1. EXECUTIVE SUMMARY

On March 11, 2021, the \$1.9 trillion American Rescue Plan Act (ARPA) was signed into law by President Biden to address the continued impact of the COVID-19 pandemic on the economy, public health, state and local governments, individuals, and businesses. The legislation established \$350 billion in Coronavirus State and Local Fiscal Recovery Funds (SLFRF) specifically for state, local, territorial, and tribal governments to use in responding to the COVID-19 pandemic, addressing its economic fallout, and laying the foundation for a strong and equitable recovery. Tulare County's share of the SLFRF is \$90,552,914. These funds are intended to cover eligible costs incurred from March 3, 2021, through December 31, 2024.

In accordance with the Interim Final Rule and the Compliance and Reporting Guidance adopted by the U.S. Department of the Treasury, in July 2021 the County prepared an Interim Recovery Plan, which outlined the County's intended use of ARPA funds and reported actual expenditures during the first reporting period starting from the date of award through July 31, 2021. The County published and submitted its Interim Plan to the U.S. Department of the Treasury on August 31, 2021.

On January 6, 2022, the U.S. Department of the Treasury adopted the SLFRF Final Rule to be effective April 1, 2022. The Final Rule provides greater flexibility and simplicity for recipients to fight the pandemic, support families and businesses struggling with its impacts, maintain vital services amid revenue shortfalls, and build a strong, resilient, and equitable recovery. Key changes, highlighted in the Treasury's updated Compliance and Reporting Guidance document, included a broader set of eligible uses and associated Expenditure Categories. On March 29, 2022, the County updated its ARPA Interim Recovery Plan to reflect the Final Rule changes in expenditure categories and redistribute funds accordingly. On July 26, 2022, the County adopted its Final Recovery Plan. The County published and submitted its Final Plan to the U.S. Department of the Treasury on July 31, 2022.

The County's Final Recovery Plan aligns with the Final Rule guidelines set forth by the Treasury. Additionally, it includes updates to the projects and programs' equity measures, performance indicators, completion status, and other relevant data as requested by the Treasury's guidelines.

Tulare County is utilizing its ARPA funds to respond to the public health emergency, address negative economic impacts, support essential workers, and make strategic investments in water, sewer, or broadband infrastructure to support an equitable recovery from the pandemic. The total budgeted funds for each eligible expenditure category, which reflect the updated Expenditure Categories from the Final Rule, are listed in the table below. Amounts may be subject to modifications based on community needs, operational needs, and as determined by the Board of Supervisors:

	ARPA EXPENDITURE CATEGORY	BUDGET	CUMULATIVE EXPENDITURES AND OBLIGATIONS TO DATE	BALANCE
1.	Public Health	\$27,456,095	\$24,112,063	\$3,344,032
2.	Negative Economic Impacts	\$10,927,807	\$7,408,418	\$3,519,388
3.	Public Health- Negative Economic Impact: Public Sector Capacity	\$21,002,987	\$20,436,150	\$566,837
4.	Premium Pay	\$6,516,579	\$6,516,579	-
5.	Infrastructure	\$14,382,910	\$7,443,911	\$6,938,999
6.	Revenue Replacement	\$10,000,000	\$9,385,196	\$614,804
7.	Administrative	\$266,536	\$167,921	\$98,615
		\$90,552,914	\$75,470,238	\$15,082,676

From the beginning of the program, March 3, 2021, through June 30, 2024, the County utilized approximately \$75,470,238 in ARPA funds. The funds have been used for projects and programs in the following Expenditure Categories: Public Health, Negative Economic Impacts, Public Health- Negative Economic Impact: Public Sector Capacity, Infrastructure, Revenue Replacement, and Administrative.

