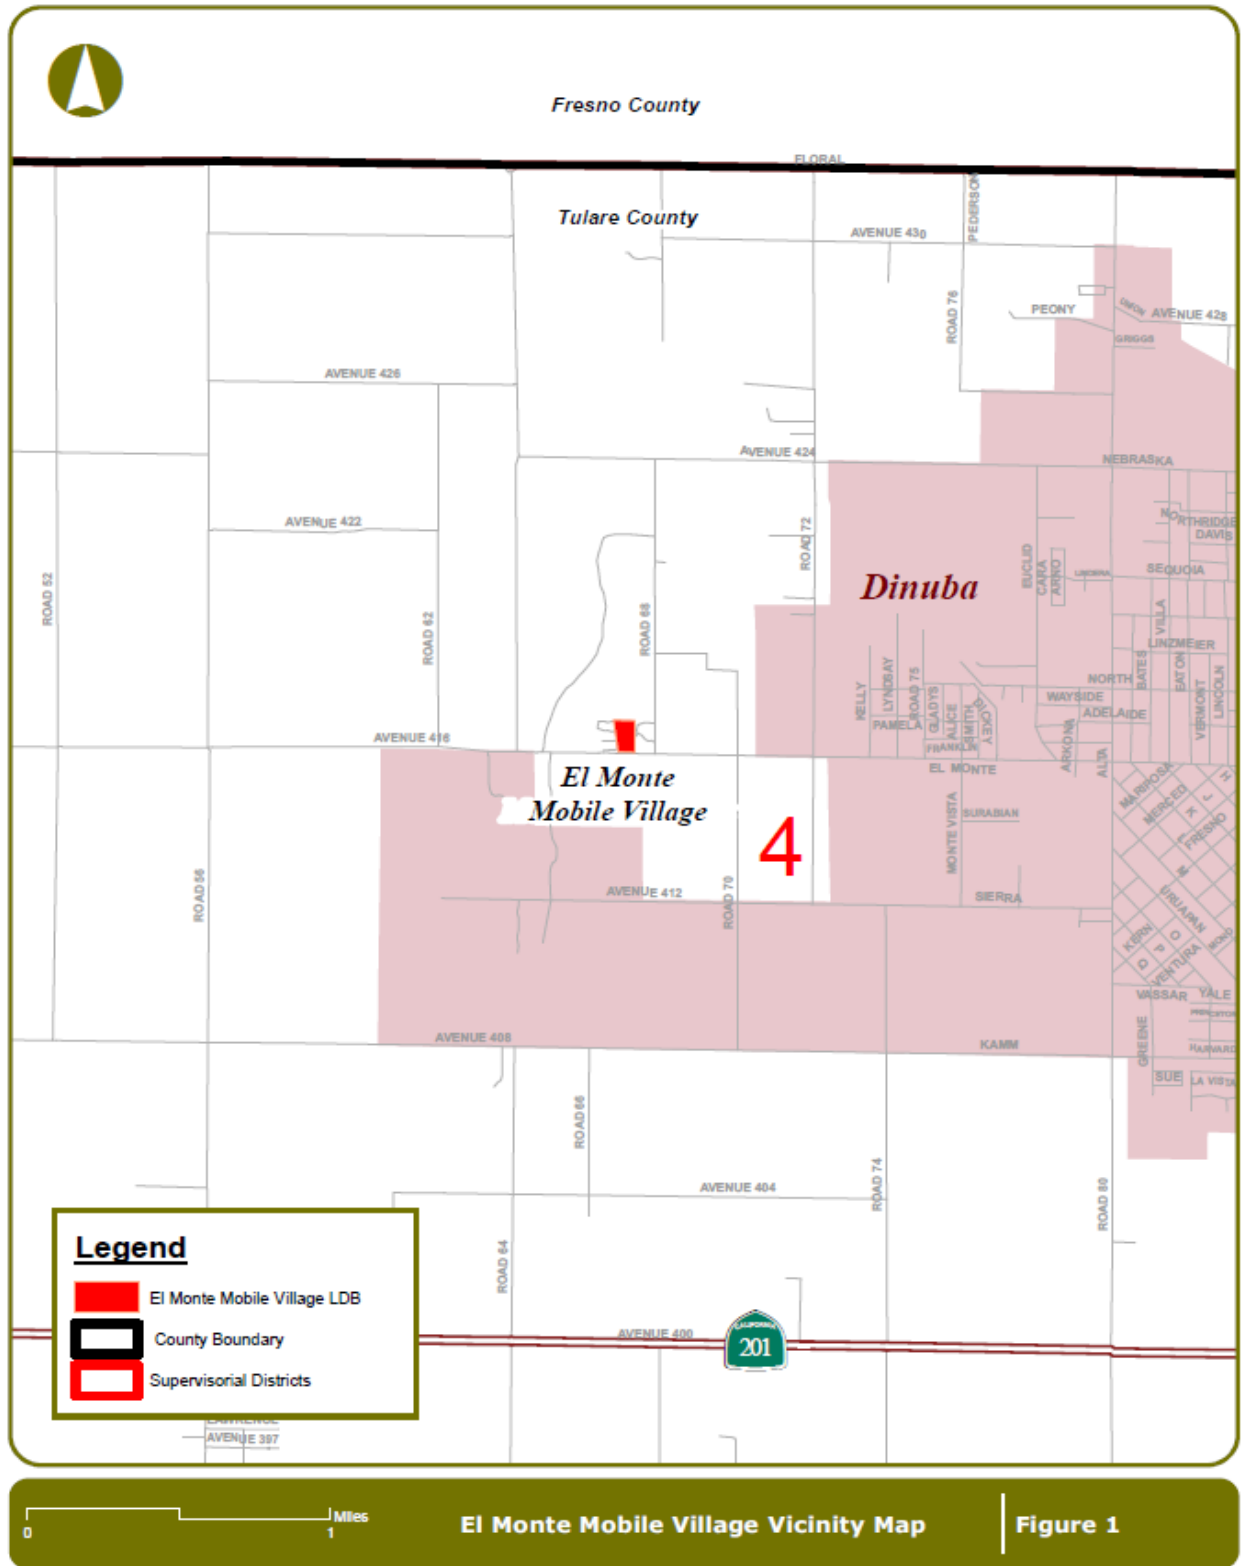

El Monte Mobile Village (**see Figure 1**) is Located on the northern part of Tulare County on the valley floor. El Monte Mobile Village is a small community comprised of mobilehomes located on Avenue 416 approximately one (1) mile west of the City of Dinuba. El Monte Mobile Village (**see Figure 2**) is in Section 12, Township 16 South, Range 23 East, MDB&M, and can be found within the Reedley, United States Geological Survey 7.5 minute topographic quadrangle. El Monte Mobile Village is located at an elevation of 337 feet above sea level, National Geodetic Vertical Datum. The coordinates of El Monte Mobile Village are: Latitude: 26.547156, Longitude: -119.424884. El Monte Mobile Village is located in Census Tract 3.01, Block Group 6 and is divided into three Census Blocks (6039, 6040 and 6041). The population is approximately 155 and is comprised of approximately 47 mobilehomes.

### City of Dinuba Sphere of Influence (SOI)

El Monte Mobile Village is located just outside the City Limits of Dinuba but within the Sphere of Influence (SOI) (**see Figure 3**). The City of Dinuba Urban Boundary Element defines the limits for extending city services and infrastructure so as to accommodate new development anticipated within the time frame of the General Plan. The element includes a 20-year Urban Development Boundary which is the city's ultimate physical boundary and service area for the next 20-years (2006-2026); a 10-year Urban Development Boundary which is the urbanizable area within which a full range of urban services will need to be extended to accommodate urban development. El Monte Mobile Village is within the city's 10 and 20-year Urban Development Boundary (UDB), the city's General Plan map designates the site as Residential – High Density.

## DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a Legacy's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a Legacy plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a Legacy allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a Legacy. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller Legacy such as El Monte Mobile Village.

### Population

El Monte Mobile Village is located within Census Tract 3.01, Block Group 6 and includes three separate Census Blocks (6039, 6040 and 6041). The Population for Census Tract 3.01 was 6,901 with 155 people living in El Monte Mobile Village. **(Census data: ACS 2015 5-year)**

### Median Age

El Monte Mobile Village's median age of 34.4 is lower than the median age of the State of California **(Census data: ACS 2015 5-year)** (See Table 1).

Table 1 - Median Age	
Geography	Median Age (years)
California	35.6
Tulare County	30.1
El Monte Mobile Village	34.4

## ECONOMIC CONDITIONS

### Employment in El Monte Mobile Village

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production.

### Median Household Income

In 2015, El Monte Mobile Village's median household income was \$44,569 **(Census data: ACS 2015 5)** whereas the State of California's median household income was \$61,818 **(see Table 2)**. However, the Medium Household Income of \$44,569 for El Monte Mobile Village is based on Census Tract 3.01 (a large geographical area) and is approximately 20% higher than the \$36,860 in the City of Dinuba.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

Table 2 - Median Household Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17, 876
City of Dinuba	\$36,860	\$36,707	\$13,221
El Monte Mobile Village	\$44,569		\$22,872

## Severely Disadvantaged Community

El Monte Mobile Village is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## Household Size (Overcrowding)

In 2015 the average housing units and occupancy were 3.37 persons per household in Tulare County. **(Census data: ACS 2015 5-year).**

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## ENVIRONMENTAL CONDITIONS

### Natural Conditions

#### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDDB) (see **Figure 5**) search conducted on May 24, 2017, indicates there are special status species within the Reedley Quadrant Species List (which includes the El Monte Mobile Village Planning Study Area) consisting of no animal species and one plant species: Valley Elderberry Longhorn Beetle (*Desmocerus californicus dimorphus*), which has been removed from the Federal/State list for Tulare County.

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect El Monte Mobile Village are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [El Monte Mobile Village] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>4</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County (**see Figure 6**), the following soil types are located throughout El Monte Mobile Village Legacy Development Boundary (LDB). The following description is provided for the above soil type:

**Delhi sandy loam, 0 to 2 percent slopes.** Consists of very deep, somewhat excessively drained soil; negligible to slow runoff, rapid permeability. Delhi soil is used for such crops as grapes, peaches, truck crops, alfalfa, and for homesites.

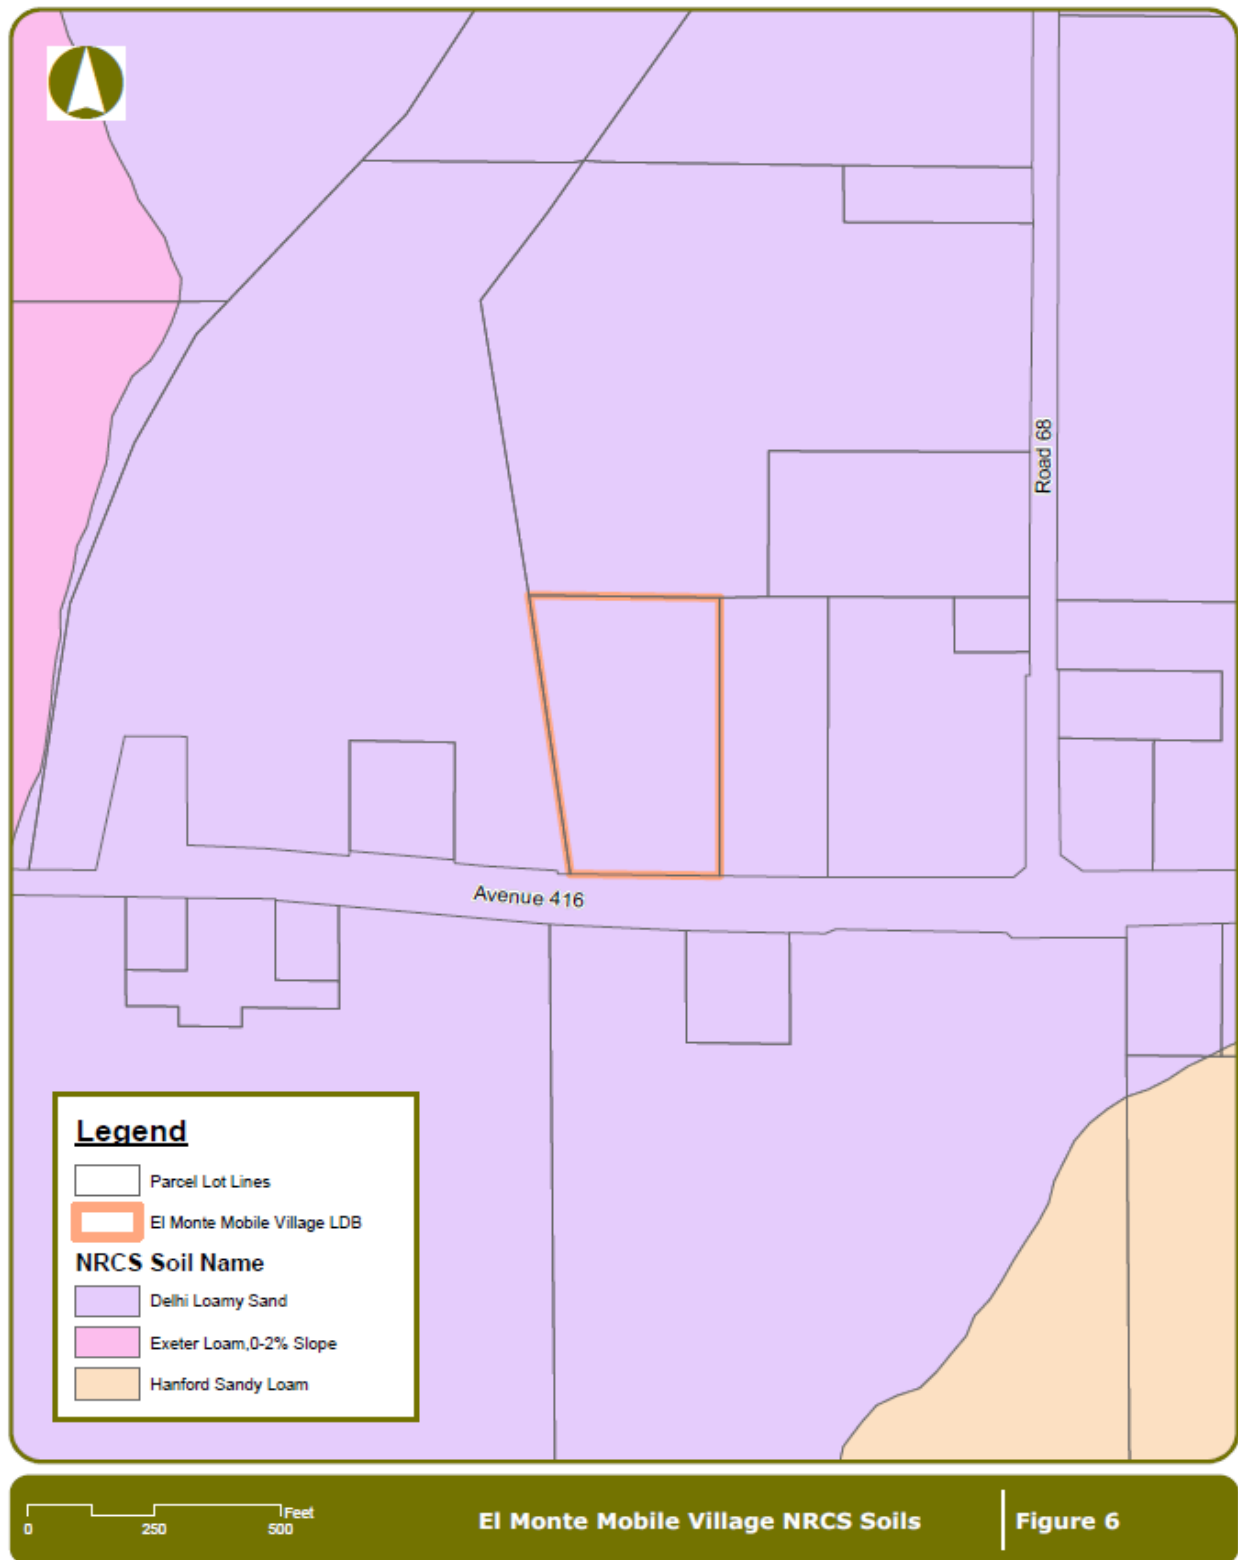

---

## Physical Conditions

### Air Quality

The El Monte Mobile Village Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

Air quality is directly related to land use; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because El Monte Mobile Village is located near the central portion of the Valley

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

with prevailing winds from the northwest, it is in a vulnerable position for the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of El Monte Mobile Village include Avenue 416 and agricultural activities.

## Flooding<sup>5</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0320E (**see Figure 7**). El Monte Mobile Village is located within Flood Zone X – Areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates are not required unless property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

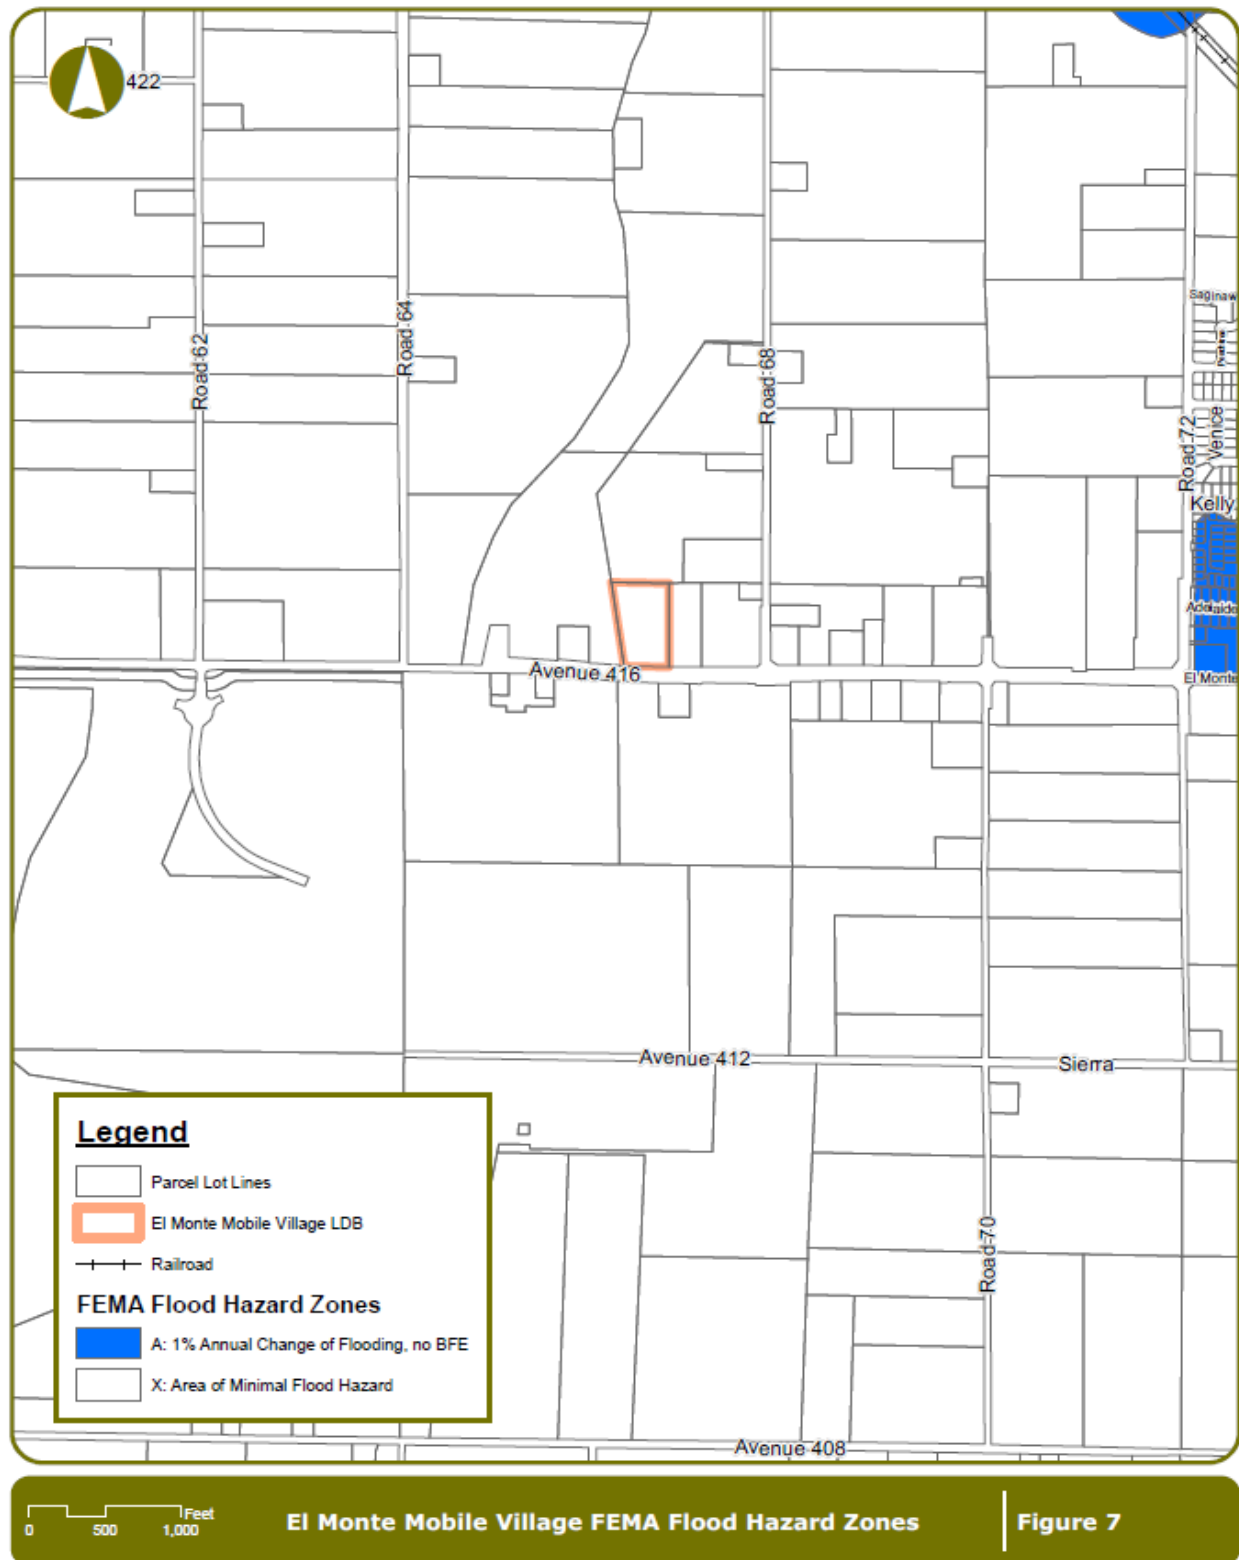

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), which means the County of Tulare agreed to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available on Tulare County Resource Management Agency website at: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

---

<sup>5</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C0320E, Panel Number 320 of 2550, June 16, 2009. <https://msc.fema.gov/portal/> accessed May 23, 2017

# EL MONTE MOBILE VILLAGE LEGACY PLAN

Figure 7 - FEMA Flood Map

# EL MONTE MOBILE VILLAGE LEGACY PLAN

## Noise<sup>6</sup>

Tulare County adopted a new noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. (**Table 3**) summarizes the daily traffic volumes along Avenue 416 from State Route 99 to Road 72. Together, these noise sources place a portion of El Monte Mobile Village's urbanized areas within the 60 dB Ldn noise contour. The Noise Element includes performance standards for new residential or other noise-sensitive land uses which are to be located near noise-impacted areas. The Element indicates that these uses will not be permitted unless effective design measures can be integrated into the development to mitigate the impact of noise.

Table 3 - Noise Levels - Avenue 416					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
Avenue 416 from State Route 99 to Road 72	9,830	42	91	196	422

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” In regards to El Monte Mobile Village, this Legacy Plan is intended to address deficiencies and the need for improvements to the drinking water system improvements, (for example wells, water distribution piping, and storage tanks), curbs, gutters, streets, sidewalks, etc.). The prioritized concerns of the Community include:

1. Energy - Natural Gas/Electricity
2. Water Supply
3. Sewer
4. Storm Water Drainage
5. Solid Waste
6. Street Conditions

## Energy: Natural Gas/Electricity

Pacific Gas & Electric (PG&E) provides electric and gas power to El Monte Mobile Village.

## Water Supply

The El Monte Mobile Village provides water service to the El Monte Mobile Village. El Monte Village has 49 connections serving 100 residence. The system has one water well that supply the community.

“The drinking water services are provided by the El Monte Village, according to the Environmental Working Group National Drinking Water [https://sdwis.waterboards.ca.gov/PDWW/JSP/WaterSystemDetail.jsp?tinwsys\\_is\\_number=7522&tinwsys\\_st\\_code=CA&counter=0](https://sdwis.waterboards.ca.gov/PDWW/JSP/WaterSystemDetail.jsp?tinwsys_is_number=7522&tinwsys_st_code=CA&counter=0) Database with services for 100 people. Testing conducted between 2004 and 2009 and provided to the EWG by the California Department of Public Health did indicate nitrite and nitrate levels over the legal and health limits, as well as alpha particle activity, lead, 1,2-dibromo-3-chloropropane, and arsenic over the health limit. Environmental Protection Agency (EPA) violations were noted for nitrate levels over the MCL (2007-2008), failure to report information to the public or state agency in the Consumer Confidence Report (2004), and failure to regularly monitor nitrate (2007).”<sup>7</sup>

Well 02 – Online 6-8-15

Well 01 – Dry (6-2015)

## Sewer

“Wastewater treatment is provided by septic systems and information is unavailable regarding any potential leaching and potential deficiencies may exist.”<sup>8</sup>

## Storm Water Drainage

El Monte Mobile Village does not currently have a storm drainage system.

## Solid Waste

Solid waste disposal services for the Community of El Monte Mobile Village is provided by Pena’s Disposal, a private company. Solid waste generated in El Monte Mobile Village can be disposed of at Visalia Landfill, located at 22466 Road 80, Visalia.

## Roads and Circulation

The community of El Monte Mobile Village is comprised of a private internal roads.

## Street Lights

El Monte Mobile Village has street lighting at two (2) locations **(See Table 4)**. “Streetlights are provided in some areas of the community but are lacking in others, therefore the community is deficient in these areas **(see Figure 8)**.”<sup>9</sup>

Community	Main Road	Crossroad	Side
El Monte Mobile Home	Ave 416	west of Mobile Home Park entrance	N
El Monte Mobile Home	Inside Park	--	W

## Sidewalks

There are currently no sidewalks located within El Monte Mobile Village.

## ADA Curb Ramps

The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

There are currently no ADA compliant curb ramps found in El Monte Mobile Village.

## **Public Transportation**

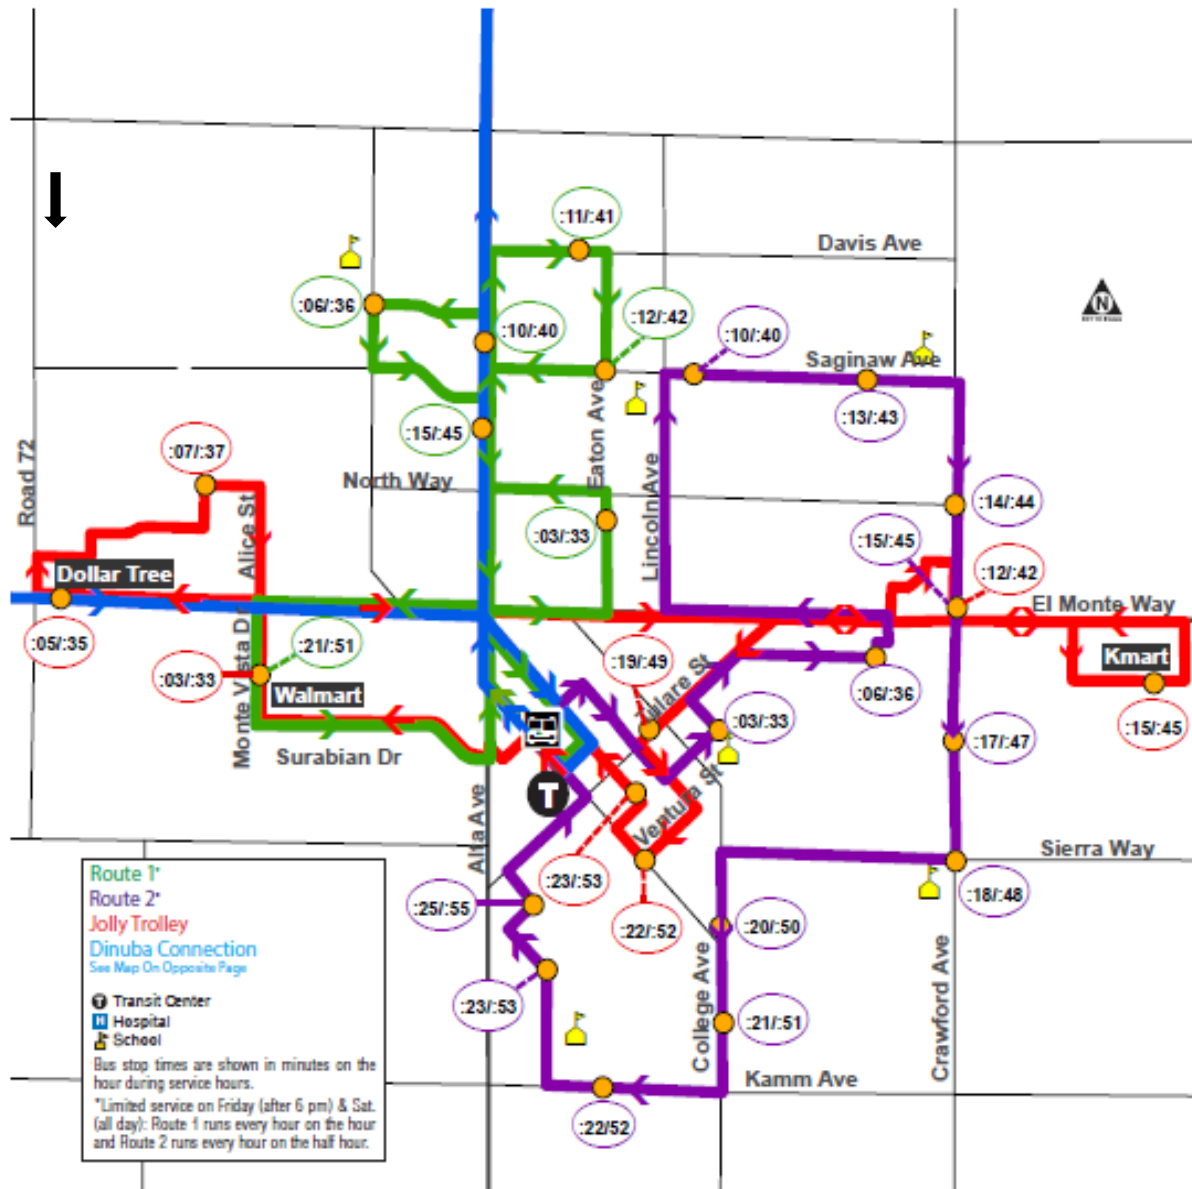

### Transit

Dinuba operates Dinuba Area Regional Transit (DART). DART operates Monday through Saturday, no service provided on Sundays. DART Flexroute is a combined fixed route and dial-a-ride service. Two 30-minute routes take you throughout Dinuba. Routes 1 and 2 operate along a fixed route, but leave the route to pick up dial-a-ride passengers between route stops. Passengers may transfer between DART routes, or to Tulare County Area Transit (TCaT) at the Transit Center in Dinuba. TCaT transfers can be made to connect to Visalia, Tulare, and the remainder of the TCAT public transit system. TCAT vehicles are wheelchair accessible and full size buses include bike racks. DART connects with the Fresno County Rural Transit Agency (FCRTA) at Reedley College. Separate fares are required to board the TCaT and FCRTA systems. El Monte Mobile Village is connected via to Dinuba and its transit center (**see Figure 9**). Bus stop for El Monte Mobile Village is located approximately one (1) mile east along Avenue 416 at the Dollar Tree Store, Dinuba California.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

Figure 9 - Dinuba Area Regional Transit (DART)

## DART System Map

## AMTRAK

The Hanford AMTRAK station, located approximately 25 miles to the southwest in Kings County, is the closest station to El Monte Mobile Village providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 20 miles southwest, offers passenger service to Los Angeles. Fresno Yosemite International Airport (FAT), approximately 40 miles north of El Monte Mobile Village, is the principal passenger and airfreight airport in the central San Joaquin Valley.

## State Route 99

State Route (SR) 99 is the major highway between cities within the Central Valley and is the primary route between the City of Fresno to the north and the City of Bakersfield to the south. El Monte Mobile Village is located approximately ten miles east of SR 99.

## Internet Access

Most families in El Monte Mobile Village do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in El Monte Mobile Village.

## PUBLIC SERVICES

### Sheriff

Police protection services are provided in El Monte Mobile Village by the Tulare County Sheriff's Department sub-station, located 40765 Road 128, in Cutler, California, approximately 10 miles southeast of El Monte Mobile Village. The substation provides patrol services 24-hours per day, 365 per year. Additional Sheriff resources are available as needed via dispatch from the main Sheriff's Office in Visalia, California.

### Fire

Fire protection and emergency medical services are provided for El Monte Mobile Village by the Tulare County Fire Department. The community is served by Dinuba Fire Station #3, located at 40404 Road 80 Dinuba, California. Parade 1, Engine 3 and Water Tender 3 are assigned to this location.

There are currently no fire hydrants in El Monte Mobile Village.

### Schools

Schools are an especially important component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The El Monte Mobile Village Area is within the Dinuba Unified School District approximately three (3) miles away). The District provides K-12/adult education at Dinuba Schools.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## Library

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>10</sup> The Dinuba Branch Library is located in Dinuba, approximately three (3) miles to the east of El Monte Mobile Village (see Table 5).

Table 5 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Dinuba	Dinuba Branch 150 S. I Street Dinuba, CA 93618	Tuesday - Friday 9:00 am – 1:00 pm 2:00 pm – 6:00 pm

Library hours current as of May 2017

## Parks

There are no County owned/operated public parks in El Monte Mobile Village. In the community of El Monte Mobile Village there is no available open green space for children to play and adults to be physically active. The nearest park is located three (3) miles away in the City of Dinuba.

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>11</sup>

---

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## Traffic

Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation

El Monte Mobile Village is a small agricultural community located adjacent to Avenue 416. The community of El Monte Mobile Village is comprised of a private internal road roads. The major rural collector road is Avenue 416. There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the El Monte Mobile Village Legacy Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in the El Monte Mobile Village Legacy Boundary is proposed to reflect a residential land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for El Monte Mobile Village to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan, El Monte Mobile Village Legacy Plan. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

It is important to recognize that County policies reflect the unique attributes of the various locations and geographic areas in the County. As such, there are policies applicable to one area of the County that are not applicable to others based on natural setting, topography, habitat, existing development, or other attributes which are unique within the planning context of the County. The following planning goals, objectives, policies and standards reflect, as applicable, the rural, suburban, or urban contexts of the Legacy planning areas designated by the County.

### **Community Development**

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Locate high density residential uses in close proximity to planned shopping areas.
2. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
3. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
4. The County shall work with the Schools to

provide safe routes to school.

5. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the El Monte Mobile Village Community Plan.
6. The El Monte Mobile Village Legacy Plan should be reviewed every five years to determine if amendments are appropriate.
7. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## **Housing**

### **GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

## Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to initiate home maintenance/repair programs in El Monte Mobile Village.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

## Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.

2. Assure that the housing industry is made aware of residential development potential in El Monte Mobile Village.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

## Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial and industrial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide the services necessary to support new development.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## Policies:

1. Encourage the El Monte Mobile Village to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial and industrial areas.

**Objective:** Provide the necessary safe guards to attract quality development to the community.

## Policies:

1. Assure that developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## ***Environmental Quality and Public Safety***

**GOAL I: Preserve and enhance the quality of life for present and future generation of El Monte Mobile Village citizens.**

**Objective:** Upgrade the level of community health, sanitation and safety.

## Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

**Objective:** Provide sufficient open space for community recreation needs.

## Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

**Infrastructure** In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

**Use Permits** There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

**Education** Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

**Health Care** Health care is important for economic development as businesses need healthy employees. The nearest medical offices are in the City of Dinuba.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Legacy Development Boundary, the Land Use Plan (see **Table 6**) and Zoning Districts Plan (see **Table 7**) have been updated.

Table 6 - Proposed Land Use

# EL MONTE MOBILE VILLAGE LEGACY PLAN

---

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the general plan recommendations contained in the El Monte Mobile Village Legacy Plan. The following components comprise the El Monte Mobile Village Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone and the Zoning Map Update), Complete Streets/Safe Routes to School

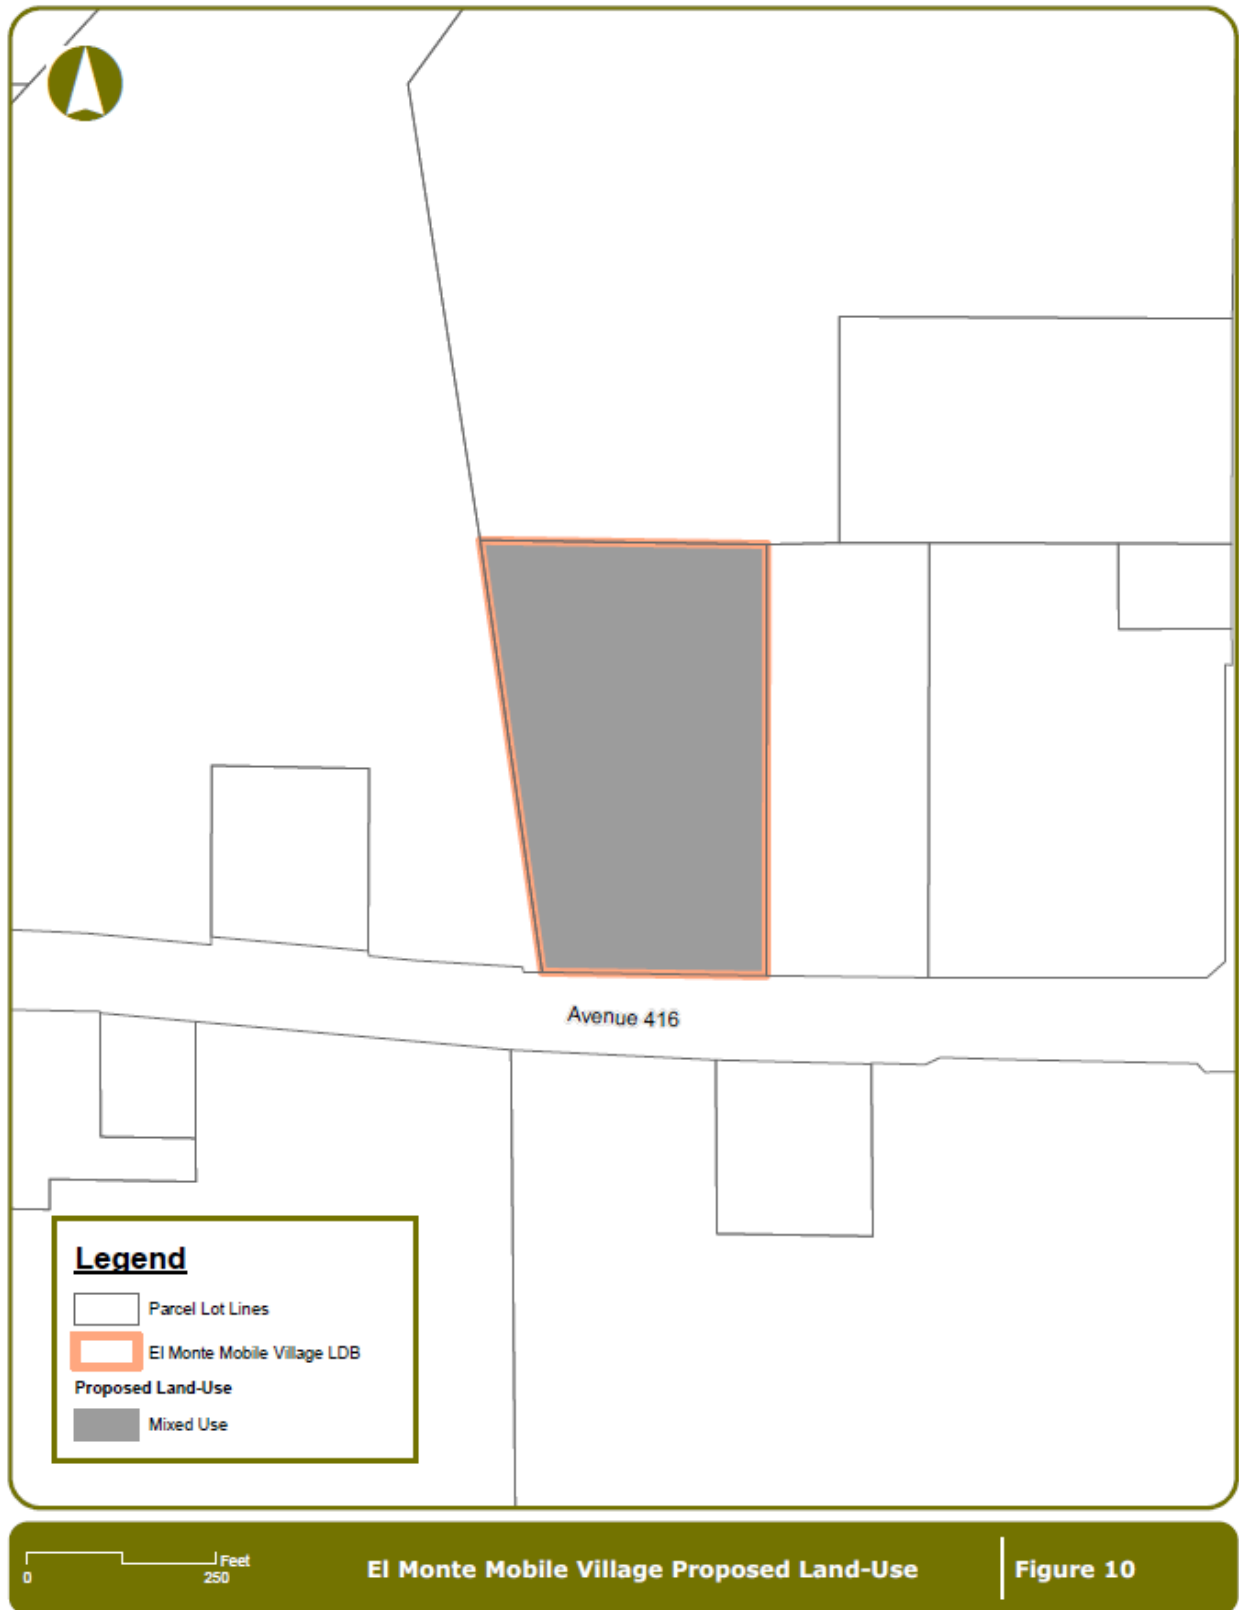

**Zoning District Changes** As part of this Implementation Program for the El Monte Mobile Village Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

**Chapter 16 of the Zoning Code** Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

**Zoning Map Update** The current Zoning Map (**see Figure 11**) for El Monte Mobile Village will be amended to be compatible with the Land Use Map (**see Figure 10**) outlined in the General Plan. There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 12**) El Monte Mobile Village Proposed Zoning.

## **ATTACHMENT**

A-1 – Use Permit Requirement Changes (Zone Change Text)

# EL MONTE MOBILE VILLAGE LEGACY PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### Additional By-Right Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE LEGACY PLANS 2017 ) RESOLUTION NO. 9342  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, II AND PART III )  
AMENDMENTS (GPA 17-033) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Legacy Plans 2017 Update which consists of General Plan Amendment No. GPA 17-033 amendment to Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities & Services Elements, and Part II Rural Valley Lands Plan, and Part III (El Monte Mobile Village GPA 17-025; Hypericum GPA 17-026; Jovista GPA 17-027; Matheny Tract GPA 17-029 and Tooleville GPA 17-030 amending the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, Change of Zones No. PZC 17-025 El Monte Mobile Village; PZC 17-026 Hypericum; PZC 17-027 Jovista; PZC 17-029 Matheny Tract and Tooleville PZC 17-030, PZC 17-032 for an amendment to Section 16 of Ordinance No. 352, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Development Boundary, and Zone Ordinance Amendment No. PZC 17-031 establishing a Mixed Use Combining Zone in El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville (incorporated by reference herein). The unincorporated Legacy Communities are located within the Mount Diablo Base & Meridian as follows: El Monte Mobile Village, Section 12, Township 16S, Range 23E, Hypericum, Section 24, Township 19S, Range 25E, Jovista, Section 32, Township 24S, Range 26E, Tooleville, Section 12, Township 19S, Range 26E, Matheny Tract Section 22, 23, & 27, Township 20 south, Range 24 East.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element, Transportation & Circulation Element and the Public Facilities & Services Element; (2) add El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Legacy

Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Legacy Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-033 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management and the Transportation and Circulation Element; Change of Zone No. PZC 17-031 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for El Monte Mobile Village, Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista, Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract, Change of Zone No. PCZ 17-029 (Zoning District Map) and Tooleville, Change of Zone No. PZC 17-030 (Zoning District Map) within the respective Legacy Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-032 an amendment to Section 16 to allow additional by-right uses in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Legacy Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Legacy Plans;
  - b. Encourage infill development within Legacy Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Legacy Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The legacy planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;
  - b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on September 15, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Legacy Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Legacy Plans 2017 Update General Plan Amendment 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Change of Zone No. PZC 17-025; Hypericum General Plan Amendment No. GPA 17-026; Change of Zone No. PZC 17-026; Jovista General Plan Amendment No. GPA 17-027; Change of Zone No. PZC 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; Change of Zone No. PZC 17-029; Tooleville General Plan Amendment No. GPA 17-030; Change of Zone No. PZC 17-030; Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-032 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation, Public Facilities & Services, and Part II Rural Valley Lands Plan has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,
2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,

4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit "B" that are restrictive and applied only to the Legacy Plans 2017 Update. Therefore, the public will benefit from the Legacy Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on October 27, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Introduction; Component A-Planning Framework Element; Component B-Agriculture and Land Use Elements, Component C-Scenic Landscapes, Environmental Resources Management and Air Quality Elements; Component D-Transportation & Circulation and Public Facilities & Services Elements; and Part II Rural Valley Lands Plan of the Tulare County General Plan as set forth in Exhibits "A-1 to A-13" and Part III Community Plan as set forth in Exhibits "B-F" for the Legacy Plans 2017 Update General Plan Amendment No. GPA 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Legacy communities as part of the Legacy Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on September 15, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017 and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan for the Legacy Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Legacy Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Legacy Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to establish Legacy Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;

4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the establishment of legacy development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;
5. The Amendment to Part I Introduction, Component A, Component B, Agriculture, Component C, Scenic Landscapes, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and the newly established Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Legacy Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-033 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-033 the Legacy Plans 2017 Update set

forth in attached Exhibits “A-1 to A-13” and Part III Exhibits “B-F” which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

SECTION 18.9 "MU" MIXED USE COMBINING        )  
ZONE OF ORDINANCE NO. 352 CONSISTENT        )        RESOLUTION NO. 9344  
WITH THE ADOPTED LEGACY PLANS 2017            )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE        )  
NO. PZC 17-031                                    )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and

Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the communities of El Monte Mobile Village,

Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update, consistent with the Legacy Communities 2017 Update including affirmation that Section 16 H. is applicable in the Matheny Tract.

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update (GPA 17-033) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities;
3. The proposed changes in zone district designations identified in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the El Monte Mobile Village Change of Zone No. PZC 17-025; Hypericum Change of Zone No. PZC 17-026; Jovista Change of Zone No. PZC 17-027; Matheny Tract Change of Zone No. PZC 17-029; and Tooleville Change of Zone No. PZC 17-030, an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" and "N" Rezoning Plans consistent with the adopted El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update (GPA 17-033).

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY: *Michael C. Spata*  
Deputy Clerk

\*\*\*\*\*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Legacy Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Legacy Plans 2017 Update (GPA 17-033); and
3. Adopted one General Plan Amendment No. GPA 17-033, for the Legacy Plans 2017 Update inclusive of the El Monte Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029); Tooleville (GPA 17-030) and Amendments to Tulare County General Plan Part III to establish Legacy Plans and Legacy Development Boundaries; Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D,

Public Facilities and Services Elements, and Part II General Plan Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update; and

4. Waived the final reading and adopted Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Legacy Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-031) to Section 18.9 to adopt a Mixed-Use Combining Zone within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-032) to Section 16 to allow additional by-right uses within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for El Monte Village (PZC 17-025), Hypericum (PZC 17-026), Jovista (PZC 17-027), Matheny Tract (PZC 17-029), and Tooleville (PZC 17-030), consistent with the Legacy Plans 2017 Update; and
5. Adopted the findings of approval set forth in Planning Commission Resolution No. 9342 (Addendum to EIR), Planning Commission Resolution No. 9343 (Legacy Plans 2017 Update), Planning Commission Resolution No. 9344 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9345 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9346 (Zoning District Ordinance Maps); and
6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of El Monte Mobile Village, Hypericum, Matheny Tract, Jovista, and Tooleville to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents; and
10. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## **EXHIBIT "A"**

### **A. Legacy Plans 2017 Update (General Plan Amendment 17-033)**

WHEREAS, on September 27, 2017 the Planning Commission held a public hearing on the Legacy Plans 2017 Update (GPA 17-033), which included an application for El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030, El Monte Mobile Village Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract Change of Zone No. PZC 17-029 (Zoning District Map); and Tooleville Change of Zone No. PZC 17-030 (Zoning District Map), Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9) and Change of Zone No. PZC 17-032 (By-Right Uses–Section 16), collectively referred to as the Legacy Plans 2017 Update (GPA 17-033); and

WHEREAS, upon conclusion of the public hearing, the Planning Commission recommended the Board of Supervisors certify and adopt the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopt the Mitigation Monitoring and Reporting Program and approve the Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors held a public hearing on October 17, 2017 to consider the proposed Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors finds the public hearing for the Legacy Plans 2017 Update was properly noticed in accordance with state law and the Tulare County Ordinance Code.