KEY OUTCOMES

Tulare County is considered "at-risk" for economic distress according to the Distressed Communities Indexⁱ. Prior to the COVID-19 pandemic, its rates of unemployment and poverty were consistently higher than the statewide and national averages, median household income was low, and nearly half of residents received some form of public assistance. The COVID-19 pandemic and the necessary actions taken to control the spread have worsened the already distressed situation for many of the County's most vulnerable populations. At the height of the emergency, farmworkers, who comprise a large portion of the workforce in Tulare County, were testing positive at a rate of seven to one compared to the overall population, unemployment rates spiked to 13.2%, and the increased demand for public assistance placed an added strain on County pandemic-response resources. In response to the disproportionate toll the COVID-19 pandemic has taken on this region, the County has used its SLFRF allocation to fund projects and programs that mitigate the spread of COVID-19 within the County, assist the economic recovery of local businesses and industries that have lacked other sources of support through the pandemic, and build resilience in disadvantaged and underserved communities through housing support and infrastructure improvements.

2. USE OF FUNDS

This section outlines the guiding principles utilized by Tulare County to allocate strategically ARPA funds and further details the intended use of funds over the next three years.

GUIDING PRINCIPLES

In addition to facilitating the County's response to the COVID-19 pandemic and addressing its negative impacts on residents, ARPA funds provide a unique opportunity for the County to complete projects and programs that will have a

transformative and lasting impact on county services and the community. In this spirit, the County established the following principles to guide the allocation and use of ARPA funds.

- **Be Transformational**. Pursue projects or programs that solve an ongoing problem and make a long-term and sustainable difference in the community.
- **One-Time Uses**. Consistent with the County's budget protocols, allocate one-time ARPA dollars to projects or programs with a defined funding period that do not create an ongoing fiscal obligation for the County.
- Health & Safety. Support the public health and safety response to COVID-19, which includes addressing the pandemic's ongoing health and safety impacts and building resiliency to better prepare the County for future disasters.
- **Equitable Outcomes**. Prioritize projects or programs that aim to increase equitable recovery and future resilience for disadvantaged or unincorporated communities.
- **Data-Driven**. Prioritize evidence-based projects or programs or contain the necessary data to demonstrate how they will address the impacts of the COVID-19 pandemic or assist in recovery.
- **Shovel-Ready**. Prioritize shovel-ready infrastructure projects that can be completed within the defined funding period.
- **Close Funding Gaps**. Prioritize funding for industries that experienced negative economic impacts due to the pandemic but did not receive other sources of funding or relief.
- Avoid Duplication. Ensure funded projects or programs do not duplicate services approved or administered by the state or federal government, including duplication of efforts of cities.

DETAIL BY FUNDING CATEGORY

The following further details the County's use of SLFRF funds by expenditure category. Funding was allocated to respond to the COVID-19 emergency; address the negative economic impacts caused by the public health emergency; provide services to underserved populations and communities disproportionately impacted by COVID-19; provide premium pay to County essential workers; and improve County and community infrastructure to respond effectively and efficiently to the current and future public health emergencies.

The County's proposed projects and programs included in this Plan are subject to change based on guidance and clarification from the U.S. Department of the Treasury, and changes in resource demands associated with the pandemic. Throughout the ARPA funding cycle, the County intends to prioritize COVID-19 testing, vaccination, and other emergency response activities. Should these activities require additional funds, ARPA funding will be redirected from other proposed projects toward these specific public health activities. Major modifications, such as adding new projects or programs, removing projects and programs, or any change in dollar amount allocations greater than 5% per ARPA Expenditure Category will be brought back to the Board of Supervisors for direction and approval.