WHEREAS, the Board of Supervisors finds the Legacy Plans 2017 Update is compatible, integrated and internally consistent with the existing policies of and with the Tulare County General Plan.

WHEREAS, the Board of Supervisors accepts and incorporates by reference herein, the findings of facts and recommendations adopted by the Planning Commission as follows:

1. Planning Commission Resolution No. 9342, in the matter of the Certification and adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update (PC Package Attachment 1 – CEQA Resolution).

2. Planning Commission Resolution No. 9343, to adopt General Plan Amendment No. GPA 17-033 for the Legacy Plans 2017 Update inclusive of El Monte Mobile Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029) and Tooleville (GPA 17-030) and Amendments to Part III of the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, to the Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities and Services Elements, and Part II Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update (PC Package Attachment 2 – GPA Resolution).
3. Planning Commission Resolution No. 9344, in the matter of an Amendment to Section 18.9 of Ordinance No. 352, the Zoning Ordinance, and establish the Mixed Use Combining Zone within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 3 – Section 18.9 Resolution).
4. Planning Commission Resolution No. 9345, in the matter of an Amendment to Section 16 of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 4 – Section 16 Resolution).
5. Planning Commission Resolution No. 9346, in the matter of an Amendment to Ordinance No. 352, the Zoning Ordinance, as set forth in the Zoning District Ordinance Maps for El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the Legacy Plans 2017 Update to rezone certain properties within El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville. (PC Package Attachment 5 – Rezoning Plan Resolution).

NOW, THEREFORE, BE IT RESOLVED as follows:

A. The Board of Supervisors hereby certifies and adopts the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopts the Mitigation Monitoring Reporting Programs.

NOW BE IT FURTHER RESOLVED as follows:

B. The Board of Supervisors adopts the entirety of all of the above findings and actions as one General Plan Amendment No. GPA 17-033.

C. The Board of Supervisors hereby waives the final reading of Change of Ordinance 352 and adopts amendments to the Tulare County Zoning Ordinance 352 pertaining to Section 18.9 - Mixed-Use Combining Zone, to Section 16 - Variances and Special Uses, and Zoning District Map Changes.

D. The Board of Supervisors authorizes the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of Legacy Plans 2017 Update to include Mixed Use Combining Zone and additional "By-Right" uses.

E. The Board of Supervisors directs the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq.

F. The Board of Supervisors directs the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file Notices of Determination with the Tulare County Clerk.

G. The Board of Supervisors authorizes the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents.

## INTRODUCTION

An important objective in preparing a Legacy Plan for Hypericum is to develop a plan which can accurately reflect the needs and priorities of this community. Hypericum was designated in the 2030 Tulare County General Plan (2012) through the SB 244 Study under GPA 2015-D. It has become apparent that a more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [for example wells, water distribution piping, and storage tanks], curbs, gutters, sidewalks, etc.) and to stimulate economic development within the community.

### Location

Hypericum (**see Figure 1**) is located on the western part of Tulare County on the valley floor. Hypericum also known as “Dog-town” is a small community comprised of two residential roads and approximately 40 parcels of land. Hypericum (**see Figure 2**) is located approximately 3 miles south of the City of Farmersville, in an unincorporated area of Tulare County. Hypericum is in Section 24, Township 19 South, Range 25 East, MDB&M and can be found within the Exeter, United States Geological Survey 7.5 minute topographic quadrangle. Hypericum is 340 feet above sea level. Coordinates of Hypericum are: Latitude: 36.256397 and Longitude: -119.216734. Hypericum is located in Census Tract 16.02, Block Group 3. The population is 161 people, Medium Household Income is \$31,156, and is comprised of approximately 43 residences.

## COMMUNITY OUTREACH AND INVITATION PROCESS

The County of Tulare received a grant from the Strategic Growth Council (SGC) to assist in the preparation of this plan. In efforts to invite and make local residents aware of the Strategic Growth Council (SGC) projects, Self-Help Enterprises (SHE) staff performed various outreach methods to promote community participation and make local residents aware of the SGC project.

- 1.) SHE staff developed an informational flyer.
- 2.) SHE staff went door to door to distribute flyers to every home on February 13 and February 19, 2016.
- 3.) During the community outreach process, SHE staff explained the goals of the project and talked with residents about the importance and the community benefits of participating in the SGC community meeting.
- 4.) SHE partnered with the Outside Creek School District to spread the word about the meeting; meeting flyers were sent home from school with each student.
- 5.) SHE partnered with a community resident who helped to distribute flyers to his neighbors and allowed us to have the community meeting at his home.

### Community Meeting

Self-Help Enterprises conducted a community meeting (with two SHE staff members present) in Hypericum on Sunday, February 21, 2016, at 3:00 pm. The meeting was scheduled on a weekend to make it easier for working residents to attend. The meeting was held at 25649 Hypericum Road, the home of a local resident. This is an ideal meeting location because the community of Hypericum does not have a community meeting space and because most residents feel welcome and comfortable with their neighbors. The purpose of the meeting was to discuss Hypericum improvement needs, gather community data, and report the findings of the meeting in a final report. Nine (9) Hypericum residents attended the meeting. Eight (8) community surveys were collected.

# HYPERICUM LEGACY PLAN

---

## Community Survey

A survey was developed as a tool to gather a variety of community information about multiple topics. The survey asks about the following community related topics: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Flooding, Fire, Safety, Infrastructure, Water Quality & Quantity, Waste Water, Storm Water Drainage, Complete Streets, and the priority of various improvement needs. Residents were encouraged to add information and comments to the survey.

After careful discussion at the Hypericum SGC community input meeting, residents concluded that the following is a list of Hypericum priority improvement needs:

## Priority Improvements:

- Energy/Natural Gas
- Water System
- Sewer System
- Storm water drainage
- Road Conditions
- Street Lights
- Sidewalks
- Transportation
- Internet
- Community Park

**Natural Gas** - Residents report that they do not have natural gas in their homes and that they use propane as their source of fuel. This is concerning to them because propane is more expensive than natural gas and the cost to heat their homes with propane is more than they can afford. Survey results show that Hypericum residents would like to have natural gas but cannot afford the cost of extending gas lines to their homes. The community is open to any option of converting to natural gas.

**Water** - Hypericum does not have a community water system, as such, residents own and maintain individual wells. Over the last year many wells have gone dry in this community. Through the help of Self Help Enterprises and Tulare County, residents whose wells have gone dry have been connected to temporary water tanks as an interim solution. Residents are receiving an allocated amount of water per month. Resident expressed that they are interested in exploring their options for connecting to a neighboring community water system, they understand that this may include an initial cost and would result in paying a monthly water bill.

# HYPERICUM LEGACY PLAN

---

Residents are concerned with their water quality and perceive their water to be unsafe to drink. Most families do not drink the water from their tap. In 2014, SHE tested three wells in Hypericum, test results show that two of the three wells tested positive for total coliform and the Nitrate levels are as follows:

- Well 1 - 47ppm
- Well 2 - 65ppm
- Well 3 - 47ppm

**Sewer System** - The community is dependent on individual septic tank systems for sewage disposal. Many residents would prefer to be part of a community wide sewer system, they understand that this may include an initial cost and would result in paying a monthly sewer bill.

**Storm Water Drainage** - Residents report that large puddles form when it rains and the water does not drain because there is nowhere for the water to go. Residents report that street flooding occurs during the rainy season and the stagnant water afterwards attracts insects and breeds mosquitos.

**Road Improvements** - The community of Hypericum is comprised of two main roads, Hypericum Road and Road 159. Road conditions are a major concern to Hypericum residents. It is reported that road conditions are poor and the roads need work, most streets have potholes, cracks and bumps. Drivers feel unsafe and are constantly worried about damage to their vehicles while driving on that road. Residents report that roads are narrow and that two cars barely fit on one road at the same time. According to residents, Hypericum roads are not regularly maintained.

**Street Lights** - Residents report dark streets at night because the streets do not have lighting. People stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the sheriff's department patrols in this area are limited due to the large geographic area of the County. Residents are especially concerned about how this affects the safety of local children. Residents said that their streets do not have light poles.

**Sidewalks** – There are currently no street walks located within Hypericum. Residents report that this is a problem for children and parents who push a stroller through the area. The lack of sidewalks becomes an even bigger problem during the rainy season as residents and children are forced to walk in the mud and through big puddles.

## **Transportation**

Hypericum lacks access to public transportation. Hypericum residents that do not drive find it hard to travel outside of town. Residents often need to travel to Visalia or Farmersville for doctors' appointments and shopping needs. Many residents expressed the need for a bus route that goes out to Hypericum. Bus transportation to and from Hypericum would help many residents with their daily travel needs.

**Internet Access** - Most families in Hypericum do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to

# HYPERICUM LEGACY PLAN

---

what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Hypericum.

**Neighborhood Park** - In the community of Hypericum there is no safe open green space for children to play and adults to be physically active. The nearest park is located 4 miles away in the city of Farmersville, survey results show that in Hypericum, children play in the street or do not play outside. Hypericum residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and for the health of their children from lack of physical activity that comes from not having a safe place to be physically active.

## DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a Legacy's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a Legacy plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a Legacy allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a Legacy. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller Legacy such as Hypericum.

### Population

Hypericum is located within Census Tract 16.02, Block Group 3. The population for Census Tract 16.02 was 2,088 people respectively 161 of the people in Hypericum (**Census data: ACS 2015 5-year**).

### Median Age

Hypericum's median age of 33 is lower than the median age of the State of California (**Census data: ACS 2015 5-year**) (see Table 1).

Table 1 - Median Age	
Geography	Median Age (years)
California	35.6
Tulare County	30.1
Hypericum	33

# HYPERICUM LEGACY PLAN

## ECONOMIC CONDITIONS

### Employment in Hypericum

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production.

### Median Household Income

In 2015, Hypericum's median household income was \$31,156 whereas the State of California's median household income was \$61,818. **(Census data: ACS 2015 5-year) (see Table 2)** Therefore, based upon Hypericum's median household income of \$31,156 (which is about 51% of the State of California's median household income), it is considered a disadvantaged community.

Table 2 - Median Household Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Hypericum	\$31,156		\$16,606

### Severely Disadvantaged Community

Hypericum is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Housing Conditions

Table 3 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Hypericum	0	0	43	100	0	0	0	0			43

Source: Tulare County 2015 Housing Element

# HYPERICUM LEGACY PLAN

---

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

As indicated by Tulare County Building Department approximately 100% of the housing units in Hypericum are in a minor deteriorated condition. **(see Table 3).**

## Household Size (Overcrowding)

In 2015 the average housing units and occupancy were 3.7 persons per household **(Census data: ACS 2015 5-year).**

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## ENVIRONMENTAL CONDITIONS

### **Natural Conditions**

#### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDDB) search conducted on November 1, 2016 **(see Figure 4)** indicates there are special status species within the Exeter Quadrant Species List (which includes the Hypericum Planning Study Area) consisting of one animal species and no plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Hypericum are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Hypericum] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>4</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Hypericum (**see Figure 5**). Generally, these soils are moderately to very deep, are well drained, and run in a northwest to southeast direction throughout the Legacy Development Boundary (LDB). The following description is provided for the above soil type:

**Nord Fine Sandy Loam, 0 to 2 percent slopes.** Consists of very deep, well drained; negligible to low runoff, moderate permeability. Nord soils are used for such crops as irrigated alfalfa, cotton, corn, milo, barley, wheat, sugar beets, tomatoes, grapes, walnuts, peaches, and other fruit and nut trees.

## Physical Conditions

### Air Quality

The Hypericum Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

Air quality is directly related to land use; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Hypericum is located near the central portion of the Valley with prevailing

# HYPERICUM LEGACY PLAN

---

winds from the northwest, it is in a vulnerable position for the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of Hypericum include Avenue 256 and agricultural activities.

## Flooding<sup>5</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0965E, Hypericum is located within Flood Zone X – Areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood (see **Figure 6**). Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

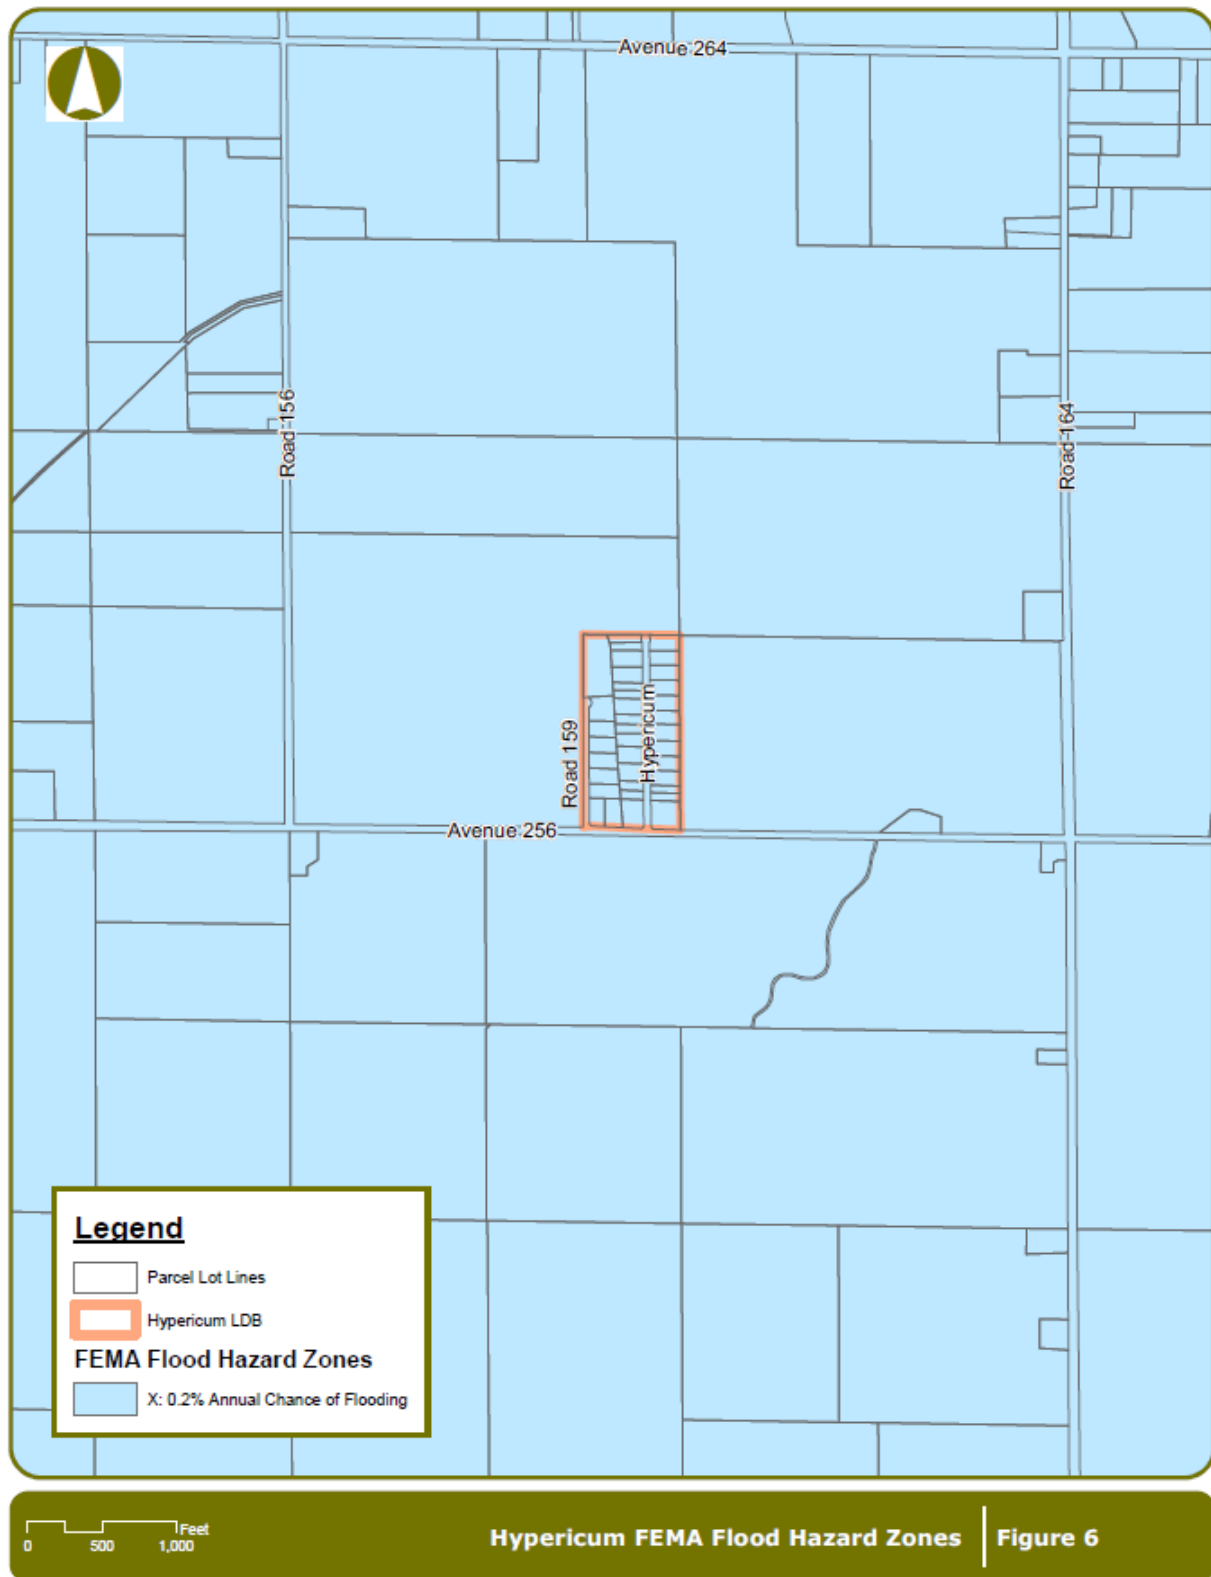

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), which means the County of Tulare agreed to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available on Tulare County Resource Management Agency website at: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

---

<sup>5</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C0965E, Panel Number 965 of 2550, June 16, 2009. <https://msc.fema.gov/portal/> accessed January 31, 2017

# HYPERICUM LEGACY PLAN

Figure 6 - FEMA Flood Map

# HYPERICUM LEGACY PLAN

## Noise<sup>6</sup>

Tulare County adopted a new noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. (**Table 4**) summarizes the daily traffic volumes along Avenue 256 from State Route 99 to Road 216. Together, these noise sources place a portion of Hypericum's urbanized areas within the 60 dB Ldn noise contour. The Noise Element includes performance standards for new residential or other noise-sensitive land uses which are to be located near noise-impacted areas. The Element indicates that these uses will not be permitted unless effective design measures can be integrated into the development to mitigate the impact of noise.

Table 4 - Noise Levels					
Location	ADT	From Roadway Centerline			
		Distance (feet) to 70 Ldn Contour	Distance (feet) to 65 Ldn Contour	Distance (feet) to 60 Ldn Contour	Distance (feet) to 55 Ldn Contour
Avenue 256 from State Route 99 to Road 216	2,210	15	33	70	151

Source: 2010 General Plan Background Report

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” In regards to Hypericum, this Legacy Plan is intended to address deficiencies and the need for improvements to the drinking water system improvements, (for example wells, water distribution piping, and storage tanks), curbs, gutters, streets, sidewalks, etc.). The prioritized concerns of the Community include:

- Energy/Nature Gas
- Water System
- Sewer System
- Storm Water Drainage

<sup>6</sup> Tulare County General Plan 2030 Update, August 2012; United States Department of Transportation, Federal Transit Administration. - Internet
- Community Park

## Energy Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom SCE has arrangements, and rolling blackouts.

## Water System

The drinking water is provided by private individual wells. Data related to any well monitoring in this area is unavailable. Therefore it is difficult to determine the availability of groundwater in the area as well as the water quality and potential deficiencies may exist.

## Sewer System

The community is dependent on individual septic tank systems for sewage disposal.

## Storm Water Drainage

Hypericum does not currently have a storm drainage system.

## Road Conditions

The community of Hypericum is comprised of two roads, Hypericum Road and Road 159.

## Street Lights

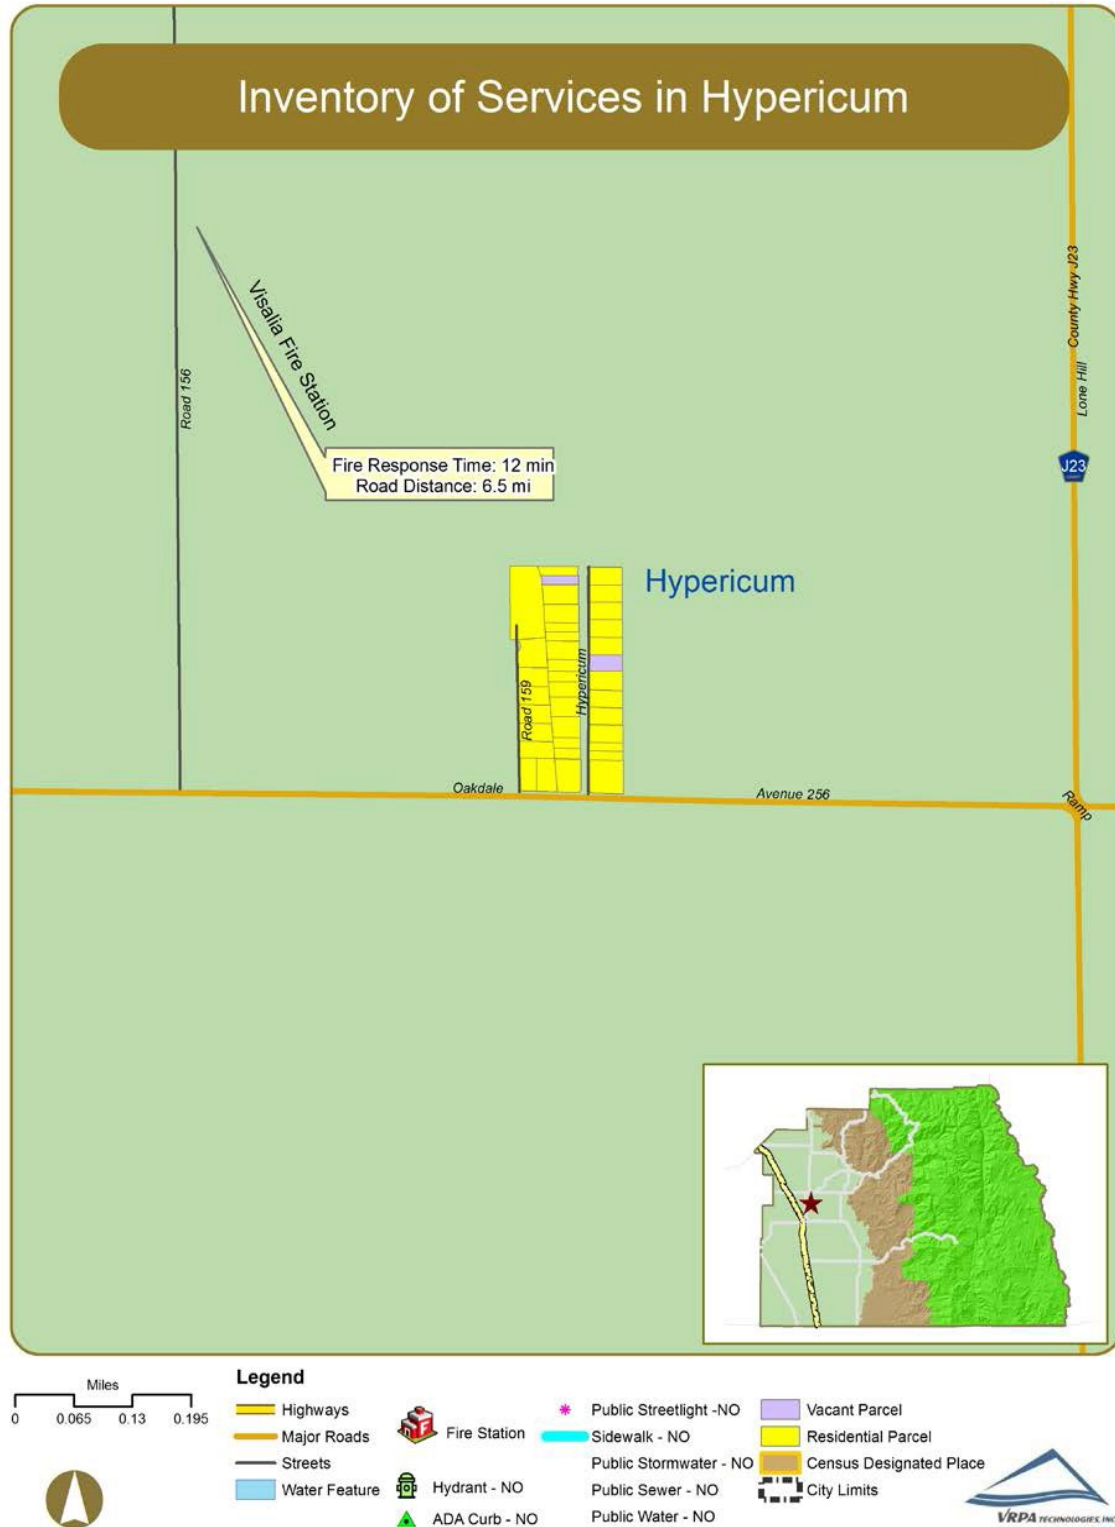

There are currently no street lights located within Hypericum.

## Sidewalks

There are currently no sidewalks located within Hypericum.

# HYPERICUM LEGACY PLAN

Figure 7 - Inventory of Services – Hypericum

# HYPERICUM LEGACY PLAN

---

## ADA Curb Ramps

The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

There are currently no ADA compliant curb ramps located in Hypericum.

## **Public Transportation**

### Transit/Bus Stop

Hypericum lacks access to public transportation. Hypericum residents that do not drive find it hard to travel outside of town. Residents often need to travel to Visalia or Farmersville for doctors' appointments and shopping needs. Many residents expressed the need for a bus stop. Bus transportation to and from Hypericum would help many residents with their daily travel needs. The nearest bus stop is 4 miles away in Farmersville.

### AMTRAK

The Hanford AMTRAK station, located approximately 30 miles to the west in Kings County, is the closest station to Hypericum providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

### Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 20 miles west, offers passenger service to Los Angeles. A community general aviation airport is located in Exeter (formerly known as Thunderhawk Field), approximately 10 miles east of Hypericum.

Fresno Yosemite International Airport (FAT), approximately 65 miles northwest of Hypericum, is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field, Bakersfield's principal commercial airport, is approximately 75 miles southwest of Hypericum and offers direct flights to several destinations.

### Solid Waste

Solid waste disposal services for the Community of Hypericum is provided by USA Waste, a private company. Solid waste generated in Hypericum can be disposed of at Road 80 Landfill, located at 8614 Avenue 328.

# HYPERICUM LEGACY PLAN

---

## Internet Access

Most families in Hypericum do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Hypericum.

## Parks

There are no County owned/operated public parks in Hypericum. The nearest park is located approximately four (4) miles away in the City of Farmersville.

## PUBLIC SERVICES

### Sheriff

Police protection services are provided in Hypericum by the Tulare County Sheriff's Department main Sheriff Office located at 2404 W. Burrel Avenue, in Visalia, California, approximately 20 miles northwest of Hypericum.

### Fire

Tulare County and all of the incorporated cities have a mutual-aid agreement for fire protection services. The closest station to Hypericum (approximately 6.5 miles) is in the City of Visalia, California.

There are currently no fire hydrants are found in Hypericum.

### Schools

Schools are an especially important component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Hypericum Area is within the Exeter Union School District Area 4 (10 miles away). The District provides K-8 grade education at Outside Creek Elementary School. High School students attend high school at the Exeter Union High School.

# HYPERICUM LEGACY PLAN

## Library

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>7</sup> The Exeter Branch Library is located in Exeter 10 miles to the east (see Table 5).

Table 5 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Exeter	Exeter Branch 230 East Chestnut Exeter, CA 93221-1712	Tuesday – Wednesday: 11:00 am – 5:00 pm 6:00 pm – 8:00 pm Thursday - Friday: 9:00 am – 1:00 pm 2:00 pm – 6:00 pm

Library hours current as of May 2017

## CIRCULATION AND TRAFFIC

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities:

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>8</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>9</sup>

<sup>7</sup> General Plan Background Report, page 7-96

<sup>8</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

<sup>9</sup> Tulare County General Plan, Background Report, page 5-7.

# HYPERICUM LEGACY PLAN

---

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation

Hypericum is a small agricultural community located adjacent to Avenue 256. The community of Hypericum is comprised of two roads, Hypericum Road and Road 159. The major rural collector is Avenue 256. There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# HYPERICUM LEGACY PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the Hypericum Legacy Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Legacy Boundaries are proposed to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Hypericum to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan, Hypericum Legacy Plan, and input received from Hypericum citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

It is important to recognize that County policies reflect the unique attributes of the various locations and geographic areas in the County. As such, there are policies applicable to one area of the County that are not applicable to others based on natural setting, topography, habitat, existing development, or other attributes which are unique within the planning context of the County. The following planning goals, objectives, policies and standards reflect, as applicable, the rural, suburban, or urban contexts of the Legacy planning areas designated by the County.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned commercial areas.

# HYPERICUM LEGACY PLAN

---

4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
5. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
6. The County shall work with the Schools to provide safe routes to school.
7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Hypericum Legacy Plan.
8. The Hypericum Legacy Plan should be reviewed every five years to determine if amendments are appropriate.
9. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

**Housing**

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to initiate home maintenance/repair programs in Hypericum.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Hypericum.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to construct new housing.

# HYPERICUM LEGACY PLAN

---

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

**GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

Policies:

1. Promote a concentration of commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new commercial development.

Policies:

1. Encourage the Hypericum to give priority to community service development in the areas reserved for commercial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial areas.

Objective: Provide the necessary safe guards to attract quality commercial development to the community.

Policies:

1. Assure that commercial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of commercial areas.

## **Environmental Quality and Public Safety**

**GOAL I: Preserve and enhance the quality of life for present and future generation of Hypericum citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

# HYPERICUM LEGACY PLAN

---

Objective: Provide sufficient open space for community recreation needs.

Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Hypericum.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Hypericum.

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

Infrastructure In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

Use Permits There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

Education Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Health Care Health care is important for economic development as businesses need healthy employees. The nearest medical offices are in the City of Farmersville and Visalia.

# HYPERICUM LEGACY PLAN

---

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Legacy Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 6**) and Zoning Districts Plan (**see Table 7**) have been updated.

<b>Table 6 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	17.1
Right-of Ways	2.4
Hypericum LDB	19.5

<b>Table 7 - Proposed Zoning</b>	
Proposed Zones	Acres
C-2-MU	2.5
R-A-43	14.7
Right-of Ways	2.4
Hypericum LDB	19.5

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the general plan recommendations contained in the Hypericum Legacy Plan. The following components comprise the Hypericum Plan implementation strategy:

**Limitation of the A-1 Zoning District.** Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

**Zoning District Changes** As part of this Implementation Program for the Hypericum Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

**Chapter 16 of the Zoning Code** Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

**Mixed Use Overlay District** This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Hypericum.

**Zoning Map Update** The current Zoning Map (**see Figure 9**) for Hypericum will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 8**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 10**) Hypericum Proposed Zoning.

## A-1 Section 16 Use Permit Requirement Changes (Zone Change Text)

### Additional By-Right Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Arcades, including video. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Assemblage of people for educational or entertainment purposes.	O, CO, C-1, C-2, C-3,	

# HYPERICUM LEGACY PLAN

Structure < 10,000 sq. ft.	M-1, M-2	
Assembly of electric appliances such as lighting fixtures, irons, fans, toasters and electric toys, refrigerators, washing machines, dryers, dishwashers and similar home appliances. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2	M-1
Assembly of small electrical equipment such as home and television receivers. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	M-1
Assembly of typewriters, business machines, computers, and similar mechanical equipment. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3	M-1
Automated car wash (coin operated only). Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	C-2, C-3, M-1
Automobile parking lots, public parking areas or storage garages. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	
Automobile supply stores.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Automobile washing, including the use of mechanical conveyors, blowers and steam cleaning.	C-2, C-3, M-1, M-2	C-3, M-1
Bakery [employing not more than five (5) persons on premises].	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bakery goods store.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Banks and financial institutions.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Barber shop or beauty parlor.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bed and Breakfast Home with three or more guests rooms (Up to 5). Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3, R-2	R-1

# HYPERICUM LEGACY PLAN

## A-2 Section 18 Mixed Use Overlay District (Zone Change Text)

The following regulations shall apply in the community of Hypericum, unless otherwise provided in this Ordinance.

### A. PURPOSE

The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

### B. APPLICATION

This overlay zone only applies to the communities of Ducor, Terra Bella, Traver, Strathmore, Pixley, Tipton, Hypericum, Jovista, Matheny Tract and Tooleville..

### C. USE

No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Hypericum.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# HYPERICUM LEGACY PLAN

---

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## D. DEVELOPMENT STANDARDS

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

# HYPERICUM LEGACY PLAN

---

## E. ALL OTHER DEVELOPMENT STANDARDS

All other Development Standards are included below and in the Community Plans for Ducor, Terra Bella, Traver, Strathmore, Pixley, and Tipton, and the Legacy Plans for Hypericum, Jovista, Matheny Tract and Tooleville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

### ARCHITECTURE

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

# HYPERICUM LEGACY PLAN

---

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# HYPERICUM LEGACY PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# HYPERICUM LEGACY PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance. Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

# HYPERICUM LEGACY PLAN

---

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

# HYPERICUM LEGACY PLAN

---

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

# HYPERICUM LEGACY PLAN

---

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or “lollipop signs.”
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

# HYPERICUM LEGACY PLAN

---

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateways signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding

buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# HYPERICUM LEGACY PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE LEGACY PLANS 2017 ) RESOLUTION NO. 9342  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, II AND PART III )  
AMENDMENTS (GPA 17-033) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Legacy Plans 2017 Update which consists of General Plan Amendment No. GPA 17-033 amendment to Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities & Services Elements, and Part II Rural Valley Lands Plan, and Part III (El Monte Mobile Village GPA 17-025; Hypericum GPA 17-026; Jovista GPA 17-027; Matheny Tract GPA 17-029 and Tooleville GPA 17-030 amending the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, Change of Zones No. PZC 17-025 El Monte Mobile Village; PZC 17-026 Hypericum; PZC 17-027 Jovista; PZC 17-029 Matheny Tract and Tooleville PZC 17-030, PZC 17-032 for an amendment to Section 16 of Ordinance No. 352, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Development Boundary, and Zone Ordinance Amendment No. PZC 17-031 establishing a Mixed Use Combining Zone in El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville (incorporated by reference herein). The unincorporated Legacy Communities are located within the Mount Diablo Base & Meridian as follows: El Monte Mobile Village, Section 12, Township 16S, Range 23E, Hypericum, Section 24, Township 19S, Range 25E, Jovista, Section 32, Township 24S, Range 26E, Tooleville, Section 12, Township 19S, Range 26E, Matheny Tract Section 22, 23, & 27, Township 20 south, Range 24 East.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element, Transportation & Circulation Element and the Public Facilities & Services Element; (2) add El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Legacy

Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Legacy Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-033 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management and the Transportation and Circulation Element; Change of Zone No. PZC 17-031 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for El Monte Mobile Village, Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista, Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract, Change of Zone No. PCZ 17-029 (Zoning District Map) and Tooleville, Change of Zone No. PZC 17-030 (Zoning District Map) within the respective Legacy Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-032 an amendment to Section 16 to allow additional by-right uses in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Legacy Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Legacy Plans;
  - b. Encourage infill development within Legacy Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Legacy Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The legacy planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;
  - b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on September 15, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Legacy Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Legacy Plans 2017 Update General Plan Amendment 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Change of Zone No. PZC 17-025; Hypericum General Plan Amendment No. GPA 17-026; Change of Zone No. PZC 17-026; Jovista General Plan Amendment No. GPA 17-027; Change of Zone No. PZC 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; Change of Zone No. PZC 17-029; Tooleville General Plan Amendment No. GPA 17-030; Change of Zone No. PZC 17-030; Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-032 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation, Public Facilities & Services, and Part II Rural Valley Lands Plan has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,
2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,

4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit "B" that are restrictive and applied only to the Legacy Plans 2017 Update. Therefore, the public will benefit from the Legacy Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on October 27, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Introduction; Component A-Planning Framework Element; Component B-Agriculture and Land Use Elements, Component C-Scenic Landscapes, Environmental Resources Management and Air Quality Elements; Component D-Transportation & Circulation and Public Facilities & Services Elements; and Part II Rural Valley Lands Plan of the Tulare County General Plan as set forth in Exhibits "A-1 to A-13" and Part III Community Plan as set forth in Exhibits "B-F" for the Legacy Plans 2017 Update General Plan Amendment No. GPA 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Legacy communities as part of the Legacy Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on September 15, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017 and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan for the Legacy Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Legacy Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Legacy Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to establish Legacy Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;

4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the establishment of legacy development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;
5. The Amendment to Part I Introduction, Component A, Component B, Agriculture, Component C, Scenic Landscapes, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and the newly established Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Legacy Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-033 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-033 the Legacy Plans 2017 Update set

forth in attached Exhibits “A-1 to A-13” and Part III Exhibits “B-F” which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

IN THE MATTER OF AN AMENDMENT TO           )  
SECTION 18.9 "MU" MIXED USE COMBINING    )  
ZONE OF ORDINANCE NO. 352 CONSISTENT     )  
WITH THE ADOPTED LEGACY PLANS 2017       )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE    )  
NO. PZC 17-031                                 )

RESOLUTION NO. 9344

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and

Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

TO SECTION 16.H OF ORDINANCE NO. 352	)	
TO ALLOW ADDITIONAL BY-RIGHT USES	)	RESOLUTION NO. 9345
CONSISTENT WITH THE ADOPTED LEGACY	)	
PLANS, AS PROPOSED IN CHANGE	)	
OF ZONE NO. PZC 17-032	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the communities of El Monte Mobile Village,

Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update, consistent with the Legacy Communities 2017 Update including affirmation that Section 16 H. is applicable in the Matheny Tract.

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update (GPA 17-033) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities;
3. The proposed changes in zone district designations identified in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the El Monte Mobile Village Change of Zone No. PZC 17-025; Hypericum Change of Zone No. PZC 17-026; Jovista Change of Zone No. PZC 17-027; Matheny Tract Change of Zone No. PZC 17-029; and Tooleville Change of Zone No. PZC 17-030, an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" and "N" Rezoning Plans consistent with the adopted El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update (GPA 17-033).

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY: *Michael C. Spata*  
Deputy Clerk

\*\*\*\*\*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Legacy Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Legacy Plans 2017 Update (GPA 17-033); and
3. Adopted one General Plan Amendment No. GPA 17-033, for the Legacy Plans 2017 Update inclusive of the El Monte Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029); Tooleville (GPA 17-030) and Amendments to Tulare County General Plan Part III to establish Legacy Plans and Legacy Development Boundaries; Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D,

Public Facilities and Services Elements, and Part II General Plan Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update; and

4. Waived the final reading and adopted Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Legacy Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-031) to Section 18.9 to adopt a Mixed-Use Combining Zone within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-032) to Section 16 to allow additional by-right uses within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for El Monte Village (PZC 17-025), Hypericum (PZC 17-026), Jovista (PZC 17-027), Matheny Tract (PZC 17-029), and Tooleville (PZC 17-030), consistent with the Legacy Plans 2017 Update; and
5. Adopted the findings of approval set forth in Planning Commission Resolution No. 9342 (Addendum to EIR), Planning Commission Resolution No. 9343 (Legacy Plans 2017 Update), Planning Commission Resolution No. 9344 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9345 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9346 (Zoning District Ordinance Maps); and
6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of El Monte Mobile Village, Hypericum, Matheny Tract, Jovista, and Tooleville to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents; and
10. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## **EXHIBIT "A"**

### **A. Legacy Plans 2017 Update (General Plan Amendment 17-033)**

WHEREAS, on September 27, 2017 the Planning Commission held a public hearing on the Legacy Plans 2017 Update (GPA 17-033), which included an application for El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030, El Monte Mobile Village Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract Change of Zone No. PZC 17-029 (Zoning District Map); and Tooleville Change of Zone No. PZC 17-030 (Zoning District Map), Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9) and Change of Zone No. PZC 17-032 (By-Right Uses–Section 16), collectively referred to as the Legacy Plans 2017 Update (GPA 17-033); and

WHEREAS, upon conclusion of the public hearing, the Planning Commission recommended the Board of Supervisors certify and adopt the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopt the Mitigation Monitoring and Reporting Program and approve the Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors held a public hearing on October 17, 2017 to consider the proposed Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors finds the public hearing for the Legacy Plans 2017 Update was properly noticed in accordance with state law and the Tulare County Ordinance Code.

WHEREAS, the Board of Supervisors finds the Legacy Plans 2017 Update is compatible, integrated and internally consistent with the existing policies of and with the Tulare County General Plan.

WHEREAS, the Board of Supervisors accepts and incorporates by reference herein, the findings of facts and recommendations adopted by the Planning Commission as follows:

1. Planning Commission Resolution No. 9342, in the matter of the Certification and adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update (PC Package Attachment 1 – CEQA Resolution).

2. Planning Commission Resolution No. 9343, to adopt General Plan Amendment No. GPA 17-033 for the Legacy Plans 2017 Update inclusive of El Monte Mobile Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029) and Tooleville (GPA 17-030) and Amendments to Part III of the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, to the Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities and Services Elements, and Part II Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update (PC Package Attachment 2 – GPA Resolution).
3. Planning Commission Resolution No. 9344, in the matter of an Amendment to Section 18.9 of Ordinance No. 352, the Zoning Ordinance, and establish the Mixed Use Combining Zone within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 3 – Section 18.9 Resolution).
4. Planning Commission Resolution No. 9345, in the matter of an Amendment to Section 16 of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 4 – Section 16 Resolution).
5. Planning Commission Resolution No. 9346, in the matter of an Amendment to Ordinance No. 352, the Zoning Ordinance, as set forth in the Zoning District Ordinance Maps for El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the Legacy Plans 2017 Update to rezone certain properties within El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville. (PC Package Attachment 5 – Rezoning Plan Resolution).

NOW, THEREFORE, BE IT RESOLVED as follows:

A. The Board of Supervisors hereby certifies and adopts the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopts the Mitigation Monitoring Reporting Programs.

NOW BE IT FURTHER RESOLVED as follows:

B. The Board of Supervisors adopts the entirety of all of the above findings and actions as one General Plan Amendment No. GPA 17-033.

C. The Board of Supervisors hereby waives the final reading of Change of Ordinance 352 and adopts amendments to the Tulare County Zoning Ordinance 352 pertaining to Section 18.9 - Mixed-Use Combining Zone, to Section 16 - Variances and Special Uses, and Zoning District Map Changes.

D. The Board of Supervisors authorizes the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of Legacy Plans 2017 Update to include Mixed Use Combining Zone and additional "By-Right" uses.

E. The Board of Supervisors directs the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq.

F. The Board of Supervisors directs the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file Notices of Determination with the Tulare County Clerk.

G. The Board of Supervisors authorizes the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents.

# JOVISTA LEGACY PLAN

---

## INTRODUCTION

An important objective in preparing a Legacy Plan for Jovista is to develop a plan which can accurately reflect the needs and priorities of this community. Jovista was designated in the 2030 Tulare County General Plan (2012) through the SB 244 Study under GPA 2015-D. It has become apparent that a more precise plan is needed to increase the availability of infrastructure funding (for things such as drinking water system improvements [for example wells, water distribution piping, and storage tanks], curbs, gutters, sidewalks, etc.) and to stimulate economic development within the community.

### Location

Jovista (**see Figure 1**) is located on the eastern side of the San Joaquin Valley, approximately 50 miles north of Bakersfield and 75 miles southeast of Fresno. Jovista is located just north of the Tulare County / Kern County line. Jovista (**see Figure 2**) is a small community located approximately 4 miles west of the Community of Richgrove and 4 miles south of the City of Delano, Kern County. Jovista is in Section 32, Township 24 south, Range 26 East MDB&M, and can be found within the Delano East United States Geological Survey 7.5 minute topographic quadrangle. Jovista is located at an elevation of 411 feet above sea level, National Geodetic Vertical Datum. The coordinates of Jovista are Latitude: 35.796437, Longitude: -119.188131. Sierra Vista Ranch Housing Certificates of Compliance were issued in May of 1984. Jovista is located in Census Tract 43, Block Group 3. The population in Jovista is approximately 68 people, Medium Household Income is \$29,766 comprised of approximately 18 parcels of property containing approximately 17 residential units.

## DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a Legacy's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a Legacy plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a Legacy allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a Legacy. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller Legacy such as Jovista.

### Population

Jovista is located within Census Tract 43, Block Group 3. The population for Census Tract 43 was 6,901 people, with approximately 68 people living in Jovista (**Census data: ACS 2015 5-year**).

### Median Age

Jovista's median age of 33 is lower than the median age of the State of California (**Census data: ACS 2015 5-year**) (see **Table 1**).

<b>Table 1 - Median Age</b>	
<b>Geography</b>	<b>Median Age (years)</b>
California	35.8
Tulare County	30.3
Jovista	33

## ECONOMIC CONDITIONS

### Employment in Jovista

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production.

### Median Household Income

In 2015, Jovista's median household income was \$29,766 whereas the State of California's median household income was \$61,818 (**Census data: ACS 2015 5-year**) (see **Table 2**). Therefore, based upon Jovista's median household income of \$29,766 (which is about 48% of the State of California's median household income), it is considered a disadvantaged community.

# JOVISTA LEGACY PLAN

**Table 2 - Median Household Income**

Median Household Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Jovista	\$29,766		\$16,606

## Severely Disadvantaged Community

Jovista is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Housing Conditions

**Table 3 - 2015 Housing Conditions Survey**

Table 3 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Jovista	0	0	17	100							17

Source: Tulare County 2015 Housing Element

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A "sound" housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person's ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

As indicated by Tulare County Building Department approximately 100% of the housing units in Jovista are in a minor deteriorated condition (see Table 3).

# JOVISTA LEGACY PLAN

---

## Household Size (Overcrowding)

In 2015 the average housing units and occupancy were 3.7 persons per household (**Census data: ACS 2015 5-year**).

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## ENVIRONMENTAL CONDITIONS

### Natural Conditions

#### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDB) search conducted on November 1, 2016 (**see Figure 4**) indicates there are special status species within the Delano East Quadrant Species List (which includes the Jovista Planning Study Area) consisting of no animal species and one (1) plant species: California jewelflower (*Caulanthus californicus*, Federal and State Endangered).

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Jovista are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and Figure 10-5 (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Jovista] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils<sup>4</sup>

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Jovista throughout the Legacy Development Boundary (LDB). The following description is provided for the above soil type:

**Hanford sandy loam, 0 to 2 percent slopes.** Consists of very deep, well drained; negligible to low runoff, moderate rapid permeability. Hanford soil is used for such crops as fruits, vegetables, and general farm crops, dairies, and urban development.

**Wasco sandy loam, 0 to 2 percent slopes,** Consists of very deep, well drained; negligible to low runoff, moderate rapid permeability. Wasco soil is used for growing field, forage and row crops.

---

## Physical Conditions

### Air Quality

The Jovista Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

Air quality is directly related to land use; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural qualities of the air. Because Jovista is located near the central portion of the Valley with prevailing

# JOVISTA LEGACY PLAN

---

winds from the northwest, it is in a vulnerable position for the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of Jovista include agricultural activities.

## Flooding<sup>5</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C2300E. Jovista is located within Flood Zone X – areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood (**see Figure 6**). Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), which means the County of Tulare agreed to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available on Tulare County Resource Management Agency website at: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

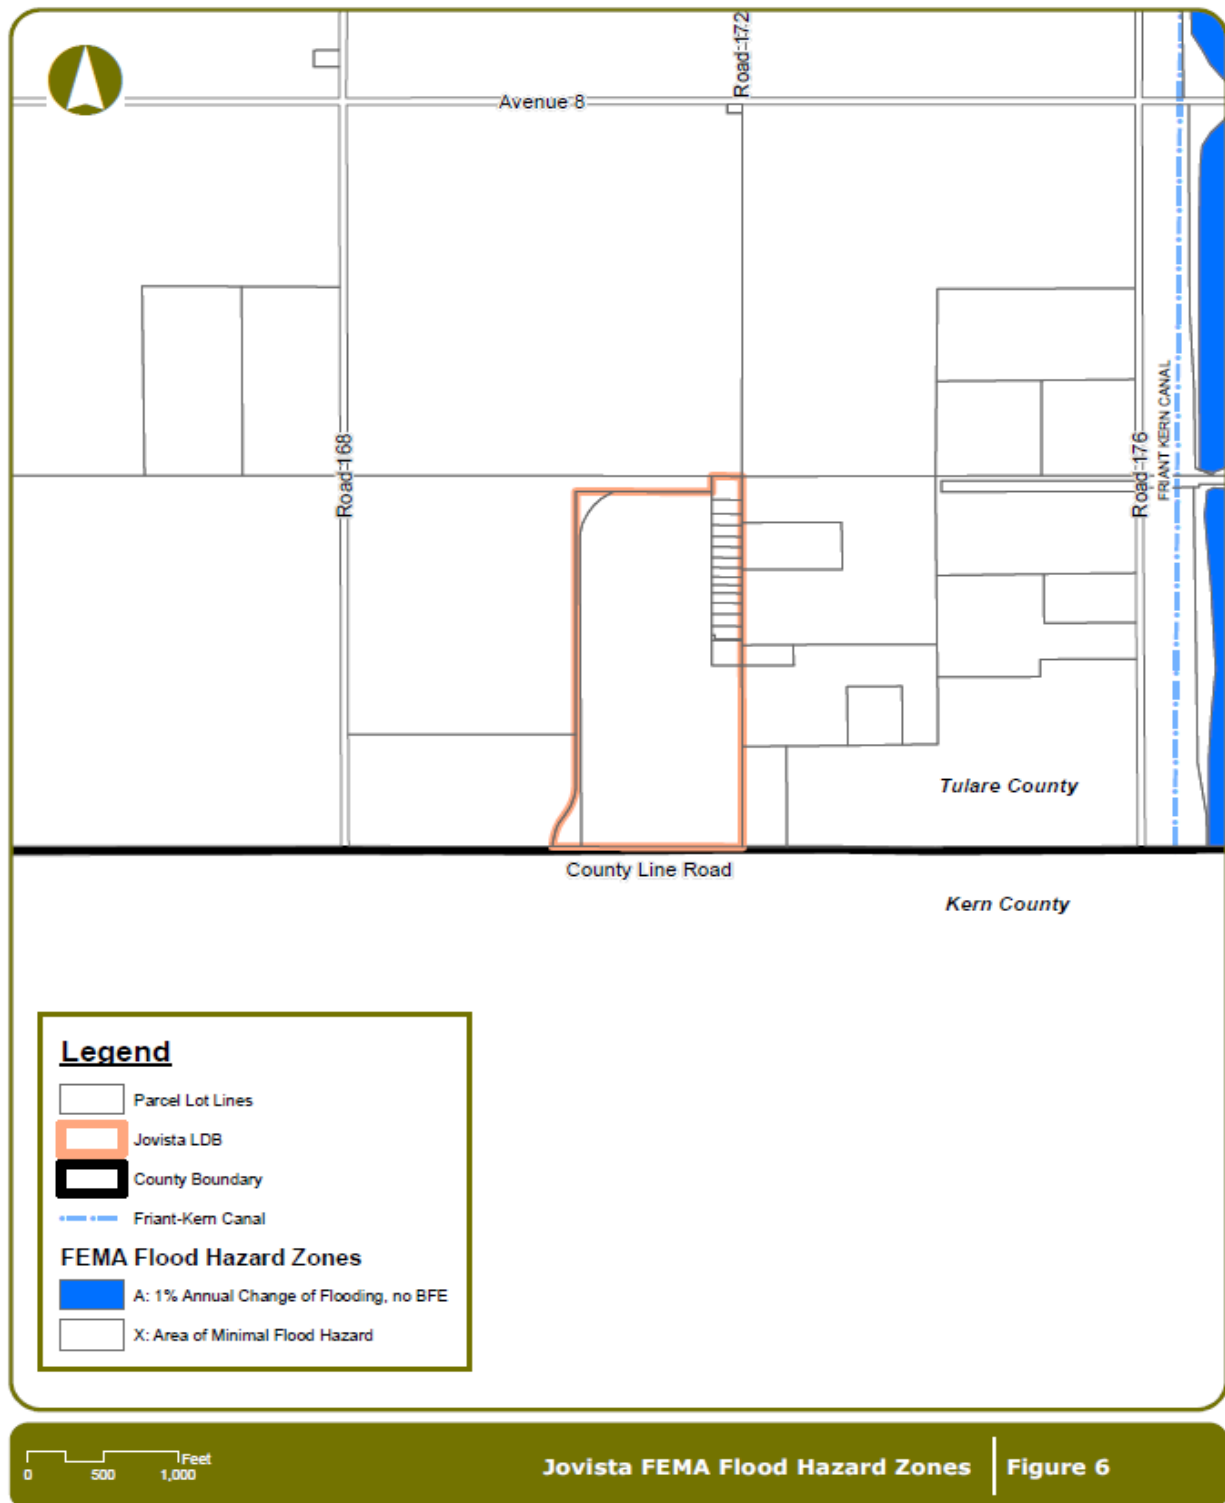

---

<sup>5</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C2300E, Panel Number 2300 of 2550, June 16, 2009. <https://msc.fema.gov/portal/> accessed May 23, 2017

Figure 6 - FEMA Flood Map

# JOVISTA LEGACY PLAN

---

## Noise<sup>6</sup>

Tulare County adopted a new noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBa) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the general Plan Background Report Jovista lies outside any noise source.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” In regards to Jovista, this Legacy Plan is intended to address deficiencies and the need for improvements to the drinking water system improvements, (for example wells, water distribution piping, and storage tanks), curbs, gutters, streets, sidewalks, etc.). The prioritized concerns of the Community include:

1. Energy
2. Water
3. Sewer
4. Storm Water Drainage
5. Solid Waste
6. Roads & Circulation
7. Street Lights
8. Sidewalks
9. ADA Curb Ramps
10. Public Transportation
11. Internet

## Energy Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

---

# JOVISTA LEGACY PLAN

---

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom PG&E has arrangements, and rolling blackouts.

Residents of Jovista use propane as their source of fuel.

## Water Supply

The drinking water is provided by private and/or small community wells. Data related to any well monitoring in this area is unavailable. Therefore it is difficult to determine the availability of groundwater in the area as well as the water quality and potential deficiencies may exist.

## Sewer

The community is dependent on individual septic tank systems for sewage disposal.

## Storm Water Drainage

Jovista does not currently have a storm drainage system.

## Solid Waste

Solid waste disposal services for Jovista Legacy Plan is provided by South Tulare Richgrove, a private company. Solid waste generated in Richgrove can be disposed of at Teapot Dome Landfill, located at 21063 Avenue 128, Porterville.

## Roads and Circulation

Jovista is comprised of a private road (Zachary Road/Road 172).

## Street Lights

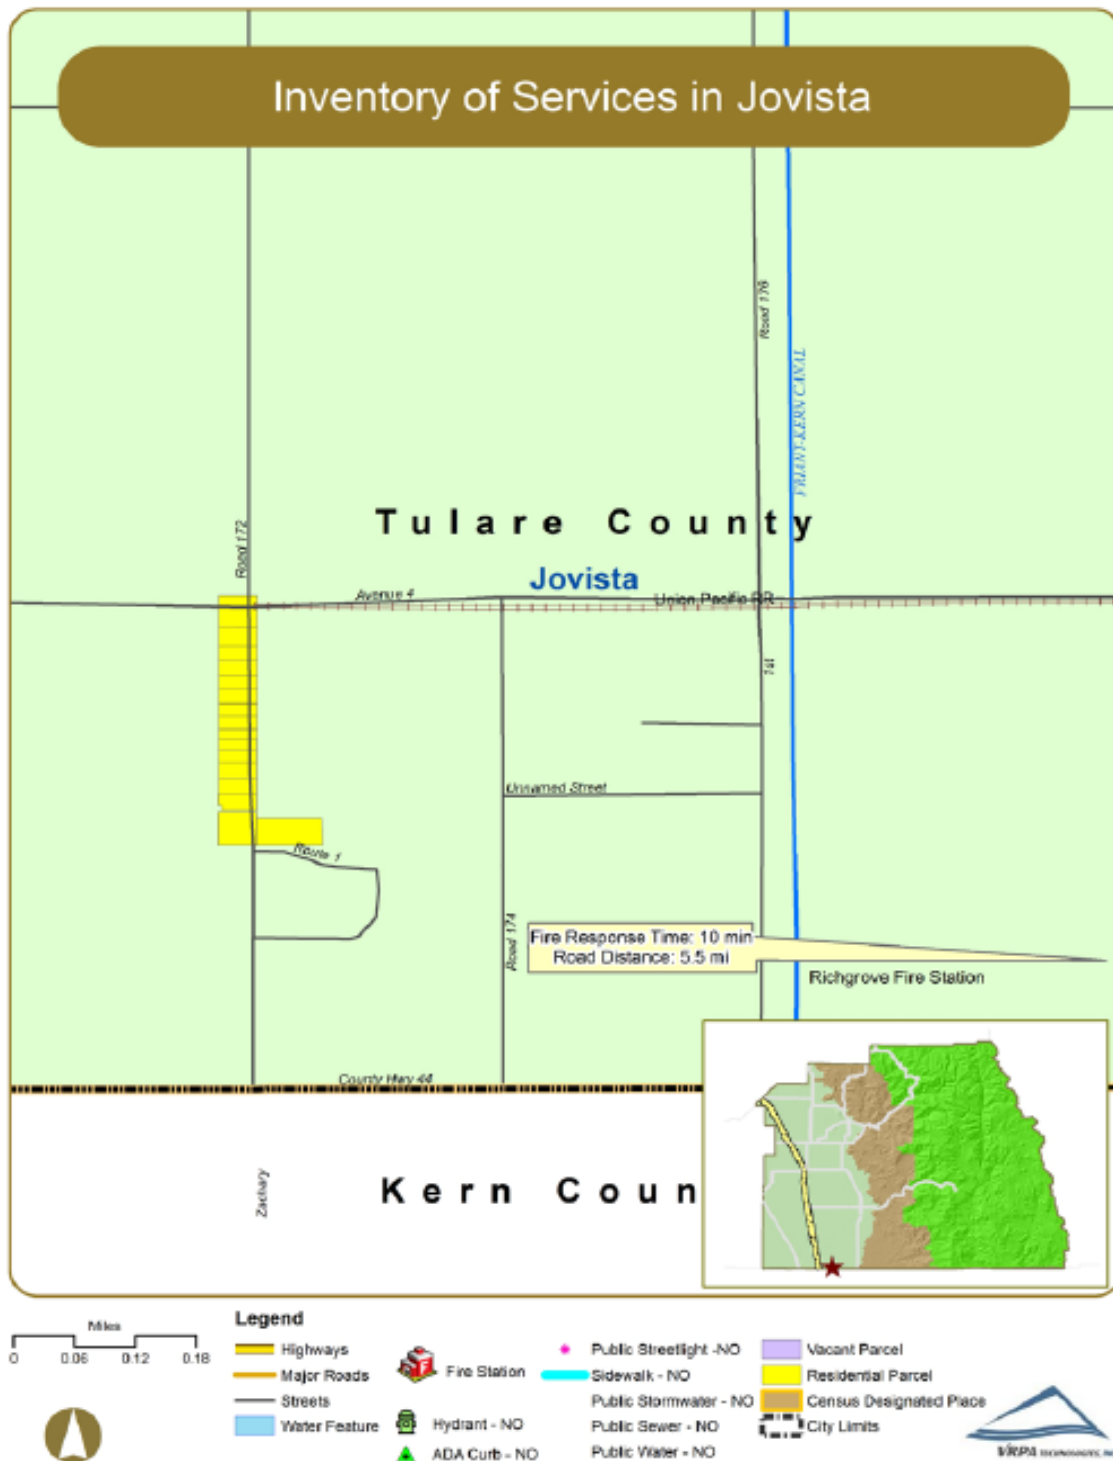

There are currently no street lights located in Jovista.

## Sidewalks

There are currently no sidewalks located in Jovista.

# JOVISTA LEGACY PLAN

Figure 7 - Inventory of Services in Jovista

# JOVISTA LEGACY PLAN

---

## ADA Curb Ramps

The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street. Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

There are currently no ADA compliant curb ramps located in Jovista.

## **Public Transportation**

### Transit

Jovista lacks access to public transportation. Jovista residents that do not drive find it hard to travel outside of town. Residents often need to travel to Earlimart or Delano for doctors' appointments and shopping needs. Bus transportation to and from Jovista would help many residents with their daily travel needs. The nearest bus stop is approximately four (4) miles east in Richgrove.

### AMTRAK

The Corcoran AMTRAK station, located 25 miles to the northwest in Kings County, is the closest station to Jovista providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

### Aviation

The nearest operational general aviation airport is Meadows Field, Bakersfield's principal commercial airport, is approximately 30 miles south of Jovista and offers direct flights to several destinations.

Fresno Yosemite International Airport (FAT), approximately 85 miles northwest of Jovista, is the principal passenger and airfreight airport in the central San Joaquin Valley. Visalia Municipal Airport, approximately 40 miles north, offers passenger service to Los Angeles.

### State Route 99

State Route (SR) 99 is the major highway between cities within the Central Valley and the primary route between the City of Fresno to the north and the City of Bakersfield to the south. Jovista is located approximately five (5) miles east of SR 99.

### Internet Access

Most families in Jovista do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in

# JOVISTA LEGACY PLAN

---

nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Jovista.

## PUBLIC SERVICES

### Sheriff

The Tulare County Sheriff's Department has a Pixley Substation covering 552 square miles and serving a rural population to include the unincorporated communities of Alpaugh, Allensworth, Teviston, Earlimart, Pixley and Tipton which holds approximately 45,000 people. The Substation runs a four shift operation which includes 16 deputies, five sergeants and one lieutenant. There are a minimum of three deputies and one sergeant in the field at all times. The substation is open for walk-ins from 8:00 am to 5:00 pm. After hours, there is a phone provided outside the substation that calls directly into the dispatch center.

### Fire

Fire protection and emergency medical services are provided for Jovista by the Tulare County Fire Department. The community is served by Tulare County Fire Department Station #10, located at 20892 Grove Drive in Richgrove, California. Engine 10 is assigned to this location. No fire hydrants are found in Jovista.

### Schools

Schools are an especially important component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Jovista Legacy Plan Area is within the Richgrove School District (20890 Grove Drive), a one-school district. The District provides K-8 education at its Richgrove School. High School students attend high school in Delano.

### Libraries

"The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch."<sup>7</sup> The Earlimart Branch Library is located in Earlimart 10 miles to the northwest (see Table 4).

Table 4 - Library Location & Hours		
Branch	Address	Service Hours
Earlimart	780 East Washington St. P.O. Box 12153 Earlimart, CA 93219-	Tuesday: 9:00 am – 1:00 pm, 2:00 pm – 5:00 pm Wednesday: 9:00 am – 1:00 pm, 2:00 pm – 5:00 pm Thursday: 9:00 am – 1:00 pm, 2:00 pm – 5:00 pm Friday: 9:00 am – 1:00 pm, 2:00 pm – 5:00 pm

Library hours current as of May 2017

---

<sup>7</sup> General Plan Background Report, page 7-96

# JOVISTA LEGACY PLAN

---

## Parks

There are no County owned/operated public parks in Jovista. In the community of Jovista there is no available open green space for children to play and adults to be physically active. The nearest park is located approximately four (4) miles east in the community of Richgrove.

## CIRCULATION AND TRAFFIC

“For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>8</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

---

<sup>8</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014, Page 3-54.

# JOVISTA LEGACY PLAN

---

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

Jovista is a small agricultural community comprised of a private road (Zachary Road/Road 172). There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# JOVISTA LEGACY PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the Jovista Legacy Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Legacy Boundaries are proposed to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Jovista to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan, Jovista Legacy Plan. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

It is important to recognize that County policies reflect the unique attributes of the various locations and geographic areas in the County. As such, there are policies applicable to one area of the County that are not applicable to others based on natural setting, topography, habitat, existing development, or other attributes which are unique within the planning context of the County. The following planning goals, objectives, policies and standards reflect, as applicable, the rural, suburban, or urban contexts of the Legacy planning areas designated by the County.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts**

**through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for industry, commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming commercial and industrial concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned shopping areas.
4. Require public, quasi-public and high density residential uses to locate where direct

# JOVISTA LEGACY PLAN

---

access to major streets is available.

5. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.

6. The County shall work with the Schools to provide safe routes to school.

7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Jovista Community Plan.

8. The Jovista Legacy Plan should be reviewed every five years to determine if amendments are appropriate.

9. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

## Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.

2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

## Policies:

1. Apply the health, safety and welfare

standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.

2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.

3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.

4. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to initiate home maintenance/repair programs in Jovista.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

## Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.

2. Assure that the housing industry is made aware of residential development potentials in Jovista.

3. Coordinate residential zoning with availability of utilities and community services.

4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.

5. Encourage housing advocacy groups, such as Habitat for Human and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

## Policies:

1. Allow for development of mobilehome parks in appropriate locations.

2. Permit mobilehomes to be installed on residentially designated lots within the original

# JOVISTA LEGACY PLAN

---

townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.

3. Discourage mobilehomes on individual lots outside the original townsites, except when necessary for caretaker use in conjunction with commercial and industrial activities.

4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.

5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

**GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for industrial and commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

### Policies:

1. Promote a concentration of industrial and commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.

2. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new industrial and commercial development.

### Policies:

1. Encourage the Jovista to give priority to community service development in the areas reserved for commercial and industrial growth on the plan.

2. Place emphasis on development and upgrading of water supply facilities to meet fire

protection standards in planned commercial and industrial areas.

Objective: Provide the necessary safe guards to attract quality industrial and commercial development to the community.

### Policies:

1. Assure that commercial and industrial developments are designed so that traffic will not impact upon residential areas.

2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of industrial and commercial areas.

## **Environmental Quality and Public Safety**

**GOAL I: Preserve and enhance the quality of life for present and future generation of Jovista citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

### Policies:

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.

2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.

3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

### Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.

2. Facilitate innovation in housing and subdivision design so that private recreation

# JOVISTA LEGACY PLAN

---

and open space areas can be accommodated.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Jovista.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Jovista.

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

Infrastructure In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

Use Permits There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

Education Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Health Care Health care is important for economic development as businesses need healthy employees. The nearest medical offices are located in the community of Earlimart and the City of Delano, California, Kern County.

# JOVISTA LEGACY PLAN

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Legacy Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan (**see Table 5**) and Zoning Districts Plan (**see Table 6**) have been updated.

<b>Table 5 - Proposed Land Use</b>	
Proposed Land Use	Acres
Mixed Use	65.1
Right-of Ways	0.0
Jovista LDB	65.1

<b>Table 6 - Proposed Zoning</b>	
Proposed Zones	Acres
AE-20	58.9
C-2-MU	0.9
R-A-43	5.3
Right-of Ways	0.0
Jovista LDB	65.1

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the general plan recommendations contained in the Jovista Legacy Plan. The following components comprise the Jovista Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

**Zoning District Changes** As part of this Implementation Program for the Jovista Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

**Chapter 16 of the Zoning Code** **Revise Chapter 16** of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

**Mixed Use Overlay District** This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Jovista. The mixed use land designation would provide for potential commercial activities in addition to the residential development.

# JOVISTA LEGACY PLAN

---

**Zoning Map Update** The current Zoning Map (**see Figure 9**) for Jovista will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 8**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 10** Jovista Proposed Zoning).

A-2 – Section 18: Mixed Use Overlay District (Zone Change Text)

# JOVISTA LEGACY PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### Additional By-Right Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Arcades, including video. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Assemblage of people for educational or entertainment purposes. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2	

# JOVISTA LEGACY PLAN

Assembly of electric appliances such as lighting fixtures, irons, fans, toasters and electric toys, refrigerators, washing machines, dryers, dishwashers and similar home appliances. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2	M-1
Assembly of small electrical equipment such as home and television receivers. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	M-1
Assembly of typewriters, business machines, computers, and similar mechanical equipment. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3	M-1
Automated car wash (coin operated only). Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	C-2, C-3, M-1
Automobile parking lots, public parking areas or storage garages. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	
Automobile supply stores.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Automobile washing, including the use of mechanical conveyors, blowers and steam cleaning.	C-2, C-3, M-1, M-2	C-3, M-1
Bakery [employing not more than five (5) persons on premises].	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bakery goods store.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Banks and financial institutions.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Barber shop or beauty parlor.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bed and Breakfast Home with three or more guests rooms (Up to 5). Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3, R-2	R-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Bicycle shops. Structure.	CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Billiard or Pool hall Structure	C-2, C-3, M-1	C-2, C-3, M-1
Bird store or pet shop.	O, CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Blueprinting and Photostatting shop.	CO, C-1, C-2, C-3, M-1, AP	C-2, C-3, M-1
Boat sales and service. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1	C-3, M-1
Book binding. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-3, M-1
Book or stationary store. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Business and professional schools and colleges. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Business, professional and trade schools and colleges. Structure <	CO, C-1, C-2, C-3, M-1	C-3, M-1

# JOVISTA LEGACY PLAN

## A-2 Section 18 Mixed Use Overlay District (Zone Change Text)

The following regulations shall apply in the community of Jovista, unless otherwise provided in this Ordinance.

### A. PURPOSE

The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

### B. APPLICATION

This overlay zone only applies to the communities of Ducor, Terra Bella, Traver, Strathmore, Pixley, Tipton, Jovista, Jovista, Matheny Tract and Tooleville..

### C. USE

No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Jovista.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# JOVISTA LEGACY PLAN

---

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## D. DEVELOPMENT STANDARDS

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

# JOVISTA LEGACY PLAN

---

## E. ALL OTHER DEVELOPMENT STANDARDS

All other Development Standards are included below and in the Community Plans for Ducor, Terra Bella, Traver, Strathmore, Pixley, and Tipton, and the Legacy Plans for Hypericum, Jovista, Matheny Tract and Tooleville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

### ARCHITECTURE

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

# JOVISTA LEGACY PLAN

---

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# JOVISTA LEGACY PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# JOVISTA LEGACY PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance. Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

# JOVISTA LEGACY PLAN

---

LA-10 All utility lines from the service drop to the site should be located underground.

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

# JOVISTA LEGACY PLAN

---

WF-3 Unless walls are required for screening or security purposes they should be avoided.

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of

# JOVISTA LEGACY PLAN

---

the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

# JOVISTA LEGACY PLAN

---

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

# JOVISTA LEGACY PLAN

---

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF THE ADDENDUM EIR )  
AND MITIGATION MONITORING AND REPORTING )  
PROGRAM FOR THE LEGACY PLANS 2017 ) RESOLUTION NO. 9342  
UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, II AND PART III )  
AMENDMENTS (GPA 17-033) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Legacy Plans 2017 Update which consists of General Plan Amendment No. GPA 17-033 amendment to Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities & Services Elements, and Part II Rural Valley Lands Plan, and Part III (El Monte Mobile Village GPA 17-025; Hypericum GPA 17-026; Jovista GPA 17-027; Matheny Tract GPA 17-029 and Tooleville GPA 17-030 amending the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, Change of Zones No. PZC 17-025 El Monte Mobile Village; PZC 17-026 Hypericum; PZC 17-027 Jovista; PZC 17-029 Matheny Tract and Tooleville PZC 17-030, PZC 17-032 for an amendment to Section 16 of Ordinance No. 352, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Development Boundary, and Zone Ordinance Amendment No. PZC 17-031 establishing a Mixed Use Combining Zone in El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville (incorporated by reference herein). The unincorporated Legacy Communities are located within the Mount Diablo Base & Meridian as follows: El Monte Mobile Village, Section 12, Township 16S, Range 23E, Hypericum, Section 24, Township 19S, Range 25E, Jovista, Section 32, Township 24S, Range 26E, Tooleville, Section 12, Township 19S, Range 26E, Matheny Tract Section 22, 23, & 27, Township 20 south, Range 24 East.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element, Transportation & Circulation Element and the Public Facilities & Services Element; (2) add El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Legacy

Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Legacy Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-033 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management and the Transportation and Circulation Element; Change of Zone No. PZC 17-031 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for El Monte Mobile Village, Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista, Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract, Change of Zone No. PCZ 17-029 (Zoning District Map) and Tooleville, Change of Zone No. PZC 17-030 (Zoning District Map) within the respective Legacy Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-032 an amendment to Section 16 to allow additional by-right uses in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Legacy Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Legacy Plans;
  - b. Encourage infill development within Legacy Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Legacy Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The legacy planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;
  - b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on September 15, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Legacy Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Legacy Plans 2017 Update General Plan Amendment 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Change of Zone No. PZC 17-025; Hypericum General Plan Amendment No. GPA 17-026; Change of Zone No. PZC 17-026; Jovista General Plan Amendment No. GPA 17-027; Change of Zone No. PZC 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; Change of Zone No. PZC 17-029; Tooleville General Plan Amendment No. GPA 17-030; Change of Zone No. PZC 17-030; Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-032 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation, Public Facilities & Services, and Part II Rural Valley Lands Plan has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,
2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,

4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit "B" that are restrictive and applied only to the Legacy Plans 2017 Update. Therefore, the public will benefit from the Legacy Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on October 27, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Introduction; Component A-Planning Framework Element; Component B-Agriculture and Land Use Elements, Component C-Scenic Landscapes, Environmental Resources Management and Air Quality Elements; Component D-Transportation & Circulation and Public Facilities & Services Elements; and Part II Rural Valley Lands Plan of the Tulare County General Plan as set forth in Exhibits "A-1 to A-13" and Part III Community Plan as set forth in Exhibits "B-F" for the Legacy Plans 2017 Update General Plan Amendment No. GPA 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Legacy communities as part of the Legacy Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on September 15, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017 and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan for the Legacy Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Legacy Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Legacy Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to establish Legacy Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;

4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the establishment of legacy development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;
5. The Amendment to Part I Introduction, Component A, Component B, Agriculture, Component C, Scenic Landscapes, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and the newly established Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Legacy Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-033 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-033 the Legacy Plans 2017 Update set

forth in attached Exhibits “A-1 to A-13” and Part III Exhibits “B-F” which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

IN THE MATTER OF AN AMENDMENT TO           )  
SECTION 18.9 "MU" MIXED USE COMBINING    )  
ZONE OF ORDINANCE NO. 352 CONSISTENT     )       RESOLUTION NO. 9344  
WITH THE ADOPTED LEGACY PLANS 2017       )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE    )  
NO. PZC 17-031                                 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and

Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

OF ZONE NO. PZC 17-032	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the communities of El Monte Mobile Village,

Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update, consistent with the Legacy Communities 2017 Update including affirmation that Section 16 H. is applicable in the Matheny Tract.

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update (GPA 17-033) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities;
3. The proposed changes in zone district designations identified in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the El Monte Mobile Village Change of Zone No. PZC 17-025; Hypericum Change of Zone No. PZC 17-026; Jovista Change of Zone No. PZC 17-027; Matheny Tract Change of Zone No. PZC 17-029; and Tooleville Change of Zone No. PZC 17-030, an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" and "N" Rezoning Plans consistent with the adopted El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update (GPA 17-033).

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano

ATTEST: MICHAEL C. SPATA  
COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY:   
Deputy Clerk

\*\*\*\*\*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Legacy Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Legacy Plans 2017 Update (GPA 17-033); and
3. Adopted one General Plan Amendment No. GPA 17-033, for the Legacy Plans 2017 Update inclusive of the El Monte Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029); Tooleville (GPA 17-030) and Amendments to Tulare County General Plan Part III to establish Legacy Plans and Legacy Development Boundaries; Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D,

Public Facilities and Services Elements, and Part II General Plan Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update; and

4. Waived the final reading and adopted Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Legacy Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-031) to Section 18.9 to adopt a Mixed-Use Combining Zone within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-032) to Section 16 to allow additional by-right uses within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for El Monte Village (PZC 17-025), Hypericum (PZC 17-026), Jovista (PZC 17-027), Matheny Tract (PZC 17-029), and Tooleville (PZC 17-030), consistent with the Legacy Plans 2017 Update; and
5. Adopted the findings of approval set forth in Planning Commission Resolution No. 9342 (Addendum to EIR), Planning Commission Resolution No. 9343 (Legacy Plans 2017 Update), Planning Commission Resolution No. 9344 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9345 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9346 (Zoning District Ordinance Maps); and
6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of El Monte Mobile Village, Hypericum, Matheny Tract, Jovista, and Tooleville to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents; and
10. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## **EXHIBIT "A"**

### **A. Legacy Plans 2017 Update (General Plan Amendment 17-033)**

WHEREAS, on September 27, 2017 the Planning Commission held a public hearing on the Legacy Plans 2017 Update (GPA 17-033), which included an application for El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030, El Monte Mobile Village Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract Change of Zone No. PZC 17-029 (Zoning District Map); and Tooleville Change of Zone No. PZC 17-030 (Zoning District Map), Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9) and Change of Zone No. PZC 17-032 (By-Right Uses–Section 16), collectively referred to as the Legacy Plans 2017 Update (GPA 17-033); and

WHEREAS, upon conclusion of the public hearing, the Planning Commission recommended the Board of Supervisors certify and adopt the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopt the Mitigation Monitoring and Reporting Program and approve the Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors held a public hearing on October 17, 2017 to consider the proposed Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors finds the public hearing for the Legacy Plans 2017 Update was properly noticed in accordance with state law and the Tulare County Ordinance Code.

WHEREAS, the Board of Supervisors finds the Legacy Plans 2017 Update is compatible, integrated and internally consistent with the existing policies of and with the Tulare County General Plan.

WHEREAS, the Board of Supervisors accepts and incorporates by reference herein, the findings of facts and recommendations adopted by the Planning Commission as follows:

1. Planning Commission Resolution No. 9342, in the matter of the Certification and adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update (PC Package Attachment 1 – CEQA Resolution).

2. Planning Commission Resolution No. 9343, to adopt General Plan Amendment No. GPA 17-033 for the Legacy Plans 2017 Update inclusive of El Monte Mobile Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029) and Tooleville (GPA 17-030) and Amendments to Part III of the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, to the Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities and Services Elements, and Part II Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update (PC Package Attachment 2 – GPA Resolution).
3. Planning Commission Resolution No. 9344, in the matter of an Amendment to Section 18.9 of Ordinance No. 352, the Zoning Ordinance, and establish the Mixed Use Combining Zone within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 3 – Section 18.9 Resolution).
4. Planning Commission Resolution No. 9345, in the matter of an Amendment to Section 16 of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 4 – Section 16 Resolution).
5. Planning Commission Resolution No. 9346, in the matter of an Amendment to Ordinance No. 352, the Zoning Ordinance, as set forth in the Zoning District Ordinance Maps for El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the Legacy Plans 2017 Update to rezone certain properties within El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville. (PC Package Attachment 5 – Rezoning Plan Resolution).

NOW, THEREFORE, BE IT RESOLVED as follows:

A. The Board of Supervisors hereby certifies and adopts the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopts the Mitigation Monitoring Reporting Programs.

NOW BE IT FURTHER RESOLVED as follows:

B. The Board of Supervisors adopts the entirety of all of the above findings and actions as one General Plan Amendment No. GPA 17-033.

C. The Board of Supervisors hereby waives the final reading of Change of Ordinance 352 and adopts amendments to the Tulare County Zoning Ordinance 352 pertaining to Section 18.9 - Mixed-Use Combining Zone, to Section 16 - Variances and Special Uses, and Zoning District Map Changes.

D. The Board of Supervisors authorizes the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of Legacy Plans 2017 Update to include Mixed Use Combining Zone and additional "By-Right" uses.

E. The Board of Supervisors directs the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq.

F. The Board of Supervisors directs the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file Notices of Determination with the Tulare County Clerk.

G. The Board of Supervisors authorizes the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents.

# MATHENY TRACT LEGACY PLAN

---

## Introduction

An important objective in preparing a Legacy Plan for Matheny Tract is to develop a plan which can accurately reflect the needs and priorities of the Matheny Tract community. Matheny Tract is not currently designated as a legacy area in the 2030 Tulare County General Plan (2012) Planning Framework Element since legacy areas have not been formally established to date. It has become apparent that a more precise plan is needed to increase the availability of infrastructure funding (for things such as wastewater improvements [for example wastewater distribution piping], curbs, gutters, sidewalks, etc.) and to stimulate economic development within the community.

Matheny Tract is located adjacent to the city of Tulare (**see Figure 1**) generally located south of Avenue 216 (Paige Avenue), east of Road 96 (Pratt Street) and west of I Drive and State Route 99. Matheny Tract is located just west of industrial land uses and a Union Pacific Railroad (formerly Southern Pacific Transportation Company) line running through Tulare County. Physically, the Community of Matheny Tract (**see Figure 2**) is physically divided into a north and south area by agricultural land uses that separate approximately 256 households in North Matheny from 80 households in South Matheny Tract. The Matheny Tract Community is predominantly surrounded by agricultural land.

Along the eastern boundary, running parallel to South “T” Drive is an irrigation ditch, above ground power lines and the Union Pacific Railroad (formerly Southern Pacific Transportation Company) tracks. Also visible to the east is the city of Tulare corporation yard. Above ground power lines run parallel to Pratt Road that acts as the western boundary. The City of Tulare’s Wastewater Treatment and Reclamation facility is located about  $\frac{3}{4}$  miles northwest of Matheny Tract. In addition, an industrial area is located immediately northeast of the Community.

There is a canal within Tulare Irrigation District (TID) service area that bisects North and South Matheny Tract. The Oakland Colony Ditch runs in a north south direction through North Matheny Tract along the Canal Street corridor and extends in an east-west direction between North and South Matheny Tract. There are two east-west crossings of the Oakland Colony Ditch - one along Wade Avenue and the other along Addie Avenue - in North Matheny Tract.

Matheny Tract is an aging unincorporated Tulare County subdivision. As indicated above, there are two parts to Matheny Tract, the southern and smaller portion laid out as Tulare County Tract 53 in 1946 and the northern portion laid out as Tract 104 in 1947 by E.S. Matheny and Grace L. Matheny with a population of approximately 1,043 and 280 households. Matheny Tract is also designated as a disadvantaged community, which is, “a census designated place that has household median incomes that are less than 80% of the statewide household median income.

## Location

The Tulare County community of Matheny Tract is comprised of two groupings of dwellings located south of the City of Tulare just east of Pratt Road and adjacent to the city of Tulare. Matheny Tract is in Section 22, 23, & 27, Township 20 South, Range 24 East, MDB&M, and can be found within the Page, United States Geological Survey 7.5 Minute topographic quadrangle. Matheny Tract is located at an elevation of 269 feet above sea level, National Geodetic Vertical Datum. The coordinates of Matheny Tract are: Latitude: 36.172179 and Longitude: -119.351606.

## Planning Area

The Matheny Tract Legacy Development Boundary (HDB) area consists of 187.8 acres (**see Figure 3**). The Land Uses within the HDB are described as follows. Agricultural activities, including orchards and pasture, currently occupy 1.54 percent of the 187.8 acres. Urban development, including urbanized uses such as residential and commercial development occupy 80.77 percent of the 187.8 acres. The remaining 17.5 percent are lands dedicated for Right-of-way (**See Table 1**).

<b>Table 1 - Matheny Tract Land Use</b>	
<b>Land Use</b>	<b>Acres</b>
Residential	145.3
Commercial	2.5
Agricultural	2.9
Non Zoned Parcels	0.2
Z	2.9
Rights-of-way	32.9
<b>Total</b>	<b>187.8</b>

No change is proposed to the Hamlet Development Boundary.

## City of Tulare's Sphere of Influence (SOI)

The community is located adjacent to the Tulare city limits and outside the city's 2035 Urban Development Boundary. Although Matheny Tract is within the city's Sphere of Influence (SOI) (**see Figure 4**), the city's General Plan map does not designate the area. Many residents have lived in Matheny Tract for many years; a 2012 survey found that 51% had lived there longer than ten years. Thirty-four percent had lived in Matheny Tract for more than twenty years. Most children attend Palo Verde School, which is not part of the Tulare City School District, and many of their parents attended Palo Verde as well.

## SUSTAINABLE COMMUNITIES STRATEGY OUTREACH REPORT

### Community Description

Matheny Tract is a disadvantaged unincorporated community located immediately adjacent to the City of Tulare's southwestern boundary. It is a community that is considered a Census Designated Place (CDP) by the 2010 U.S. Census. This means that it is a place where there is a settled concentration of population that is identifiable by name, but is not legally incorporated under the laws of the state in which it is located and is delineated to provide data.<sup>1</sup>

This report is based on data from the American Community Survey (ACS), Matheny Tract residents' testimony through surveys, and informal residents' testimony collected via community canvassing. The observations made by Leadership Counsel for Justice and Accountability (Leadership Counsel) and the Matheny Tract Committee (MTC) is also included. Leadership Counsel is a 501(c)3 non-profit organization that helps disadvantaged communities with infrastructure needs and MTC is a group of Matheny Tract residents that volunteer their time to work towards improving their community. MTC and Leadership Counsel conducted canvassing and door-to-door outreach in Matheny Tract to create this report.

The ACS estimates that Matheny Tract's total population in 2014 was 1,098 residents with 305 households.<sup>2</sup> The age breakdown is as follows: 38.8% of the population in Matheny Tract is between the ages 0 to 19, 36.3% are between 20 to 44 years of age, 18.1% are between 45 to 59 years of age, and 11.9% are over 60 years of age.<sup>3</sup>

The male and female population makes up 49.2% and 50.8%, respectively.<sup>4</sup> In Matheny Tract, residents of Hispanic or Latino background make up 63.4% of the population. Additionally, of the population that identified as "Not Hispanic," 33.8% identified themselves as White and 2% identified themselves as Black or African American.<sup>5</sup>

Additionally, Matheny Tract has many infrastructure needs. Notably, the residents have stated that their current water servicer, the Pratt Mutual Water Company, has tested the drinking water in Matheny Tract and confirmed that it is contaminated with arsenic, nitrates, and leaching septic tanks. Attaining clean drinking water is a top priority for residents, and for many years, the community has worked towards securing their right to potable water.<sup>6</sup>

Heading this movement is the Matheny Tract Committee. As mentioned, MTC's purpose is to advocate for improved conditions and quality of life in the Matheny Tract. MTC and Leadership Counsel for Justice and Accountability have secured an agreement by the City of Tulare to consolidate its water system with Matheny Tract's new water system constructed with Proposition 84 funds.

# MATHENY TRACT LEGACY PLAN

---

In 2011, the City of Tulare signed an agreement with Pratt Mutual Water Company, the water company that serves Matheny Tract, to provide potable water to Matheny Tract and consolidate its water system with the community's water system, which would be constructed with Proposition 84 funding. In June 2015, the City of Tulare initiated a lawsuit to alter the terms of the agreement, and MTC countersued to seek the City's compliance with the agreement. The City, MTC, and Pratt Mutual arrived at an agreement in April 2016, prior to trial and after the State Water Resources Control Board (SWRCB) ordered the City of Tulare to initiate potable water service to Matheny Tract and consolidate its water system with the community's pursuant to the authority granted to it under SB 88. SB 88 grants the SWRCB authority to require local governments such as Tulare, to consolidate their water systems with adjacent disadvantaged communities when those communities have high levels of contamination in their drinking water that exceed public health thresholds.

## Community Outreach and Invitation Process

Leadership Council met with MTC on two occasions to discuss dates for outreach and whether or not we should have a large-scale workshop at Palo Verde Elementary School. The group decided to schedule the first workshop for January 9, 2016, at 10:00 am. The group usually meets outdoors at Reina Palma's house on 256 East Beacon Avenue on Reina's driveway. However, the group informed us that the workshop should not be outdoors during that time of the year, because it was too cold in the evenings, and no one would attend.

Also, because MTC has had large meetings at the Palo Verde Elementary cafeteria in the past, we contacted Mr. Manning, Palo Verde's principal, who agreed to allow us to use the Palo Verde Cafeteria for the workshop location and agreed to have someone there to help us open the gate for a small fee, at first. Later, he decided to sponsor us and did not charge a fee.

For outreach for the workshop, we worked alongside MTC members, Tim Denney, Reina Palma, and Leadership Counsel Employees, Ashley Werner, Merced C. Barrera, and Robert Fuentes. Together we canvassed all of Matheny Tract by dividing up into teams (See "Outreach Dates" listed above and the flyer). On average, we spoke to fifteen to twenty residents per team per day.

During outreach, team members had to contend with threatening and stressful encounters with stray dogs. Tim, Reina, and Merced, for example, were approached by hostile stray dogs but fortunately were not bitten. However, there was one day in which Reina was chased by a dog. Residents of Matheny Tract must deal with the stray dogs that roam the community's streets on a daily basis. The residents stated that this is because animal control does not frequent Matheny Tract.

As described above, MTC and Leadership Counsel conducted extensive outreach for the SGC workshop. Nevertheless, just 13 residents attended the workshop on January 9th, fewer than hoped for and expected. During outreach, we received feedback from various residents that they did not plan to attend the workshop, because after so many years of neglect, broken promises and discriminatory actions and statements by their own representatives and the City of Tulare, the residents didn't believe anything could come of it. However, MTC did not give up. Together with MTC, we planned an additional meeting to get more resident input.

In addition to the workshop, we held a follow-up meeting with MTC where residents that did not attend the workshop completed the surveys. This additional meeting was held at MTC's usual place of convening, Reina Palma's house, on January 21, 2016 at 6 pm. We also did outreach for this meeting

# MATHENY TRACT LEGACY PLAN

---

by calling our list of residents that have been involved in MTC at some point in the past; this is a list of approximately 155 residents. Additionally, MTC leaders informed their neighbors and relatives that live in Matheny Tract of the additional opportunity to provide input. Please see list below for more details:

1. 11/19/15, 6:00 pm:
  - a. Matheny Tract Committee (MTC) Meeting - introduction to SGC Workshops and RMA, dates for workshop suggested
2. 12/13/16:
  - a. Matheny Tract Committee Meeting- setting dates for SGC workshop in Matheny Tract and outreach dates
3. 1/4/16:
  - a. Phone calls to MTC members re outreach for 1/5/16
4. 1/5/16, 2:00 pm- 5:00 pm:
  - a. Door-to-door flyer (300)
5. 1/7/16:
  - a. Phone calls to MTC members re outreach for 1/8/16
6. 1/8/16, 2:00 pm-5:00 pm
  - a. Door-to-door flyer (300)
7. 1/9/16- Workshop at Palo Verde Elementary School Cafeteria
8. 1/14/16-
  - a. Completed survey with residents (Mr. Vance and Mrs. Andrade)
9. 1/20/16-
  - a. Phone calls to MTC members re meeting for 1/21/16
10. 1/21/16- Meeting at MT resident's house (Reina Palma)

Lastly, the educational materials and outreach flyer included Tulare Resource Management's logo, Leadership Counsel's logo, and phone numbers for Leadership Counsel, date, location, time, and purpose of the workshop. The educational materials were copies of the survey, a PowerPoint printout, and easel boards. We used a survey to review with the residents and for discussion groups. All materials and flyers were in both, English and Spanish.

## Community Meeting

The workshop was held as planned on January 9th and began at 10am in Palo Verde Elementary new cafeteria. As mentioned above, 13 residents attended the workshop. We gave a brief presentation in which we explained the types of infrastructure and services relevant to the workshop, the purpose of collecting surveys to determine residents' priorities for improvements in the community, and the role of the County of Tulare in the planning process and project application process. We also emphasized the importance of public participation in the planning process, and why their engagement in these types of infrastructure needs assessment workshops for Matheny Tract is one way to contribute to the improvement of their community.

We provided the residents with a printout of the presentation (see Attachment A). The presentation was in English and Spanish because there were five English-speaking residents and eight Spanish-speaking residents in attendance. Childcare was not provided, and none of the participants brought children to the workshop.

# MATHENY TRACT LEGACY PLAN

---

After the presentation, we broke out into two groups, a Spanish-speakers group and an English-speakers group, to complete the surveys. Ashley Werner facilitated the English group and Merced C. Barrera facilitated the Spanish group. Once the groups completed the surveys, they numbered their improvement needs priorities on page 6 of the survey. Their priorities are tallied on the attached Excel spreadsheet, which shows the group's order of priorities (see Attachment B).

Please note that three residents forgot to sign the sign-in sheet, but as you can see in our workshop picture and the attached surveys, they attended the workshop and completed the survey (see Attachment C).

*Pictures of Matheny Tract community meeting and outreach.*

## Community Survey

A survey was developed as a tool to gather a variety of information from the community about multiple topics (see Attachment D). It was 6 pages in length and was provided in both English and Spanish. On average, it took about 30 to 40 minutes for residents to complete. The survey asks about the following community-related topics: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Transportation Options, Walkability, Roads, Street Safety, Flooding, Fire, Safety, Infrastructure, Water Quality & Quantity, Wastewater, Storm Water Drainage, Multimodal Opportunities, and the priority of various improvement needs.

Residents were encouraged to add information and comments to the survey. There were only two translations that were confusing to the Spanish-speaking residents. The first was under the topic of “Gas Stations:” the residents did not understand the difference between “estacion de servicio” and “gasolinera.” Second, under “Fire and Safety,” residents needed some explanation about the meaning of “hidrantes de bomberos.” We discussed residents’ questions to ensure that they fully understood and could complete the survey.

After careful discussion at the Matheny Tract SGC community input meeting, residents concluded that the following list represents Matheny Tract priority improvement needs.

# MATHENY TRACT LEGACY PLAN

---

## Priority Improvements

1. Water Quality/ Water Quantity
2. Sewer System
3. Storm Water Drainage/ Street Flooding
4. Road Improvements
5. Street lights
6. Sidewalks
7. Trash Service
8. Community Safety
9. Fresh food availability/Market
10. Community Park

## **Water Quantity**

Matheny is comprised of approximately 305 residential units and a local store.<sup>7</sup> Currently, Pratt Mutual Water Company and septic tanks serve all of the residential lots. Pratt Mutual Water Company serves the local store as well. The residents also mentioned that the water pressure is very low sometimes.

## **Water Quality**

Pratt Mutual's wells were drilled several decades ago. The residents report that all of the wells are contaminated with Arsenic. Residents strongly desire access to potable drinking water, consistent with Pratt Mutual's agreement with the City of Tulare.

During outreach calls to residents for the workshop, one resident stated that they had been denied building permits to construct a single-family resident on a vacant lot that they owned due to inability to demonstrate a source of potable water.

Also, while canvassing, one resident asked whether she could boil her water to eliminate arsenic from her tap water; we informed the residents that boiling water would not address arsenic contamination.

## **Sewer System**

Matheny Tract is presently unsewered, with wastewater disposal provided via individual septic systems that date to the 1960's. Based on visual inspection there are approximately 305 dwellings within the community on 290 residential lots; approximately one-third of the dwellings are mobile homes. Some residents report that the septic systems are failing due to age, lack of maintenance and insufficient percolation capacity of the underlying soils.

In the recent "Wastewater System Project Feasibility" survey, all of the residents voted in favor of the Alternative # 2 presented by the County's report, which is application for a state grant to construct a waste water system in Matheny Tract and consolidation of that system with the City of Tulare's system. This seems especially relevant given that the wastewater treatment plant is less than a mile away from Matheny Tract and continues to impact the community with foul odors despite years of complaints by residents.

---

<sup>7</sup> <http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=CF>

# MATHENY TRACT LEGACY PLAN

---

## **Storm Water Drainage**

The lack of storm water drainage was the second highest concern for the residents. At the workshop, 2 out of 13 participants identified drainage and sewer as their top priority and 4 out of 13 residents named this their second priority on the survey.

This is of great concern for the community because Matheny Tract experiences heavy flooding during the rainy season. This flooding greatly reduces walkability in the community, as residents must walk through muddy, flooded streets that lack sidewalks. These conditions pose special risks to children and the elderly who are more vulnerable to the wetness and cold. During the outreach conducted in December and January, one of the issues that MTC and Leadership Counsel encountered while canvassing was that there were many large puddles of dirty water that blocked driveways that led to the front doors of homes.

## **Road Improvements**

There are many potholes in Matheny Tract, and some of the residents stated that the pavement cracks. Also, the roads do not have a lane-dividing line or a boundary line for the residential sides of the streets. There are no bike lanes. Most of the residents stated that vehicles that pass through the community, especially on Addie Avenue, do so at extremely fast and dangerous speeds.

## **Street Lights**

There are very few streetlights in Matheny Tract, and several of the streetlights in the community do not work well or at all. One streetlight is located at the intersection of West Beacon Avenue and Luton Street. The residents stated that having more street lights are imperative for the safety in their community, as it is now, without much lighting, none of the survey participant felt safe walking or being outdoors in their neighborhood at night.

In 2012, MTC secured a community-benefits agreement with Colony Energy LLC -- which plans to build an anaerobic co-digester facility upwind of the community by the City of Tulare's Waste Water Treatment Plant -- which provides that Colony Energy will work with Southern California Edison to install approximately 17 street lights in Matheny Tract and pay for their operation for ten years. Colony Energy's duty to do so is triggered when it secures financial close. Colony Energy representatives report that it has not yet secured financial close.

## **Speed Limit Signs**

The community needs traffic calming signs throughout and enforcement by patrol officers.

## **Public Transportation**

TCAT's South County Route #20 is scheduled to stop at the corner of Pratt Street and Addie Avenue approximately five times a day. However, many of the survey participants said that they have only seen the bus pass by once a day.

## **Fire Hydrants**

The majority of the residents stated that they did not know how many fire hydrants are in Matheny Tract. One resident said there weren't any fire hydrants, two others said there were several, and three residents respectively said there were more than fifty, two, and two. Also, while canvassing, we only saw one fire hydrant on Wade Street, but we were not sure whether it was operating. The point here

# MATHENY TRACT LEGACY PLAN

---

is that there seems to be a lot of confusion as to whether residents are safe in case of a fire in their community.

## **Flooding**

Almost all of the participants answered yes to this question. Two participants did not answer this question and two others said that their particular driveway did not flood, but that others on their street did. However, the majority of the participants said that flooding is an issue on all of the streets of Matheny Tract. Some of the streets that were identified by the participants were Prine Drive, Beacon Ave, and Addie Ave.

Some explained that this is due to lack of concern and maintenance by the county. Another pointed out that none of the streets have curbs. Also, some residents blame the flooding on the lack of storm water drains, as noted above. One other participant said that this was due to the many potholes on the streets as well.

## **Zoning**

Most residents reported that they did not have limitations building a home or starting a business in Matheny Tract or stated that this issue was not applicable. One resident reported that it was a problem, because she did not have money to start a business. We recommend that this question be amended in the future to account for resident's financial ability to build on their lots or start a business to better reflect how zoning can affect a resident under these circumstances. Residents may have been concerned about exposing themselves to zoning violation citations if he or she already made changes to their homes without consulting the proper permitting agencies as a result of answering the question.