PUBLIC HEALTH

July 2024

- **COVID -19 Vaccination** Vaccination programs for residents of Tulare County are intended to mitigate the health impacts and reduce the number of deaths caused by COVID-19. In addition to administering currently available vaccines, the County anticipates using ARPA funds to organize and administer a vaccine booster in future years.
- **COVID-19 Testing** Provide an employee and countywide testing program to serve the communities of Tulare County for mitigation and prevention of the COVID-19 virus.
- **Prevention in Congregate Settings** These capital expenditures are intended to improve the County's response to the COVID-19 public health emergency. The HVAC projects would assist in mitigating the spread of the COVID-19 virus in County buildings by improving ventilation in congregate settings.
- Personal Protective Equipment (PPE) The County anticipates a sustained demand for PPE among staff and
 outside medical providers as organizational policies change to require the use of PPE in daily operations. PPE
 protects staff and mitigates the spread of the COVID-19 virus among county employees as they perform their
 essential functions of serving the public and maintaining County operations. The demand for PPE increases during
 surge periods. Therefore, ARPA funding has been set aside to address this potential cost.
- **Medical Expenses** Provide funding to local hospitals to assist with reimbursement for COVID-19 expenses and to support hospitals in emergency response services. Provide funding to the County self-funded health insurance plan for reimbursement for COVID-19 expenses.
- Other COVID-19 Public Health Expenses (including Communication, Enforcement, Isolation/Quarantine) The County will provide communication messaging and outreach to residents and communities within Tulare County regarding COVID-19 vaccinations and testing; provide facilities for quarantining the homeless and jail inmate populations with COVID-19; improve teleworking and video conferencing to allow for social distancing while maintaining the continuity of essential County operations; and enhance outdoor and green space areas for residents and disproportionately impacted communities to remain active and socially distanced during this public health emergency.
- Other Public Health Services Other COVID-19 expenditures include technology expenditures to continue County
 public health operations and provide services to the public. These technology projects would digitize records and
 allow for teleworking so that the County may continue to provide socially distanced services to the public,
 residents, and communities of Tulare County online.

NEGATIVE ECONOMIC IMPACTS

- Household Assistance: Rent, Mortgage, and Utility Aid– Assist Low-income households with utility assistance.
- Long-term Housing Assistance The County recognizes that individuals experiencing homelessness have been
 particularly hard hit during this pandemic and will use SLFRF funds to develop projects that provide housing
 support and allow for homeless populations to safely quarantine during the pandemic, and transition into stable
 housing.
- Small Business Economic Assistance Assist local small businesses through an Environmental Health Fee waiver.
- Aid to Nonprofit Organizations Develop programs in collaboration with local nonprofit organizations to assist those in Tulare County impacted by the public health emergency and assist nonprofit organizations with funding to offset the loss of revenue caused by the COVID-19 pandemic.
- Aid to Impacted Industries Provide assistance to the County libraries for modification of services that mitigate and prevent the spread of COVID-19, and aid industries impacted by the public health emergency, such as

museums, memorial districts, and other community service districts, that have not received other sources of pandemic relief. Additionally, funding will be available to assist with economic development.

PUBLIC HEALTH- NEGATIVE ECONOMIC IMPACT: PUBLIC SECTOR CAPACITY

• Public Sector Workforce: Payroll and Benefits for Public Health, Public Safety, or Human Services – County departments with staff directly or substantially dedicated to responding to or mitigating the COVID-19 public health emergency will use ARPA funding to cover the associated payroll costs of those employees.

PREMIUM PAY

July 2024

County employees are deemed essential workers and, as such, are eligible for premium pay under the guidelines set forth by the U.S. Department of the Treasury; accordingly, ARPA funds were used to provide premium pay to eligible County employees. ARPA guidelines state that premium pay may be provided to employees who, after earning \$1,500 in premium pay, would earn less than 150% of the California Annual Mean Wage for all occupations. County workers are considered disaster workers by ordinance. During the COVID-19 pandemic, County workers were deemed essential via emergency order to maintain the continuity of critical services that ensure the safety, health, and well-being of County residents.

INFRASTRUCTURE

- **Clean Water Projects** The Resource Management Agency has compiled 19 projects that meet a critical sewer infrastructure need for disadvantaged and underserved communities.
- **Drinking Water Projects** The Resource Management Agency and the General Services Agency have compiled 15 projects that meet a critical drinking water infrastructure need for the identified disadvantaged and underserved communities.

REVENUE REPLACEMENT

The County will use ARPA funding for government services, as authorized by the SLFRF Final Rule.

- **Radio Tower Projects** The County will fund the Radio Tower projects to allow for better medical and public safety responses to communities, including disadvantaged and isolated communities in the mountainous and remote areas of the County.
- **Park Improvement Projects**—Funds will support the improvement of outdoor green spaces so that impacted communities can remain active and socially distanced during this public health emergency.

ADMINISTRATIVE

The County will fund direct and indirect SLFRF administrative costs for the implementation of projects and programs. Administering and developing the County's Recovery Plan will require the oversight of the County Administrative Office, Auditor's Office, and County Cost Centers (e.g. Health and Human Services Agency, Information and Communications Technology Department, and the General Services Agency). Administrative funds may also be used to hire a consultant or reimburse staff time associated with the administration, monitoring, and reporting of the County's Recovery Plan.

PROJECT AND PROGRAM PHASES

The County's Interim ARPA Recovery Plan included a timeline for the projects and programs, with start and completion dates. The timeline was organized into four phases intended to ensure ARPA funds were fully obligated by December 31, 2024, and expended by December 31, 2026.

However, due to the scope and complexity of the projects and programs, and current supply chain issues (especially related to capital improvement projects), the County is no longer assigning phases to the projects and programs. Instead, departments will have the flexibility to complete projects as practicable. The County Administrative Office and Auditor's Office will continue to monitor project progress to ensure that they are completed in a timely manner and prior to the ARPA deadline.

3. EQUITABLE OUTCOMES

Tulare County is composed of eight incorporated cities and numerous unincorporated communities and hamlets, including 17 qualified census tracts designated as disadvantaged communities. The County is considered "at-risk" for economic distress according to the Distressed Communities Index, which uses seven indicators of economic well-being found in the U.S. Census Bureau's American Community Survey (ACS) 5-Year Estimates to evaluate the economic well-being of communities across the US.^{II} Approximately 25.5% of the population lives at or below the poverty level, more than 30% of adults 25 and older do not have a high school diploma, and more than 30% of adults aged 25 to 54 are not working or not in the labor force. Countywide, the median household income is 21% below the national average and 40% below the state average.^{III} Additionally, approximately 25% of the population has an active CalFresh/Supplemental Nutrition Assistance Program or CalWORKs/ Temporary Assistance for Needy Families case, and over 75% of school children are eligible for the Free or Reduced-Price Meal (FRPM) program.^{IV}

The projects and programs detailed in this Plan were selected to help all Tulare County communities, but with special consideration for the disadvantaged and underserved communities who experienced a more significant negative economic and social impact as a result of the COVID-19 public health emergency. The County's Plan focuses on projects and programs that may facilitate economic prosperity in disadvantaged communities and hasten a full recovery from the pandemic. Specific focus areas include: public health and safety protection, emergency medical services, reliable communication infrastructure, access to County services, and access to clean, safe, and sustainable water sources. Individual project and program equity measures may be found in **Attachment B**- Project Inventory & Performance.

The County utilizes the California Healthy Places Index (HPI), developed by the Public Health Alliance of Southern California, as one of many tools for identifying disadvantaged and underserved communities and advancing equitable outcomes. The HPI measures health outcomes, access to services, income, and other equity indicators that shape health in every neighborhood of the State and allows the County to pinpoint underserved communities by zip code. During the height of the pandemic, the County utilized HPI data to provide targeted COVID-19 testing and vaccination outreach and events for communities that have historically lacked adequate access to health care. As a result of this targeted campaign attendance at testing and vaccination events increased by 300% in the communities of Traver, Richgrove, and Pixley.

Other County projects aimed at easing the disproportionate impact of the pandemic on individuals, communities and businesses are housed in the ARPA Compliance and Reporting Guidance Expenditure Category two (EC2). Examples of

projects in this category include permanent supportive housing initiatives to acquire and renovate motel facilities to provide housing security for low-income individuals and those experiencing homelessness; and support for local businesses through an Environmental Health Fee waiver project that refunds or waives fees for two years to restaurants, bars, and other local businesses that shut down in compliance with COVID-19 mitigation measures.