## **Community Based Officer**

Additionally, some residents expressed concern about security in their neighborhoods. They would like to see the Tulare County Sheriff do more surveillance rounds, so that they can "catch" a group of motorcyclist that speed on their extremely loud motorcycles at late hours of the night, which is disturbs the many residents who work or go to school early in the morning. Some residents have seen or heard these motorcyclists as early as 4 a.m.

While canvassing for outreach in the afternoon, we also witnessed at least four motorcycles and four-wheelers speeding past us on the streets.

## **Internet**

Lastly, some residents stated that they have Comcast as their Internet and cable provider, but also stated that this service is very costly.

## **Public Services**

The nearest library for Matheny Tract residents is the City of Tulare's library, which is located four miles away. There is no direct bus route to the library. In fact, only one route services Matheny Tract, TCAT's South County Route #20, which stops at the corner of Pratt Street and Addie Avenue.

Most Matheny Tract residents reported that they have access to an electricity provider for their homes.

# MATHENY TRACT LEGACY PLAN

---

## Local Market

The local market is a small gas and liquor store. It does not offer fresh produce for Matheny Tract residents. Most of the residents travel to R&N Market or Vallarta Supermarket in Tulare, which are five to eight miles from Matheny Tract.

## Medical Clinic

Matheny Tract does not have a medical clinic. Some residents travel three miles to Hillman Clinic or Family Healthcare Network. Others travel six miles to the Community Health Clinic on the North side of Tulare.

## Follow Up Meeting

County staff and Self Help Enterprises had a follow up meeting on January 9<sup>th</sup>, 2017 to discuss the results of the outreach from Leadership and the Surveys taken at the previous meeting. The citizens remained concerned about sewer for the community. They were pleased to hear about roadway improvements along Pratt Street.

# MATHENY TRACT LEGACY PLAN

## DEMOGRAPHICS

An important part of planning is having information that describes the characteristics of a Legacy's population. Collectively, these characteristics are known as "demographics" which is data typically consisting of the age, gender (i.e., male or female), income, race, employment, and other characteristics of a community. This data, and looking at historical trends of this data, allows a reasonable way to project what may occur in the future and thereby provides a guide to which issues need to be addressed in a Legacy plan. For example, knowing the age and percentage of a population allows proper planning for school needs for school-age children; knowing how many people may eventually live in a Legacy allows for proper planning to meet housing needs and the amount of land needed to provide housing for a growing population. If a population can be estimated, it is possible to project how much water and/or sewer service may be needed for a Legacy. The following information provides a summary of some of the more important demographic data needed to craft a plan that can realistically address the needs of smaller Legacy such as Matheny Tract.

The 2015 United States Census reported that Matheny Tract had a population of 1,043. The racial makeup of Matheny Tract was (33.8%) White, (2.0%) African American, (0.0%) Native American, (0.0%) Asian, (0.5%) some other race, and (0.3%) from two or more races. Hispanic or Latino of any race were 345 persons (88.5%). The average renting household size was 4.35. There were 295 housing units, of which (43.6%) were owner-occupied, and (56.4%) were occupied by renters.

### Population

In 2015, Matheny Tract's population was 1,043, (see Table 2).

Table 2 - Population						
	California	%	Tulare County	%	Matheny Tract	%
Male	18,911,519	49.68%	225,881	50.07%	449	43.0%
Female	19,155,401	50.32%	225,227	49.93%	594	57.0%
Total	38,066,920		451,108		1,043	

2011-2015 American Community Survey 5-Year Estimates

### Median Age

Matheny Tract's population is younger than the median age throughout all of Tulare County. Matheny Tract's median age of 27 is lower than the median age of the State of California (see Table 3).

Table 3 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Matheny Tract	27

2011-2015 American Community Survey 5-Year Estimates

# MATHENY TRACT LEGACY PLAN

## ETHNICITY AND RACE

In 2015, approximately 33.8% of Matheny Tract's population was White, 0.0% was African American, 0.0% was Native American, 0.0% was Asian, 0.5% some other race alone, and 0.3% was two races or more (see Table 4). Approximately 63.4% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

Table 4 - Race & Ethnicity						
	California	%	Tulare County	%	Matheny Tract	%
Total	38,421,464		454,033		1,043	
Hispanic or Latino (of any race)	14,750,686	38.4 %	283,533	62.4 %	696	63.4%
White (Not Hispanic)	14,879,258	38.7 %	139,581	30.7 %	371	33.8%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	6	2.0%
American Indian and Alaska Native (Not Hispanic)	142,191	0.4%	3,069	0.7%	0	0%
Asian (Not Hispanic)	5,192,548	13.5 %	14,546	3.2%	0	0%
Some other race (Not Hispanic)	84,477	0.2%	288	0.1%	6	0.5%
Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	3	0.3%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Matheny Tract

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production (see Table 4).

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Matheny Tract was about 9.1% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 9.1% includes only the employable labor force (that is, not every person of the population) results in about 67 unemployed persons of Matheny Tract's person labor force of 390.

# MATHENY TRACT LEGACY PLAN

Table 5 - Employment Status			
Employment Status	California	Tulare County	Matheny Tract
Population 16 years & over	30,312,429	325,404	733
In labor force	19,269,449	194,420	390
Civilian labor force	19,137,441	194,102	390
Employed	17,246,360	170,780	323
Unemployed	1,891,081	23,322	67
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	343

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

In 2015, Matheny Tract's median household income was \$30,565 whereas the State of California's median household income was \$61,818. Therefore, based upon Matheny Tract's median household income of \$30,565 (which is about 49% of the State of California's median household income), it is considered a severely disadvantaged community (see Table 6).

Table 6 - 2011-2015 American Community Survey: Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Matheny Tract CDP	\$30,565	\$30,450	\$10,660

## Severely Disadvantaged Community:

Matheny Tract is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial opportunities, allow expansion of the size of existing housing (for example, increase a unit by an additional bedroom),

Table 7 - Housing Tenure			
	California	Tulare County	Matheny Tract
Occupied housing units	12,717,801	133,570	280
Owner-occupied	6,909,176	75,685	122
Renter-occupied	5,808,625	57,885	158

2011-2015 American Community Survey 5-Year Estimates

# MATHENY TRACT LEGACY PLAN

and allow various housing types (such as mobile homes). According to the California Department of Finance, the 2011-2015 American

Table 8 - Housing Tenure (%)			
	California	Tulare County	Matheny Tract
Owner-occupied	54.8%	57.2%	43.6%
Renter-occupied	45.2%	42.8%	56.4%

Community Survey data indicated 43.6% of the housing units in Matheny Tract was owner-occupied (**see Table 8**). Similarly, 57.2% of housing units were owner occupied in Tulare County and 54.8% of the housing units were owner occupied in the State of California.

## Housing Conditions

Table 9 - 2015 Housing Conditions Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Matheny Tract	27	14	23	12	58	29	28	14	63	32	199

Source: Tulare County 2015 Housing Element

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Matheny Tract indicated that approximately 14% of the housing units were sound. Approximately 55% of Matheny Tract's housing units were deteriorated and 32% were dilapidated (**see Table 9**).

## Age of Structures

Most of the homes in Tulare County were built between 1940 and 1989 (**see Table 10**). The total number of housing units in Matheny Tract is 295.

# MATHENY TRACT LEGACY PLAN

Table 10 - Year Structure Built			
Year Structure Built	California	Tulare County	Matheny Tract
Total housing units	13,845,790	144,792	295
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	11
Built 2000 to 2009	1,646,490	25,997	6
Built 1990 to 1999	1,495,571	21,767	14
Built 1980 to 1989	2,117,819	22,733	49
Built 1970 to 1979	2,503,688	27,111	69
Built 1960 to 1969	1,871,029	15,500	42
Built 1950 to 1959	1,907,512	13,694	42
Built 1940 to 1949	865,607	7,494	43
Built 1939 or earlier	1,298,438	8,186	19

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2014 the average renter occupied household size in Matheny Tract was 4.10 persons per household (see Table 11). The average owner occupied household size is 3.24.

Table 11 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	2.99	2.01
Tulare County	3.23	3.52
Matheny Tract	3.24	4.10

2010-2014 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>8</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. Typically, a vacancy rate of about 5-6% is considered normal; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Matheny Tract was 0.0%, the rental vacancy rate for Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate for Matheny Tract was 5.4%, the homeowner vacancy rate for Tulare County at 1.4% and the State of California at 1.4%, (see Table 12).

Table 12 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Matheny Tract	5.4%	0.0%

2011-2015 American Community Survey 5-Year Estimates

# MATHENY TRACT LEGACY PLAN

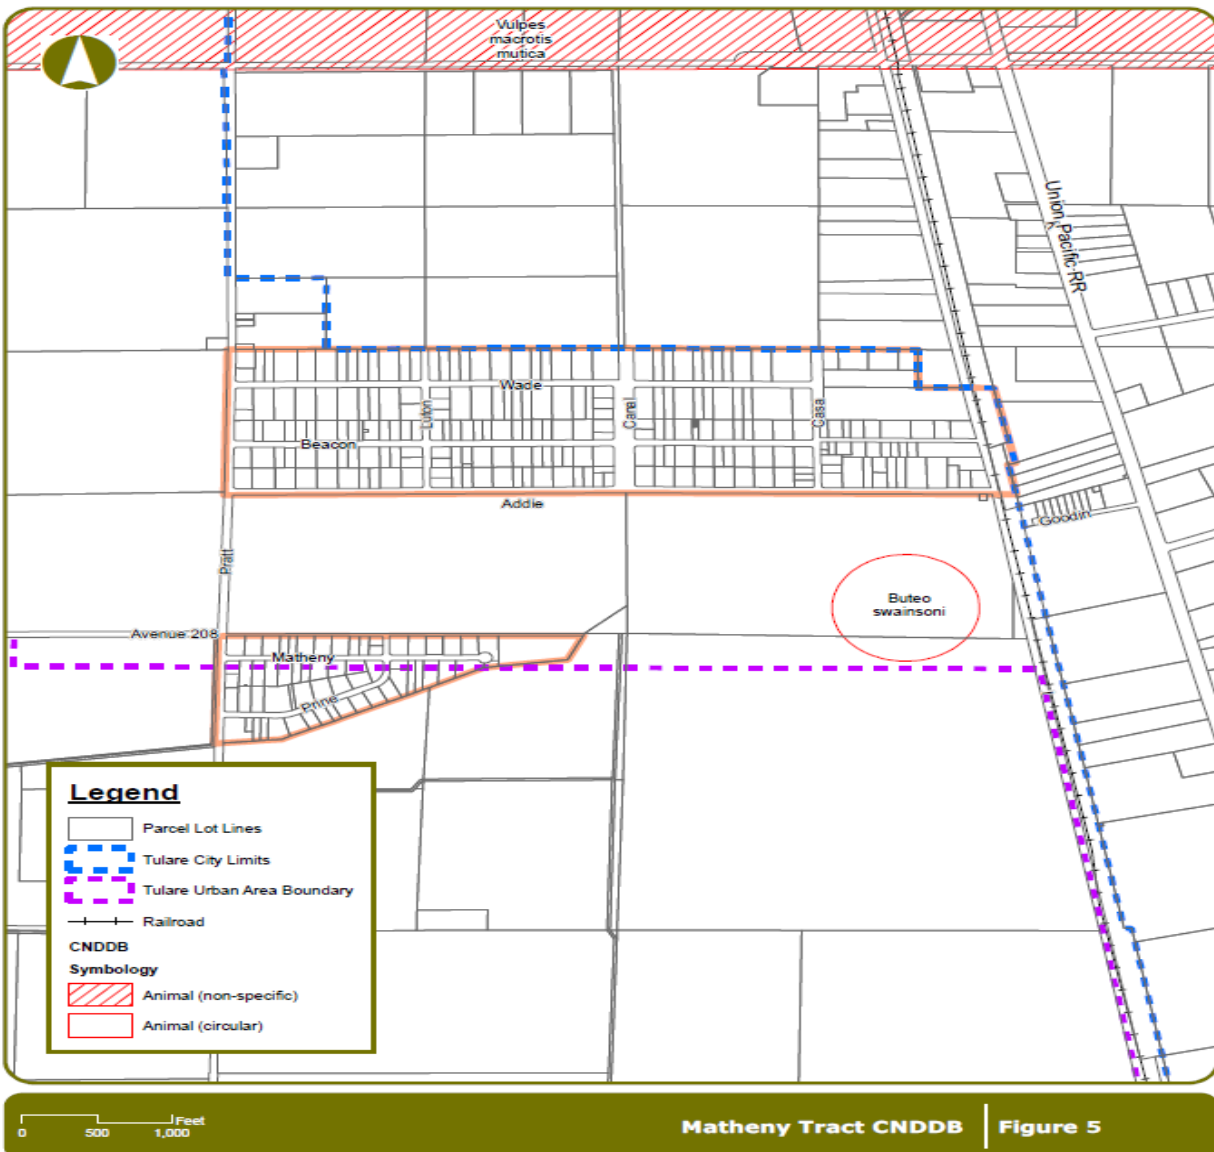

## ENVIRONMENTAL CONDITIONS

### Natural Conditions

#### Wildlife

A California Natural Diversity Database (CNDDB) search conducted on November 1, 2016 (see **Figure 5**), indicates there are special status species within the Tulare Quadrant Species List (which includes the Matheny Tract Planning Study Area) consisting of two animal species and two plant species: San Joaquin kit fox (*Vulpes macrotis mulica*, federal endangered); Swainson's hawk (*Buteo Swainsoni*, state threatened); San Joaquin adobe starburst (*Pseudobahia peirsonii*, federal threatened); and California jewelflower (*Caulanthus californicus*, federal and state endangered). The California Department of Fish and Wildlife (CDFW) Occurrence Reports indicate a last sighting of kit fox in 1975.

**Figure 5 – CNDDB Map – Tulare Quad**

# MATHENY TRACT LEGACY PLAN

---

## Geology & Seismic Hazards

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Matheny Tract are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Matheny Tract] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

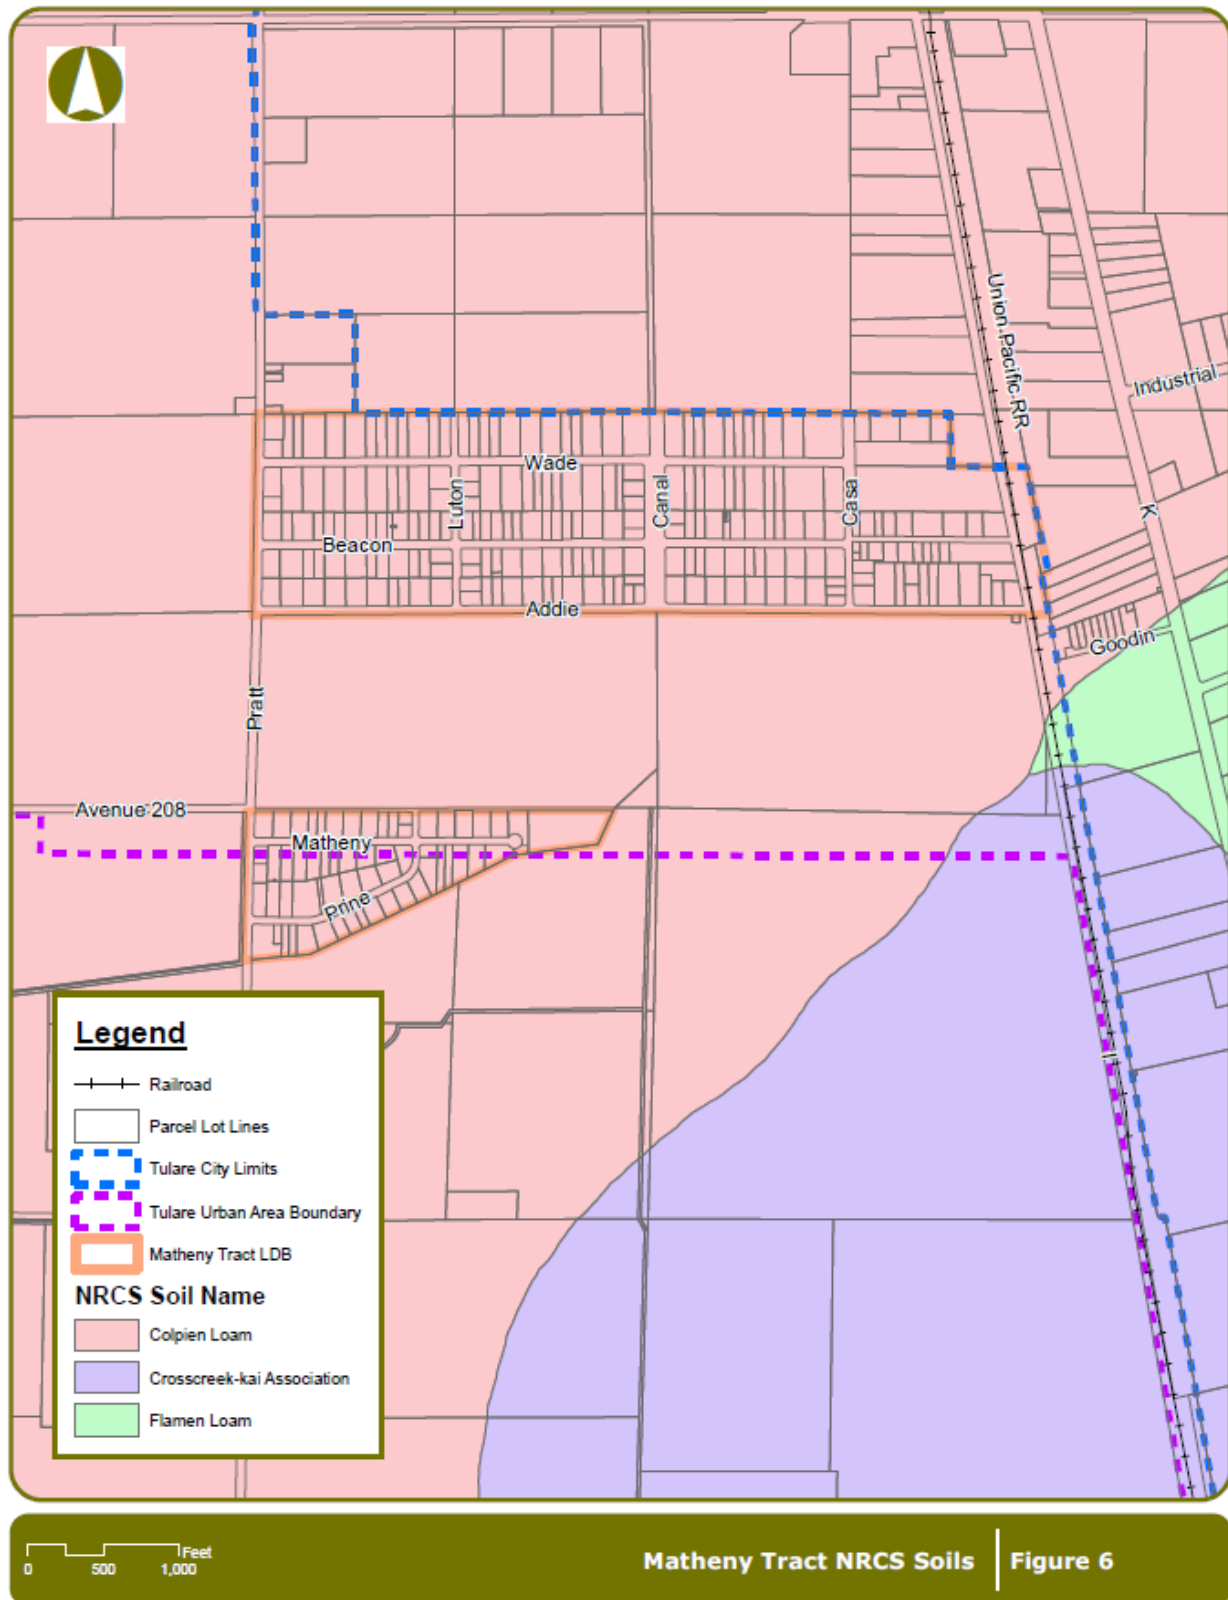

## Soils

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County (**see Figure 6**), the following soil types are located in Matheny Tract. The following descriptions are provided for the above soil types:

**Copien loam soil 0 to 2 percent slopes**, consists of very deep, moderately well drained soil on terraces that formed in alluvium derived mainly from granitic rocks.

# MATHENY TRACT LEGACY PLAN

Figure 6 – NRCS Soils Map

# MATHENY TRACT LEGACY PLAN

---

## Physical Conditions

### Air Quality

The Matheny Tract Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State O<sub>3</sub> 1-hour standard, non-attainment for the State O<sub>3</sub> 8-hour standard, non-attainment for the State PM<sub>10</sub> standard, non-attainment for the federal and State PM<sub>2.5</sub> standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

Air quality is directly related to land use; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural

# MATHENY TRACT LEGACY PLAN

---

qualities of the air. Because Matheny Tract is located near the central portion of the Valley with prevailing winds from the northwest, it is in a vulnerable position for the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of Matheny Tract include agricultural activities.

## Flooding<sup>9</sup>

“According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C1275E (**see Figure 7**). Matheny Tract is located within Flood Zone X – areas of 0.2% annual chance flood; area of 1% annual chance flood with average depths of less than 1 square mile; and areas protected by levees from 1% annual chance flood. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), which means the County of Tulare agreed to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county’s participation in the NFIP, individuals are eligible to obtain flood insurance. Further flood information is available on Tulare County Resource Management Agency website at: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>

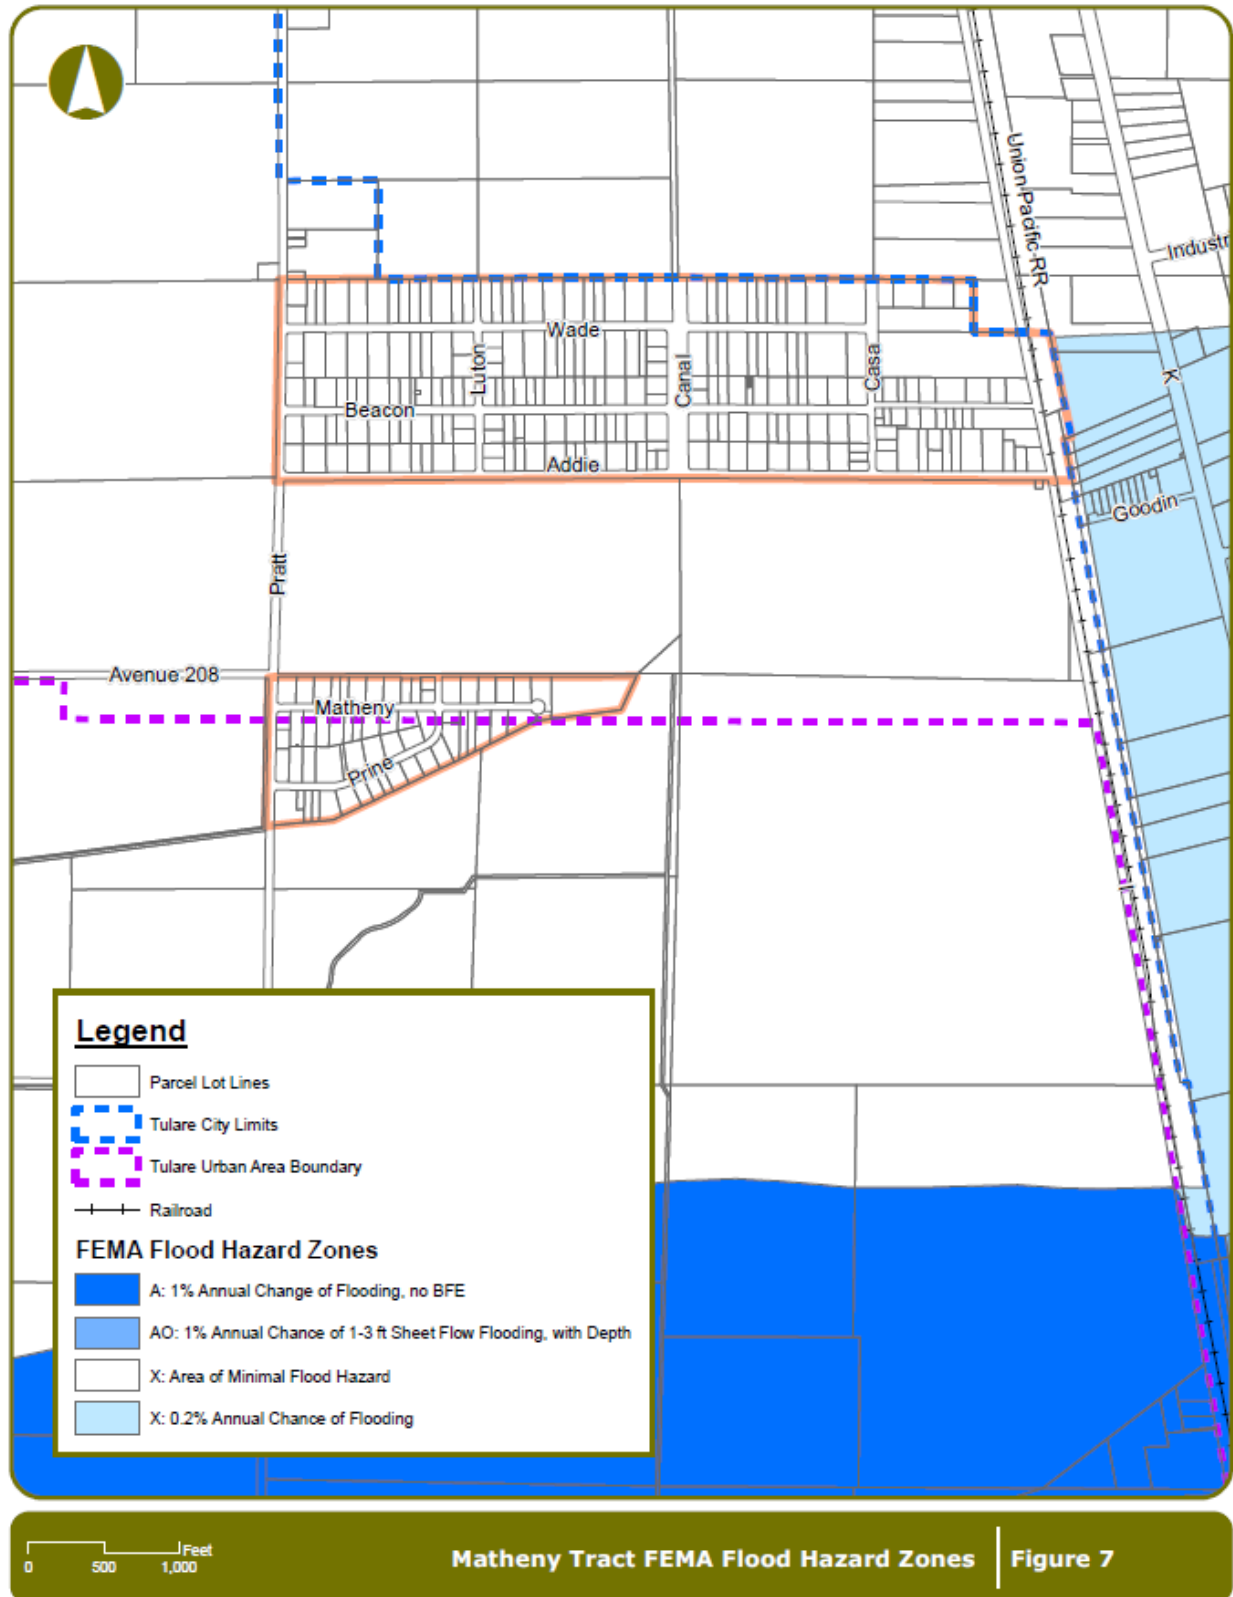

---

<sup>9</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C1275E, Panel Number 1275 of 2550, June 16, 2009. <https://msc.fema.gov/portal/>

# MATHENY TRACT LEGACY PLAN

Figure 7 - FEMA Flood Map

# MATHENY TRACT LEGACY PLAN

---

## Noise

Tulare County adopted a new noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan Background Report, the predicted Ldn noise level at the distance from the SR 99 centerline to the 60 dB-Ldn contour between Airport Avenue and Paige Avenue is 1,545 feet. The Matheny Tract lies outside of the 60 dB-Ldn contour line.

Operations along the Union Pacific Railroad line are another dominant source of noise in Matheny Tract. According to the Tulare County General Plan EIR, there are more than twenty (20) freight train operations per day along the Union Pacific Railroad line in Tulare County and may occur at any time of day or night. According to the Wyle methodology, the type and frequency of rail operation results in noise exposures of 65 and 60 dB Ldn at approximately 335 and 660 feet, respectively, from the center of the tracks for present operations, and at approximately 440 and 800 feet, respectively, from the center of the tracks for estimated future operations. There are areas in the east side of the Matheny Tract LDB that are located within 335 feet of the Union Pacific Railroad line. Noise levels are higher at grade crossings due to the warning horn. The Paige Avenue (Avenue 216) and Avenue 200 grade crossings are over one (1) mile from the Community of Matheny Tract.

## Airport Safety Tulare County Comprehensive Airport Land Use Plan (CALUP)

The purpose of the CALUP is to promote the safety and well-being of the public by ensuring adoption of land use regulations which minimize exposure of persons to hazards associated with the operation of these airports including aircraft accidents and aircraft noise. The Matheny Tract is located within safety zones 4 (Outer Approach/Departure Zone) and 6 (Traffic Pattern Zone) of the Tulare Municipal Airport (Mefford Field) which is classified as a “general transport” facility. Future development is regulated by land use and airport compatibility requirements are determined by the CALUP and regulations found in General Plan, Improvement Standards and the *Tulare County* Zoning Ordinance. Residents of Matheny Tract may experience some noise related to aircraft operations from this airport, although it is not considered to be extreme as the area is located outside of the 60 dB CNEL airport noise contour. (Please see extensive discussion regarding Mefford Field beginning on page 44).

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” In regards to Matheny Tract, this Legacy Plan is intended to address deficiencies and the need for improvements to the wastewater system improvements, (for example wastewater distribution piping), curbs, gutters, streets, sidewalks, etc.). The prioritized concerns of the Community include:

# MATHENY TRACT LEGACY PLAN

---

1. Water Supply
2. Sewer System
3. Storm Water Drainage
4. Road Improvements
5. Street Lights
6. Sidewalks
7. Solid Waste
8. Community Safety
9. Community Park
10. Fresh food availability/Market

## Water Supply

In 2016, the State Water Board exercised its power and directed the city of Tulare to accept Matheny Tract as water customers. Water supply for Matheny Tract is provided by City of Tulare's Water Division. As per the city of Tulare's MSR update, August 2013 The Water Division is responsible for providing water that is of safe and sanitary quality for the citizens of Tulare and an adequate water supply for fire protection. "Tulare's water supply source consists of a 30 domestic wells that are scattered throughout the city, extracting water from the city's underground aquifer. Newer wells drilled by the city over the past thirty-five years are gravel packed and have been drilled to approximately 700 feet. The older wells, and wells purchased by the city are generally around 350 feet deep. The city has one elevated water storage tank with a capacity of 150,000 gallons, and several hydro-pneumatic pressure tanks that are used for storage."<sup>10</sup>

"The Water Division operates under the direction of the Board of Public Utilities. The quality of water is maintained through monitoring and proper maintenance of the system. State regulations require the city test the entire system, from wells to service connections, and that data is then reported to the State."<sup>11</sup>

## Sewer System

There is no community wide sewer system in Matheny Tract. The community depends on individual on-site septic tank systems for wastewater disposal. In wet years, the combination of a perched water table and tight soils creates problems for effective leaching of septic tank effluent. SGC survey results indicate that the Matheny Tract residents are in favor of creating a community wide sewer system. No public sewer facilities are available in Matheny Tract. Each land owner relies on septic systems for wastewater.

The City of Tulare and the County of Tulare are in the process of identifying/discussing specifics to allow connection to the city of Tulare's Wastewater Treatment System.

## Storm Water Drainage

"A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters,

---

<sup>10</sup> City of Tulare Final Municipal Service Review August 2013, page 34

<sup>11</sup> ID

# MATHENY TRACT LEGACY PLAN

---

manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

Matheny Tract currently has a limited storm water system, which is served by Tulare Irrigation District (TID). The purpose of TID is to obtain and deliver surface water supplies for the purpose of agricultural irrigation in the District and for groundwater recharge efforts within the basin underlying the District. The District must also operate and maintain 330 miles of canal and approximately 30 miles of pipeline along with 1,110 acres of groundwater recharge/regulation basins.

In Matheny Tract (northern portion), the Oakland Colony Ditch bisects the Community running in a north- south direction between Ruth Street and Canal Street. **Figure 8** identifies Matheny Tract, the Oakland Colony ditch, a groundwater recharge basin, TID service area and the City of Tulare limits. According to TID, the Oakland Colony Ditch is used primarily for irrigation and flood control purposes. An existing pump station is located the northeast corner of Addie Avenue/Canal Street that pumps surface water into the ditch.

Excessive runoff from the Oakland Colony Ditch is directed to a groundwater recharge basin located south of North Matheny Tract. An additional basin is located to the east of the current basin for large flood events.

Tulare County has completed initial base mapping for Matheny Tract. Files obtained from RMA include surveying data with bench mark locations and top of curb or pavement elevations in North Matheny Tract. In addition, existing concrete pipes and directional flow arrows are mapped as shown in **Figure 8**.<sup>12</sup>

---

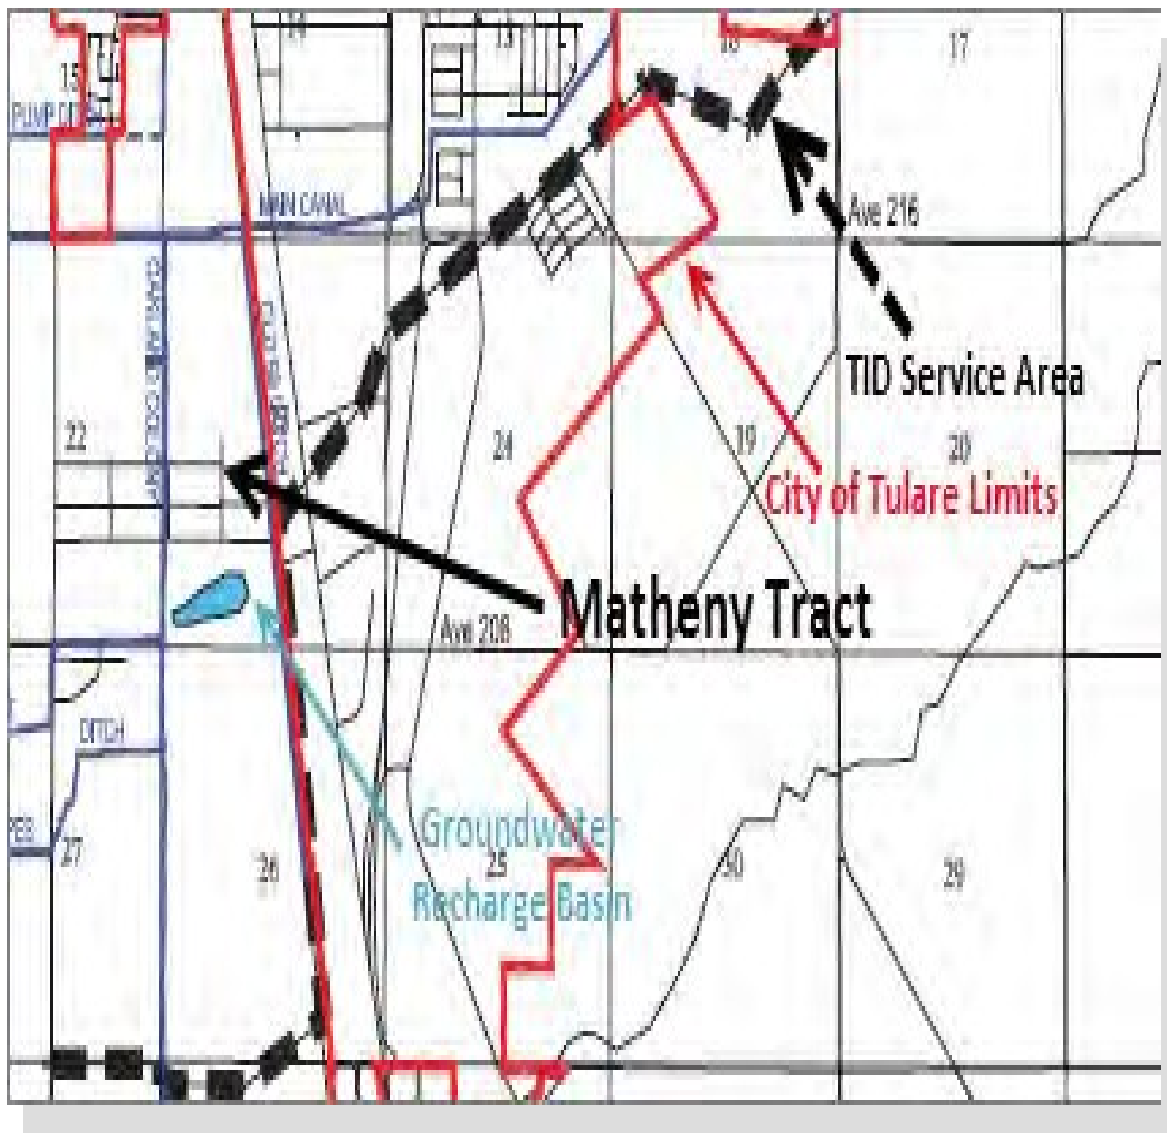

<sup>12</sup> Action Program 9, Tulare County 2015 Housing Element page 33-5

# MATHENY TRACT LEGACY PLAN

---

It was also indicated by TID that trash accumulation in and around Oakland Colony Ditch in the Matheny Tract Community is a serious concern. Any future efforts to underground the ditch with a grate to exclude trash and other debris would be a maintenance issue to prevent obstruction of water flow. Additional costs would have to be offset with a maintenance agreement between the property owners and the beneficiaries of such improvements to safety and aesthetics, if desired.

**Figure 8 - Tulare Irrigation District Map**

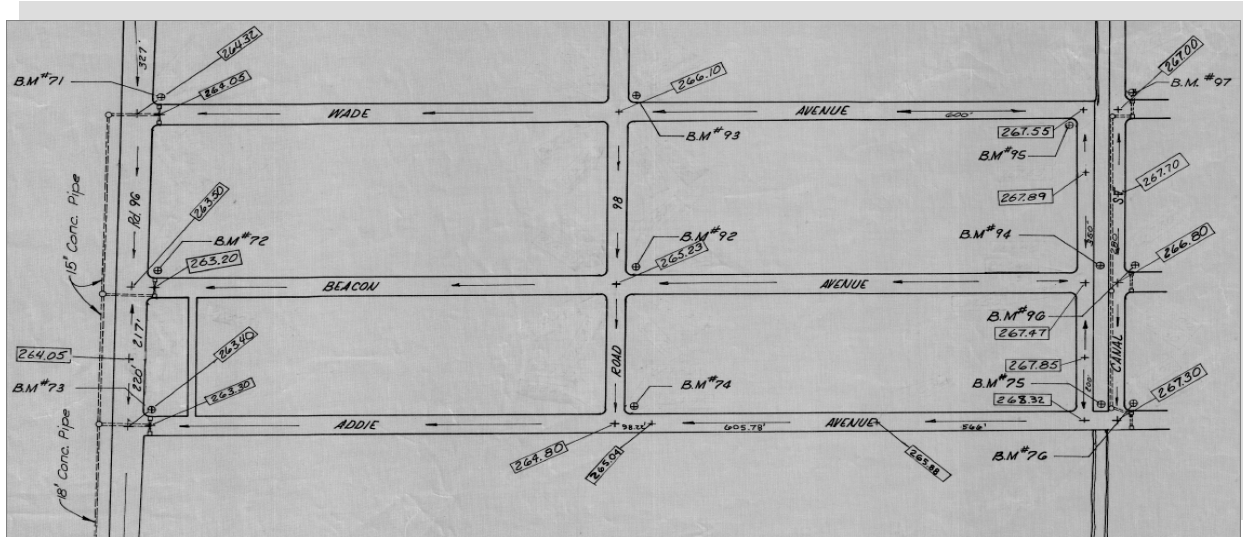

# MATHENY TRACT LEGACY PLAN

## Road Conditions

“Tulare County also has road classifications that are used to determine how the road is constructed, i.e., typical cross section (median, travel lanes, curb, gutter, sidewalk, shoulder, etc.), pavement structure, design speeds, grades, super elevation, sight distance, horizontal alignments, intersections, etc.. Tulare County has four road classifications as summarized below:

**Figure 9 - Matheny Tract Transportation and Infrastructure Plan**

(Source: Matheny Tract Transportation and Infrastructure Plan, Omni Means September 2014)

**Class 1 Roads:** a cul-de-sac or minor residential street so designed that it cannot serve more than 50 lots, the primary function of which is to provide access to abutting property.

**Class 2 Roads:** a minor residential street so designed that it cannot serve more than 120 lots, the primary function of which is to provide access to abutting property.

**Class 3 Roads:** a minor residential collector street that has one or is expected to have the dual purpose of providing access to abutting property and of carrying traffic from Class 1 and Class 2 Roads to roads in the County Select System.

**Select System Roads:** All State Highways, Federal Aid Secondary Routes, arterials and collector roads existing or unconstructed, that are designated for inclusion in the Select System by the Board of Supervisors with the approval of the State Department of Transportation.

Currently in Matheny Tract, there are only roads that are built within a two-lane right-of-way for Class 1, 2 and 3 Roads.

Based upon field reviews, the roads in Matheny Tract are generally in poor to fair condition, lack continuous curbs, gutters and sidewalks, are poorly lit at night, lack crosswalks, are susceptible to flooding i.e., lack drainage and provide limited opportunity for walking and bicycling beyond the vehicle travel surface.

# MATHENY TRACT LEGACY PLAN

---

There are several roadways in Matheny Tract that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads.”<sup>13</sup>

## Street Lights

“Street lights are typically located at the edge of roadways on top of utility poles. They are illuminated at night and improve the visibility and safety of the roadway and sidewalk by increasing motorist visibility and improving nighttime pedestrian security. They can also reduce nighttime pedestrian crashes by increasing the awareness of drivers relative to pedestrians.

The County typically provides street lighting at major road intersections in the communities but does not provide mid-block lighting as is typical within cities. Matheny Tract has street lighting at 10 locations. Overhead utility poles are prevalent in Matheny Tract. These utility poles provide electricity and telephone service to residences and businesses in Matheny Tract and are located within the County right- of- way. **Figures 10, 11, and 12** display Existing Utilities Poles, Fire Hydrants and Street Lights in three sub-areas in Matheny Tract (Northwest Area, Northeast Area and Southwest Area). *[Note: New fire hydrants were being installed at various locations in 2014 that are not shown in these Figures].”<sup>14</sup>*

---

<sup>13</sup> Ibid. 33-7

<sup>14</sup> Op. Cit.

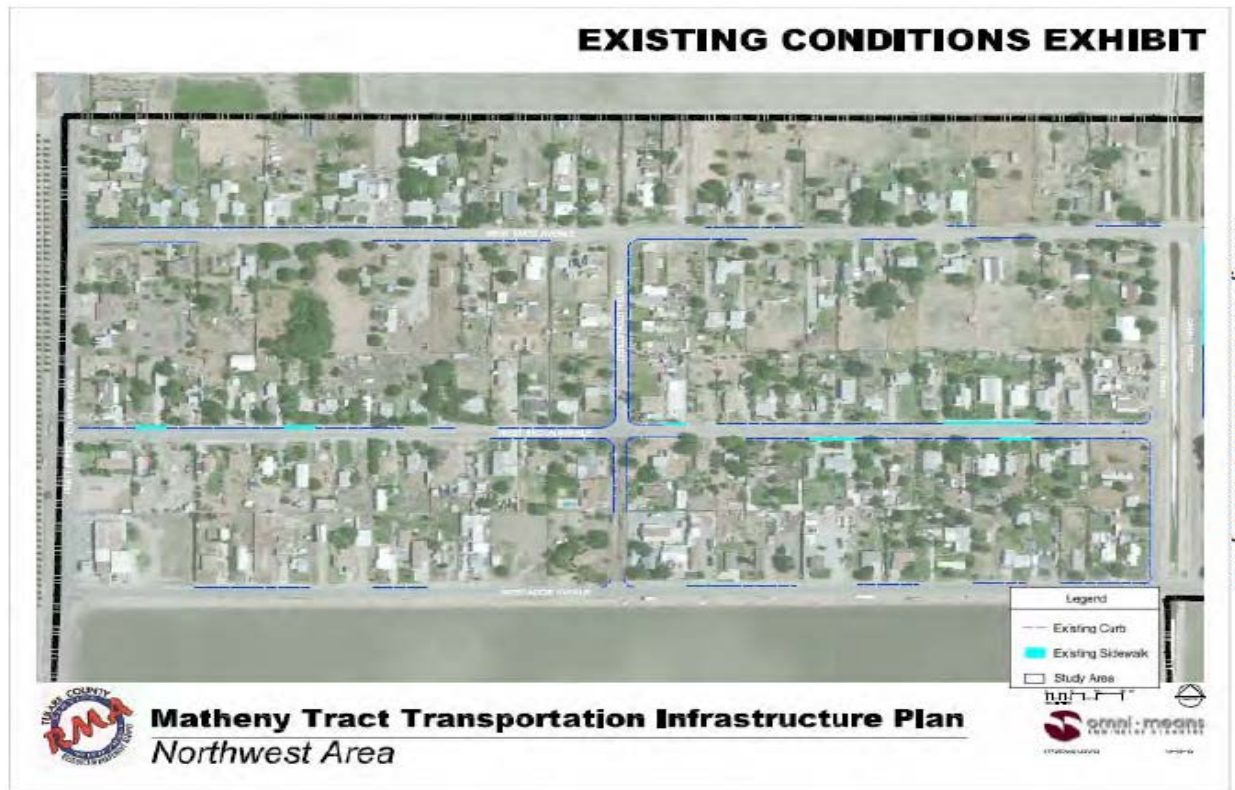

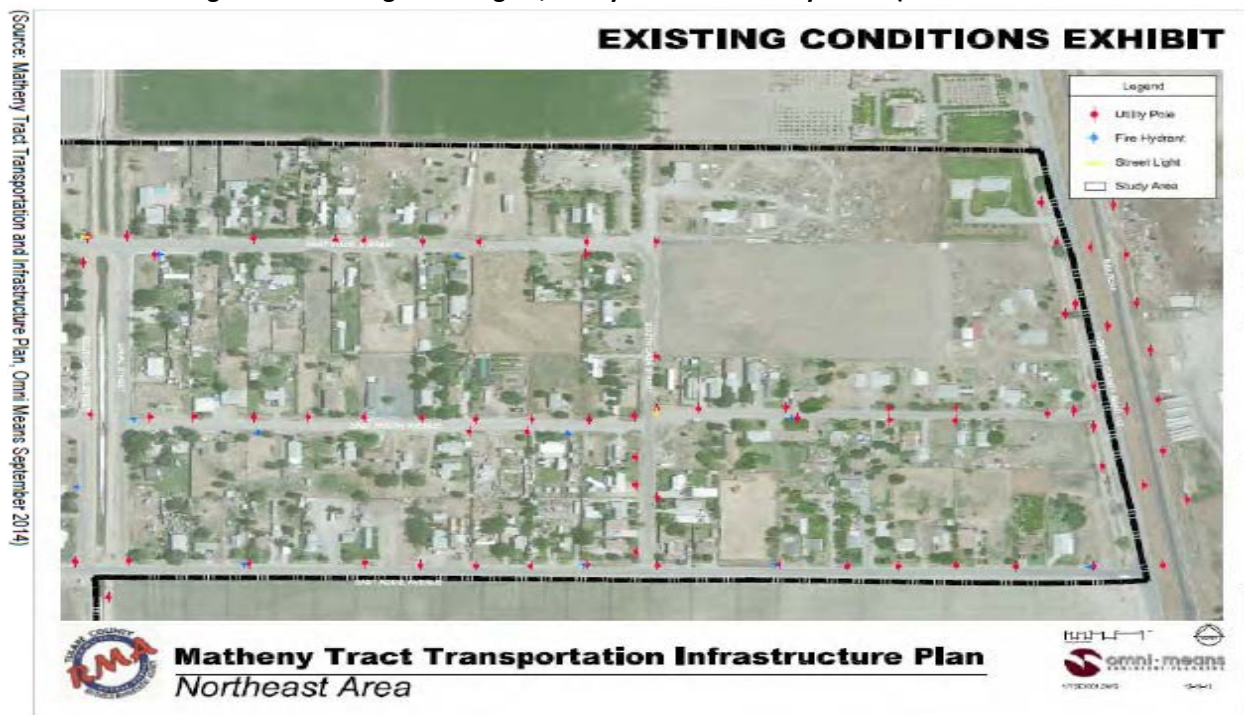

Figure 11 - Existing Street Lights, Utility Poles and Fire Hydrants (Northeast Area)

# MATHENY TRACT LEGACY PLAN

Figure 12 - Existing Street Lights, Utility Poles and Fire Hydrants of Matheny Tract (Southwest Area)

## Sidewalks

“Sidewalks are typically separated from a roadway by a curb and accommodate pedestrian travel. They improve mobility for those with disabilities and are also an important part of walking routes to schools. They provide the space for pedestrians to travel within the public right-of-way while being separated from vehicles and bicycles.

The 2010 California Building Code identifies a clear width minimum of 48 inches for sidewalks. This clear width minimum is the walkway width that is completely free of obstacles and not necessarily the sidewalk width. However, the 48-inch minimum does not provide sufficient passing space or space for two-way travel. Therefore, the guidelines state that for sidewalks less than 5 feet in clear width, passing lanes (wide enough for wheelchairs) shall be provided at 200-foot intervals. However, the clear width may be reduced to 3 feet if the enforcing agency determines that compliance with the 4-foot clear sidewalk width would create an unreasonable hardship due to right-of-way restrictions, natural barriers, or other existing conditions.