4. COMMUNITY ENGAGEMENT

The SLFRF parameters provide substantial flexibility for each jurisdiction to decide how to best meet the needs of their local communities and allow for flexible spending up to the level of their revenue loss. The County, through public comments at Board of Supervisors meetings, Board of Supervisors Town Halls, Government Affairs Committee meetings (City Chambers of Commerce), community council meetings, Board of Supervisors Monthly Message (County website, Facebook, and Twitter), county constituent contacts, and internal County meetings, developed a recovery plan, following SLFRF guidelines and community input to:

- a. Respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality.
- b. Respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers.
- c. Provide government services to the extent of the reduction in revenue due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency.
- d. Make necessary investments in water, sewer, or broadband infrastructure.

On August 24, 2021, the County Administrative Officer presented the ARPA Interim Recovery Plan during a regularly scheduled public Board of Supervisors meeting. During this meeting, the public was made aware of the principles used to determine the allocation of ARPA funds and community members provided feedback on multiple projects and programs.

From July 2023 through July 2024, the County has continued to engage the community in a discussion of the use of ARPA funds and has provided information and updates at multiple public meetings regarding the ARPA Final Recovery Plan.

- On July 25, 2023, the Board of Supervisors approved the ARPA Final Recovery Plan to reflect the Final Rule changes in expenditure categories and redistribute funds accordingly. Changes to the Final Plan were presented during a regularly scheduled Board of Supervisors meeting in which the public had an opportunity to participate and comment. The meeting agenda, which included the updated ARPA Final Recovery Plan, was posted on the County's website and made available to the public. Through the Board's meeting, the community was updated on the ARPA Final Recovery Plan projects and programs and the changes made to the plan to align it and comply with the Treasury's Final Rule.
- On February 27, 2024, the Chair of the Tulare County Board of Supervisors presented the annual State of the County at the Board of Supervisors meeting. The State of the County report provides an opportunity for the Chair to provide an update on the County's achievements and challenges and look forward to the year ahead. The

Chair's report included information about highlighted County ARPA Final Recovery Plan projects such as, County Park projects, the Assessor Scanning project, and the county facilities HVAC projects.

- The Tulare County Board of Supervisors and Board staff have provided information about ARPA projects at various events, including Town Hall meetings, Town Council meetings, advisory committee meetings, Chamber of Commerce events, and other community meetings and events. The County Supervisors and Board staff have shared information regarding ARPA projects and how these projects support the County. It is estimated that through these meetings and events over 10,000 county residents learned about the County's ARPA Final Recovery Plan.
- Details about Water and Sewer projects were shared at various Community Water System Board meetings, including Pixley Public Utility District Board, Tipton Community Services District, Orosi Public Utility District, Earlimart Public Utility District, Cutler Public Utility District, Ivanhoe Public Utility District, Poplar Community services District, and Strathmore Public Utility Board throughout the year. Additional outreach in the communities of East Orosi, Delft Colony, Wells Tract, Traver, Tooleville, and Tonyville was conducted to discuss sewer and water infrastructure needs. Further outreach was performed with Pixley Public Utility District to finalize a feasibility study, with Economic Development funding, to extend the Pixley PUD Water Main Extension further north to additional homes and businesses.
- The Tulare County Task Force on Homelessness meets on the third Wednesday of every month. County staff provides updates to County ARPA funded homeless projects to the Task Force. The updates include information on Request for Proposals, status updates on projects, and information on new funding for homelessness projects. The Task Force is comprised of twenty-two members and divided into two categories. The first category consists of appointed members from various local agencies that are essential partners in addressing homelessness. These members represent local cities, the Kings/Tulare Homeless Alliance, the county's Board of Supervisors. The second category is voluntary members, who are members of the public who represent various sectors that pertain to homelessness. Voluntary members include affordable housing developers, faith-based community members, those with lived experience, etc. Task Force meetings include opportunities for discussion among board members as well as public comment through multiple channels including in-person, phone, email, or comments via Facebook Live.
- The County has allocated ARPA funding to improve the County Parks, as these are essential to promote improved health outcomes. The Tulare County Parks Advisory Committee, which includes representation from each of the five County districts, meets regularly and the meetings are open to the public. The Committee met in July of 2023, October of 2023, January of 2024 and April of 2024, and information about ARPA-related projects was shared. Feedback and suggestions were provided by members and attendees on future park projects.

As part of this Plan, the County will continue to disseminate information through its social media sites, communitybased organization partners, Board of Supervisor meetings, Town Halls, Government Affairs Committee meetings, and community council meetings to ensure employees, residents, and businesses of the County are aware of the services funded through SLFRF.

July 2024

5. LABOR PRACTICES

County labor practices will follow and comply with all local, state, and federal laws, regulations, and directives. This includes compliance with all laws and regulations pertaining to wages and hours, state and federal income tax, unemployment insurance, Social Security, disability insurance, workers' compensation insurance, and discrimination in employment. The County, its contractors, and subcontractors shall comply with Title VI of the Civil Rights Act of 1964, and in accordance with said Act, no person on the grounds of race, color, sex or national origin, shall be excluded from participation in, be denied the benefits of, or be otherwise subject to discrimination under any service or activity in connection with any public works project.

With regard to public works projects, the County, its contractors, and subcontractors shall pay all workers employed on public works projects not less than the prevailing wage rates determined by the Director of the Department of Industrial Relations and shall comply with all laws and regulations relating to the employment of apprentices. Said wage rates pursuant to Section 1773.2 of the Labor Code are on file with the Tulare County General Services Agency, 2637 W. Burrel Avenue Suite 200, Visalia, California and will be made available to any interested person on request.

No contractor or subcontractor may work on county public works projects unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. According to Labor Code section 1776, contractors and subcontractors are required to keep an accurate record showing the names, occupations, and actual per diem wage of all laborers, workers, and mechanics employed by it in connection with County public works projects.

6. USE OF EVIDENCE

The Plan considers the use of evidence-based programs and identifies them on the Tulare County Final ARPA Recovery Plan Project List - Attachment B.

7. EXPENSES BY EXPENDITURE CATEGORY

Attachment A – Expense by Expenditure Category lists all ARPA projects and programs, including budget allocation, and cumulative expenses. The following is a list of major changes to the projects and programs captured on the County's ARPA Final Recovery Plan:

2024 Deleted projects

• 5012- Strathmore Public Utilities District - Well and Treatment. (\$2,150,000). Project cancelled due to the construction cost increase the project was infeasible.

2024 Completed Projects

- 1007- HVAC Project Visalia Government Plaza (\$1,230,189)
- 1030- HHSA Air Purifiers and Installation Cost (\$585,863)
- 1005- Distribution of PPE for other Tulare County institutions responding to COVID-19 (\$710,735)
- 1060- Self Funded Health Insurance Plan Covid Claims (\$2,593,347)
- 1036- Goshen Park (\$123,371)
- 1040- Pixley Park (\$1,291,260)
- 3001- Addressing Homelessness Tagus Gardens and Sequoia Lodge Renovations (\$2,000,000)
- 3003- No Place Like Home (\$400,000)
- 5001- Ivanhoe PUD Disposal Pond Improvements (\$650,000)

5008- Poplar CSD - Well Replacement (\$499,000)

- 1034- Bartlett Park (\$2,107,313)
- 1037- Kings River Park (\$126,941)
- 1039- Mooney Grove Park (\$2,248,245)

2024 Reestablished Projects

• 1046- Payroll for Fire Staff- Additional allocation of \$406,653 provided. Project was reported completed in FY2023.