The presence of curbs, gutters and sidewalks (CG&S) varies significantly between the communities in Tulare County. Some street segments within the Matheny Tract have curbs and fewer segments have sidewalks; however, several segments have no curbs, gutters or sidewalks. **Figures 13, 14, and 15** display existing curbs and sidewalks in three sub-areas in Matheny Tract (Northwest Area, Northeast Area and Southwest Area). As indicated in the Figures, many gaps and non-contiguous sections for both curbs and sidewalks exist.

# MATHENY TRACT LEGACY PLAN

Matheny Tract currently consists of existing sidewalks within the Community; however, many of these existing sidewalks are fragmented or are in relatively poor condition and need to be replaced entirely because they have deteriorated past the point where spot repairs are feasible or cost effective. The photograph to the left shows an existing street with driveways and a partial sidewalk. Many of the existing non-contiguous sidewalks are proposed to be replaced entirely in order to have uniformity and to be in compliance with current County Standards.”<sup>15</sup>

## ADA Curb Ramps

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

Curb ramps are most typically found at intersections, but can also be located near on-street parking, transit stations and stops, and midblock crossings. Title II regulations require curb ramps at existing and new facilities.

The County of Tulare completed a survey of ADA compliant ramps within the communities in August 2012. According to the survey, there are no ADA compliant curb ramps located within Matheny Tract.”<sup>16</sup>

**Figure 13 - Existing Curbs and Sidewalks of Matheny Tract (Northwest Area)**

<sup>15</sup> Op. Cit.

<sup>16</sup> Op. Cit.

Figure 14 - Existing Curbs and Sidewalks of Matheny Tract (Northeast Area)

Figure 15 - Existing Curbs and Sidewalks of Matheny Tract (Southwest Area)

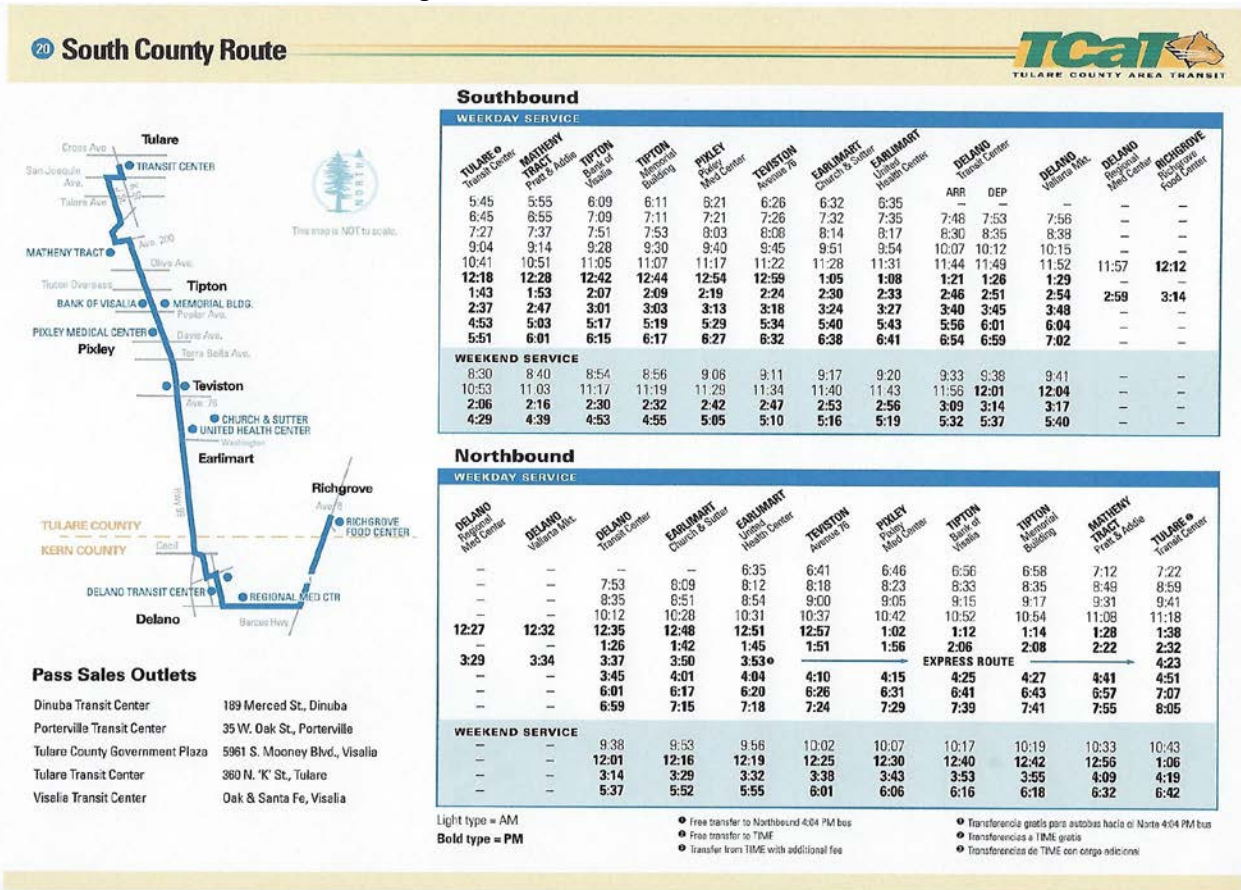

# MATHENY TRACT LEGACY PLAN

## Transit and Bus Stops

The Tulare County Transit Agency (TCaT) operates fixed-route services that link communities with each other and with Visalia and Tulare's urban transit systems. Matheny Tract is connected via TCAT Route 20 Southbound to Tulare (see Figure 16) and its transit center. TCaT also connects Delano (Kern County) in the south. Route 20 has ten northbound and southbound buses serving Matheny Tract on weekdays and four buses in each direction on Saturdays and Sundays. Stops are currently located at Pratt and Addie. In Tulare, transfers can be made to connect to Visalia (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>). TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Matheny Tract, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

Beginning in August 2017, TCaT Bus Stops for Southbound Route 20 at Matheny Tract have been realigned so that Passengers getting on or off will not be required to cross Pratt Street or Addie Avenue.

Figure 16 - TCaT Route 20 Southbound

# MATHENY TRACT LEGACY PLAN

---

## State Route 99

State Route (SR) 99 is the major highway between cities within the Central Valley and is the primary route between the City of Fresno to the north and the City of Bakersfield to the south. Matheny Tract is located approximately two (2) miles west of SR 99.

## AMTRAK

The Hanford AMTRAK station, located approximately 25 miles to the northwest in Kings County, is the closest station to Matheny Tract providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway bus service).

## Mefford Field Airport

“The Tulare County General Plan Part I – Goals and Policies Report pertaining to Aviation is intended to guide the long-term development of the airport, including the compatibility of adjacent land uses. The principle concerns of the Tulare County Comprehensive Airport Land Use Plan (CALUP) fall into five categories

- *Height restrictions:* to enhance aircraft safety by protecting the navigable airspace around airports;
- *Safety of persons on the ground:* to reduce risks to the population from aircraft operations and accidents;
- *Noise compatibility:* to minimize the effects of aircraft noise on communities adjacent to airports;
- *Overflight:* to balance land development within traffic patterns of public use airports; and
- Any proposed public, private or charter school site, or community college site, within two miles of the airport runway.”<sup>17</sup>

Currently, the airport is primarily used for general aviation operations, including local and itinerant services. Other Airport activities include airtaxi services and government operations.

“The ALUC is responsible for airport land use planning that balances the safety risks inherent to an airport against unnecessarily restricting a property owner’s ability to develop or use his or her land. Issues such as bird strikes, pilot error, mechanical failure, and obstructions in navigable airspace, as well as large concentrations of people on the ground need to be considered in achieving this balance. Large land areas around airports are exposed to the possibility of aircraft accidents even with well-maintained aircraft and highly trained pilots. Despite stringent laws governing aircraft and airport maintenance and pilot training, history demonstrates that aircraft accidents are going to occur. Although the risk to persons on the ground being killed or injured in an aircraft accident is small, such an accident is a high-consequence event, and particularly so if the accident location coincides with a large concentration of persons on the ground. For this reason airport safety zones are needed to define the nature of the risk and to minimize the number of persons who may be exposed to air crash hazards.”<sup>18</sup>

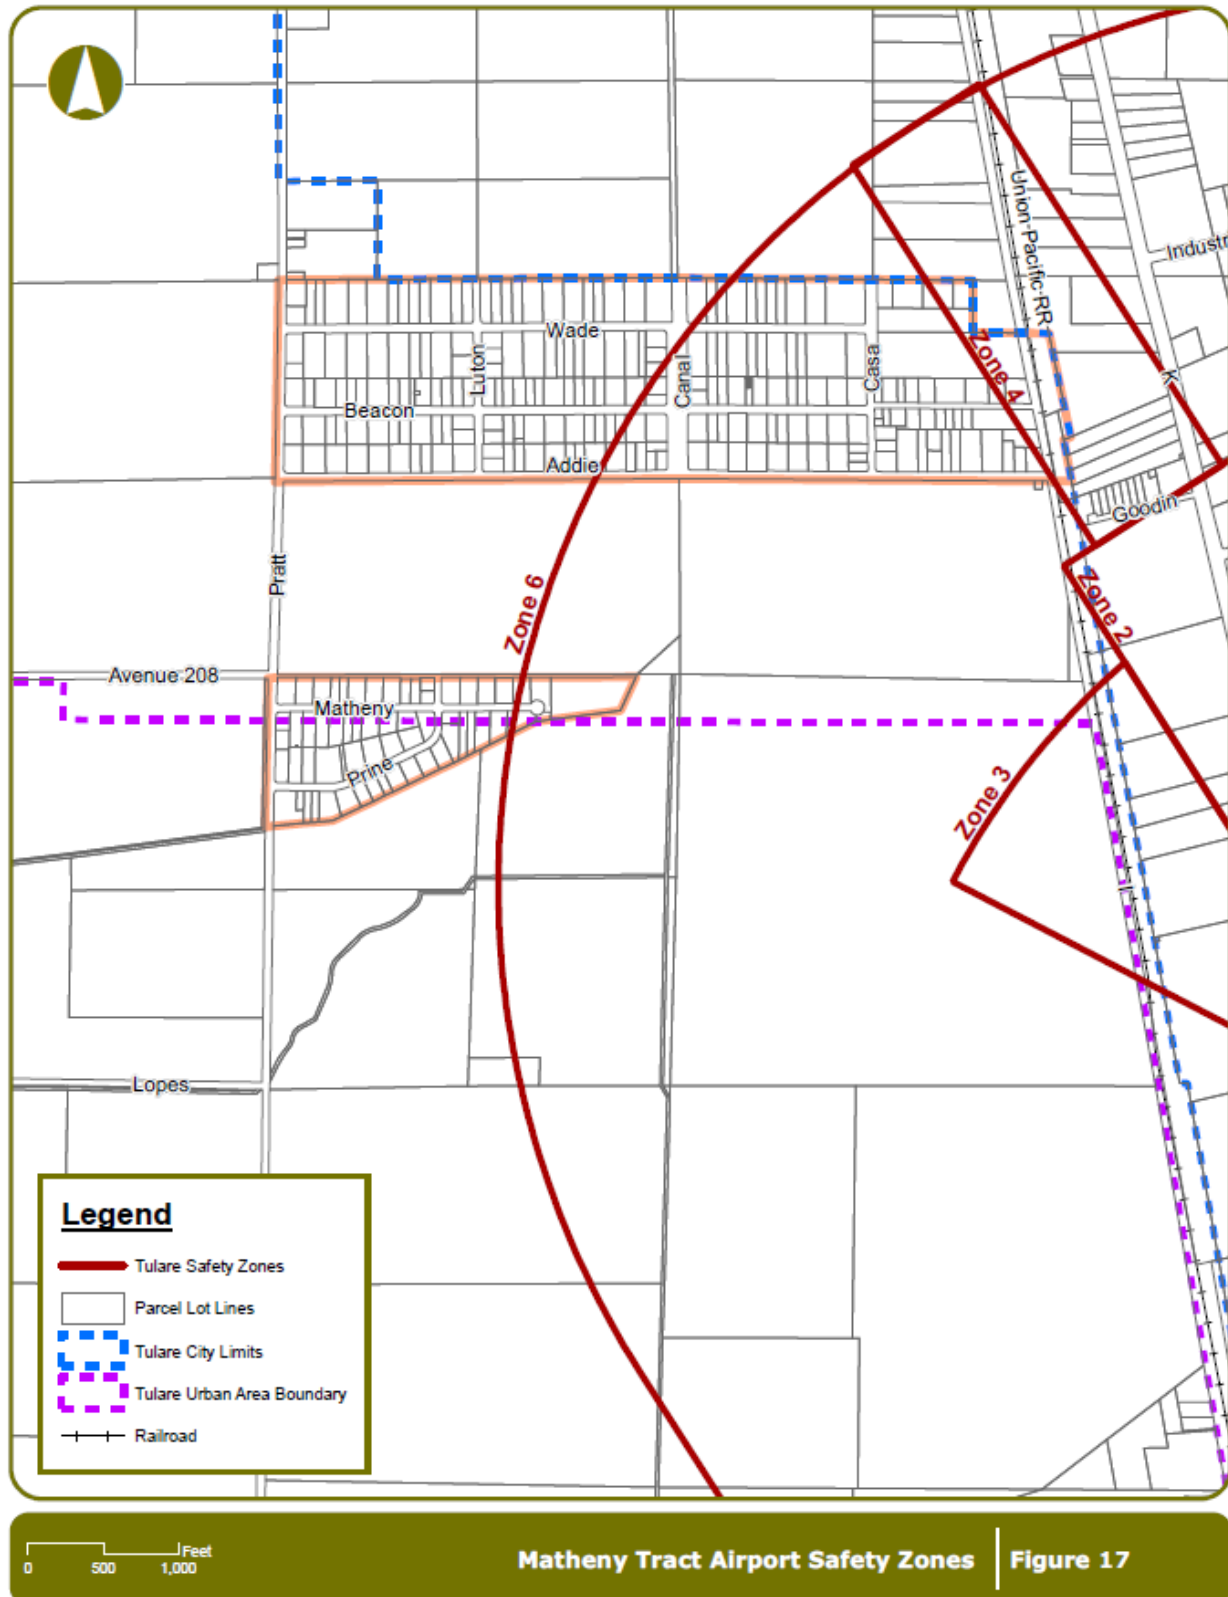

---

<sup>17</sup> Tulare County Comprehensive Airport Land Use Plan, page 2-2

<sup>18</sup> Ibid. 2-8

# MATHENY TRACT LEGACY PLAN

Figure 17 - Mefford Field Airport Safety Zones

# MATHENY TRACT LEGACY PLAN

---

## Airport Safety Zones

Six safety zones (see **Figure 17**) were identified to represent the relative safety risks. These safety zones and their respective risk factors are summarized below:

- ***“Safety Zone 1, Runway Protection Zone*** – The Runway Protection Zone (RPZ) is a trapezoidal area located immediately off each end of a runway. This area is defined by FAA who recommends it be a part of the airport property due to its very high risk factors. Aircraft over fly this area at altitudes below 200 feet. Caltrans research indicates that 20 to 21 percent of near-runway accidents occur in this zone.
- ***Safety Zone 2, Inner Approach/Departure Zone*** – The Inner Approach/ Departure Zone is a rectangular area located along the extended runway centerline immediately beyond the RPZ. Aircraft over fly this area at altitudes between 200 and 400 feet above the runway elevation. Caltrans research indicates that 8 to 22 percent of near-runway accidents occur in this zone.
- ***Safety Zone 3, Inner Turning Zone*** - The Inner Turning Zone is a cone shaped zone which lies on either side of the Inner Approach/Departure Zone. The sides of this zone are defined by a 20 or 30 degree angle, depending upon runway length, measured from the runway centerline. The apex of the cone is located on the runway at a distance from the runway end that is also dependent upon runway length. This zone encompasses locations where arriving aircraft are typically turning from the base to final approach legs of the standard traffic pattern and are descending from traffic pattern altitude or where departing aircraft normally complete the transition from takeoff power and flap settings to a climb mode and has begun to turn to their en route heading. Aircraft are less than 500 feet above the runway elevation. Caltrans research indicates that 4 to 8 percent of near-runway accidents occur in this zone.
- ***Safety Zone 4, Outer Approach/Departure Zone*** – is a rectangular are, which lies immediately beyond the Inner Approach/Departure Zones along the extended runway centerline. Particularly applicable for runways with straight-in instrument approach procedures, and other runways where straight-in or straight-out flight paths are common. Approaching and departing aircraft are usually at less than 1,000 feet above the runway elevation. Caltrans research indicates that 2 to 6 percent of near-runway accidents occur in this zone.
- ***Safety Zone 5, Sideline Zone*** - The Sideline Zone encompasses close-in areas lateral to the runway. These areas are typically within the airport property. The area is not normally over flown and the primary risk is from twin-engine aircraft losing directional control on takeoff. Caltrans research indicates that 3 to 5 percent of near-runway accidents occur in this zone.
- ***Safety Zone 6, Traffic Pattern Zone*** - The Traffic Pattern Zone is an oval shaped area centered on the extended runway centerline. This zone encompasses all other portions of the regular traffic patterns and pattern entry routes. This area generally has a low likelihood of accident occurrence at most airports, except where high concentrations of people present the potential for severe consequences. Caltrans

# MATHENY TRACT LEGACY PLAN

---

research indicates that 18 to 29 percent of near- runway accidents occur in this zone, but that these numbers are misleading due to the large size of this zone.”<sup>19</sup>

Matheny Tract is located in portions of Safety Zones 4 and 6.

## Aircraft Noise

The most common public complaint regarding airports is the noise generated by aircraft operations. Most individuals can tolerate low levels of aircraft noise, but as the overall noise level rises and begins to interfere with conversation, sleep, business and other activities, the frequency of complaints increases. Complaints can also result from a single event in which the perception is held that an aircraft is too low or too noisy. Eventually, excess noise levels become detrimental to the public health, safety and welfare and, therefore, contrary to the public interest.

Noise restriction policies at Tulare County public-use airports are proposed to limit the number of people exposed to frequent and/or high levels of airport noise or to frequent and/or high cumulative noise levels of which airport noise is one component. The basic strategy for achieving noise compatibility is to limit the development of land uses that are particularly sensitive to noise and to obtain avigation easements for aircraft noise within all aircraft safety areas (defined in Section 2.4) and overflight areas (defined in Section 2.6). The following policies were established:

### **HS-3.1 Airport Land Use Compatibility Plan**

The County shall require that development around airports is consistent with the safety policies and land use compatibility guidelines contained in the adopted Tulare County Comprehensive Airport Land Use Plan (CALUP)

### **HS-3.2 Compliance with Federal Aviation Administration (FAA) Regulations**

The County shall ensure that development within the airport approach and departure zones is in compliance with Part 77 of the FAA Regulations (*FAA regulations that address objects affecting navigable airspace*).

### **HS-8.4 Airport Noise Contours**

The county shall ensure new noise sensitive land uses are located outside the 60 CNEL contour of all public use airports.

Matheny Tract is located outside of the 55 dB CNEL noise contour of the Tulare Municipal Airport (Mefford Field).

## Land Use Compatibility Matrix

“The Tulare County Airport Land Use Compatibility Matrix consists of two tables. Table 12 addresses land use compatibility in the safety and height restriction zones by land use type. Table 13 addresses the maximum residential densities in the safety and height restriction zones. Table 13 also addresses the maximum non-residential intensity in the safety and height restriction zones. Footnotes document the application of ALUC policy for specific categories of land use. It should be noted that land uses are subject to jurisdictional requirements and restrictions found in General and Specific Plans and

## Notes

- Land uses are identified as being “C” – compatible, or “P” – prohibited based upon the following interpretations:

*Compatible* - Compatible land uses are designated by the symbol “C”. This designation means associated land use groups are at a level of intensity or density, or location, which does not present a significant risk to the safety of persons on the ground or to persons in aircraft over-flying the proposed use, nor is the land use type sensitive to anticipated aircraft noise or frequent aircraft over-flights.

*Prohibited* - Prohibited land uses are designated by the symbol “P”. The associated land use groups are at a level of intensity or density, or location, which presents a significant risk to the

# MATHENY TRACT LEGACY PLAN

---

safety of persons on the ground or to persons in aircraft over-flying the proposed use, or the land use groups are sensitive to anticipated aircraft noise or frequent aircraft over-flights.

2. The land use categories illustrated provide a representative sample of land uses found in Tulare County for the purpose of identifying any associated noise, safety, height, or overflight issues within the various zones of the Airport Influence Area. Other land use types that exhibit functional characteristics similar to the uses listed are likely to receive a similar compatibility rating. When it is not clear how a particular land use type might be rated for compatibility the referring agency, landowner or developer should contact ALUC Staff.
3. Safety Zones 1 through 5 represent areas of greatest risk with respect to aircraft accidents. All uses that constitute a hazard to flight, including physical objects in the navigable airspace, activities that create a glare or visual interference to a pilot, or electronic interference with aircraft operations are specifically excluded from these zones regardless of whether they meet other qualifying criteria, unless such prohibition is precluded by applicable state statutes. Land use development that may cause the attraction of birds is also prohibited. In locations under portions of established instrument approach or departure routes, object heights may be restricted to less than that indicated by FAR Part 77 imaginary surfaces. An FAA aeronautical study may be required. All new development within Safety Zones 1 through 6 must dedicate an avigation easement to the airport sponsor.
4. Safety Zone 6 includes considerable overflight activity and although safety concerns are diminished, aircraft noise and objects within the navigable airspace are of primary concern.
5. The Airport Influence Area is defined by the outer edge of the conical surface as described in FAR Part 77, plus aircraft noise areas outside the conical surface that exceed 60 dB CNEL.
6. The Remainder areas include portions of the FAR Part 77 horizontal surface not included within the safety zones, together with the conical surface and any 60 dB CNEL noise zones that project beyond the conical surface.
7. Allowed as a temporary use of Airport lands provided the activity does not attract birds or interfere with Airport operations.
8. No structures, congregations of equipment or vehicles, or public venues shall be located within 500 feet of runway centerline.
9. Land uses that incorporate the use of any weapons or implements that would launch a projectile into the air other than animal tranquilizers are prohibited.
10. As a general policy, new residential development is an undesirable land use within Safety Zones 1 to 5. It is the intent of the ALUC to prohibit further residential subdivision of land within these Safety Zones, or to allow changes to land use or zoning in a manner that would accommodate additional dwelling units. Dwelling units already approved in accordance with current General Plans or Zoning and property owners allowed development of a single family house by right are not affected.
11. In areas where aircraft noise is expected to exceed 60dB CNEL; inhabited residential structures must meet California Noise Standards and be designed to achieve an interior noise level of 45 dB CNEL or less. Non-residential structures such as offices, restaurants and retail stores must meet an interior noise level of 50 dB CNEL or less.
12. Allowed only to the extent that such uses support the flow of passengers to and from the Airport.
13. For otherwise acceptable land uses, the limit for aboveground storage of hazardous materials is 2,000 gallons.

# MATHENY TRACT LEGACY PLAN

14. Allowed if dust, fumes, and other aspects of the process are carried out in a controlled environment.
15. A compatible use only when the activity is an integral part of an acceptable on-Airport use.
16. Subject to location and height limits.
17. Any activities located in Safety Zones 1 through 6 must meet nonresidential intensity standards – See Table 3-2 of this matrix.
18. No local schools (K-12) or hospitals are permitted in Safety Zones 1 to 6. School locations must meet California Education Code standards.
19. Retail Commercial (Aircraft Fuel, Aircraft Sales, Aircraft Repairs and Aircraft Flying Schools) are a compatible use on airport property within Safety Zone 6.

**Table 14 - Maximum Allowed Densities**

Current Setting	Safety Zone 1	Safety Zone 2	Safety Zone 3	Safety Zone 4	Safety Zone 5	Safety Zone 6	Remainder Areas within Airport Influence Area <sup>3</sup>

# MATHENY TRACT LEGACY PLAN

---

- Notes:**
- A Maintain current zoning if less than density criteria for suburban setting. Noise and overflight should be considered. Affected jurisdictions may impose greater density restrictions through their general plan and/or zoning.
  - B Allow infill at up to the average density of surrounding residential area.
  - C Exceptions can be permitted for agricultural activities, roads and automobile parking provided that FAA criteria are satisfied.
  - D Large stadiums and similar uses should be prohibited.
  - E Allow infill at up to the average intensity of comparable surrounding uses.
  - F Based on 2x the Maximum Nonresidential Density.
  - H Based on 3x the Maximum Nonresidential Density.
  - I Based on 4x the Maximum Nonresidential Density.

**Source:** Derived from Figures 4B through 4G, *California Airport Land Use Planning Handbook*, State of California, Department of Transportation, and Division of Aeronautics, October 2011.

## Aircraft Overflight Areas

Matheny Tract is located within the Airport Influence Area of Mefford Field. “Current California Law requires residential property owners to disclose to prospective buyers that the property is in the “vicinity” of an airport.”<sup>21</sup> “To ensure that potential and prospective land users within an Airport Influence Area are provided with sufficient information regarding the presence of, and activities at, the nearby airport the following overflight policies are adopted:

- a. Avigation easements shall be obtained and recorded for all properties to be developed within Safety Zones 2 to 6 (See Policy 2.4.3.g. earlier), and in those portions of Safety Zone 1 that are not owned by the Airport Sponsor.
- b. Deed notices describing the potential for airport impacts shall be required as a condition of development in those areas of the Airport Influence Area outside designated Safety Zones.
- c. All real estate transfers within the Airport Influence Area shall include the following Notice of Airport in Vicinity in the Real Estate Transfer Disclosure Statement:

### ***Notice of Airport in Vicinity***

*This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you.*<sup>22</sup>

---

<sup>21</sup> Op. Cit. 2-18

<sup>22</sup> Op. Cit. 2-19

# MATHENY TRACT LEGACY PLAN

---

Visalia Municipal Airport, is located approximately 15 miles northeast of Matheny Tract, offers passenger service to Los Angeles. Fresno Yosemite International Airport (FAT), approximately 70 miles northeast of Matheny Tract, is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field, Bakersfield's principal commercial airport, is approximately 70 miles southeast of Matheny Tract and offers direct flights to several destinations.

## Union Pacific Railroad

Matheny Tract is bound on the east side by the Union Pacific Railroad (formerly Southern Pacific Transportation Company) line running through Tulare County. "According to the Trainmaster's office in Fresno, there are more than 20 freight train operations per day in the Tulare County Area. Passenger trains presently do not operate on Union Pacific tracks in Tulare County"<sup>23</sup> Train speeds on the mainline are generally 45-65 mph and train movements may occur at any time during the night or day.

According to the Wyle methodology, the type and frequency of rail operation results in noise exposures of 65 and 60 dB Ldn at approximately 335 and 660 feet, respectively, from the center of the tracks for present operations, and at approximately 440 and 800 feet, respectively, from the center of the tracks for estimated future operations. There are areas in the east side of the Matheny Tract LDB that are located within 335 feet of the Union Pacific Railroad line. Noise levels are higher at grade crossings due to the warning horn. The Paige Avenue (Avenue 216) and Avenue 200 grade crossings are over one (1) mile from the Community of Matheny Tract.

The Union Pacific Railroad tracks are elevated approximately 10-feet above natural ground surface; these tracks serve as a physical boundary between the commercial and industrial areas located in the City of Tulare to the east and the Matheny Tract.

## Energy: Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom PG&E has arrangements, and rolling blackouts.

The Southern California Gas Company provides gas service to Matheny Tract.

## Solid Waste

Solid waste disposal services for Matheny Tract is provided by Waste Management, a private company. Solid waste generated in Matheny Tract can be disposed of at Visalia Landfill, located at 8614 Avenue 328.

---

<sup>23</sup> Tulare County General Plan Background Report, page 8-61

# MATHENY TRACT LEGACY PLAN

---

## Internet Access

Most families in Matheny Tract do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Matheny Tract.

## PUBLIC SERVICES

### Sheriff

Police protection services are provided in Matheny Tract by the Tulare County Sheriff's Department main Sheriff Office located at 2404 W. Burrel Avenue, in Visalia, approximately 20 miles northeast of Matheny Tract.

### Fire

Tulare County and all of the incorporated cities have a mutual-aid agreement for fire protection services. The proximity of the nearest City or County fire station varies significantly between the unincorporated communities. There are three City fire stations and one County fire station in the Tulare area. County Fire Station #25 is within Tulare City limits. County Fire Station #25, located at Foster Drive/Turner Drive, is the closest station to Matheny Tract (two miles) and is shown in Figure 33-6.

Eleven fire hydrants are found within Matheny Tract. These fire hydrants are located within the County right-of-way. Emergency Services are located in the City of Tulare (**see Figure 18**).

### Parks:

There are no County owned/operated public parks in Matheny Tract. In the community of Matheny Tract there is no safe open green space for children to play and adults to be physically active. The nearest park is located approximately two (2) miles away in the City of Tulare.

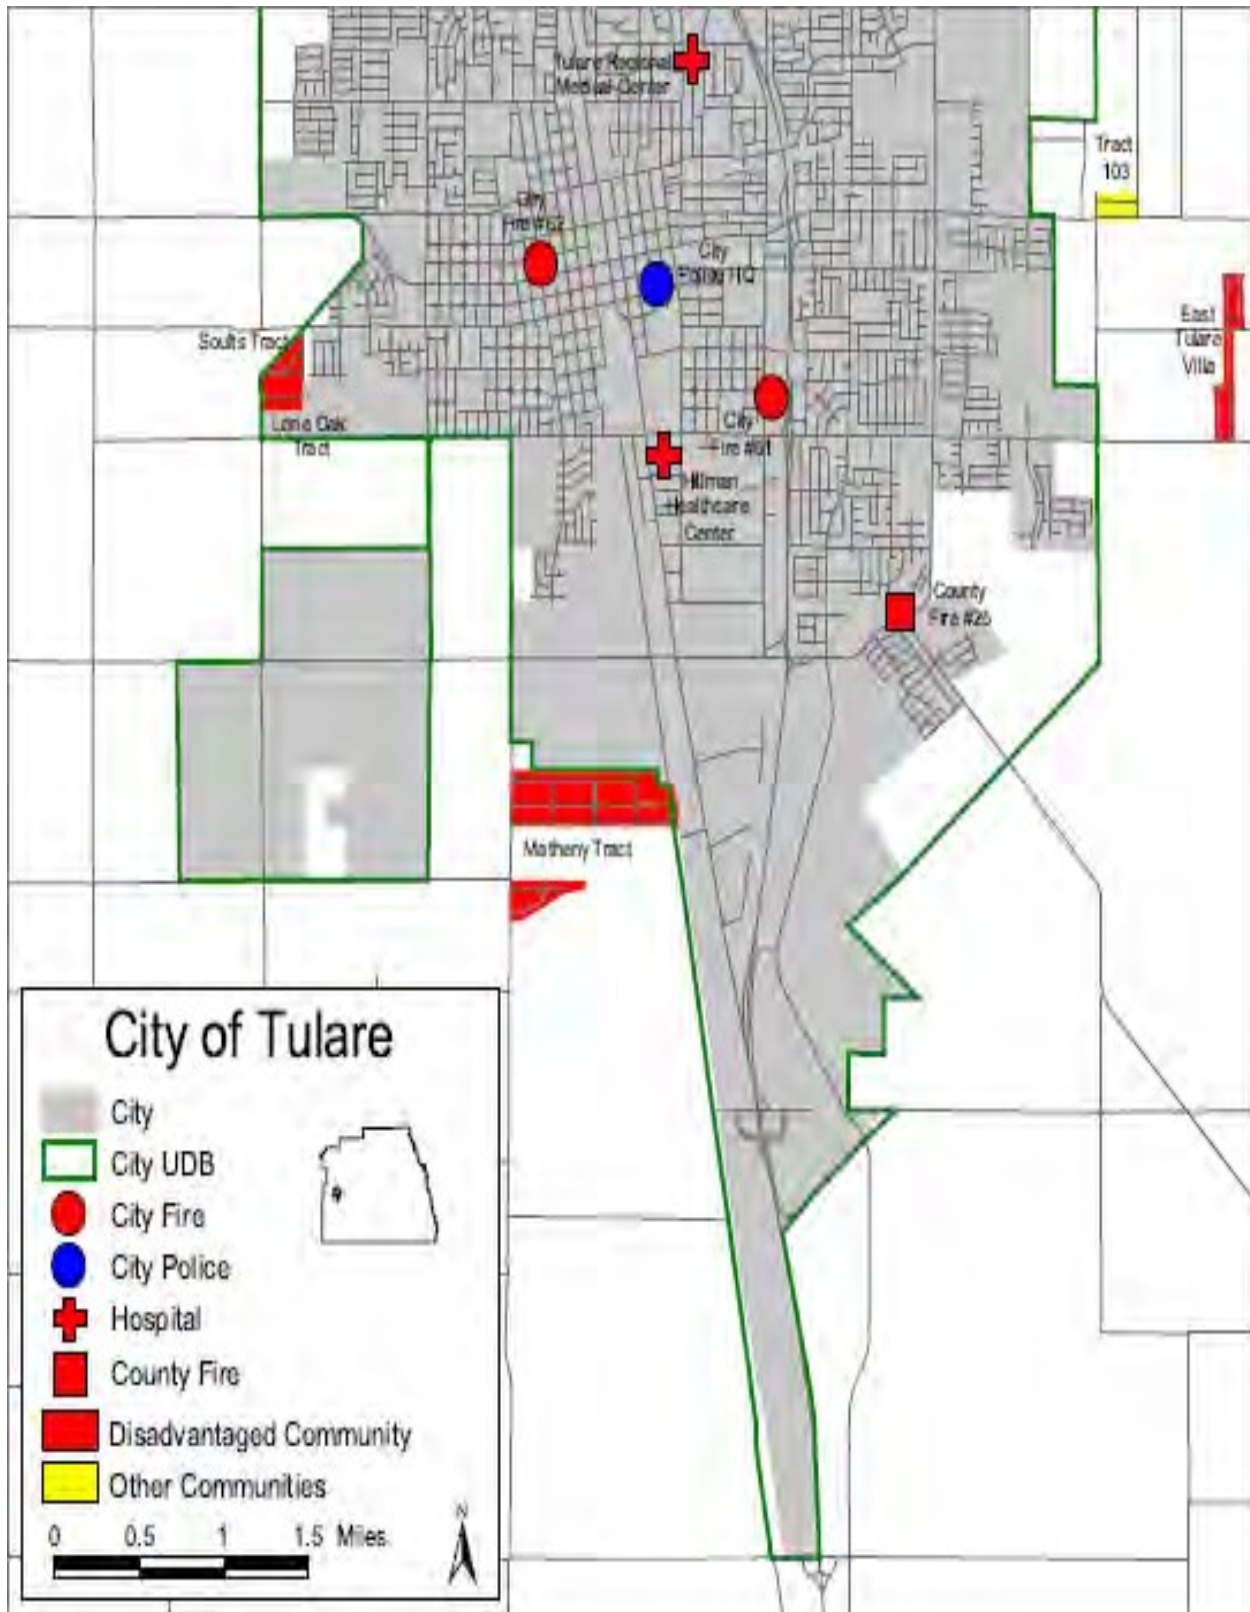

### Schools

Schools are an especially important component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. Most children attend Palo Verde Union School District (not part of the Tulare City School District). The District provides Preschool -8<sup>th</sup> grade education. High School students attend high school in the City of Tulare, approximately two (2) miles away.

# MATHENY TRACT LEGACY PLAN

Figure 18 - Emergency Services - City of Tulare

# MATHENY TRACT LEGACY PLAN

## Library

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>24</sup> The Visalia Branch Library

is located in the City of Visalia approximately 20 mile to the northeast. The Tulare Public Library is located approximately five miles northeast in the City of Tulare (see Table 15).

Table 15 - Library Location & Hours		
	Address	Service Hours (2017)
Tulare Public Library	Main Branch 200 W. Oak Ave Visalia, CA 93291	Tuesday – Friday: 10:00 am – 7:00 pm Saturday 10:00 am – 5:00 pm

Library hours current as of August 2017

## CIRCULATION AND TRAFFIC

“For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>25</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and

<sup>24</sup> General Plan Background Report, page 7-96

<sup>25</sup> 2014-2040 Regional Transportation Plan & Sustainable Communities Strategy, Tulare County Association of Governments (TCAG), June 2014. Page 3-54.

# MATHENY TRACT LEGACY PLAN

---

a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>26</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation

Matheny Tract is a small agricultural community located adjacent to Pratt Street (Road 90). The internal traffic circulation system for the Matheny Tract Legacy Plan is comprised of Matheny Avenue, Wade Avenue, Beacon Avenue, Addie Avenue, Pratt Street, Lutton Street, Canal Street, Casa Street, and Prine Drive. There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# MATHENY TRACT LEGACY PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the Matheny Tract Legacy Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Legacy Boundaries were updated in 2012 to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Matheny Tract to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan,

Matheny Tract Legacy Plan, and input received from Matheny Tract citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

### Community Development

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

#### Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

#### Policies:

1. Establish areas zoned exclusively for commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned commercial areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.
5. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
6. The County shall work with the Schools to provide safe routes to school.

# MATHENY TRACT LEGACY PLAN

---

7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Matheny Tract Legacy Plan.
8. The Matheny Tract Legacy Plan should be reviewed every five years to determine if amendments are appropriate.
9. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of vacant substandard housing units.
2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.

3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to initiate home maintenance/repair programs in Matheny Tract.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Matheny Tract.
3. Coordinate residential zoning with availability of utilities and community services.
4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.

# MATHENY TRACT LEGACY PLAN

---

3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### **Policies:**

1. Promote a concentration of commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new commercial development.

#### **Policies:**

1. Encourage the Matheny Tract to give priority to community service development in the areas reserved for commercial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial areas.

Objective: Provide the necessary safe guards to attract quality commercial development to the community.

#### **Policies:**

1. Assure that commercial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of commercial areas.

## **Environmental Quality and Public Safety**

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Matheny Tract citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### **Policies:**

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

Objective: Provide sufficient open space for community recreation needs.

#### **Policies:**

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

# MATHENY TRACT LEGACY PLAN

---

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Matheny Tract.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Matheny Tract.

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

Infrastructure: In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

Use Permits: There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

Education: Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

Health Care: Health care is important for economic development as businesses need healthy employees. The nearest medical offices are located in the City of Tulare.

## LAND USE AND ZONING ACREAGES

### Land Use and Zoning District Updates

As suggested earlier, and based on the forecasted growth and the recommended Legacy Development Boundary, the Land Use Plan (see **Table 15**) and Zoning Districts Plan (see **Table 16**) has been updated.

<b>Table 16 - Proposed Land Use Plan</b>	
Proposed Land Use	Acres
Mixed Use	154.9
Right-of Ways	32.9
Matheny Tract HDB	187.8

<b>Table 17 - Proposed Zoning District</b>	
Proposed Zones Districts	Acres
AE-20	2.9
C-2-MU	16.3
M-1	3.1
R-2	1.0
R-A	131.6
Unclassified (Right-of Ways)	32.9
Matheny Tract HDB	187.8

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the General Plan recommendations contained in the Matheny Tract Legacy Plan. The following components comprise the Matheny Tract Community Plan implementation strategy:

Limitation of the A-1 Zoning District. Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

**Zoning District Changes:** As part of this Implementation Program for the Matheny Tract Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

**Chapter 16 of the Zoning Code:** Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

**Mixed Use Overlay District:** This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Matheny Tract.

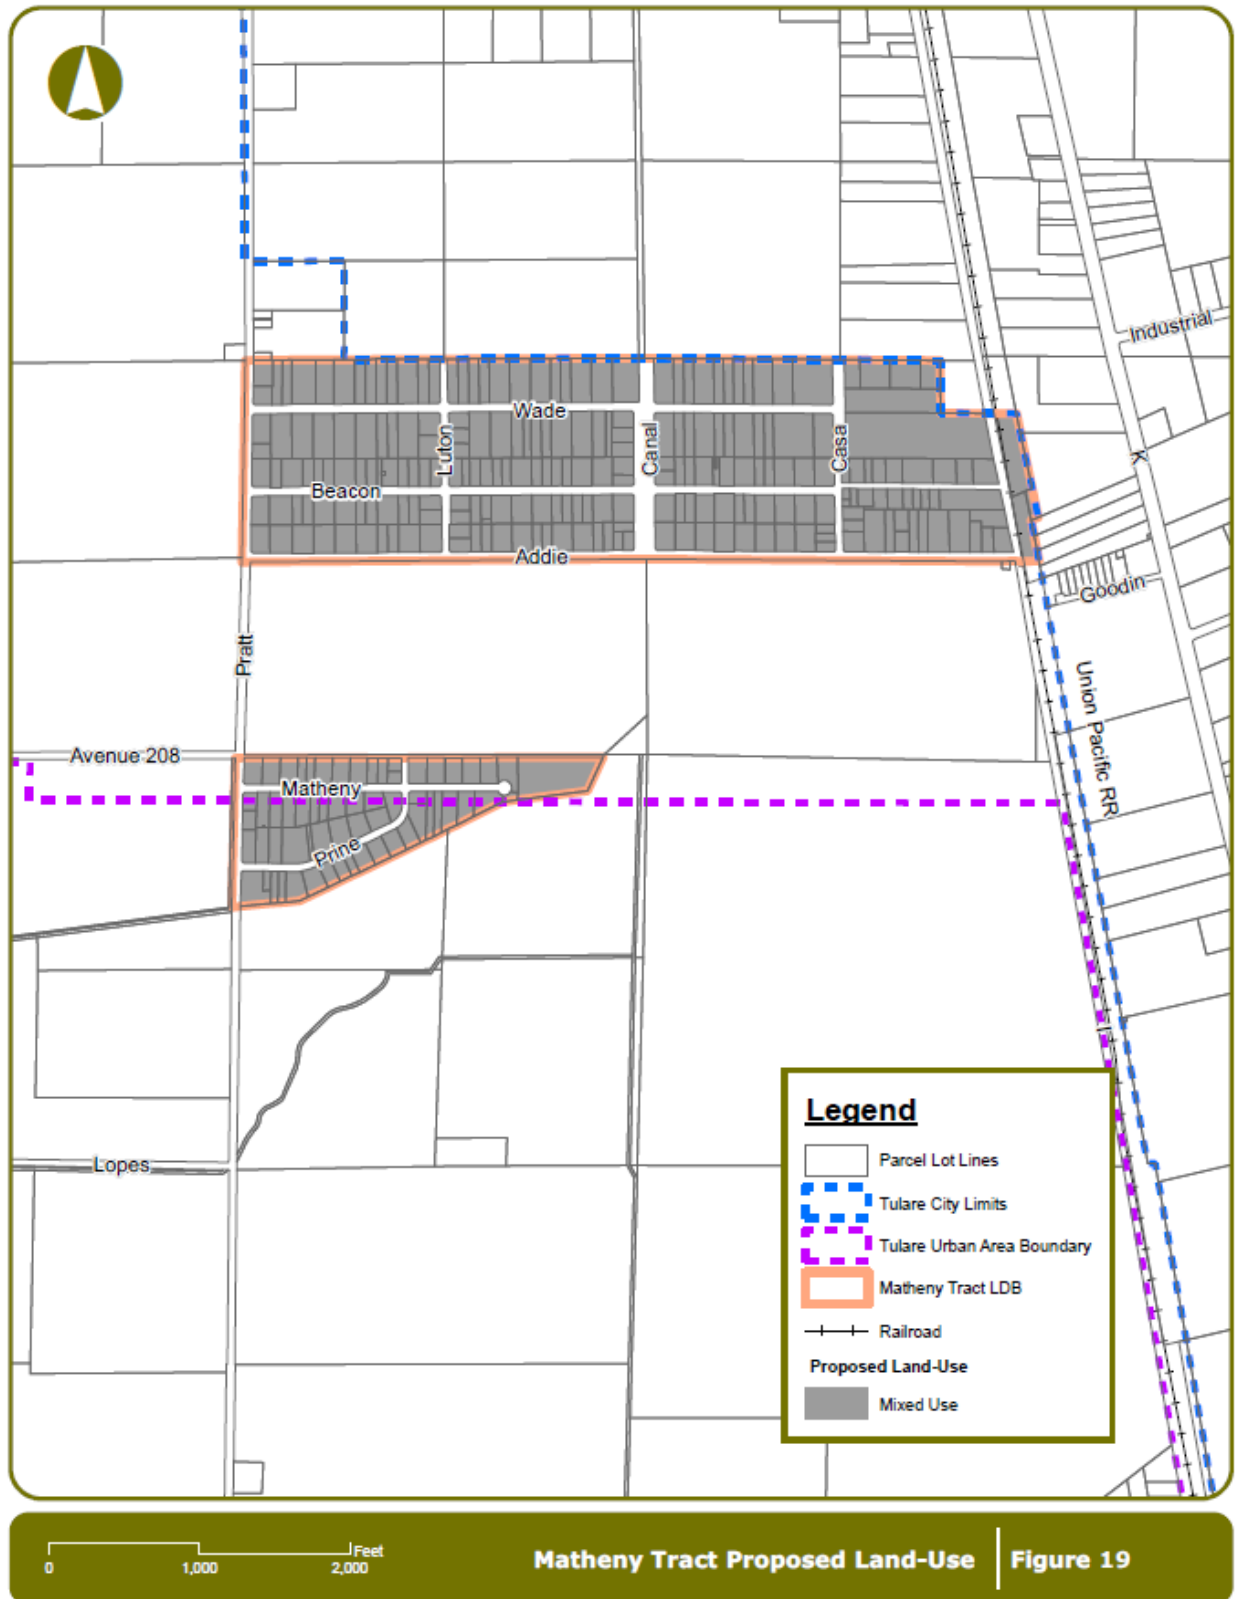

# MATHENY TRACT LEGACY PLAN

---

**Zoning Map Update:** The current Zoning Map for Matheny Tract (**see Figure 20**) will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 19**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 21**) Matheny Tract Proposed Zoning).

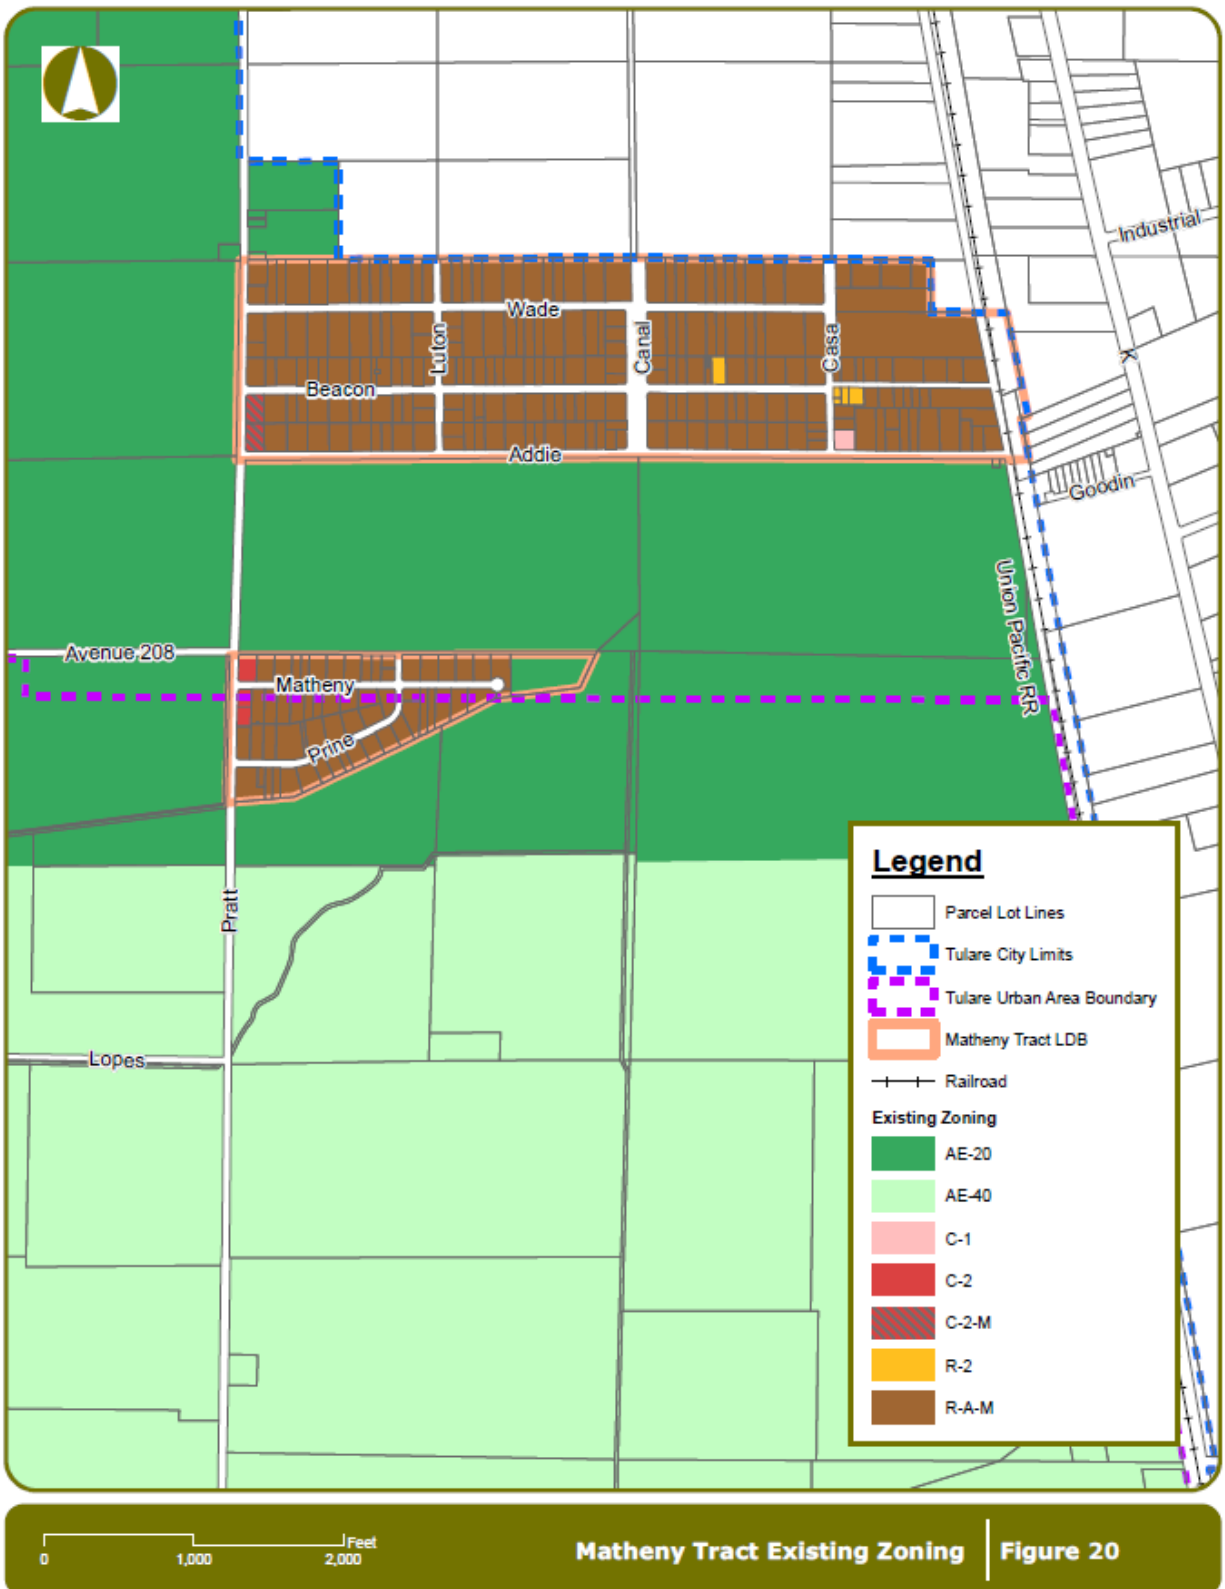

# MATHENY TRACT LEGACY PLAN

## *A-1 Use Permit Requirement Changes (Zone Change Text)*

### **Additional By-Right Uses**

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Arcades, including video. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Assemblage of people for educational or entertainment purposes. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2	

# MATHENY TRACT LEGACY PLAN

Assembly of electric appliances such as lighting fixtures, irons, fans, toasters and electric toys, refrigerators, washing machines, dryers, dishwashers and similar home appliances. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2	M-1
Assembly of small electrical equipment such as home and television receivers. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	M-1
Assembly of typewriters, business machines, computers, and similar mechanical equipment. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3	M-1
Automated car wash (coin operated only). Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	C-2, C-3, M-1
Automobile parking lots, public parking areas or storage garages. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, M-2, R-3, AP	
Automobile supply stores.	O, CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Automobile washing, including the use of mechanical conveyors, blowers and steam cleaning.	C-2, C-3, M-1, M-2	C-3, M-1
Bakery [employing not more than five (5) persons on premises].	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bakery goods store.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Banks and financial institutions.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Barber shop or beauty parlor.	C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Bed and Breakfast Home with three or more guests rooms (Up to 5). Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3, R-2	R-1
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Bicycle shops. Structure.	CO, C-1, C-2, C-3, M-1, R-3	C-2, C-3, M-1
Billiard or Pool hall Structure	C-2, C-3, M-1	C-2, C-3, M-1
Bird store or pet shop.	O, CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Blueprinting and Photostatting shop.	CO, C-1, C-2, C-3, M-1, AP	C-2, C-3, M-1
Boat sales and service. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1	C-3, M-1
Book binding. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-3, M-1
Book or stationary store. Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1
Business and professional schools and colleges. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-2, C-3, M-1
Business, professional and trade schools and colleges. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1	C-3, M-1

## ***A-2 Mixed Use Overlay District (Zone Change Text)***

---

The following regulations shall apply in the community of Matheny Tract, unless otherwise provided in this Ordinance.

### **A. PURPOSE**

The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

### **B. APPLICATION**

This overlay zone only applies to the communities of Ducor, Terra Bella, Traver, Strathmore, Pixley, Tipton, Matheny Tract, Jovista, Matheny Tract and Tooleville..

### **C. USE**

No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Matheny Tract.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

<b>Uses/Combination of Uses reviewed by Planning Commission</b>
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# MATHENY TRACT LEGACY PLAN

---

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## D. DEVELOPMENT STANDARDS

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

# MATHENY TRACT LEGACY PLAN

---

## E. ALL OTHER DEVELOPMENT STANDARDS

All other Development Standards are included below and in the Community Plans for Ducor, Terra Bella, Traver, Strathmore, Pixley, and Tipton, and the Legacy Plans for Matheny Tract, Jovista, Matheny Tract and Tooleville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

### ARCHITECTURE

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

# MATHENY TRACT LEGACY PLAN

---

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# MATHENY TRACT LEGACY PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# MATHENY TRACT LEGACY PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance. Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to

screen parking at the street periphery (Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior

# MATHENY TRACT LEGACY PLAN

---

fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

# MATHENY TRACT LEGACY PLAN

---

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

# MATHENY TRACT LEGACY PLAN

---

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or “lollipop signs.”
- Moving signs and flashing signs.

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

# MATHENY TRACT LEGACY PLAN

---

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateways signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

# MATHENY TRACT LEGACY PLAN

---

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

## A-3 – Community Outreach Flyers

**Leadership Counsel for Justice & Accountability and TULARE COUNTY**

invite you to participate in a

### **COMMUNITY MEETING**

to

### **DISCUSS IMPROVEMENT NEEDS**

in

### **Matheny Tract**

*The Sustainable Communities Strategy Project (SCS) seeks to document the following needs: Sewer, Water, Water Quality & Quantity, Storm Water Drainage, Fire, Access to Transportation, Housing, Schools, Libraries, Parks, Access to Healthy Foods and Shopping Opportunities, Access to Medical Facilities, Internet Access and more.*

The information that you provide at this meeting will help Tulare County create a plan and identify resources for future infrastructure improvements, land use changes, and zoning changes where possible.

**When:** January 9<sup>th</sup>, 2016

**Location:** Palo Verde School, Old Cafeteria  
10369 Avenue 196, Tulare, CA  
93274

**Time:** 10am- 12pm

For more information please call: Merced at 310-499-8034 or Ashley at 415-686-1368

\*Refreshments and snacks will be provided.

# MATHENY TRACT LEGACY PLAN

---

El Consejo de Liderazgo y el CONDADO DE TULARE

les invita a una

## **JUNTA COMMUNITARIA**

para

### **Hablar de las necesidades de infraestructura en Matheny Tract**

*El Proyecto de Estrategia de Comunidades Sostenibles (SCS) esta documentando las siguientes necesidades: alcantarillado, agua, calidad y cantidad del agua, drenaje pluvial, agua, fuego, el acceso al transporte, vivienda, escuelas, bibliotecas, parques, acceso a alimentos y tiendas, acceso a servicios médicos, acceso al internet y mucho más!*

La información que usted proporcione en esta junta ayudará al condado crear un plan e identificar recursos para mejorar la infraestructura de La Villa donde sea posible.

También ayudará a planificar el uso de la tierra y los cambios de zonificación.

**When: January 9<sup>th</sup>, 2016**

**Location: Palo Verde School, la Cafeteria pequeña  
10369 Avenue 196, Tulare, CA 93274**

**Time: 10am- 12pm**

Para más información llame a: Merced al 310-499-8034 o Ashley al 415-686-1368

*\*Refrescos y aperitivos serán proveídos.*

UPDATE AND PROPOSED CHANGES TO THE )  
LAND USE MAPS AND ZONING CHANGES )  
THAT ARE NECESSARY FOR CONSISTENCY WITH )  
THE GENERAL PLAN PARTS I, II AND PART III )  
AMENDMENTS (GPA 17-033) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Legacy Plans 2017 Update which consists of General Plan Amendment No. GPA 17-033 amendment to Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities & Services Elements, and Part II Rural Valley Lands Plan, and Part III (El Monte Mobile Village GPA 17-025; Hypericum GPA 17-026; Jovista GPA 17-027; Matheny Tract GPA 17-029 and Tooleville GPA 17-030 amending the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, Change of Zones No. PZC 17-025 El Monte Mobile Village; PZC 17-026 Hypericum; PZC 17-027 Jovista; PZC 17-029 Matheny Tract and Tooleville PZC 17-030, PZC 17-032 for an amendment to Section 16 of Ordinance No. 352, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Development Boundary, and Zone Ordinance Amendment No. PZC 17-031 establishing a Mixed Use Combining Zone in El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville (incorporated by reference herein). The unincorporated Legacy Communities are located within the Mount Diablo Base & Meridian as follows: El Monte Mobile Village, Section 12, Township 16S, Range 23E, Hypericum, Section 24, Township 19S, Range 25E, Jovista, Section 32, Township 24S, Range 26E, Tooleville, Section 12, Township 19S, Range 26E, Matheny Tract Section 22, 23, & 27, Township 20 south, Range 24 East.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element, Transportation & Circulation Element and the Public Facilities & Services Element; (2) add El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Legacy

Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Legacy Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-033 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management and the Transportation and Circulation Element; Change of Zone No. PZC 17-031 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for El Monte Mobile Village, Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista, Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract, Change of Zone No. PCZ 17-029 (Zoning District Map) and Tooleville, Change of Zone No. PZC 17-030 (Zoning District Map) within the respective Legacy Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-032 an amendment to Section 16 to allow additional by-right uses in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Legacy Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Legacy Plans;
  - b. Encourage infill development within Legacy Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Legacy Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The legacy planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;
  - b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on September 15, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Legacy Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Legacy Plans 2017 Update General Plan Amendment 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Change of Zone No. PZC 17-025; Hypericum General Plan Amendment No. GPA 17-026; Change of Zone No. PZC 17-026; Jovista General Plan Amendment No. GPA 17-027; Change of Zone No. PZC 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; Change of Zone No. PZC 17-029; Tooleville General Plan Amendment No. GPA 17-030; Change of Zone No. PZC 17-030; Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-032 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation, Public Facilities & Services, and Part II Rural Valley Lands Plan has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,
2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,

4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit "B" that are restrictive and applied only to the Legacy Plans 2017 Update. Therefore, the public will benefit from the Legacy Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on October 27, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Introduction; Component A-Planning Framework Element; Component B-Agriculture and Land Use Elements, Component C-Scenic Landscapes, Environmental Resources Management and Air Quality Elements; Component D-Transportation & Circulation and Public Facilities & Services Elements; and Part II Rural Valley Lands Plan of the Tulare County General Plan as set forth in Exhibits "A-1 to A-13" and Part III Community Plan as set forth in Exhibits "B-F" for the Legacy Plans 2017 Update General Plan Amendment No. GPA 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Legacy communities as part of the Legacy Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on September 15, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017 and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan for the Legacy Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Legacy Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Legacy Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to establish Legacy Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;

4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the establishment of legacy development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;
5. The Amendment to Part I Introduction, Component A, Component B, Agriculture, Component C, Scenic Landscapes, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and the newly established Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Legacy Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-033 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-033 the Legacy Plans 2017 Update set

forth in attached Exhibits “A-1 to A-13” and Part III Exhibits “B-F” which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

NO. PZC 17-031                                    )

RESOLUTION NO. 9344

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and

Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

BEFORE THE PLANNING COMMISSION

COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF AN AMENDMENT	)	
TO SECTION 16.H OF ORDINANCE NO. 352	)	
TO ALLOW ADDITIONAL BY-RIGHT USES	)	RESOLUTION NO. 9345
CONSISTENT WITH THE ADOPTED LEGACY	)	
PLANS, AS PROPOSED IN CHANGE	)	
OF ZONE NO. PZC 17-032	)	

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 16.H of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Zoning Ordinance Amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 and of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report, made a part hereof, and recommended approval of the Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the communities of El Monte Mobile Village,

Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update, consistent with the Legacy Communities 2017 Update including affirmation that Section 16 H. is applicable in the Matheny Tract.

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update (GPA 17-033) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities;
3. The proposed changes in zone district designations identified in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the El Monte Mobile Village Change of Zone No. PZC 17-025; Hypericum Change of Zone No. PZC 17-026; Jovista Change of Zone No. PZC 17-027; Matheny Tract Change of Zone No. PZC 17-029; and Tooleville Change of Zone No. PZC 17-030, an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" and "N" Rezoning Plans consistent with the adopted El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update (GPA 17-033).

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

ATTEST: MICHAEL C. SPATA  
COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY: *Michael C. Spata*  
Deputy Clerk

\*\*\*\*\*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Legacy Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Legacy Plans 2017 Update (GPA 17-033); and
3. Adopted one General Plan Amendment No. GPA 17-033, for the Legacy Plans 2017 Update inclusive of the El Monte Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029); Tooleville (GPA 17-030) and Amendments to Tulare County General Plan Part III to establish Legacy Plans and Legacy Development Boundaries; Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D,

Public Facilities and Services Elements, and Part II General Plan Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update; and

4. Waived the final reading and adopted Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Legacy Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-031) to Section 18.9 to adopt a Mixed-Use Combining Zone within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-032) to Section 16 to allow additional by-right uses within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for El Monte Village (PZC 17-025), Hypericum (PZC 17-026), Jovista (PZC 17-027), Matheny Tract (PZC 17-029), and Tooleville (PZC 17-030), consistent with the Legacy Plans 2017 Update; and
5. Adopted the findings of approval set forth in Planning Commission Resolution No. 9342 (Addendum to EIR), Planning Commission Resolution No. 9343 (Legacy Plans 2017 Update), Planning Commission Resolution No. 9344 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9345 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9346 (Zoning District Ordinance Maps); and
6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of El Monte Mobile Village, Hypericum, Matheny Tract, Jovista, and Tooleville to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents; and
10. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## **EXHIBIT "A"**

### **A. Legacy Plans 2017 Update (General Plan Amendment 17-033)**

WHEREAS, on September 27, 2017 the Planning Commission held a public hearing on the Legacy Plans 2017 Update (GPA 17-033), which included an application for El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030, El Monte Mobile Village Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract Change of Zone No. PZC 17-029 (Zoning District Map); and Tooleville Change of Zone No. PZC 17-030 (Zoning District Map), Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9) and Change of Zone No. PZC 17-032 (By-Right Uses–Section 16), collectively referred to as the Legacy Plans 2017 Update (GPA 17-033); and

WHEREAS, upon conclusion of the public hearing, the Planning Commission recommended the Board of Supervisors certify and adopt the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopt the Mitigation Monitoring and Reporting Program and approve the Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors held a public hearing on October 17, 2017 to consider the proposed Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors finds the public hearing for the Legacy Plans 2017 Update was properly noticed in accordance with state law and the Tulare County Ordinance Code.

WHEREAS, the Board of Supervisors finds the Legacy Plans 2017 Update is compatible, integrated and internally consistent with the existing policies of and with the Tulare County General Plan.

WHEREAS, the Board of Supervisors accepts and incorporates by reference herein, the findings of facts and recommendations adopted by the Planning Commission as follows:

1. Planning Commission Resolution No. 9342, in the matter of the Certification and adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update (PC Package Attachment 1 – CEQA Resolution).

2. Planning Commission Resolution No. 9343, to adopt General Plan Amendment No. GPA 17-033 for the Legacy Plans 2017 Update inclusive of El Monte Mobile Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029) and Tooleville (GPA 17-030) and Amendments to Part III of the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, to the Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities and Services Elements, and Part II Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update (PC Package Attachment 2 – GPA Resolution).
3. Planning Commission Resolution No. 9344, in the matter of an Amendment to Section 18.9 of Ordinance No. 352, the Zoning Ordinance, and establish the Mixed Use Combining Zone within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 3 – Section 18.9 Resolution).
4. Planning Commission Resolution No. 9345, in the matter of an Amendment to Section 16 of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 4 – Section 16 Resolution).
5. Planning Commission Resolution No. 9346, in the matter of an Amendment to Ordinance No. 352, the Zoning Ordinance, as set forth in the Zoning District Ordinance Maps for El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the Legacy Plans 2017 Update to rezone certain properties within El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville. (PC Package Attachment 5 – Rezoning Plan Resolution).

NOW, THEREFORE, BE IT RESOLVED as follows:

A. The Board of Supervisors hereby certifies and adopts the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopts the Mitigation Monitoring Reporting Programs.

NOW BE IT FURTHER RESOLVED as follows:

B. The Board of Supervisors adopts the entirety of all of the above findings and actions as one General Plan Amendment No. GPA 17-033.

C. The Board of Supervisors hereby waives the final reading of Change of Ordinance 352 and adopts amendments to the Tulare County Zoning Ordinance 352 pertaining to Section 18.9 - Mixed-Use Combining Zone, to Section 16 - Variances and Special Uses, and Zoning District Map Changes.

D. The Board of Supervisors authorizes the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of Legacy Plans 2017 Update to include Mixed Use Combining Zone and additional "By-Right" uses.

E. The Board of Supervisors directs the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq.

F. The Board of Supervisors directs the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file Notices of Determination with the Tulare County Clerk.

G. The Board of Supervisors authorizes the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents.

## INTRODUCTION

Tooleville is a small rural community located on the east side of Spruce Road (Road 204) roughly a mile and a half east of the city of Exeter in Tulare County. Homes in Tooleville are located along Alfred Avenue on the north and Morgan Avenue on the south, with a few homes fronting Spruce Road. The Friant Kern Canal borders the east side of the community.

Tooleville (named for the Toole family) was a farmworker settlement established by Dust Bowl migrants in the 1940's. It remains largely a farmworker town, with a population this is currently about 88.5% Hispanic and 11.5% White.

### Location

The Tooleville Census Designated Place (CDP) is located in the central part of Tulare County on the valley floor. Tooleville is a small rural community located on the east side of Spruce Road (Road 204) roughly a mile and a half east of the city of Exeter in Tulare County. Tooleville is in Section 12. Township 19 South, Range 26 East, MDB&M, and can be found within Rocky Hill United States Geological Survey 7.5 minute topographic quadrangle. Tooleville is located at an elevation of 396 feet National Geodetic Vertical Datum. The coordinates of Tooleville are: Latitude: 36.287450, Longitude: -119.424884. Homes in Tooleville are located along Alfred Avenue on the north and Morgan Avenue on the south, with a few homes fronting Spruce Road. The Friant Kern Canal borders the east side of the community. Tooleville is divided into two Census Blocks (4000 and 4001). Its population was 339 at the 2010 Census. According to Census data, there were 78 households and the median age was 22.4 years. The nearest city is Exeter, directly to the west (**see Figure 1**).

## **Community Outreach and Invitation Process**

The County of Tulare was successful in obtaining a grant from the Strategic Growth Council (SGC) to assist in the preparation of this Legacy Plan. In efforts to invite and make local residents aware of the Strategic Growth Council (SGC) project, Self Help Enterprises (SHE) went door to door throughout the community of Tooleville to distribute flyers at every home and local business. During this process SHE talked with residents about the importance of participating in this process. Meeting invitations were sent to the members of the Tooleville Mutual Water Company. Flyers were posted at the local taco stand.

Self-Help Enterprises (SHE) staff performed various outreach methods to promote community participation and make local residents aware of the (SGC) project.

- 1.) SHE staff developed an informational flyer.
- 2.) SHE staff partnered with Tooleville Mutual Water Company to post flyers and spread the word about the meeting. The Tooleville Water Mutual Company Board Members were invited to attend the meeting.
- 3.) SHE staff did door to door outreach on Tuesday October 20 and Thursday October 22, 2015.
- 4.) During the community outreach process, SHE staff explained the goals of the project and talked with residents about the importance and the community benefits of participating in the SGC community meeting.

## **Community Meeting:**

The Strategic Growth Council held a community input meeting in Tooleville on Tuesday October 27, 2015 at 6:00 pm. The meeting was scheduled in the evening to allow all residents to attend, including those that work during the day. The meeting was held at the office of the Tooleville Water Mutual Company. This is an ideal location because most residents know where the office is located.

# TOOLEVILLE LEGACY PLAN

---

## Community Survey

A detailed survey was developed in efforts to gather specific community information about different areas of concern. The survey asked about the following: Schools, Libraries, Housing, Zoning, Parks, Shopping Opportunities, and Access to Gas Stations, Access to Medical Facilities, Natural Gas, Internet Access, Flooding, Fire, Safety, Water Quality & Quantity, Waste Water, Storm Water Drainage, Complete Streets, and priority improvements. During the Strategic Growth Council Community meeting, residents listed the following as their priority needs/concerns:

## Priority Concerns

- Water Supply
- Storm Water Drainage
- Street lights
- Stop Signs
- Internet
- Police Patrol
- Clinic

**Water** - Tooleville Mutual Non-Profit Water Association is a small mutual water company ran by a five-member board. Tooleville has two undependable water wells and is planning to drill a new well once the location has been determined. They are actively searching for potential well sites in Tooleville and neighboring Exeter. Tooleville is exploring the different ways that could potentially partner with Exeter. TMNPWA is currently reviewing three options: Water wheeling, Master meter or full consolidation with the City of Exeter.

**Storm Water Drainage** – Tooleville residents report that the community does not have adequate storm water drainage. Large puddles form when it rains and the water does not drain because there is nowhere for the water to go. Residents report that some streets flood during the rainy season. This becomes a bigger problem when the stagnant water attracts insects and mosquitos.

**Street Lights** - Residents report dark streets at night due to little or no street lighting. Most people stay indoors at night because they do not feel safe walking on a dark street. At night, one cannot see down the street; this is a major safety concern for them, especially since the Sheriff's Department seldom patrols Tooleville. Residents are especially concerned about how this affects the safety of local children. Residents said that some streets have light poles but the light bulb is out and other streets have no poles at all. Residents report being told that there is a cost to them to install a light pole on their street.

**Stop Signs on Alfred and Morgan** - Tooleville is a small community comprised of two residential roads. Residents are concerned with road safety on the corners of Alfred and Spruce as well as Morgan and Spruce. Drivers state they cannot see oncoming traffic and that this has led to car crashes at both corners. Residents are asking for stop signs or flashing lights to slow traffic on Spruce Road.

# TOOLEVILLE LEGACY PLAN

---

**Internet** - Most families in Tooleville do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Tooleville.

**Police Patrol** - Residents report that the TCSD response time is long and that there is too little Sheriff Patrol within the community. Residents are worried about the rate of unreported crimes and crimes that go un-responded to. People feel that the limited presence of law enforcement contributes to the local crime rate and makes criminals feel unstoppable in that area of Tooleville. Tooleville residents are asking for increased Sheriff presence in their community.

**Clinic** - Tooleville residents do not have access to medical care within the community. The nearest medical clinic is approximately 2.5 miles away in Exeter. Most residents report traveling to Visalia, 13 miles for medical care. This is concerning to residents especially during medical emergencies. Families without vehicles and one car families are especially affected by this. Families that do not have a car are forced to find transportation to access medical care in a nearby community by paying for a ride or using public transportation to travel there. The nearest hospital is in Visalia, 13 miles away, and it takes approximately 20 minutes for the nearest ambulance to get to Tooleville from Visalia.

## DEMOGRAPHICS

The 2015 United States Census reported that Tooleville had a population of 391. The racial makeup of Tooleville was 45 (11.5%) White, (0.0%) African American, (0.0%) Native American, (0.0%) Asian, (0.0%) some other races, and (0.0%) from two or more races. Hispanic or Latino of any race were 346 persons (88.5%). The average renting household size was 4.51. There were 124 housing units, of which 83 (66.9%) were owner-occupied, and 41 (33.1%) were occupied by renters.

### Population

In 2015, the population of Tooleville was 391 (see **Table 1**).

Table 1 - Population						
	California	%	Tulare County	%	Tooleville	%
Male	18,911,519	49.68%	225,881	50.07%	222	56.8%
Female	19,155,401	50.32%	225,227	49.93%	169	43.2%
Total	38,066,920		451,108		391	

2011-2015 American Community Survey 5-Year Estimates

# TOOLEVILLE LEGACY PLAN

## Median Age

Tooleville's population is younger than the median age throughout all of Tulare County. Tooleville's median age of 35.1 is lower than the median age of the State of California (see Table 2).

Table 2 - Median Age	
Geography	Median Age (years)
California	35.8
Tulare County	30.3
Tooleville	35.1

2011-2015 American Community Survey 5-Year Estimates

## ETHNICITY AND RACE

In 2015, approximately 11.5% of Tooleville's population was White, 0.0% was African American, 0.0% was Native American, 0.0% was Asian, and 0.0% was two races or more (see Table 3). Approximately 88.5% was Hispanic (of any race). This statistic is important because persons of Hispanic origin may speak a language other than English (in this case, likely to be Spanish) and the needs of the Spanish-speaking community should be considered in order to reach out to persons on issues which may affect their community.

Table 3 - Race & Ethnicity						
	California	%	Tulare County	%	Tooleville	%
Total	38,421,464		454,033		391	
Hispanic or Latino (of any race)	14,750,686	38.4 %	283,533	62.4 %	346	88.5%
White (Not Hispanic)	14,879,258	38.7 %	139,581	30.7 %	45	11.5%
Black or African American (Not Hispanic)	2,160,795	5.7%	6,448	1.3%	0	0%

Two or more races (Not Hispanic)	1,072,500	2.8%	6,304	1.4%	0	0%

2011-2015 American Community Survey 5-Year Estimates

## ECONOMIC CONDITIONS

### Employment in Tooleville

According to the Tulare County 2030 General Plan Update, the County's economy has historically been driven by agriculture and has had one of the largest agricultural outputs of any county in the US. Despite this, the Tulare County unemployment rate has remained consistently higher than the State average, which can be largely attributed to the seasonal nature of agricultural production (see Table 4).

# TOOLEVILLE LEGACY PLAN

According to the California Department of Finance, the 2011-2015 American Community Survey indicated that the unemployment rate for Tooleville was about 5.2% while the rate for Tulare County was 7.2%. The unemployment rate for the State of California was 6.2%. Keeping in mind that the 5.24% includes only the employable labor force (that is, not every person of the population) results in about 19 unemployed persons of Tooleville's person labor force of 251.

Table 4 - Employment Status			
Employment Status	California	Tulare County	Tooleville
Population 16 years & over	30,312,429	325,404	364
In labor force	19,269,449	194,420	251
Civilian labor force	19,137,441	194,102	251
Employed	17,246,360	170,780	232
Unemployed	1,891,081	23,322	19
Armed Forces	132,008	318	0
Not in labor force	11,042,980	130,984	113

2011-2015 American Community Survey 5-Year Estimates

## Median Household Income

Tooleville's median household income was \$29,455, compared to \$42,031 for Tulare County and \$61,818 for the State of California (see Table 5).

Table 5 - 2011-2015 American Community Survey: Income			
Geography	Median household income (dollars)	Median family income (dollars)	Per capita income (dollars)
California	\$61,818	\$70,720	\$30,318
Tulare County	\$42,031	\$44,814	\$17,876
Tooleville CDP	\$29,455	\$27,644	\$13,599

2011-2015 American Community Survey 5-Year Estimates

## Severely Disadvantaged Community

Tooleville is a severely disadvantaged community based upon household income. As defined by the State of California Public Resources Code 75005. (g), a "[d]isadvantaged community" means a community with a median household income less than 80% of the statewide average. "Severely disadvantaged community" means a community with a median household income less than 60% of the statewide average."

# TOOLEVILLE LEGACY PLAN

## HOUSING CHARACTERISTICS

### Tenure

As the community grows, it will be important to provide new housing and commercial

opportunities, allow expansion of the size of existing housing

(for example, increase a unit by an additional bedroom), and allow various

housing types (such as mobile homes). According to the California

Department of Finance, the 2011-2015 American Community Survey data indicated 66.9% of the housing units in Tooleville were owner-occupied (**see Table 7**). Similarly, 57.2% of housing units were owner occupied in Tulare County and 54.8% of the housing units were owner occupied in the State of California.

Table 6 - Housing Tenure			
	California	Tulare County	Tooleville
Occupied housing units	12,717,801	133,570	124
Owner-occupied	6,909,176	75,685	83
Renter-occupied	5,808,625	57,885	41

2011-2015 American Community Survey 5-Year Estimates

Table 7 - Housing Tenure (%)			
	California	Tulare County	Tooleville
Owner-occupied	54.8%	57.2%	66.9%
Renter-occupied	45.2%	42.8%	33.1%

2011-2015 American Community Survey 5-Year Estimates

### Housing Conditions

Table 8 - 2015 Housing Survey											
Survey Area	Sound		Deteriorated						Dilapidated		Total Units
			Minor		Moderate		Substantial				
	Units	%	Units	%	Units	%	Units	%	Units	%	
Tooleville	6	18	4	12	4	12	3	9	17	50	34

Source: Tulare County 2015 Housing Element

The condition of housing is typically categorized as sound, deteriorated, or dilapidated. A “sound” housing unit (house) is one that is in good-to-excellent condition requiring no structural or other improvements. Deteriorated housing means a housing unit may need some level of maintenance/repair to improve the condition of the housing. Deterioration is classified as minor, moderate, or substantial. Dilapidated means a unit is not considered suitable for living. There may be structural, electrical, plumbing or other conditions that could endanger the well-being and safety of persons living in dilapidated housing. Housing condition is an indicator of a person’s ability to afford maintenance/repair of the house they live in. Without income to pay for maintenance/repair, it is likely that a house, as it ages, will continue to deteriorate over time.

According to the 2015 Tulare County Housing Element, a sampling of housing conditions in Tooleville indicated that approximately 18% of the housing units were sound. Approximately 32% of Tooleville's housing units were deteriorated and 50% were dilapidated (**see Table 8**).

# TOOLEVILLE LEGACY PLAN

## Age of Structures

Most of the homes in Tulare County were built between 1970 and 1979 (see Table 9). The total number of housing units in Tooleville is 124.

Table 9 - Year Structure Built			
Year Structure Built	California	Tulare County	Tooleville
Total housing units	13,845,790	144,792	124
Built 2014 or later	10,183	196	0
Built 2010 to 2013	129,453	2,114	0
Built 2000 to 2009	1,646,490	25,997	19
Built 1990 to 1999	1,495,571	21,767	0
Built 1980 to 1989	2,117,819	22,733	0
Built 1970 to 1979	2,503,688	27,111	87
Built 1960 to 1969	1,871,029	15,500	0
Built 1950 to 1959	1,907,512	13,694	18
Built 1940 to 1949	865,607	7,494	0
Built 1939 or earlier	1,298,438	8,186	0

2011-2015 American Community Survey 5-Year Estimates

## Household Size (Overcrowding)

In 2015 the average renter occupied household size in Tooleville was 4.51 persons per household (see Table 10). The average owner occupied household size is 2.48.

Table 10 - Average Household Size		
Geography	Average Household size (Owner Occupied)	Average Household size (Renter Occupied)
California	2.99	2.01
Tulare County	3.23	3.52
Tooleville	2.48	4.51

2011-2015 American Community Survey 5-Year Estimates

By definition, the most common measure of overcrowding is persons per room in a dwelling unit.<sup>1</sup> More than one person for each room of a dwelling unit is considered overcrowding. It is important to note that the measure is based on all rooms of a dwelling unit, not just the number of bedrooms. It is not uncommon for persons to share a bedroom, for example siblings or adults.

## Vacancy Rate

Vacancy rate is important as it provides an indicator of unoccupied housing units. Vacancies may occur as people move away from a housing unit and it remains vacant until the next person/family moves in. Vacancy allows persons to decide whether to choose owning or renting housing based on their need and income. Typically, a vacancy rate of about 5-6% is considered normal; however, vacancy rates above 6% can be a reflection of affordability or housing condition. In 2015, the rental vacancy rate in Tooleville was not determined however, the rental vacancy rate for Tulare County at 3.7% and the State of California at 4.1%. The homeowner vacancy rate for Tooleville also was not determined however, the homeowner vacancy rate for Tulare County at 1.7% and the State of California at 1.4%, (see Table 11).

Table 11 - Vacancy Rate		
Geography	Homeowner vacancy rate	Rental vacancy rate
California	1.4%	4.1%
Tulare County	1.7%	3.7%
Tooleville	N/A	N/A

# TOOLEVILLE LEGACY PLAN

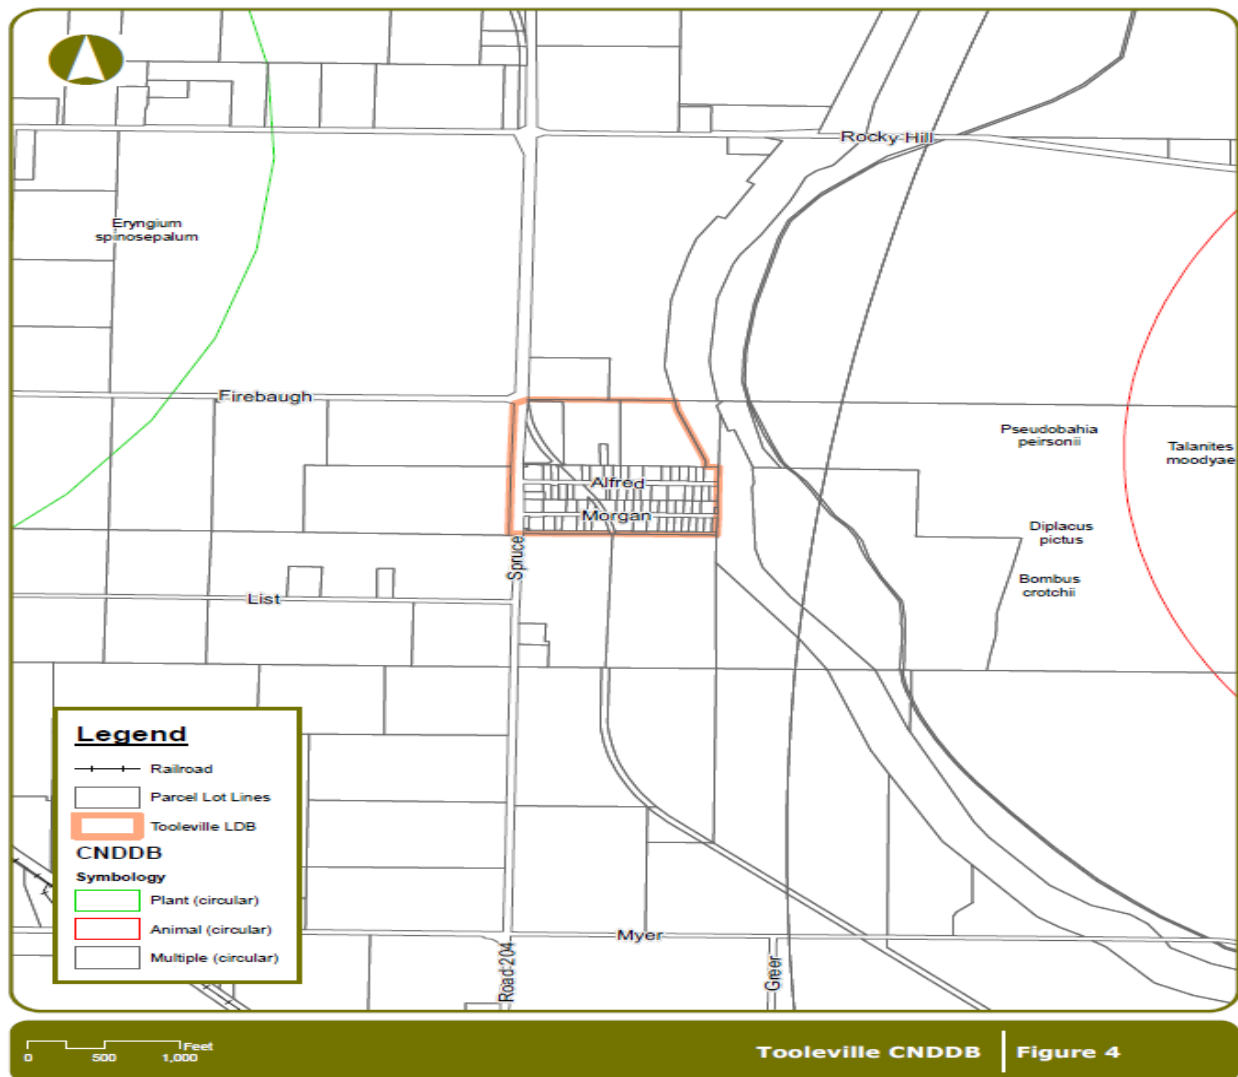

## ENVIRONMENTAL CONDITIONS

### Natural Conditions

#### Wildlife<sup>2</sup>

A California Natural Diversity Database (CNDDB) search conducted on May 24, 2017, (see Figure 4) indicates there are special status species within the Rocky Hill Quadrant Species List (which includes the Tooleville Planning Study Area) consisting of one (1) animal species and no plant species: Vernal pool fairy shrimp (*Branchinecta lynchi*, federal threatened). The planning area has been heavily disturbed with urban uses.

---

## Geology & Seismic Hazards<sup>3</sup>

“The Official Maps of Earthquake Fault Zones delineated by the California Geological Survey (CGS), State of California Department of Conservation, through December 2010, under the Alquist-Priolo Earthquake Fault Zoning Act, indicate that there are no substantial faults known to occur in Tulare County. The nearest known faults likely to affect Tooleville are the San Andreas Fault (approximately 75 miles to the west), the Owens Valley Fault (approximately 65 miles to the northeast), and the Pond Fault (approximately 25 miles southwest). According to the Five County Seismic Safety Element (FCSSE) and (Seismic/Geologic Hazards and Microzone) of the Tulare County 2030 General Plan Health and Safety Element (GPHSE), the Project area, [Tooleville] is located in the V-1 zone, characterized as a moderately thick section of marine and continental sedimentary deposits overlying the granitic basement complex. The FCSSE further states that, “Amplification of shaking that would affect low to medium-rise structures is relatively high, but the distance to either of the faults that are expected sources of the shaking [the San Andreas and Owens Valley Faults] is sufficiently great that the effects should be minimal. The requirements of Zone II of the Uniform Building Code should be adequate for normal facilities.”

## Soils

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS), and the Soil Survey of Tulare County, the following soil types are located in Tooleville (see Figure 5). The following descriptions are provided for the above soil types:

**Exeter loam, 0 to 2 percent slopes**, is moderately deep to a duripan, moderately well drained, very slow to medium runoff, moderately slow permeability above the duripan. The soils that formed in alluvium mainly from granitic sources. Exeter soils are on alluvial fans and stream terraces. The soil is used for irrigated cropland growing oranges, olives and deciduous orchards, vineyards and row crops.

**Porterville clay, 2 to 9 percent slopes**, is moderately deep well drained soils that formed in fine textured alluvial material from basic and metabasic igneous rock. Porterville soils are on fans and foothills, used mostly for range pasture. Vegetation is annual grasses, burclover, herbs and widely spaced shrubs. Most cultivated areas are irrigated and planted to oranges, lemons, olive, figs, and some grapes.

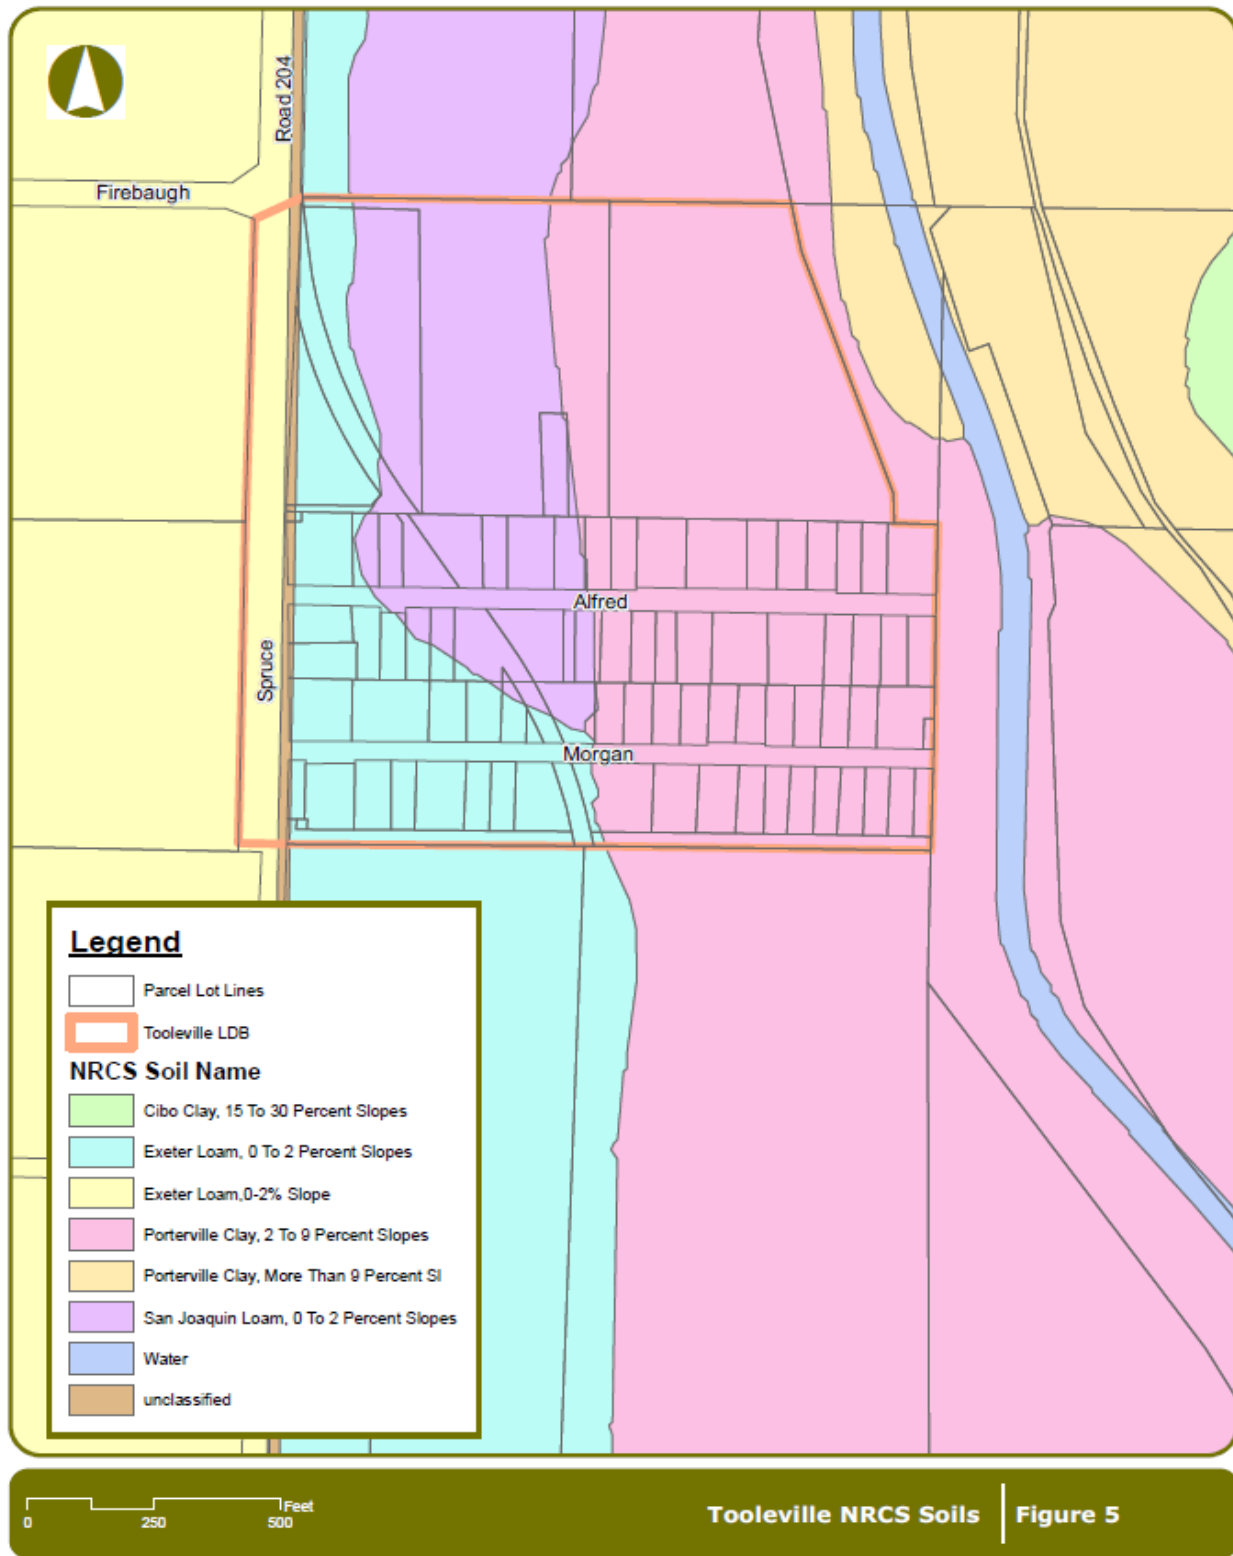

**San Joaquin loam, 0 to 2 percent slopes**, is moderately deep to a hardpan, well drained and nearly level. This soil is suitable for orchards, vineyards, and cultivated crops but is somewhat limited by the presence of hardpan which restricts root growth. This problem can be alleviated by ripping and shattering the hardpan. The soil is poorly suited to urban uses because of a high clay content, very slow permeability and a cemented hardpan. Septic tank filter fields are severely limited for these reasons.

Figure 5 – NRCS Soils Map - Tooleville

# TOOLEVILLE LEGACY PLAN

---

## Physical Conditions

### Air Quality

The Tooleville Plan Area is within the San Joaquin Valley Air Basin (SJVAB) and under the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAB is classified non-attainment/severe for the State  $O_3$  1-hour standard, non-attainment for the State  $O_3$  8-hour standard, non-attainment for the State  $PM_{10}$  standard, non-attainment for the federal and State  $PM_{2.5}$  standards, and attainment and/or unclassified for the remaining federal and State air quality standards. According to the Tulare County General Plan, the San Joaquin Valley has some of the worst air quality in the nation. The CO and NOX emissions are typically generated by motor vehicles (mobile sources). The ROG emissions are generated by mobile sources and agriculture. Although emissions have been shown to be decreasing in recent years, the SJVAB continues to exceed state and federal air quality emission standards.

Executive Order S-3-05, issued by Governor Schwarzenegger in 2005, established targets for greenhouse gas (GHG) emissions for the State. The Global Warming Solutions Act of 2006 (or Assembly Bill (AB) 32) directed the California Air Resources Board (CARB) to develop and adopt statewide GHG emission limits in order to reduce emission levels to those experienced in 1990, by the year 2020. In order to achieve those targets, CARB adopted the Climate Change Scoping Plan in December 2008.

Sustainable Communities and Climate Protection Act of 2008, also known as Senate Bill (SB) 375, builds upon AB 32 by requiring CARB to develop regional GHG emissions reduction targets for passenger vehicles. Then each Metropolitan Planning Organization (MPO) must prepare a Sustainable Communities Strategy (SCS) to demonstrate how the region will meet its targets. The SCS will be incorporated into the Regional Transportation Plan (RTP).

The SJVAPCD provides a list of potential air quality mitigation measures that are applicable to General Plan updates and community plans:

- Adopt air quality element/general plan air quality policies/specific plan policies.
- Adopt Local Air Quality Mitigation Fee Program.
- Fund TCM program: transit, bicycle, pedestrian, traffic flow improvements, transportation system management, rideshare, telecommuting, video-conferencing, etc.
- Adopt air quality enhancing design guidelines/standards.
- Designate pedestrian/transit oriented development areas on general plan/specific plan/planned development land use maps.
- Adopt ordinance limiting wood burning appliances/fireplace installations.
- Fugitive dust regulation enforcement coordinated with SJVUAPCD.
- Energy efficiency incentive programs.
- Local alternative fuels programs.
- Coordinate location of land uses to separate odor generators and sensitive receptors.

Air quality is directly related to land use; it is also related to the configuration of land, vegetation, climate, wind direction and velocity, and production of man-made impurities which change the natural

# TOOLEVILLE LEGACY PLAN

qualities of the air. Because Tooleville is located near the central portion of the Valley with prevailing winds from the northwest, it is in a vulnerable position for the accumulation of adversely modified air, particularly when a temperature inversion occurs which holds down surface air along with its pollutants.

Local air pollution sources within the general vicinity of Tooleville include agricultural activities.

## Flooding<sup>4</sup>

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map, Community-Panel Number 06107C0990E (see **Figure 6**). Tooleville is within Flood Zone X, areas of 0.2% chance flood; areas of 1 % annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance of flood. Structures located in a shaded X zone are recommended to be elevated one foot above natural ground. Elevation certificates not required unless the property owner wishes to use them for insurance rating purposes; for example, a preferred risk policy.

The County of Tulare has taken steps to be a part of the National Flood Insurance Program (NFIP), which means the County of Tulare agreed to manage flood hazard areas by actively adopting minimum regulatory standards as set forth by Federal Emergency Management Agency (FEMA). The National Flood Insurance Program (NFIP) is administered by the (FEMA) to offer flood insurance to properties located in special flood hazard areas (SFHAs). Information about the NFIP, is available at the following website: [www.fema.gov](http://www.fema.gov). As part of the county's participation in the NFIP, individuals are eligible to obtain flood insurance.

**Figure 6 - FEMA Flood Map**

<sup>4</sup> Federal Emergency Management Agency, 2009. National Flood Insurance Rate Map, Map Number 06107C0990E, Panel Number 990 of 2550, June 16, 2009. <https://msc.fema.gov/portal/>

# TOOLEVILLE LEGACY PLAN

---

Further flood information is available on Tulare County Resource Management Agency website at: <http://tularecounty.ca.gov/rma/index.cfm/public-works/flood-hazard-information/flood-control-information/>. On June 16, 2009, Tulare County adopted the new Digital Flood Insurance Rate Maps (DFIRMs). Information is available to determine if a property is located in a SFHA by using the following FEMA Map Service Center link as follows: <https://msc.fema.gov/portal>.