2024 New Projects

- 1071- Poplar CSD Park (\$225,000)
- 2201- East Orosi Sewer- Utility Charge Arrearage (\$70,000)
- 3006- Porterville Navigation Center (\$1,000,000)
- 5017- Tooleville Wastewater Treatment Plant Improvements (\$151,534)
- 5018- Delft Colony Wastewater Treatment Plant Improvements (\$172,400)
- 5019- Traver Wastewater Treatment Plant Improvements (\$146,535)
- 5020- Terra Bella Wastewater Treatment Plant Improvements (\$274,706)
- 5021- East Orosi Sewer-Emergency liftstation repair (\$20,000)
- 5022- El Rancho Sewer Collection System Deferred Maintenance (\$134,592)
- 5023- Tonyville Sewer Collection System Deferred Maintenance (\$177,171)
- 5024- Tooleville Sewer Collection System Deferred Maintenance (\$123,806)
- 5025- East Orosi Sewer Collection System Lift Station and Flushing (\$32,000)
- 5026- Delft Colony Sewer Collection System Deferred Maintenance (\$103,806)
- 5027- Seville Sewer Collection System Deferred Maintenance (\$158,421)
- 5028- Traver Sewer Collection System Deferred Maintenance (\$128,806)
- 5029- Yettem Sewer Collection System Deferred Maintenance (\$213,421)
- 5030- Wells Tract Sewer Collection System Deferred Maintenance (\$218,421)
- 5031- Terra Bella Sewer Collection System Deferred Maintenance (\$118,934)
- 5032- East Orosi Septic Pumping (\$50,000)
- 5033- Delft Colony Chlorination System Improvements (\$55,000)
- 5034- Delft Colony Water Distribution System Deferred Maintenance (\$31,901)
- 5035- Delft Colony Well Improvements (\$45,012)
- 5036- Delft Colony Water System Storage Tank Improvements (\$94,500)

8. PROJECT INVENTORY & PERFORMANCE

The County's ARPA Interim Recovery Plan included a list of the County's projects and programs. The County has aligned the projects and programs with the requirements based on Treasury's Final Rule guidance. Attachment B- Project Inventory and Performance includes updates to the equity measures and performance indicators, the status of the project or program, and other relevant data as requested by the Treasury's guidelines.

New Proposed Project

^ Must report on whether projects are primarily serving disproportionally impacted communities:

lic Health	h		\$	27,45
1.1 CO\	VID-19 Vaccination ^			
	Project Name: HHSA support for vaccine administration by community partners	HHSA	\$	
	Project ID #: 1001			
	Description: HHSA has and continues to establish agreements with healthcare partners to assist			
	19 vaccine administration. Funds under this project will be used after the Epidemiolo	ogy and		
	Laboratory Capacity (ELC) funds have been maximized. Reimbursement to providers	s is provided		
	at up to \$55/dose). 2023 Update : Project cancelled due to health care partners no	longer		
	needing support to cover costs for vaccine administration, as the initial need was co	overed by		
	ELC funds. Upon cancelation, funds reserved for this project were re-allocated to oth	her ARPA		
	projects.			
	Equity Measures: Vaccination strategies are informed by the California Healthy Places Index (HPI), wh	nich		
	identifies which communities are most disadvantaged or at-risk. Tulare County has	used this		
	index to identify the zip codes that are most vulnerable, and vaccination events and	activities in		
	these underserved areas are prioritized. In addition to this strategy, Tulare County a	Ilso		
	developed a GIS Mapping tool to identify vaccine registered providers in the County.	. This tool		
	extended the ability to identify where within the county/communities under the Q1	HPI		
	quartiles needed providers to be registered as vaccine providers. This was addressing	g health		
	equity by targeting the commuting distance to a vaccination location and decreasin		1	
	transportation inequities. Accessibility is addressed by locating vaccine events and p	-	1	
	within the communities that may have low vaccination rates. For example, if a com		1	
	under a specific percentage, like under 30% being vaccinated, this draws the attenti		1	
	these communities as priorities and schedule vaccine events in that community. The			
	be able to sustain these vaccine efforts by making sure that these well-established lo			
	kept active in these communities for consistency access to the residents.			
	Performance Indicators: As noted above, this funding would provide approximately 45,450 vaccine doses. Th	e County		
	will measure the progress of the project by measuring both the overall County vacci	nation rate		
	as well as vaccination rates by zip code. Weekly reports are being compiled by Tular	e County		
	Epidemiology team to demonstrate the percentage of vaccination among the priori	ty		
	communities, to identify where the needs are and what planning should take place	to		
	increase/improve the percentage.			
	Project Status Not Started-Cancelled			
	Serving Yes, 19 communities were identified to be under the 25% quartile. These are priority	/		
	disproportionately communities to be reached.			
	impacted communities: Populations Served:			
	Impacted General Public & Impacted Households that experienced increased food o	r housing		
	insecurity			
			4	
	Project Name: Response Team Support	HHSA	\$	
	Project ID #: 1002	-+ <i>ff</i>		
	Description: Due to the nature of the vaccine point of distribution (POD) events, volunteers and s		1	
	working at these events are not able to leave the location, or there is not enough tim		1	
	and get food; therefore, food has been provided. Covers primarily period from Marc	-	1	
	May of 2021 during period of intensive vaccination efforts, plus a small amount to p	bay for food	1	
	during any potential surges.			
	Equity Measures: POD vaccination events were planned trough out Tulare County. The number of even		1	
	increased with the demand of the vaccine. Many of the events were hosted in under		1	
	communities in the County. The volunteers were key in making the events successful	<i>I.</i>		
	Performance Indicators: There were over 100 volunteers who assisted during the POD events.		1	
	2022 Update:		1	
	During the timeframe of March - May 2021, 171 POD vaccine events in communities	S	1	
	throughout Tulare County.			
	Project Status Completed			
	^ Serving Staff support vaccination events in disadvantaged and underserved communities.			
	disproportionately Populations Served: Impacted General Public. Impacted low or moderate household	ls or	1	
	impacted communities: populations.		1	
			1	
1.2 COV	VID-19 Testing ^			