## Noise<sup>5</sup>

Tulare County adopted a new noise element as part of the Health and Safety Chapter of the 2030 General Plan Update. The noise contours were prepared in terms of day-night average decibel level (Ldn), which are descriptive of the total noise exposure at a given location for an annual average day.

The Noise Element identifies noise-impacted areas throughout Tulare County. These areas include lands which have existing or projected noise levels exceeding 60 decibels (dBA) Ldn. This decibel figure is considered to be the maximum normally acceptable noise level for single family residential areas. Roadways and traffic noise are the dominant source of ambient noise in the County. According to summarized daily traffic volumes in the General Plan Background Report, the predicted Ldn noise level at the distance from the Road 204 centerline to the 60 dB-Ldn contour between SR 198 and SR 137 is 187 feet. The distance from the Road 204 centerline to the 65 dB-Ldn contour between SR 198 and SR 137 is 87 feet. As a result, the parcels generally located adjacent to Road 204 in Tooleville are exposed to 65 dB-Ldn noise levels. New construction proposed in the 65 dB-Ldn noise contour is conditionally acceptable after a detailed analysis of the noise reduction requirements is made and needed noise insulation features are included in the design.

## INFRASTRUCTURE

Infrastructure is defined as “the basic physical and organizational structures needed for the operation of a society or enterprise or the services and facilities.” In regards to Tooleville, this Legacy Plan is intended to address deficiencies and the need for improvements to the drinking water system improvements, (for example wells, water distribution piping, and storage tanks), curbs, gutters, streets, sidewalks, etc.). The prioritized concerns of the Community include:

- Water Supply
- Storm Water Drainage
- Street lights
- Stop Signs
- Internet
- Police Patrol
- Clinic

---

# TOOLEVILLE LEGACY PLAN

## Water and Sewer Supply

The Mutual Water System, *The Tooleville Mutual Nonprofit Water Association, Inc.* is governed by a 5-member Board of Directors. Like many mutual. The board pays a monthly stipend to directors who are present at each month's meeting. The stipend is \$40. The board currently meets every other month. There are a couple of families, the Enloes and the Baileys, who have lived in Tooleville since time immemorial and have long-term knowledge of the water system. Both families remain involved in running the water system, or at least staying in touch with what is happening. This is a valuable resource. Again, like many Mutuals, it is rare to get a majority of shareholders at annual meetings, so the bylaws were amended to require only a 20% presence to achieve a quorum. The water system has two professional support personnel: a bookkeeper who is actually an employee of the company, and a D3 operator who is a contractor. The operator calls out a well or pipe repair company as needed for major repairs.

**Table 12 - Existing Infrastructure**

### Existing Infrastructure in DUCs

Disadvantaged Unincorporated Community (DUC)	Public Sewer Available	Public Water Available	Public Stormwater Available	Existing Streetlights	Existing Sidewalks	Existing ADA Curb Ramps
Tooleville, CDP	Yes	Yes	Yes	Yes	No	No

The board makes the decisions at its semi-monthly meetings. The bookkeeper receives the mail, so she makes sure that state filings happen, that taxes are filed, bills paid and revenue deposited, etc. The operator visits weekly or as needed to check the system, flush lines, pull samples, etc. Tulare County takes bacteriological samples. As a Mutual, the system is not regulated by the PUC.

Since the Tooleville Mutual Nonprofit Water Association, Inc. has less than 200 connections, the system is monitored by the Tulare County Health & Human Services Agency, Tulare County Public Health Environmental Health Division.

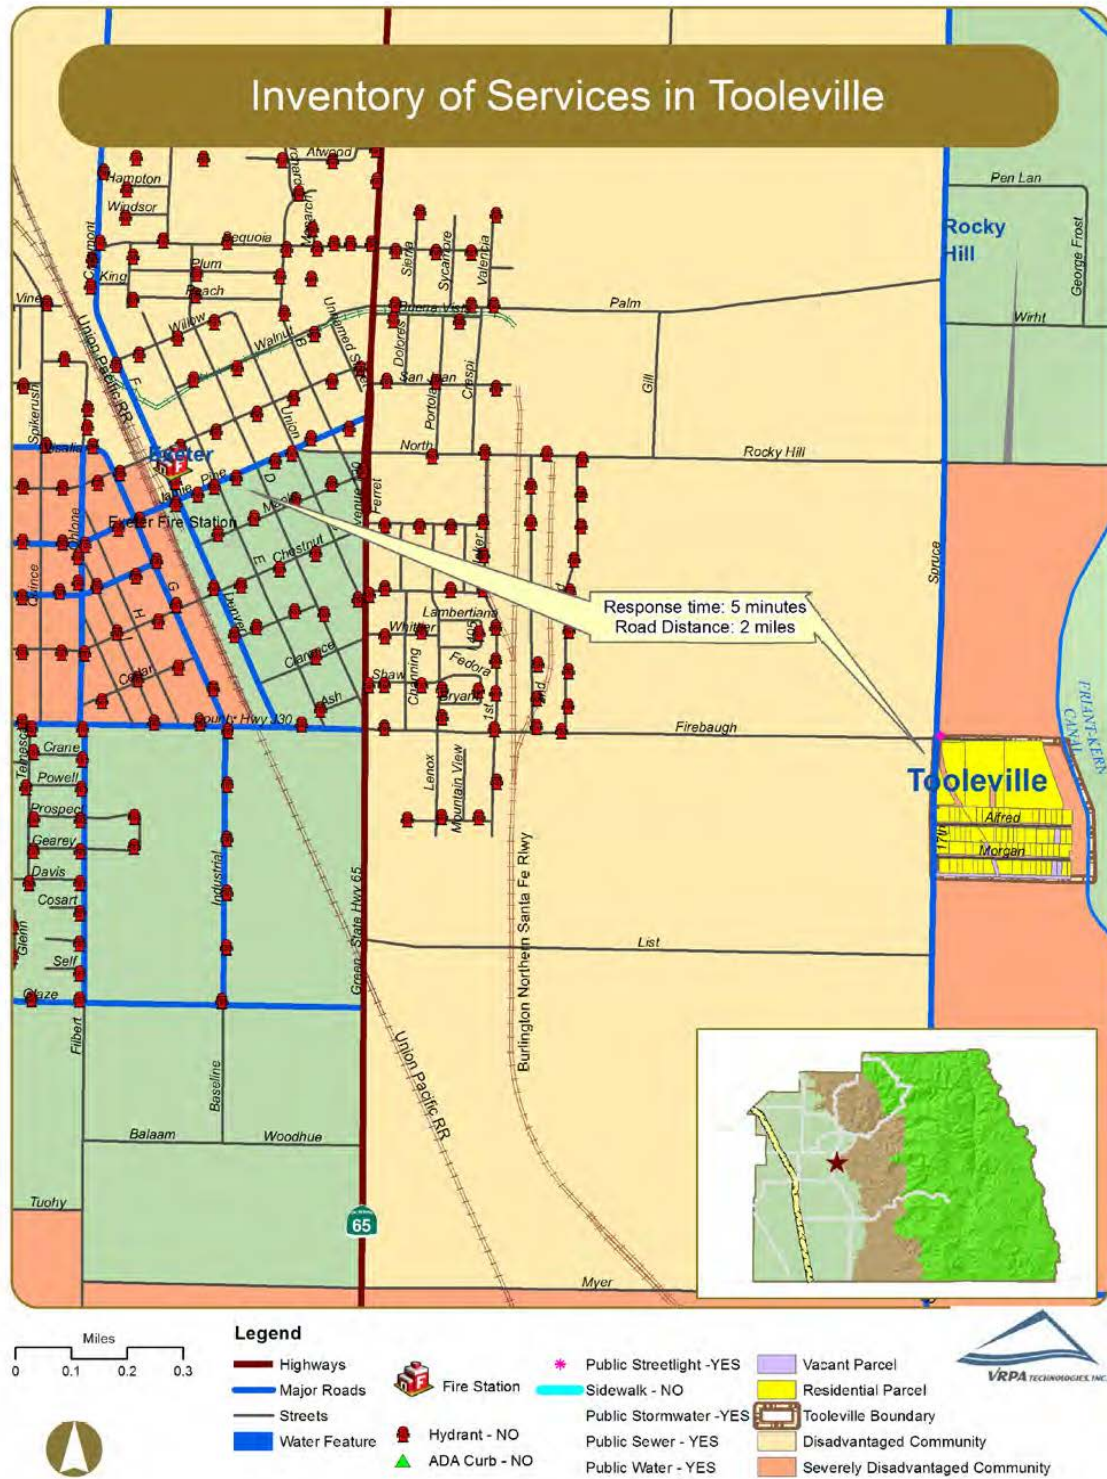

They have successfully applied for CDBG and USDA funding that was used to drill a water test well and replace the water distribution system. The Tooleville Mutual Nonprofit Water Association, Inc. has also successfully applied for and received a commitment for a Proposition 84 planning grant from CDPH to design a source of water by drilling a new well on the west side of Exeter (where higher-quality water is known to exist), wheeling that water through that city to a connection point where a transmission line would transport water to the Tooleville water distribution system.

The Tulare County Service Area #1 Tooleville Zone of benefit provides sewer service to the community. The Tooleville Mutual Nonprofit Water Association, Inc. has 76 connections servicing 77 residences. The system has two water wells that supply the community. The Alfred Avenue well was drilled to a depth of 310 feet with an annular seal to a depth of 90 feet. This is an open bottom well with no perforations and no gravel pack. It is equipped with a 7.5 hp submersible pump and 3,500 gallon hydro pneumatic tank. The Morgan Avenue well was drilled to a depth of 320 feet with an annular seal to a depth of 99 feet. This is an open bottom well with no perforations and no gravel pack. It is equipped with a 7.5 hp submersible pump and 1,200 gallon hydro pneumatic tank.

# TOOLEVILLE LEGACY PLAN

Figure 7 - Inventory of Services - Tooleville

# TOOLEVILLE LEGACY PLAN

---

Interestingly, for about the past three years, the nitrate levels in both wells have dropped below 45 ppm. Water pumped from the wells has intermittently exceeded the nitrate Maximum Contaminant Level set by EPA and CDPH. The chronic on again and off again problem with Tooleville's water quality has been the nitrate levels of water produced from the community's two wells. Attached is a table listing nitrate levels from both wells from 1978 through October 2012. This table shows that both wells have produced water exceeding the nitrate MCL 9 times over this period (**see Table 13**).

The distribution system was replaced entirely in 2009 with a USDA grant. Unfortunately, total coliform bacteria has plagued the system since that time. It is unknown whether the system was not sufficiently flushed at installation, or whether there is a cross-contamination problem (at least two old wells are known to exist and the water company has been unable to prove that they are connected to household plumbing that could be creating a cross-contamination situation). Routine flushing at hydrants on a monthly basis seems to be keeping the problem in check, but on average there are about two bacteriological violations per year.

The Tooleville Mutual Nonprofit Water Association, Inc. water system has had sporadic nitrate problems and uncertainty since the late 1990's. Low system pressure was frequently a problem until the distribution system was replaced, and that seems to have helped.

Consolidation with the City of Exeter could be a good way to resolve the water quality problems of residents served by the Tooleville Mutual Nonprofit Water Association, Inc. Unfortunately, however, both communities are more or less opposed to full consolidation. Exeter maintains that it does not have the resources to own or manage Tooleville's system. It also remains concerned about the charter city prevailing wage exemption that Exeter fears could be lost to them if they serve an outlying community. This problem was theoretically resolved by SB2X9 in 2009 but it has not yet been tested in court, so Exeter prefers to err on the side of caution in this case. For its part, Tooleville's board of directors is not interested in being a charity case, and would prefer to continue owning and operating their own system. A partial consolidation has also been considered (buying water in bulk through a master meter) but is not currently favored, due to risk on the part of the water company (which would have to cover every month's bill, regardless of collection problems or other revenue issues) and Exeter's unwillingness to help with billing and maintenance. As a result, the only option for a long term water source (that would not intermittently be contaminated with nitrate levels over the MCL) appears to be the drilling of a water well west of Exeter and wheeling potable water through the city's distribution system and then on to Tooleville.

# TOOLEVILLE LEGACY PLAN

# TOOLEVILLE LEGACY PLAN

---

## Storm Drainage

“A storm drainage system is designed to drain excess rain and groundwater (from roads, sidewalks, etc.) to some point where it is discharged into a channel, ponding basin, or piped system. The system itself typically consists of pipes connecting inlets and is facilitated by curbs and gutters, manholes, and sumps. The operation of the system consists of runoff being collected in the inlets and transported by pipes to a discharge location. Manholes provide access to storm drain pipes for inspection and cleanout. A sump is a shallow, artificial pond designed to infiltrate storm water through permeable soils into the groundwater aquifer. It does not typically discharge to a detention basin.

Storm drainage systems should be designed so they have adequate capacity to accommodate runoff that enters the system for the design frequency and should also be designed considering future development. An inadequate roadway drainage system could result in the following:

- ✓ Water overflowing the curb and entering adjacent property leading to damage.
- ✓ Accelerated roadway deterioration and public safety concerns may occur due to excessive water accumulation on roadways.
- ✓ Over saturation of the roadway structural section due to immersion will lead to pavement deterioration.

Tooleville does not currently have a storm drainage system.

## Solid Waste

Solid waste disposal services for the Community of Tooleville is provided by USA Waste, a private company. Solid waste generated in Tooleville can be disposed of at Road 80 Landfill, located at 8614 Avenue 328, Visalia, California.

## Roads

Road conditions are of the highest concern to the residents of Tooleville. It is reported that road conditions are poor and most roads need work, roads have potholes, cracks and bumps. This makes residents concerned with both driving conditions and walkability. Road conditions are described as poor and most of the roads in town need work. Tooleville roads are not regularly maintained and the few times that roads have been serviced, the repair work was poor because the roads were patched and not repaired.

The following roads are a priority to the residents:

- Alfred
- Morgan

There are several roadways in Tooleville that are in need of repair. Over time, roadway pavement can become damaged or begin to fail due to fatigue, aging, or surface abrasion. The binding agent within road pavement becomes rigid and less flexible as time passes and the surface of the pavement may start losing aggregates. If timely maintenance does not occur, potholes will start to occur within the road.

# TOOLEVILLE LEGACY PLAN

---

If the road is still structurally sound, a bituminous surface treatment, such as a chip seal or surface dressing can prolong the life of the road at low cost. Such repairs are considered medium if the maintenance strategy consists of:

- ✓ Chip seal - surface treatment in which the pavement is sprayed with asphalt and then immediately covered with aggregate and rolled. Chip seals are used primarily to seal the surface of a pavement with cracks not associated with heavy loads.

Some roadways require more extensive repairs such as resurfacing, grinding, remix and or reconstruction. These repairs are considered major if the maintenance strategy consists of:

- ✓ Grind and remix - process by which construction materials are recycled and reused to add structure to roadways.
- ✓ Overlay resurfacing operation - consists of grinding off selected areas of old asphalt, patching any potholes, placing a fabric (in some cases), placing and compacting hot mix asphalt pavement, and adjusting any street hardware.
- ✓ Asphalt reconstruction - consists of excavating the entire roadway, placing and compacting rock beneath the roadway, and placing and compacting hot mix asphalt.
- ✓ Cold mix reconstruction - similar to asphalt reconstruction except cold mix asphalt is used. It is commonly used as patching material and on lower volume service roads

**Table 14** lists the roadways, the limits, and type of maintenance, and the date the roadways last repaired.

Table 14 - Road Maintenance Strategies				
No.	Roadway	Limits	Repair Code	Date Repaired
1	Alfred Avenue	Spruce Road - End	CHIP	2011
2	Morgan	Spruce Road - End	CHIP	2011

OLAY = overlay resurfacing operation

CHIP = chip seal

GRX = grind and remix

ACST = asphalt reconstruction

RCST = cold mix reconstruction

## Street Lights

The County typically provides street lighting at major road intersections in the communities but does not provide mid-block lighting as is typical within cities. Tooleville has street lighting at one (1) location. Overhead utility poles are prevalent in Tooleville. These utility poles provide electricity and telephone service to residences and businesses in Tooleville and are located within the County right-of-way (see **Table 15**).

# TOOLEVILLE LEGACY PLAN

**Table 15 - Streetlight Site Inventory - Tooleville**

Streetlight Site Inventory					
Streetlight Locations					
Community	Main Road	Crossroad	Side	Corner	Location Detail
Tooleville	E Firebaugh Ave (Ave 276)	Spruce Ave (14th Ave E)		N/E	

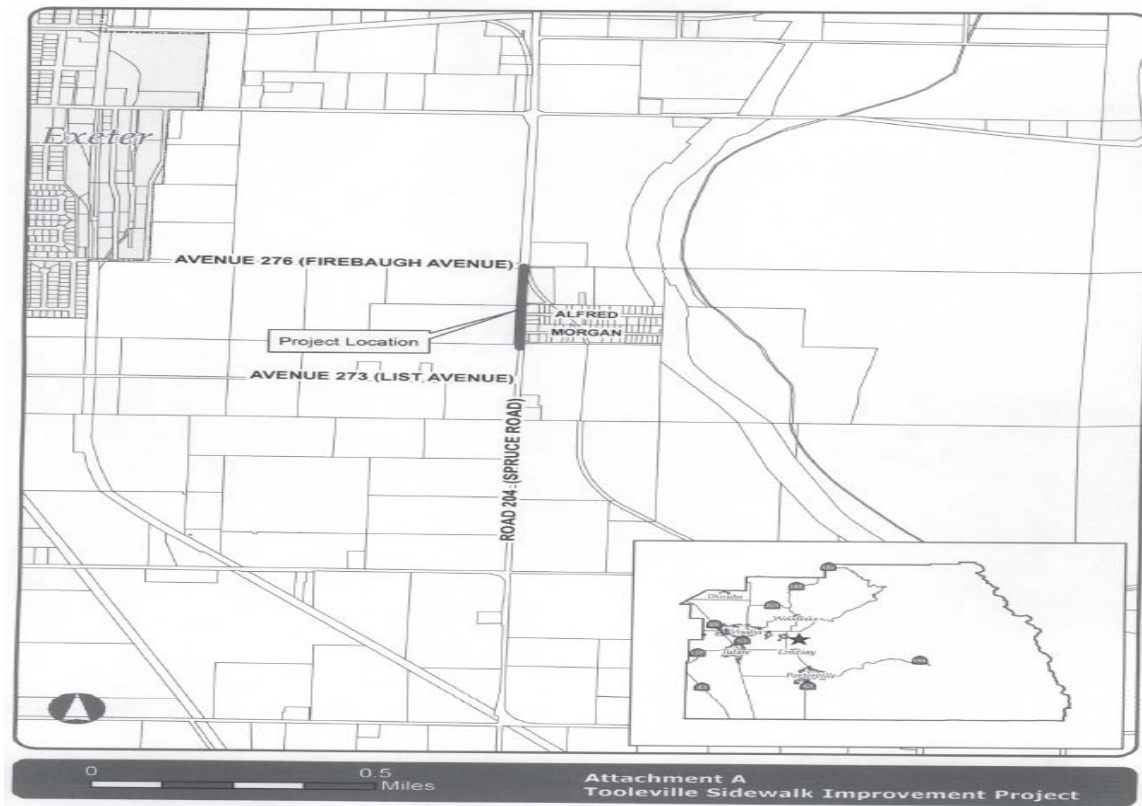

## Sidewalks

There are currently no sidewalks located within the interior streets in Tooleville. A sidewalk project was completed in 2016 along the frontage of Road 204 in Tooleville.

## Tooleville Sidewalk Improvement Project (2016)

The project consisted of construction of approximately 765 linear feet of curb, gutter, sidewalk, and associated drainage improvements along Road 204 (Spruce Road) from Morgan Avenue to Alfred (see **Figure 8**). The project included the construction of a bus pullout that accommodates two school busses. All improvements were constructed to meet current Americans with disability Act (ADA) requirements. The Construction of the Tooleville Sidewalk Improvement Project was completed in August of 2016.

**Figure 8 - Sidewalk Improvement Project**

# TOOLEVILLE LEGACY PLAN

---

## ADA Curbs

“The Americans with Disabilities Act (ADA) of 1990 included design requirements for persons with disabilities in the public rights-of-way. Curb ramps are an important part of making sidewalks and street crossings accessible to people with disabilities (especially those who use wheelchairs). An ADA compliant curb ramp is a short ramp cutting through or built up to a curb. It consists of the ramp itself which is sloped to allow wheelchair access from the street to the sidewalk and flared sides that bring the curb to the level of the street.

## Transit and Bus Stops

Recognizing the need to provide transportation services to those who are disadvantaged, the County of Tulare provides public transportation services to the elderly, handicapped, low-income, and residents without access to transportation. Public transit is only available in Tooleville through the Dial-A-Ride Service. Public transit is only available in Tooleville through the Dial-A-Ride Service.

The Tulare County Transit Agency (TCAT) operates fixed-route services that link communities with each other and with Visalia and Tulare’s urban transit systems. Tulare County Transit Agency (TCAT) operates Dial-A-Ride Service Monday through Friday. Reservations must be placed the day before planned trip for a curb to curb trip on Dial-A-Ride. (see TCAT website at: <http://www.tularecounty.ca.gov/rma/index.cfm/public-works/tulare-county-area-transit-tcat/>).

TCAT vehicles are wheelchair accessible and all full size buses include bike racks. As such, public transit is likely to remain a limited option due to fiscal constraints and the high cost of providing services to a community of less than one thousand residents. The low level of auto congestion in Tooleville, now and as forecasted into the future, suggests that driving will continue to be more convenient in rural communities than the use of transit for those with access to a private car.

## AMTRAK

The Hanford AMTRAK station, located approximately 35 miles to the west in Kings County, is the closest station to Tooleville providing passenger rail service. The San Joaquin Joint Powers Authority (SJJPA) is comprised of ten agencies (including TCAG) currently oversees the operation of seven daily trains serving this station. Service is provided to points north including San Francisco and Sacramento and to points south including Bakersfield and the Los Angeles basin (via connecting Amtrak Thruway) bus service.

## Aviation

The nearest operational general aviation airport is Visalia Municipal Airport, approximately 25 miles west, offers passenger service to Los Angeles. A community general aviation airport is located in Exeter (formerly known as Thunderhawk Field), approximately 5 miles southwest of Tooleville.

Fresno Yosemite International Airport (FAT), approximately 70 miles northwest of Tooleville, is the principal passenger and airfreight airport in the central San Joaquin Valley. Meadows Field, Bakersfield’s principal commercial airport, is approximately 80 miles southwest of Tooleville and offers direct flights to several destinations.

## Energy Natural Gas/Electricity

Southern California Edison (SCE) is the main provider of electrical power in Tulare County, which maintains an extensive network of high-voltage and low-voltage electrical lines, substations, natural

# TOOLEVILLE LEGACY PLAN

---

gas mains, and related facilities. In addition to power produced by its plants, SCE purchases power from other producers for use within its service area.

On a region wide basis, electrical demand has increased while the available power supply has remained fairly constant. As a result, during peak demand periods, the reserve capacity of the overall system has dropped at times to under 3%. In response, SCE has planned for more stringent measures as reserve capacity diminishes. These measures include voluntary cutbacks, cutbacks for major users with whom SCE has arrangements, and rolling blackouts.

## Internet Access

Most families in Tooleville do not have internet access at their homes. Any available internet service is unreliable and expensive. Residents are told by internet providers that there is not a tower in their area and that is why internet service is either unreliable or very expensive compared to what it costs in nearby cities. This is a major problem to residents, without access to the internet, they are unable to do very basic things such as online job hunting, applying for resources, and providing homework help to their kids. Internet access ranked as a high priority improvement need in Tooleville.

## PUBLIC SERVICES

### Sheriff

The Tulare County Sheriff Department (TCSD) Main Office located at 2404 W. Burrel Avenue, in Visalia, approximately 20 miles west of Tooleville is responsible for providing police protection and for patrolling the community of Tooleville. Residents report that the TCSD response time is long and that there is too little Sheriff Patrol within the community. Residents are worried about the rate of unreported crimes and crimes that go un-responded to. People feel that the limited presence of law enforcement contributes to the local crime rate and makes criminals feel unstoppable in that area of Tooleville. Tooleville residents are asking for increased Sheriff Presence in their community.

### Fire

Tulare County and all of the incorporated cities have a mutual-aid agreement for fire protection services. The proximity of the nearest City or County fire station varies significantly between the unincorporated communities. There is one (1) County fire station in the Exeter area. County Fire Station #11 is located at 137 North “F” Street, is the closest station to Tooleville (two miles) and is shown in Figure 33-6.

There are currently no Fire Hydrants in Tooleville.

### Schools

Schools are an especially important component of a community. The quality of residential development is often measured by whether schools exist in close proximity to the neighborhood. As a result, schools are often a gravitational factor in attracting residential development to certain areas of a community. The Tooleville Area is within the Exeter Unified School District located approximately five (5) miles to the northwest.

### Library

# TOOLEVILLE LEGACY PLAN

“The Tulare County Public Library System is comprised of interdependent branches, grouped by services, geography and usage patterns to provide efficient and economical services to the residents of the county. At present, there are 14 regional libraries and one main branch.”<sup>6</sup> The Exeter Branch Library is located in Exeter approximately five (5) miles to the northwest (see Table 16).

Table 16 - Library Location & Hours		
Branch	Address	Service Hours (2017)
Exeter	Exeter Branch Library 230 East Chestnut Exeter, CA 93221-1712	Tuesday – Wednesday: 11:00 am – 5:00 pm 6:00 pm – 8:00 pm Thursday - Friday: 9:00 am – 1:00 pm 2:00 pm – 6:00 pm

Library hours current as of May 2017

## Parks

There are no County owned/operated public parks in Tooleville. In the community of Tooleville there is no available open green space area for children to play and adults to be physically active. The nearest park is located approximately four (4) miles away in the city of Exeter, survey results show that in Tooleville, children play in the street or do not play outside at all. Tooleville residents are concerned about the health and safety of their children, they are concerned that the safety of their kids is at risk when they play on the street and for the health of their children from lack of physical activity that comes from not having a safe place to be physically active.

## CIRCULATION AND TRAFFIC

### Circulation

For a land use plan to operate effectively, it is imperative that a comprehensive circulation plan be prepared. Existing roadways must have the capacity to expand as traffic counts increase, and new roads must be planned so that one part of the community can be connected to another.

Tulare County’s relationship to the State Route system, nearby counties, cities, and communities

“The purpose of the highway, streets and roads section is to identify the existing regional circulation system and determine both feasible short-term and long-range improvements. Tulare County's planned circulation system consists of an extensive network of regional streets and roads, local streets and State Highways. The system is designed to provide an adequate [Level of Service] LOS that satisfies the transportation needs of County residents. However, Tulare County has experienced a large increase in population and is beginning to outgrow portions of the circulation system. The need for major improvements to the State Highways, streets and roads network is an important issue.

The existing State Highway system was completed in the 1950's and 60's. The average design life of a State Highway is approximately 20 years and many Tulare County's highways were constructed 50 years ago. The Agricultural and commercial industry continue to utilize the circulation system to get products to market. With industry intensification and other development, many facilities are beginning

<sup>6</sup> General Plan Background Report, page 7-96

# TOOLEVILLE LEGACY PLAN

---

to show structural fatigue (e.g., surface cracks, potholes, and broken pavement).”<sup>7</sup>

## Traffic

“Tulare County is linked to Fresno County and Kern County principally by State Route 99. This route provides the only continuous north-south route through the County and is heavily used for regional travel. The entire length of State Route 99 in Tulare County and State Route 198 through Visalia and a portion of State Route 65 in Porterville are constructed to freeway standards.”<sup>8</sup>

**Freeways** provide for the ability to carry large traffic volumes at high speeds for long distances. Access points are fully controlled. Freeways connect points within the County and link the County to other parts of the State.

**Arterials** provide for mobility within the County and its cities, carrying through traffic on continuous routes and joining major traffic generators, freeways, and other arterials. Access to abutting private property and intersecting local streets shall generally be restricted.

**Collectors** provide for internal traffic movement within communities, and connect local roads to arterials. Direct access to abutting private property shall generally be permitted.

**Local Roads** provide direct access to abutting property and connect with other local roads, collectors, and arterials. Local roads are typically developed as two-lane undivided roadways. Access to abutting private property and intersecting streets shall be permitted.

## Existing Circulation and Transportation Conditions

Tooleville is a small agricultural community located adjacent to Road 204 (Spruce). The community of Tooleville is comprised of two roads, Morgan Avenue and Alfred Avenue. The major rural collector road is Avenue 204. There are no proposed major streets as part of this Legacy Plan.

## Patterns of Blocks and Streets

The prominent grid pattern of County roads provides efficient and direct collector routes that provide ease of travel from place to place.

## Complete Streets

The California Complete Streets Act (AB 1358) of 2008 was signed into law on September 30, 2008. Beginning January 1, 2011, AB 1358 requires circulation elements to address the transportation system from a multimodal perspective. The bill states that streets, roads, and highways must “meet the needs of all users in a manner suitable to the rural, suburban, or urban context of the general plan.” The Complete Street roadway typically includes sidewalks and sidewalk amenities, transit shelters and facilities whenever there is a route along the corridor, and provisions for bicycle facilities.

# TOOLEVILLE LEGACY PLAN

---

## GOALS, OBJECTIVES AND POLICIES

This Section of the Tooleville Legacy Plan prescribes the land use policy framework which will govern the development of the community through the year 2030. It includes text, which sets out explicit policy statements about the quality, character, and manner in which development in the community will take place. The land uses in all the Legacy Boundaries are proposed to reflect a “mixed use land use designation.” The following land use designations and descriptions, with densities and intensities are recommended for Tooleville to address land demand needs through the 2030 planning horizon year.

Goals, objectives and policies are the fundamental building blocks of the planning process. Goals describe the desirable results to which the plan is committed while objectives describe the intermediate steps or achievements which must be taken to reach the goals. Policies describe more specific actions or processes which must be undertaken in order to achieve objectives. The goals, objectives and policies of this community plan are based on those contained in the Tulare County 2030 General Plan, Tooleville Legacy Plan, and input received from Tooleville citizens during the public outreach process. The goals, objectives and policies are divided into four categories: Community Development, Housing, Economic Base, and Environmental Quality.

It is important to recognize that County policies reflect the unique attributes of the various locations and geographic areas in the County. As such, there are policies applicable to one area of the County that are not applicable to others based on natural setting, topography, habitat, existing development, or other attributes which are unique within the planning context of the County. The following planning goals, objectives, policies and standards reflect, as applicable, the rural, suburban, or urban contexts of the Legacy planning areas designated by the County.

### **Community Development**

#### **GOAL I: Foster a cohesive community with easy access to necessary services and support facilities**

Objective: Prevent premature urban-type development on agriculturally productive lands.

Policies:

1. Encourage in-filling of vacant land and compatible development on underdeveloped land as a priority before development of agriculturally productive lands.

#### **GOAL II: Avoid land use conflicts through planning separation of uses.**

Objective: Promote concentrations of similar or compatible uses.

Policies:

1. Establish areas zoned exclusively for commerce and residences consistent with the policies in this plan.
2. Phase-out existing nonconforming concerns within planned residential areas through appropriate zoning amortization procedures.
3. Locate high density residential uses in close proximity to planned commercial areas.
4. Require public, quasi-public and high density residential uses to locate where direct access to major streets is available.

# TOOLEVILLE LEGACY PLAN

---

5. The County shall cooperate with all affected school districts to provide the highest quality educational services and school facilities possible.
6. The County shall work with the Schools to provide safe routes to school.
7. The County of Tulare will solicit recommendations from all interested public agencies on matters regarding the Tooleville Legacy Plan.
8. The Tooleville Legacy Plan should be reviewed every five years to determine if amendments are appropriate.
9. When considering any land use proposal, capital expenditure or other matters of community importance, the County of Tulare will request input from the local service district and other affected agencies.

Objective: Provide for appropriate buffers between areas set aside for commercial activities and single family residential uses.

Policies:

1. Require adequate setbacks, side and rear yards, landscaping and screening between living and working areas.
2. Utilize roadways, railroad right of ways and other physical features to separate planned living and working areas.

## Housing

**GOAL I: Provide safer and adequate housing for all citizens within the community.**

Objective: Reduce deficiencies in existing housing stock.

Policies:

1. Apply the health, safety and welfare standards of the Tulare County Ordinance Code, which may require demolition of

vacant substandard housing units.

2. Encourage relocation of families from substandard housing units by expanding affordable housing opportunities within the community.
3. Inform potential rehabilitators of substandard housing that incentives such as reduced building permit fees are available.
4. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to initiate home maintenance/repair programs in Tooleville.

Objective: Encourage new housing construction within the community to meet the needs of low and moderate income residents.

Policies:

1. Enable the housing industry to proceed with construction in a timely and cost-efficient fashion by providing adequate amounts of residential zoning.
2. Assure that the housing industry is made aware of residential development potentials in Tooleville.
3. Coordinate residential zoning with availability of utilities and community services.

4. Provide adequate amounts of residential zoning to encourage the housing industry to proceed with construction of residential development in a timely and cost-efficient fashion.
5. Encourage housing advocacy groups, such as Habitat for Humanity and Self-Help Enterprises, to construct new housing.

Objective: Provide a role for mobile homes in satisfying community housing needs.

Policies:

# TOOLEVILLE LEGACY PLAN

---

1. Allow for development of mobilehome parks in appropriate locations.
2. Permit mobilehomes to be installed on residentially designated lots within the original townsite; however, mobilehomes shall not be allowed to occupy more than 25% of such lots.
3. Discourage mobilehomes on individual lots outside the original townsite, except when necessary for caretaker use in conjunction with commercial activities.
4. Require skirting or some other type of architectural screening to improve mobilehome appearance and safety.
5. Provide a role for mobilehomes and travel trailers in satisfying the seasonal housing needs of migrant populations.

## **Economic Base**

### **GOAL I: Develop a strong and diversified economy.**

Objective: Provide sufficient land for commercial development to meet the needs of the community and region and strengthen and maintain a viable community economy.

#### **Policies:**

1. Promote a concentration of commercial activities within selected areas to allow for cost efficient provision of necessary services and to protect residential neighborhoods.
2. Reserve areas with convenient highway access for highway-oriented commercial development, thereby encouraging outside cash flow into the community.

Objective: Provide the services necessary to support new commercial development.

#### **Policies:**

1. Encourage the Tooleville to give priority to community service development in the areas reserved for commercial growth on the plan.
2. Place emphasis on development and upgrading of water supply facilities to meet fire protection standards in planned commercial areas.

Objective: Provide the necessary safe guards to attract quality commercial development to the community.

#### **Policies:**

1. Assure that commercial developments are designed so that traffic will not impact upon residential areas.
2. Develop standards for signs, landscaping, and fencing to improve the attractiveness of commercial areas.

## **Environmental Quality and Public Safety**

### **GOAL I: Preserve and enhance the quality of life for present and future generation of Tooleville citizens.**

Objective: Upgrade the level of community health, sanitation and safety.

#### **Policies:**

1. Encourage capital improvements (curbs, gutters, streets paving, lighting, etc.) within existing developed areas which will upgrade the community image and improve safety.
2. Tulare County shall, within its authority, protect the public from danger to life and property caused by fire.
3. Tulare County shall, within its authority, protect the public against crime against people and property.

# TOOLEVILLE LEGACY PLAN

---

Objective: Provide sufficient open space for community recreation needs.

Policies:

1. Encourage reservation of open space for recreational purposes in conjunction with future residential developments.
2. Facilitate innovation in housing and subdivision design so that private recreation and open space areas can be accommodated.

Objective: Prohibit to the extent allowed by law activities that will have a significant adverse effect on the environmental quality of Tooleville.

Policies:

1. Prohibit to the extent allowed by law residential development in excess of seven families per acre, until a sewage collection system is constructed.
2. Require a sufficient lot area for all new residential development to ensure an adequate area for on-site sewage disposal until a sewage collection system is constructed.
3. Prohibit to the extent allowed by law new intensive animal raising operations within the "windshed" area of Tooleville.

# TOOLEVILLE LEGACY PLAN

---

## ECONOMIC DEVELOPMENT

Tulare County's current Economic Development Strategy focuses on the agricultural industry and pursuing grants. In rural areas, elimination of all barriers to economic development is the foundation for growth. This Plan addresses the following four potential barriers to Economic Development.

**Infrastructure** In order for more development to occur, service levels for water to be expanded. Grant funding is needed to increase service levels.

**Use Permits** There are a number of uses that currently require Planning Commission approval. In many cases, these uses are beneficial for the community and do not necessarily need discretionary review. In order to reduce the cost of and length of time to obtain entitlements, use permit requirements are being reduced.

**Education** Tulare County has five satellite campuses for four year universities: California State University-Fresno, University of California- Davis, Fresno Pacific University, Brandman University, and the University of Phoenix. Community Colleges in Tulare County include the College of the Sequoias, Porterville College, and San Joaquin Valley College. Workforce Development Partners include Proteus Inc., and CSET.

**Health Care** The nearest hospital is in Visalia, approximately 13 miles away, and it takes approximately 20 minutes for the nearest ambulance to get to Tooleville from Visalia.

## LEGACY DEVELOPMENT BOUNDARY

The initial Legacy Development Boundary planning area contained approximately 21.3 acres (**see Table 17**). At the request of the community, an area to the north of the existing developed community was added to the initial planning area of the project. The northern addition of approximately 17.4 acres increases Tooleville's proposed Legacy Boundary to approximately 38.7 acres.

## LAND USE CHANGES

### General Plan Land Use and Zoning District Updates

As part of this Legacy Plan for Tooleville, there are a number of land use changes. These changes are described below:

As suggested earlier, and based on the forecasted growth and the recommended Legacy Development Boundary in the Opportunities and Constraints Analysis, the Land Use Plan map (see **Table 18**) and Zoning Plan (see **Table 19**) have been updated.

<b>Table 19 - Proposed Land Use</b>

## IMPLEMENTATION STRATEGY

The purpose of this section is to prescribe a proposed approach to implement the General Plan recommendations contained in the Tooleville Legacy Plan. The following components comprise the Tooleville Community Plan implementation strategy:

**Limitation of the A-1 Zoning District.** Zoning Code Changes (changes to Use Permit issuance, eliminating the SR Combining Zone, Mixed-Use Overlay District, Zoning Map Update), Complete Streets/Safe Routes to School

**Zoning District Changes** As part of this Implementation Program for the Tooleville Legacy Plan, there are a variety of changes to existing zoning districts. These changes are described below.

**Chapter 16 of the Zoning Code** Revise Chapter 16 of the Zoning Code to limit the uses that require a Use Permit. As part the Economic Development Strategy, use permit requirements are streamlined to allow for uses to be developed without discretionary review. That is, proposed uses will not have to undergo an approval process that involves a decision making action by the Tulare County Planning Commission or Board of Supervisors. Project design features and Administrative approval will serve as the mechanism to allow (regulate) land uses, activities, densities, and other conditions typically applied through the special use permit process.

**Mixed Use Overlay District** This alternative involves the creation of a Mixed Use Zoning Designation for the Community of Tooleville.

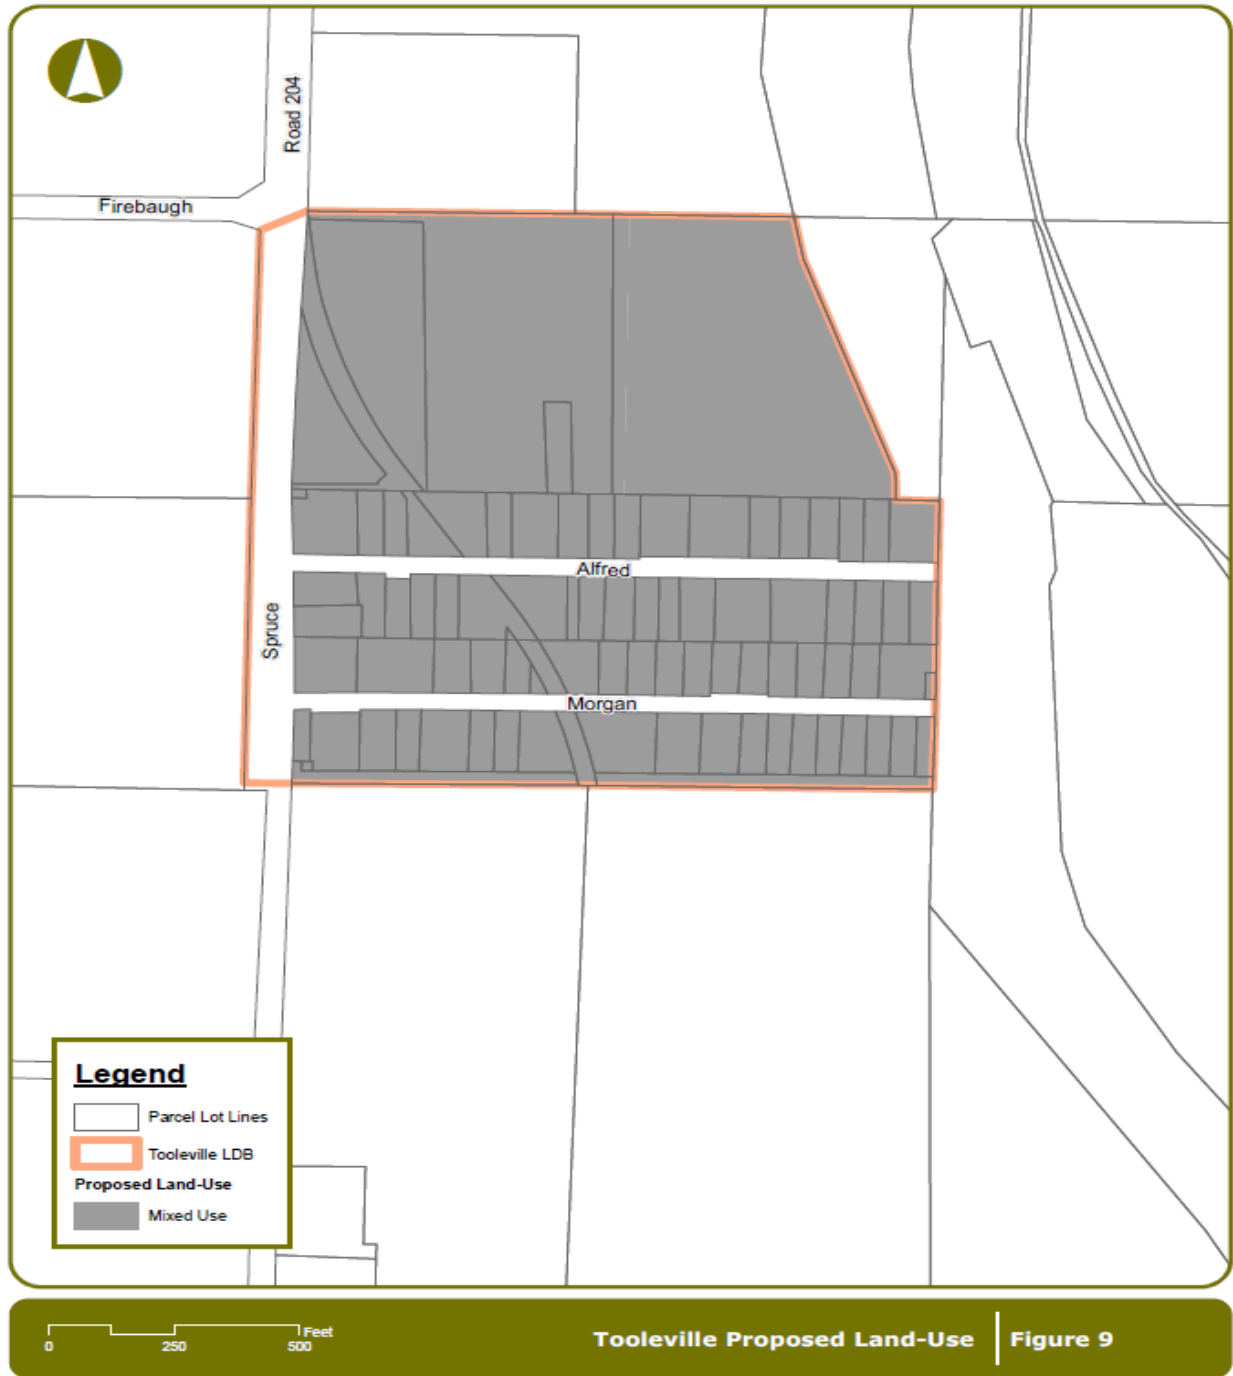

# TOOLEVILLE LEGACY PLAN

---

**Zoning Map Update** The current Zoning Map (**see Figure 10**) for Tooleville will be amended to be compatible with the Land Use Map outlined in the General Plan (**see Figure 9**). There are a couple of zoning district changes that are proposed to allow the General Plan and Zoning Ordinance to be in conformity with each other (**see Figure 11**) Tooleville Proposed Zoning).

# TOOLEVILLE LEGACY PLAN

## A-1 Use Permit Requirement Changes (Zone Change Text)

### Additional By-Right Uses

All of the following, and all structures and accessory uses directly related thereto in this section are entitled without a Special Use Permit (Conditional Use Permit). The following is allowed only in the various zones indicated below and within a community plan that adopted development standards for such entitled use. The proposed use must adhere to the adopted development standards of the community. The proposed use must also qualify for an exemption under the California Environmental Quality Act as determined by the Permit Center. The Permit Center will review the project for General Plan Policy, Community Plan Policy and development standard consistency and determine which environmental document is appropriate. Projects where the Permit Center is unable to make an immediate determination will be required to go through the Project Review Committee (PRC).

Uses that have an environmental effect on adjacent properties or necessitate mitigation measures through the California Environmental Quality Act will be required to apply for a PRC and a traditional use permit and legislative process through the County. These uses may have environmental or land use issues that may not be compatible with adjacent uses. These impacts may include but are not limited to; hours of operation (night time), noise (i.e. power tools such as impact drivers, or loudspeaker, etc) air quality (idle running vehicles) traffic, (number of vehicles) and odor. The Permit Center process is to determine the whether the use is by right or must go through the traditional use permit process. The following uses and zones shall be considered:

Permitted Uses		
Zoning District Uses	New Entitled Zone	Prior Entitled Zone
Animal hospital, clinic, and veterinarian office wherein only small/domestic animals (i.e. dogs, cats, etc.) are treated. Structure < 10,000 sq. ft.	C-1, C-2, C-3, M-1, M-2	
Antique and art store. Structure < 10,000 sq. ft.	C-2, C-3, M-1, M-2, R-3	C-2, C-3, M-1
Antique store containing less than one thousand (1,000) square feet of floor area	C-1, C-2, C-3, M-1, R-2, R-3	C-1, C-2, C-3, M-1
Apartment Hotel Structure < 10,000 sq. ft.	O, CO, C-1, C-2, C-3, M-1, R-3	O
Apparel stores. Structure < 10,000 sq. ft.	CO, C-1, C-2, C-3, M-1, R-3	C-1, C-2, C-3, M-1

# TOOLEVILLE LEGACY PLAN

## A-2 Section 18 Mixed Use Overlay District (Zone Change Text)

The following regulations shall apply in the community of Tooleville, unless otherwise provided in this Ordinance.

### A. PURPOSE

The purpose of this zone is to allow for mixed uses. Allowing a mix of uses promotes flexibility in the types of entitlements that can be issued. Economic Development can be pursued with a wide variety of development potential. In addition, mixed use can allow for decreased vehicles miles traveled if residential uses are mixed with uses for employment.

### B. APPLICATION

This overlay zone only applies to the communities of Ducor, Terra Bella, Traver, Strathmore, Pixley, Tipton, Tooleville, Jovista, Matheny Tract and Tooleville..

### C. USE

No building or land shall be used and no building shall be hereafter erected or structurally altered, except for one or more of the following uses allowed in this this overlay zone are outlined in the community plan for Tooleville.

Within the Mixed Use Zoning District, all uses outlined in the M-1, C-3, C-2, C-1, R-1, R-2 and R-3 uses are allowed. Uses and activities that are found by the Planning Director to be similar to and compatible with those specific zoning districts are also allowed. In addition, use and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed.

All conditional uses allowed in these zoning districts shall also be allowed by right with exception of the following combination of uses: All uses shall not be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood, or to the general welfare of the county. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards to be considered an allowed use without the need for a special use permit. All allowed uses are subject to the determination of appropriateness by the Director of Planning.

Uses/Combination of Uses reviewed by Planning Commission
Auto wrecking and Residential
Battery Manufacture and Residential or Commercial
Biomass Fuel Production and Residential
Flammable Liquids over 10,000 gallons
Hazardous Waste Facility
Planning Mills and Residential or Commercial
Sand blasting
Slaughterhouse and Residential
Solid Waste Recycling and Residential
Super service stations and Residential
Airport
Heliport

# TOOLEVILLE LEGACY PLAN

---

The Director of Planning has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

## **D. DEVELOPMENT STANDARDS**

1. Height: No building or structure hereafter erected or structurally altered shall exceed six (6) stories or seventy five (75) feet to uppermost part of roof.
2. Front Yard: 0 Feet
3. Side Yard: Where a lot abuts upon the side of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a side yard of not less than five (5) feet. Where a reversed corner lot rears upon a lot in any "R" Zone, the side yard on the street side of the reversed corner lot shall be not less than fifty (50) percent of the front yard required on the lots in the rear of such corner lot. In all other cases, a side yard for a commercial building shall not be required.
4. Rear Yard: Where a lot abuts upon the rear of a lot in any "R" Zone (R-A, R-O, R-1, R-2 and R-3), there shall be a rear yard of not less than fifteen (15) feet. In all other cases, a rear yard for a commercial building shall not be required.
5. Lot Area: The minimum lot area shall be ten thousand (10,000) square feet; provided, however, that where a lot has less area than herein required and was of record at the time this paragraph became effective, said lot may be occupied by not more than one (1) main building subject to the provisions of this Section.
6. Floor Area Ratio: The maximum Floor Area Ratio is 2. The Floor Area Ratio is the amount of square feet of all structure allowed on a parcel based on parcel size.
7. Distance between structures: The minimum distance between structures is 10 feet.
8. Parking: Off-street parking and loading shall be required in conformance with Section 15.
9. Fences, Walls, and Screening: Where the side or rear lot line of a site adjoins or is located across an alley from any "R" Zone (R-A, R-O, R-1, R-2, and R-3), there shall be a solid wall, fence or equivalent landscaping screening at least six (6) feet in height located along the common lot line, except in the required front or side yard. Open storage of materials and equipment shall be permitted only within an area surrounded and screened by a solid wall or fence or compact evergreen hedge (with solid gates where necessary), not less than six (6) feet in height, provided that no materials shall be stored to a height greater than that of the wall, fence, or hedge. Fulfillment of the requirement of this paragraph shall not be required for buildings and uses which were established in accordance with all applicable buildings and zoning regulations and which were existing in a commercial or manufacturing zone on the effective date of this paragraph, until such time as a permit or other grant of approval for expansion, alteration or development of property is approved by Tulare County.

# TOOLEVILLE LEGACY PLAN

---

## E. ALL OTHER DEVELOPMENT STANDARDS

All other Development Standards are included below and in the Community Plans for Ducor, Terra Bella, Traver, Strathmore, Pixley, and Tipton, and the Legacy Plans for Tooleville, Jovista, Matheny Tract and Tooleville. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate. Conformance to development standards is required for all development; however, the Planning Director, Planning Commission, or Board of Supervisors may provide exemptions to particular development standards when deemed appropriate.

### ARCHITECTURE

A-1 Entries to buildings should be individualized and clearly identifiable.

A-2 Retail spaces should be accessed directly from the sidewalk, rather than through lobbies or other internal spaces.

A-3 Entrances to upper story uses should not be as prominent as the primary entrances to first story uses.

A-4 The height of first floor commercial should have a minimum ceiling height of 12 feet.

A-5 Architecturally distinguish the ground floor from the upper façade, to form a visual base for the building. Create an intimate scale for the pedestrian environment.

A-6 Each building should have a defined base, body, and cap segment

A-7 Blank walls on ground floor facades adjacent to public sidewalks, public right-of-ways, and public spaces are prohibited.

A-8 Ground floor window openings should range between fifty (50) to eighty (80) percent of the ground floor façade adjacent to sidewalks and private and public plazas, patios, and courtyards. These window openings should consist of transparent “storefront” windows. Second story windows should not exceed fifty (50) percent of the total exterior wall surface.

A-9 Three-dimensional cornice lines, parapet walls, and/or overhanging eaves should be used to enhance the architectural character of the building.

A-10 Wall surfaces should not exceed 250 square feet without including some form of articulation. Acceptable forms of articulation include use of windows, varied reveal patterns, change in material, texture, color, or detail; and a change in wall plane location or direction.

A-11 Openings in the façade should be accentuated with paint, tile, shutters, awnings, planters, and/or other appropriate architectural features in order to create varied shadows and a rich visual texture.

A-12 Articulation and detailing of the exterior walls at the ground level, should be integrated with landscape features (trees, plants, walls, trellises, and unique land forms) to ensure an appropriate transition from ground to wall plane.

# TOOLEVILLE LEGACY PLAN

---

A-13 An equal level of architectural detail and landscaping should be incorporated into all sides of freestanding buildings, because they are generally visible from all sides.

A-14 Architectural details should be fully integrated into the design of the building to avoid the appearance of afterthought elements or elements that are “tacked on” to a building.

A-15 Finish materials that give a feeling of permanence and quality should be used at ground level facades.

A-16 A consistent use of window style, size, trims, and accents should be used to ensure a consistent character along the building façade.

A-17 Exposed structural elements (beams, trusses, frames, rafters, etc.) are acceptable when appropriately designed to complement the over design of the façade.

A-18 Tilt-up buildings should incorporate decorative trim, recessed/projecting panels, recessed windows/doors, accent materials, and varied roof height to increase visual interest.

A-19 New buildings located at the corner of the block may be more massive in scale than adjacent buildings to better define the street intersection.

A-20 Corner buildings should have a strong relationship to the corner of the intersection by incorporating a unique architectural element or detail at the corner; such as a tower or primary building entrance.

A-21 Corner buildings should present equally important facades of similar appearance on both streets.

A-22 Articulate side and rear facades in a manner compatible with the design of the front façade. Avoid large blank wall surfaces on side and rear facades which are visible from public areas. In these locations, display windows, store entrances, and upper windows are encouraged. When this is not feasible, consider the use of ornament, murals, or landscaping along large blank walls.

A-23 Remove alterations whose design and/or materials are not consistent with the overall character of the building.

A-24 Where off-street parking or an alley is provided behind a building, a secondary entrance to both first floor and upper floor uses should be provided at the rear of the building.

A-25 Locate and design required vents and access doors to minimize their visibility from public spaces.

A-26 Use high quality detailing for new buildings and replacement elements. For example, new or replacement windows should have sash and frame thicknesses and window depths which are similar to those of original or historic windows. Such level of detailing provides an interplay between light and shadow which adds interest and visual depth to the façade.

A-27 Loading docks, storage areas, and service facilities should be located at the rear of the building and screened from the street as necessary.

A-28 Conceal all electrical boxes and conduits from view, and position light sources to prevent glare for pedestrians and vehicles.

# TOOLEVILLE LEGACY PLAN

---

## **ROOFS AND AWNINGS**

RA-1 Awnings should be compatible with other awnings nearby, particularly those on the same building, when these awnings complement the architectural character of the building.

RA-2 Canopies and awnings should be compatible with the style and character of the structure on which they are located.

RA-3 Use matte canvas fabric for awnings; not vinyl, fiberglass, plastic, wood or other unsuitable materials. Glass and metal awnings may be appropriate for some buildings, but must be consistent with the architectural style of the building.

RA-4 Include architectural features such as awnings, canopies, and recessed entries that can protect pedestrians from inclement weather. Design these features as integral parts of the building.

RA-5 Awnings and canopies should not hang below the top of the first floor storefront window. In addition, awnings and canopies should be at least ten (10) feet above the sidewalk.

RA-6 Canopies and awnings should not project more than seven (7) feet from the surface of the building.

RA-7 Awnings and canopies that project into the public right-of-way should not impede pedestrian or vehicular movement.

RA-8 Roof forms, lines, masses, and materials should be continuous and consistent with the overall style, character, scale, and balance of the building.

RA-9 Roof overhangs and exposed structural elements should be designed to be consistent with the overall style and character of the building.

RA-10 Roof mounted HVAC equipment, ducts, vents, and other equipment should be screened from public view.

RA-11 Mansard roofs are prohibited.

RA-12 All flat roofs should have 90% of the roof area covered by solar panels. All sloped roofs should have 50% of the roof area covered by solar panels. Roofs should be painted or colored with a bright white (or similar color) with a reflective glossy finish.

## **SITE PLANNING**

SP-1 Place entrances to storefronts and other ground floor uses so that they are accessible directly from the public sidewalk, not internal lobbies.

SP-2 On corner sites, a prominent streetscape presence should be established and visual interest should be created by either locating buildings near the intersection to enliven the streetscape or using landscaping to frame the intersection. Parking areas immediately adjacent to intersections are discouraged.

SP-3 Structures and site improvements should be located and designed to avoid conflict with adjacent uses.

SP-4 Gates to parking areas should be designed with materials and color that are compatible with the site.

SP-5 Multi-story buildings that overlook private or common area open space of adjacent residences should be designed to protect privacy of these spaces.

# TOOLEVILLE LEGACY PLAN

---

SP-6 Gates to parking areas should be located to prevent vehicle stacking or queuing on the street.

SP-7 Primary site and building entry points are strongly encouraged to generate visual interest with special design features such as decorative or textured paving, flowering accents, special lighting, monuments, walls, shrubs, water features, and the use of sizeable specimen trees.

SP-8 To the extent feasible and practicable, parcels should share access driveways to minimize curb cuts and traffic congestion.

SP-9 Cul-de-sacs are inappropriate except when a freeway, railroad, or canal prevents connectivity.

SP-10 Block lengths should be short, averaging 200 to 300 feet. Maximum block length is be 500 feet.

## **LANDSCAPING**

LA-1 Projects should provide, and maintain, landscaped buffers between commercial uses and low-density residential uses, between industrial and residential uses, and between commercial and industrial uses. Plant material will be placed in a manner to suggest natural growth as opposed to a rigid barrier.

LA-2 A predominance of deciduous tree species is encouraged to shade western, southern, and southwestern exposures.

LA-3 The parking lot should not be the dominant visual element of the site as viewed from the street. Locate or place parking lots at the side and rear of buildings or use parking lot screening to soften their appearance. Screen parking lots: Utilize a hedge (recommended height of 36 inches) with a rolling berm to screen parking at the street periphery

(Minimum shrub container size should be 5 gallons.)

LA-4 Project sites should be designed so that areas used for outdoor storage, and other potentially unsightly areas are screened from public view. All service yards and outdoor storage areas should be enclosed or screened from view.

LA-5 Loading areas, access and circulation driveways, trash, and storage areas, and rooftop equipment should be adequately screened from the street and adjacent properties, as deemed necessary. To the fullest extent possible, loading areas and vehicle access doors should not be visible from public streets.

LA-6 Loading driveways should not back onto streets or encroach into landscaped setback areas.

LA-7 Loading doors should be integrated into building elevations and given the same architectural treatment where feasible.

LA-8 Utility equipment such as electric and gas meters, electrical panels, and junction boxes should be screened from view or incorporated into the architecture of the building.

LA-9 Utility devices, such as transformers and backflow preventers, should not dominate the front landscape area.

LA-10 All utility lines from the service drop to the site should be located underground.

# TOOLEVILLE LEGACY PLAN

---

LA-11 When security fencing is required, it should be a combination of solid walls with pillars and offsets, or short solid wall segments and segments with metal fencing. Chain-link fencing is strongly discouraged when facing public view and should only be used as interior fencing.

LA-12 Retaining walls at retention basins should utilize a stepped or terraced motif as a visual tool to maintain appropriate human scale.

LA-13 Retention basins visible to public view and common open spaces should be contoured and landscaped in a creative manner to minimize a harsh utilitarian appearance. When feasible, it is recommended to beneficially use the run-off storm water as supplemental watering for the landscape plants.

LA-14 Parking lot run-off should be routed through turf or other landscaping.

LA-15 Parking lots located adjacent to the sidewalks or right-of-ways should be screened to a height of thirty six (36) inches above the grade with landscaping and/or low high quality fencing.

## **REFUSE AND STORAGE AREAS**

R-1 Trash storage must be enclosed within or adjacent to the main structure or located within separate freestanding enclosures.

R-2 Trash enclosures should be unobtrusive and conveniently accessible for trash collection but should not impede circulation during loading operations.

R-3 Trash enclosures should be located away from residential uses to minimize nuisance to adjacent properties.

R-4 Trash and storage enclosures should be architecturally compatible with the project design. Landscaping should be incorporated into the design of trash enclosures to screen them and deter graffiti.

## **LIGHTING**

LI-1 Provide lighting at building entrances and for security at ground level.

LI-2 Lights should be shielded and point down toward the ground.

LI-3 Parking lot should have uniformly spaced night lighting.

LI-4 Well-lit sidewalks and/or pedestrian walkways should be located to provide safe access from the parking lot to the street sidewalk.

LI-5 Exterior architectural lighting should fully compliment a building's design and character. Light fixtures should work in conjunction (size, scale, and color) with the building's wall, roof.

LI-6 Street lighting features should be "pedestrian scale" at twelve (12) to eighteen (18) feet in height above the curb.

## **WALLS AND FENCES**

WF-1 Wall/fence design should complement the project's architecture. Landscaping should be used to soften the appearance of wall surfaces.

WF-2 Walls and fences within front and exterior side yards of commercial sites should be avoided.

WF-3 Unless walls are required for screening or security purposes they should be avoided.

# TOOLEVILLE LEGACY PLAN

---

WF-4 Security fencing should incorporate solid pilasters, or short solid wall segments and view fencing.

WF-5 Front yard fences should not abut the sidewalk. The fence should be set back from the sidewalk at least 2 to 3 feet to allow room for landscape materials to soften the fence and to ensure pedestrian comfort.

WF-6 Walls and fences should be designed in such a manner as to create an attractive appearance to the street and to complement the architecture of the industrial park.

WF-7 Gates should be provided in walls or fences where necessary to allow emergency access.

WF-8 High perimeter walls and walls topped with barbed wire, razor wire, or broken glass are strongly discouraged.

WF-9 Inordinately long walls or fences should be broken up by landscaping, pilasters, offsets in the alignment of the wall or fence, and/or changes in materials and colors.

WF-10 Chain link fences should not be visible from streets.

WF-11 Long expanses of fence or wall surfaces should be offset and architecturally designed to prevent monotony. Landscape pockets (12-feet wide by 3- feet deep) should be provided at 70-foot minimum intervals along the wall.

## **STREETSCAPE**

ST-1 A consistent pavement material of varied texture and color should be applied to all crosswalks to clearly define pedestrian crossings, to slow down traffic.

ST-2 Sidewalks widths, excluding curbs, should be a minimum of five (5) feet.

ST-3 Curb and gutters should be constructed with all new development.

ST-4 A planting strip, or tree lawn, 3 to 5 feet wide should be located between the sidewalk and the curb of the street. Existing tree lawns should be preserved.

ST-5 New street trees should be planted on the curb edge of the sidewalk in front of all new development projects.

## **SIGNAGE**

SI-1 Sign letter and materials should be professionally designed and fabricated.

SI-2 Each storefront with a ground floor entrance should be allowed two signs that should be attached to the building.

SI-3 All electrical conduits should be concealed from public view.

SI-4 For commercial uses, the primary wall sign should be in the space above a storefront and visibly oriented towards the street.

SI-5 For commercial uses, a secondary sign should be smaller than the primary sign and be oriented towards passing pedestrians. It should extend out perpendicular to the building façade and be mounted or hung from the wall beneath an awning or above a first floor window. The bottom of the wall-mounted sign should be located at least eight (8) feet above the sidewalk. The outer face of the sign should not extend more than four (4) feet from the edge of the building surface, and the maximum area of the sign should have no more than six (6) square feet.

# TOOLEVILLE LEGACY PLAN

---

SI-6 Signs should be designed to be compatible with building design in terms of relative scale, overall size, materials, and colors. No sign should dominate the façade. Signage elements should incorporate materials colors, and shapes that appropriately reflect and compliment the building's architecture.

SI-7 Large signs that dominate a building façade or the streetscape should not be permitted.

SI-8 Signage should be constructed of high quality, low maintenance, and long lasting materials. Except for banners, flags, temporary signs, and window signs, all signs should be constructed of permanent materials and should be permanently attached to the ground, a building or another structure by direct attachment to a rigid wall, frame, or structure.

SI-9 No more than twenty (20) percent of window area should be obstructed by signs, posters, advertisements, painted signs, and/or merchandise, and the top one half of the window should be permanently clear and free of obstructions. Awning signage should be of a replaceable-type to accommodate tenant turnover.

SI-10 Wall, canopy, under-canopy, and marquee signs should not exceed three-fourths (3/4) square foot of aggregated display area per lineal foot of frontage.

SI-11 Awning sign should be mounted on the hanging border of the awning and should not protrude beyond the awning surface.

SI-12 Wall signs or advertisements should not project more than twelve (12) inches from the wall face to which they are mounted, should not project beyond building eaves, and should be mounted flat throughout their length and height.

SI-13 Signs for individual tenants within a multiple-tenant, such as offices located above the ground floor, should be grouped together and appropriately scaled to a pedestrian-oriented retail environment.

SI-14 Fin signs or under marquee sign are permitted provided that they are installed with a minimum of eight (8) feet clearance from the lowest point on the sign and support to the top of the walking surface below it.

SI-15 Awning signs and face-mounted signs are permitted provided that the sign should have no more than one line of text and that maximum text height is twelve (12) inches.

SI-16 No signs should be erected in any manner in which the sign, in whole or in part, would create a hazardous condition to pedestrian or automobile traffic alike.

SI-17 Additional business signs should be permitted on windows and on the vertical face of awning valances provided that the signs are permanent in nature and of high quality.

SI-18 The following signs are strictly prohibited:

- Roof signs, signs located above the roof or parapet lines.
- Permanent banner signs.
- Posters.
- Painted window advertisements.
- Billboards
- Large auto-oriented pole-mounted or "lollipop signs."
- Moving signs and flashing signs.

# TOOLEVILLE LEGACY PLAN

---

SI-19 Signs advertising an activity, business product, or service no longer conducted on the premises, and/or signs frames, structural members, or supporting poles remaining unused for a period of six (6) months should be removed from the site or building by the property owner.

SI-20 Address markers should be easily identifiable and readable from the street.

SI-21 Freestanding, ground-mounted and monument signs should be not less than one (1) foot behind a property line or designated right-of-way for vehicular and pedestrian traffic, but in no case should be more than ten (10) feet behind a sidewalk and ten (10) feet from any vehicular entrance or driveway. These signs should not interfere with the safety of vehicular traffic entering or exiting the premises.

SI-22 The maximum height of monument signs should be five (5) feet above the top of concrete curb.

SI-23 One freestanding or monument sign with a maximum of thirty-two (32) square feet of display area should be allowed on each street frontage of more than fifty (50) feet. Where two (2) or more freestanding or monument signs are allowed on a single street frontage, one freestanding or monument sign with a maximum of fifty (50) square feet of display area may be used in lieu of several signs on the same frontage.

SI-24 All gateway signs should have a consistent character and style.

SI-25 A hierarchy of gateway signs should be established to differentiate between major and minor gateway entrances.

SI-26 Major gateway signs should be designed as visually prominent towers, monuments, or street spanning arches.

SI-27 Minor gateway signs should be visible to automobile traffic, but also be low enough to be visible to pedestrian traffic.

## **SERVICE STATIONS AND CAR WASHES**

SS-1 Service and carwash bays should not face residential properties or the public street. The visibility of service bays and carwash opening should be minimized.

SS-2 Gas pump canopies should be ancillary to the main building structure. The retail market/office building segment of the facility should be oriented along the street frontage, whenever possible.

SS-3 All structures on the site (including kiosks, carwash buildings, gas pump columns, etc.) should be architecturally consistent and related to an overall architectural theme.

SS-4 Canopy light fixtures should be recessed into the canopy.

SS-5 Outdoor equipment, such as vent risers and clean air separators, should be screened either with an enclosure or if site configuration topography permits, away from street view, screened with landscaping or located at a grade differential.

SS-6 Site-specific architectural design contextual to surroundings is strongly encouraged. Designs based solely on corporate or franchise models are strongly discouraged.

# TOOLEVILLE LEGACY PLAN

---

## **AUTO REPAIR SERVICES**

AR-1 Building design should be stylistically consistent, and compatible with surrounding buildings through use of similar scale, materials, colors, and/or detailing.

AR-2 Building materials should have the appearance of substance and permanency; lightweight metal or other temporary appearing structures are discouraged.

AR-3 Vehicle drop-off areas should be provided to prevent vehicle overflow to adjacent streets.

## **CONTRACTOR, BUILDING SUPPLY, OR LANDSCAPING YARDS**

BS-1 The main office or building should be located along the street frontage to screen outdoor sales and minimize the visibility of storage of materials and vehicles.

BS-2 Customer parking should be provided close to the building and not interspersed in the yard.

BS-3 All outdoor contractor vehicle storage areas should be enclosed with a screen of sufficient height and constructed with durable and high-quality materials that are compatible with the building and site.

## **CONSUMER STORAGE FACILITIES**

SF-1 The administrative office should be located in a building or building element that is human scale and located in proximity to the street.

SF-2 Parking for visitors should be located near the administrative office, outside of any gated portion of the facility.

SF-3 A storage facility should be consistent with its surrounding area in scale and appearance, through the use of building size transitions, architecture, and landscaping.

SF-4 Loading doors for individual storage units should not face outward toward streets.

SF-5 In order to break up the mass of larger buildings which containing storage units, provide horizontal and vertical articulation through the use of building offsets, windows, and variations in colors and materials.

SF-6 Any area intended for the storage of automobiles and recreational vehicles should be located towards the rear of the site or screened with an enclosure of adequate height

## **SPECIAL CONDITIONS**

SC-1 The project should emit no smoke or should reduce the amount of smoke from an existing use.

SC-2 The project should emit no fumes or should reduce the amount of fumes from an existing use.

SC-3 The project should implement dust control measures sufficient to minimize or prevent dust emissions. Measures should be consistent with, or more effective than, those required by the Valley Air District.

SC-4 The project should emit no odors or should reduce the amount of odors from an existing use.

SC-5 The project should not create noticeable vibrations.

THE GENERAL PLAN PARTS I, II AND PART III )  
AMENDMENTS (GPA 17-033) )

Resolution of the Tulare County Planning Commission recommending to the Board of Supervisors adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update set forth in attached Exhibit "A" and Mitigation Monitoring and Reporting Program (MMRP) set forth in Exhibit "B" for the entire Legacy Plans 2017 Update which consists of General Plan Amendment No. GPA 17-033 amendment to Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities & Services Elements, and Part II Rural Valley Lands Plan, and Part III (El Monte Mobile Village GPA 17-025; Hypericum GPA 17-026; Jovista GPA 17-027; Matheny Tract GPA 17-029 and Tooleville GPA 17-030 amending the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, Change of Zones No. PZC 17-025 El Monte Mobile Village; PZC 17-026 Hypericum; PZC 17-027 Jovista; PZC 17-029 Matheny Tract and Tooleville PZC 17-030, PZC 17-032 for an amendment to Section 16 of Ordinance No. 352, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Development Boundary, and Zone Ordinance Amendment No. PZC 17-031 establishing a Mixed Use Combining Zone in El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville (incorporated by reference herein). The unincorporated Legacy Communities are located within the Mount Diablo Base & Meridian as follows: El Monte Mobile Village, Section 12, Township 16S, Range 23E, Hypericum, Section 24, Township 19S, Range 25E, Jovista, Section 32, Township 24S, Range 26E, Tooleville, Section 12, Township 19S, Range 26E, Matheny Tract Section 22, 23, & 27, Township 20 south, Range 24 East.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California; and,

WHEREAS, the General Plan Amendment will accomplish the following: (1) update the Planning Framework Element, Land Use Element, Environmental Resources Management Element, Transportation & Circulation Element and the Public Facilities & Services Element; (2) add El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville to the Mixed-Use Combining Zone; (3) allow additional by-right uses within the aforementioned Legacy

Communities; and (4) rezoning of properties consistent with the Land Use Element, as amended; and,

WHEREAS, The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,

WHEREAS, The Board of Supervisors has given notice of the proposed amendment to the General Plan as provided in Sections 65355, 65090, and 65091 of the Government Code of the State of California. A public notice was printed in the Dinuba Sentinel on August 23, 2012 the Visalia Times Delta, Porterville Recorder, and the Tulare Advance Register on August 17, 2012 at least ten days prior to the public hearing before the Board of Supervisors on August 28, 2012.; and,

WHEREAS, this Addendum EIR and MMRP is for the Legacy Plans 2017 Update inclusive of: General Plan Amendment No. GPA 17-033 an amendment to the Planning Framework Element, Land Use Element, Environmental Resources Management and the Transportation and Circulation Element; Change of Zone No. PZC 17-031 an amendment to Section 18.9 the "MU" Mixed-Use Combining Zone; A Change of Zone for El Monte Mobile Village, Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista, Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract, Change of Zone No. PCZ 17-029 (Zoning District Map) and Tooleville, Change of Zone No. PZC 17-030 (Zoning District Map) within the respective Legacy Development Boundaries in conformance with the updated Land Use Element; Change of Zone No. PZC 17-032 an amendment to Section 16 to allow additional by-right uses in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities; and

WHEREAS, through a good faith and substantial analysis of environmental impacts from this Project in the Addendum EIR, staff found, and the Planning Commission agrees that a summary of impacts and potential mitigation measures is included in Table ES-4 of the RDEIR and contains: (1) environmental impacts; (2) mitigation measures; (3) significance before mitigation; and (4) significance after mitigation, and required additional mitigating policies and implementation measures are recommended for the following: (1) Land Use and Aesthetics; (2) Traffic and Circulation; (3) Energy and Global Climate Change; (4) Noise; (5) Geology, Soils, Seismicity, and Mineral Resources; (6) Hazardous Materials and Public Safety; (7) Public Services, Recreation Resource and Utilities; (8) Agricultural Resources; (9) Biological Resources; and (10) Cultural Resources; and; therefore, the Addendum EIR and MMRP were the appropriate level of environmental review under CEQA for this Project;

WHEREAS, the proposed Legacy Plans 2017 Update is consistent with the Tulare County General Plan and includes the following primary goals and objectives:

1. Land Use and Environmental Planning - Promote Economic Development within planning areas in order to implement the following General Plan goals:
  - a. Ensure that the text and mapping of the Community Plan Designations and Zoning Reclassifications address various development matters such as encouraging Agricultural Adaptive Reuse activities, recognizing Non-Conforming Use activities, and facilitating Ministerial Permit approvals through an amendment of the Land Use Element to incorporate use designations contained in the proposed Legacy Plans;
  - b. Encourage infill development within Legacy Development Boundaries, thereby discouraging leapfrog development within Tulare County;
  - c. Reduce development pressure on agriculturally-designated lands within the Valley Floor, thereby encouraging agricultural production to flourish;
  - d. Reduce vehicle miles travelled throughout the County, thereby reducing greenhouse gas emissions and positively affecting air quality;
  - e. Amend the Transportation and Circulation Element and incorporate circulation plan designations in the Legacy Plans. This will improve the community's circulation, transit and pedestrian transportation system by enabling the construction of key projects including Safe Routes to Schools, Complete Streets, and Bike Lanes/Pedestrian Paths; and
  - f. Promote Economic Development by reducing entitlement requirements and providing flexible land uses in a mixed use overlay zone, which will enable the County to adapt to current market conditions.
2. Improvements for a "disadvantaged community" - The legacy planning areas will be improved because of the following:
  - a. Faster project processing resulting in increased employment opportunities by the private sector, as proposed projects can be reviewed and approved expeditiously;
  - b. Increased housing grant awards that are consistent with the policies of the recently adopted General Plan Update and Housing Element; and
  - c. Enhanced infrastructure grant awards providing access to funding to upgrade road, water, wastewater, and storm water facilities.
3. Strengthening Relationship with TCAG - An important benefit of this expedited community plan process is the opportunity for RMA to strengthen the County's relationship with the Tulare County Association of Governments (TCAG), as this Community Plan will help to facilitate the funding and implementation of several key transportation programs such as Safe Routes to Schools, Complete Streets, and Bike/Pedestrian Projects. By pursuing these transportation programs through a collaborative process, there is greater probability of getting projects in the ground faster, thereby making the community safer and healthier by providing a more efficient transportation network.

WHEREAS, on September 15, 2017 a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

WHEREAS, the Planning Commission is the advisory body to the Board of Supervisors with respect to the Addendum EIR, MMRP and the Legacy Plans 2017 Update; and

NOW, THEREFORE, BE IT RESOLVED as follows:

1. This Planning Commission hereby recommends adoption based on the substantial evidence in the record that the analysis presented in the Addendum EIR and Mitigation Monitoring Reporting Program (MMRP) for the Legacy Plans 2017 Update General Plan Amendment 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Change of Zone No. PZC 17-025; Hypericum General Plan Amendment No. GPA 17-026; Change of Zone No. PZC 17-026; Jovista General Plan Amendment No. GPA 17-027; Change of Zone No. PZC 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; Change of Zone No. PZC 17-029; Tooleville General Plan Amendment No. GPA 17-030; Change of Zone No. PZC 17-030; Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9); Change of Zone No. PZC 17-032 (By-Right Uses–Section 16); and Amendments to General Plan Elements Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation, Public Facilities & Services, and Part II Rural Valley Lands Plan has been completed in compliance with the California Environmental Quality Act and the State Guidelines for the Implementation of the California Environmental Quality Act of 1970; and,
2. The Commission further finds that The County prepared a Final EIR for the 2010 draft Tulare County General Plan 2030 Update (SCH #2006041162) and released the Final EIR for public review on or about August 30, 2011. The FEIR for the General Plan 2030 Update was prepared in compliance with the CEQA (Public Resources Code Section 21000 et seq. and the CEQA Guidelines (California Code of Regulations, Title 14). The Final EIR was distributed on CD to the State Clearinghouse, and all agencies who commented on the RDEIR. Individual notices of the FEIR availability were sent to agencies, organizations, and individuals who commented on the RDEIR. The Final EIR was available in all Tulare County Libraries, at the Tulare County Resource Management Agency and the following website, <http://generalplan.co.tulare.ca.us>; and,
3. The findings made in regards to this Addendum EIR and Mitigation Monitoring and Reporting Program for the Project are recommended by the Planning Commission as the Lead Agency; and,

4. Consistent with Public Resource Code Section 21081 and Guidelines Sections 15091 through 15093 (including Public Resources Code section 21061.1 and Guidelines Section 15364 relating to the definition of "feasibility"), the Commission hereby makes various findings relating to the less than significant effects identified in the Project Addendum. Based on substantial evidence in the IS/MND and Pursuant to the discussion in each section of the Addendum EIR, and the Public Record of Proceedings, the Commission finds and declares that mitigation measures are required and that the Project will not cause a significant impact to the environment with adoption of these mitigation measures.

AND, BE IT FURTHER RESOLVED as follows:

A. The Planning Commission finds that Tulare County is required to undertake Mitigation Measures set forth in attached Exhibit "B" that are restrictive and applied only to the Legacy Plans 2017 Update. Therefore, the public will benefit from the Legacy Plans as it will implement the General Plan and advance socially desirable community improvements that are environmentally and economically sound.

B. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on October 27, 2017, by the following roll call vote:

Resolution of the Tulare County Planning Commission recommending the adoption of the proposed amendments to Part I Introduction; Component A-Planning Framework Element; Component B-Agriculture and Land Use Elements, Component C-Scenic Landscapes, Environmental Resources Management and Air Quality Elements; Component D-Transportation & Circulation and Public Facilities & Services Elements; and Part II Rural Valley Lands Plan of the Tulare County General Plan as set forth in Exhibits "A-1 to A-13" and Part III Community Plan as set forth in Exhibits "B-F" for the Legacy Plans 2017 Update General Plan Amendment No. GPA 17-033; inclusive of El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030 by the Board of Supervisors.

WHEREAS, the Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) which initiated the action to amend the Tulare County General Plan pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California, and

WHEREAS, the Planning Commission has given notice of the proposed amendment to the General Plan as provided in Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has made such investigation of fact bearing upon the proposed amendments to assure the action is consistent with the procedures and purposes set forth in the California Government Code, the State General Plan Guidelines, and other elements of the Tulare County General Plan, and

WHEREAS, staff has conducted multiple public outreach meetings in the Legacy communities as part of the Legacy Plans 2017 Update to receive public participation in shaping the Update, and

WHEREAS, on September 15, 2017 a notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, to consider the Legacy Plans 2017 Update, and

WHEREAS, a Public Hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017 and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded.

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA, prior to taking action on the proposed amendments to the Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan for the Legacy Plans 2017 Update.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings to be relevant in evaluating the proposed General Plan Amendment:

1. The amendment of the Land Use Element to incorporate the land use designations contained in the Legacy Plans 2017 Update is consistent with the Land Use Element of the Tulare County General Plan;
2. The amendment of the Transportation & Circulation Element to incorporate circulation plan designations contained in the Legacy Plans 2017 Update is consistent with the Transportation & Circulation Element of the Tulare County General Plan;
3. The Amendment of the Planning Framework Element to establish Legacy Development Boundaries as set forth in the Tulare County General Plan, Planning Framework Element, adopted by the Tulare County Board of Supervisors in August 2012;

4. The Amendment to the Environmental Resources Management Element to modify the urban expansion area in the open space element reflective of the establishment of legacy development boundaries consistent with the Planning Framework Element of the Tulare County General Plan;
5. The Amendment to Part I Introduction, Component A, Component B, Agriculture, Component C, Scenic Landscapes, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan is necessary to maintain consistency and uniformity regarding the application of policies and procedures relative to Communities, Hamlets, and the newly established Legacy Communities.
6. Amendments to the Zoning Ordinance to implement the Legacy Plans 2017 Update will reflect and remain consistent with the Land Use Plan for the community;
7. The proposed amendments are internally consistent with the Tulare County General Plan. Specifically, Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Transportation & Circulation and Public Facilities & Services Elements, and Part II Rural Valley Lands Plan of the Tulare County General Plan;
8. The Environmental Assessment Officer approved the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) prepared for the project;
9. Based on substantial evidence, the analysis presented in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for GPA 17-033 have been completed in compliance with the California Environmental Quality Act and the State Guidelines for the implementation of the California Environmental Quality Act of 1970.

AND, BE IT FURTHER RESOLVED as follows:

C. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH #2006041162).

D. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt General Plan Amendment No. GPA 17-033 the Legacy Plans 2017 Update set

forth in attached Exhibits “A-1 to A-13” and Part III Exhibits “B-F” which is incorporated by reference herein.

The foregoing was adopted upon motion of Commissioner Pitigliano, seconded by Commissioner Whitlatch, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

IN THE MATTER OF AN AMENDMENT TO           )  
SECTION 18.9 "MU" MIXED USE COMBINING    )  
ZONE OF ORDINANCE NO. 352 CONSISTENT     )       RESOLUTION NO. 9344  
WITH THE ADOPTED LEGACY PLANS 2017       )  
UPDATE, AS PROPOSED IN CHANGE OF ZONE    )  
NO. PZC 17-031                                 )

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Section 18.9 "MU" Combining Zone of Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibit "A," to include the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is

applicable for the proposed amendment to Section 18.9 “MU” Mixed Use Combining Zone of Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through mixed land uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of this Mixed Use Combining Zoning District is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicle miles traveled by locating residential uses within proximity of employment areas;
4. This Mixed Use Combining Zone update currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added;
5. Within the Mixed Use Combining Zone, all uses outlined in the M-1 (Light Manufacturing), C-3 (Service Commercial), C-2 (General Commercial), C-1 (Neighborhood Commercial), R-1 (Single Family Residential), R-2 (Two-Family Residential), and R-3 (Multiple Family Residential) uses are allowed. Uses and activities that are found by the Planning Director to be similar to, and compatible with, those specific zoning districts are also allowed. Uses and activities determined to be compatible by the Planning Commission and the Board of Supervisors with the above mentioned zoning districts are also allowed;
6. All conditional uses allowed in the M-1, C-3, C-2, C-1, R-1, R-2, and R-3 zoning districts shall also be allowed by right with the exception of the following uses and combination of uses: Auto Wrecking and Residential, Battery Manufacture and Residential or Commercial, Biomass Fuel Production and Residential, Flammable Liquids over 10,000 gallons, Hazardous Waste Facility, Planing Mills and

Residential or Commercial, Sand blasting, Slaughterhouse and Residential, Solid Waste Recycling and Residential, Super service stations and Residential, Airport, and Heliport;

7. All uses shall be non-detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the community, or to the general welfare of the County. All uses shall limit impacts related to smoke, fumes, dust, gas, noise, odor, vibrations and other hazards. All allowed uses are subject to the determination of appropriateness by the Director of Planning; and
8. The Planning Director has the option of deferring any land use application allowed in this district to the Planning Commission for review and decision.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 18.9 "MU" Mixed Use Combining Zone of Ordinance No. 352 will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update is applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZ 17-032, an amendment to Ordinance 352, Section 18.9 "MU" Mixed Use Combining Zone to include the communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update.

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed amendment to Section 16.H of Ordinance No. 352, it has reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed Change of Zone.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update and to promote sustainability through the allowance of Additional By-Right Uses while promoting economic development and prosperity in the Communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville;
3. The purpose of adding Additional By-Right Uses is to provide design flexibility, streamline the approval process, promote economic development, and reduce vehicles miles traveled by locating residential uses within proximity of employment areas; and
4. The allowance of Additional By-Right Uses currently only applies to the communities of Traver, Strathmore, Pixley, Tipton, Terra Bella and Ducor. The communities of El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville will be added.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the amendment to Section 16.H of Ordinance No. 352 to allow Additional By-Right Uses will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # State Clearinghouse No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve Change of Zone No. PZC 17-032 an amendment to Ordinance No. 352, Section 16.H to allow Additional By-Right Uses to include the communities of El Monte Mobile Village,

Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the adopted Legacy Plans 2017 Update, consistent with the Legacy Communities 2017 Update including affirmation that Section 16 H. is applicable in the Matheny Tract.

The foregoing was adopted upon motion of Commissioner Dias, seconded by Commissioner Pitigliano, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

AYES: Dias, Aguilar, Whitlatch, Millies, Gong, Pitigliano

Resolution of the Tulare County Planning Commission recommending that the Board of Supervisors amend Ordinance No. 352, the Zoning Ordinance as set forth in attached Exhibit "B" El Monte Mobile Village Rezoning Plan (PZC 17-025), to include the Legacy Community of El Monte Mobile Village, consistent with the adopted El Monte Mobile Village Legacy Plan 2017 Update, Exhibit "E" Hypericum Rezoning Plan (PCZ 17-026), to include the Legacy Community of Hypericum, consistent with the adopted Hypericum Legacy Plan 2017 Update, Exhibit "H" Jovista Rezoning Plan (PCZ 17-027), to include the Legacy Community of Jovista, consistent with the adopted Jovista Legacy Plan 2017 Update, Exhibit "K" Matheny Tract Rezoning Plan (PCZ 17-029), to include the Legacy Community of Matheny Tract, consistent with the adopted Matheny Tract Legacy Plan 2017 Update, Exhibit "N" Tooleville Rezoning Plan, to include the Legacy Community of Tooleville, consistent with the adopted Tooleville Legacy Plan 2017 Update.

WHEREAS, a petition has been filed pursuant to the regulations contained in Section 17 of the Tulare County Zoning Ordinance No. 352, and

WHEREAS, the Planning Commission has given notice of the Ordinance amendment as provided in Section 18 of Ordinance No. 352 and Section 65854 of the Government Code of the State of California, and

WHEREAS, staff has performed necessary investigations, prepared a written report made a part hereof, and recommended approval of this Ordinance amendment, and

WHEREAS, on September 15, 2017, a Notice of Public Hearing by the Tulare County Planning Commission was duly published in the Visalia Times-Delta, a newspaper of general circulation in Tulare County, and

WHEREAS, a public hearing was held and an opportunity for public testimony was provided at a regular meeting of the Planning Commission on September 27, 2017, and

WHEREAS, at Tulare County Planning Commission meeting, public testimony was presented by Mel Meleka, Principal Planner with the City of Tulare, who confirmed the City's position regarding wastewater treatment which was received and recorded, and

NOW, THEREFORE, BE IT RESOLVED as follows:

A. This Planning Commission hereby certifies that prior to taking action on the proposed Change of Zone, it reviewed and considered the information contained in the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) for compliance with the with the California Environmental Quality Act (CEQA), and the State Guidelines for the implementation of CEQA that were prepared for the Legacy Plans 2017 Update and is applicable for the proposed amendment to Ordinance No. 352.

B. This Planning Commission, after considering all of the evidence presented, including all comments received during the public review process, hereby determines the following findings were relevant in evaluating the proposed Change of Zone:

1. The Tulare County Board of Supervisors, on April 4, 2017, approved General Plan Initiation (GPI 17-001) to prepare a General Plan Amendment for Unincorporated Community Plans, Hamlet Plans and Legacy Plans pursuant to Title 7, Chapter 3, Articles 5 and 6 of the Government Code of the State of California;
2. The purpose of this proposal is to obtain the appropriate zoning consistent with the adopted Legacy Plans 2017 Update (GPA 17-033) and to promote sustainability through mixed land uses while promoting economic development and prosperity in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Communities;
3. The proposed changes in zone district designations identified in the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans are consistent with Tulare County General Plan policy.

C. This Planning Commission, after considering all of the evidence presented, hereby finds the proposed Ordinance amendment to be consistent with the purpose of Ordinance No. 352 and further finds the petition is in conformance with the adopted General Plan for the County of Tulare.

AND, BE IT FURTHER RESOLVED as follows:

D. This Planning Commission hereby recommends that the Board of Supervisors find there is no substantial evidence that the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Rezoning Plans will have a significant effect on the environment. And that the Addendum EIR and Mitigation Monitoring and Reporting Program (MMRP) that were prepared for the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update are applicable for the proposed amendment to Ordinance No. 352 and reflects the independent judgment of the County.

E. This Planning Commission hereby recommends that the Tulare County Board of Supervisors adopt the Addendum EIR and Mitigation Monitoring Reporting Program (SCH # No. 2006041162).

F. This Planning Commission hereby recommends that the Tulare County Board of Supervisors approve the El Monte Mobile Village Change of Zone No. PZC 17-025; Hypericum Change of Zone No. PZC 17-026; Jovista Change of Zone No. PZC 17-027; Matheny Tract Change of Zone No. PZC 17-029; and Tooleville Change of Zone No. PZC 17-030, an amendment to Ordinance No. 352, the Zoning Ordinance set forth in attached Exhibits "B" "E" "H" "K" and "N" Rezoning Plans consistent with the adopted El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville Legacy Plans 2017 Update (GPA 17-033).

The foregoing was adopted upon motion of Commissioner Whitlatch, seconded by Commissioner Dias, at a regular meeting of the Planning Commission on September 27, 2017, by the following roll call vote:

COUNTY ADMINISTRATIVE OFFICER/  
CLERK, BOARD OF SUPERVISORS

BY: *Michael C. Spata*  
Deputy Clerk

\*\*\*\*\*

That the Board of Supervisors:

1. Held Public Hearing at 9:30 A.M. or shortly thereafter; and
2. Certified that the Board of Supervisors has reviewed and considered the information contained in the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update is applicable to the General Plan Amendment and associated Zoning Ordinance Amendments for the Legacy Plans 2017 Update as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and the Mitigation Monitoring Reporting Program for the Legacy Plans 2017 Update (GPA 17-033); and
3. Adopted one General Plan Amendment No. GPA 17-033, for the Legacy Plans 2017 Update inclusive of the El Monte Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029); Tooleville (GPA 17-030) and Amendments to Tulare County General Plan Part III to establish Legacy Plans and Legacy Development Boundaries; Part I Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D,

Public Facilities and Services Elements, and Part II General Plan Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update; and

4. Waived the final reading and adopted Amendments to Section 18.9 and Section 16 of Tulare County Ordinance 352, the Zoning Ordinance, and Map Amendments to rezone properties consistent with the Legacy Plans as follows:
  - A. Zone Ordinance Amendment (PZC 17-031) to Section 18.9 to adopt a Mixed-Use Combining Zone within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - B. Zone Ordinance Amendment (PZC 17-032) to Section 16 to allow additional by-right uses within the El Monte Village, Hypericum, Jovista, Matheny Tract, and Tooleville Development Boundaries.
  - C. Zone Ordinance Amendments as set forth in the Zoning District Ordinance Maps for El Monte Village (PZC 17-025), Hypericum (PZC 17-026), Jovista (PZC 17-027), Matheny Tract (PZC 17-029), and Tooleville (PZC 17-030), consistent with the Legacy Plans 2017 Update; and
5. Adopted the findings of approval set forth in Planning Commission Resolution No. 9342 (Addendum to EIR), Planning Commission Resolution No. 9343 (Legacy Plans 2017 Update), Planning Commission Resolution No. 9344 (Section 18.9 Mixed Use), Planning Commission Resolution No. 9345 (Section 16 By-Right Uses), and Planning Commission Resolution No. 9346 (Zoning District Ordinance Maps); and
6. Authorized the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of El Monte Mobile Village, Hypericum, Matheny Tract, Jovista, and Tooleville to include the Mixed Use Combining Zone and additional by-right uses; and
7. Directed the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq; and
8. Directed the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file a Notice of Determination with the Tulare County Clerk; and
9. Authorized the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents; and
10. Approved more detailed findings contained in Exhibit "A" incorporated by reference herein.

## **EXHIBIT "A"**

### **A. Legacy Plans 2017 Update (General Plan Amendment 17-033)**

WHEREAS, on September 27, 2017 the Planning Commission held a public hearing on the Legacy Plans 2017 Update (GPA 17-033), which included an application for El Monte Mobile Village General Plan Amendment No. GPA 17-025; Hypericum General Plan Amendment No. GPA 17-026; Jovista General Plan Amendment No. GPA 17-027; Matheny Tract General Plan Amendment No. GPA 17-029; and Tooleville General Plan Amendment No. GPA 17-030, El Monte Mobile Village Change of Zone No. PZC 17-025 (Zoning District Map); Hypericum Change of Zone No. PZC 17-026 (Zoning District Map); Jovista Change of Zone No. PZC 17-027 (Zoning District Map); Matheny Tract Change of Zone No. PZC 17-029 (Zoning District Map); and Tooleville Change of Zone No. PZC 17-030 (Zoning District Map), Change of Zone No. PZC 17-031 (Mixed-Use Combining Zone–Section 18.9) and Change of Zone No. PZC 17-032 (By-Right Uses–Section 16), collectively referred to as the Legacy Plans 2017 Update (GPA 17-033); and

WHEREAS, upon conclusion of the public hearing, the Planning Commission recommended the Board of Supervisors certify and adopt the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopt the Mitigation Monitoring and Reporting Program and approve the Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors held a public hearing on October 17, 2017 to consider the proposed Legacy Plans 2017 Update; and

WHEREAS, the Board of Supervisors finds the public hearing for the Legacy Plans 2017 Update was properly noticed in accordance with state law and the Tulare County Ordinance Code.

WHEREAS, the Board of Supervisors finds the Legacy Plans 2017 Update is compatible, integrated and internally consistent with the existing policies of and with the Tulare County General Plan.

WHEREAS, the Board of Supervisors accepts and incorporates by reference herein, the findings of facts and recommendations adopted by the Planning Commission as follows:

1. Planning Commission Resolution No. 9342, in the matter of the Certification and adoption of the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update (PC Package Attachment 1 – CEQA Resolution).

2. Planning Commission Resolution No. 9343, to adopt General Plan Amendment No. GPA 17-033 for the Legacy Plans 2017 Update inclusive of El Monte Mobile Village (GPA 17-025); Hypericum (GPA 17-026); Jovista (GPA 17-027); Matheny Tract (GPA 17-029) and Tooleville (GPA 17-030) and Amendments to Part III of the Tulare County General Plan to establish Legacy Plans and Legacy Development Boundaries, to the Part I General Plan Amendment to the Introduction, Component A, Planning Framework, Component B, Agriculture, Land Use, Component C, Scenic Landscapes, Environmental Resources Management, Air Quality, Component D, Public Facilities and Services Elements, and Part II Rural Valley Lands Plan, consistent with the Legacy Plans 2017 Update (PC Package Attachment 2 – GPA Resolution).
3. Planning Commission Resolution No. 9344, in the matter of an Amendment to Section 18.9 of Ordinance No. 352, the Zoning Ordinance, and establish the Mixed Use Combining Zone within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 3 – Section 18.9 Resolution).
4. Planning Commission Resolution No. 9345, in the matter of an Amendment to Section 16 of Ordinance No. 352, the Zoning Ordinance, to allow additional by-right uses within the El Monte Mobile Village, Hypericum, Jovista, Matheny Tract, and Tooleville Legacy Development Boundaries (PC Package Attachment 4 – Section 16 Resolution).
5. Planning Commission Resolution No. 9346, in the matter of an Amendment to Ordinance No. 352, the Zoning Ordinance, as set forth in the Zoning District Ordinance Maps for El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville, consistent with the Legacy Plans 2017 Update to rezone certain properties within El Monte Mobile Village, Hypericum, Jovista, Matheny Tract and Tooleville. (PC Package Attachment 5 – Rezoning Plan Resolution).

NOW, THEREFORE, BE IT RESOLVED as follows:

A. The Board of Supervisors hereby certifies and adopts the Addendum to the (2012) Tulare County 2030 General Plan Final Environmental Impact Report for the Legacy Plans 2017 Update, as being in compliance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, including CEQA findings, and adopts the Mitigation Monitoring Reporting Programs.

NOW BE IT FURTHER RESOLVED as follows:

B. The Board of Supervisors adopts the entirety of all of the above findings and actions as one General Plan Amendment No. GPA 17-033.

C. The Board of Supervisors hereby waives the final reading of Change of Ordinance 352 and adopts amendments to the Tulare County Zoning Ordinance 352 pertaining to Section 18.9 - Mixed-Use Combining Zone, to Section 16 - Variances and Special Uses, and Zoning District Map Changes.

D. The Board of Supervisors authorizes the Chairman to sign any and all necessary zoning changes under Ordinance 352, and specifically changes to Sections 18.9 and Section 16 to add the communities of Legacy Plans 2017 Update to include Mixed Use Combining Zone and additional "By-Right" uses.

E. The Board of Supervisors directs the Clerk of the Board to publish once in the Visalia Times-Delta newspaper the summary of the ordinance amendments and amended zoning map with the names of the Board of Supervisors voting for and against the amendment and to post a certified copy of the full ordinance amending the Tulare County Zoning Ordinance with the names of the Board of Supervisors voting for and against the amendment, within fifteen (15) days as required by Section 25124 et. seq.

F. The Board of Supervisors directs the Environmental Assessment Officer, or designee, of the Tulare Resource Management Agency to file Notices of Determination with the Tulare County Clerk.

G. The Board of Supervisors authorizes the Director of the Resource Management Agency, or designee, to make appropriate technical revisions to the General Plan Amendment, Legacy Plans, and associated project documents.