^ Must report on whether projects are primarily serving disproportionally impacted communities:

Project ID #:	1003	Dept		ject B
	Ensure access to testing for Tulare County employees. Testing is an important measure to		1	
Description.	mitigate and contain the COVID-19 disease.			
Equity Mossures:	Tulare County is establishing a testing program for its employees. Tulare County staff are			
Equity weasures.	considered essential workers, and have been assisting with responding to the COVID-19			
	pandemic. These testing sites will be located through out County facilities, in addition to testing			
	sites available to County residents. 2023			
	Update: Testing continued to be offered through December 2022 to ensure offices providing			
	services to disproportionately impacted communities in need of health, mental health, and			
	social services operating in Q1 HPI Communities.			
Performance Indicators:	County of Tulare employees (over 4,000 employees both full-time and part-time) have the			
	opportunity to participate in this testing program.			
	2023 Update:			
	Testing was available as required by CalOSHA and other employer guidance at various county			
	sites to employees to reduce transmission.			
Project Status	Completed			
^ Serving	County of Tulare has offices throughout the County, and many of them are located in, and serve			
disproportionately	disadvantage communities. The testing sites for staff will be located in some of these			
impacted communities:	communities.			
	Populations Served: Impacted General Public & Impacted Households that experienced			
	increased food or housing insecurity			
ention in Congregate Set	tings (Nursing Homes, Prisons/Jails, Dense Work Sites, Schools, etc.)*^			
Project Name:	HVAC Project - Visalia Government Plaza	GSA	\$	1,2
Project ID #:	1007			
Description:	Project: Purchase and install two (2) chillers and two (2) boilers at Visalia Government Plaza.			
	Project timeline: One (1) Chiller has been delivered and placed in the "Chiller Yard". EMCOR			
	was scheduled to begin construction work on 6/7/2023. This project will be completed by			
	12/31/2024.			
	Intended outcomes: Improve ventilation in congregate settings/key County offices. According to			
	the Centers for Disease Control and Prevention*, "when indoors, ventilation mitigation			
	strategies can help reduce viral particle concentration. The lower the concentration the less			
	likely viral particles can be inhaled by the lungs, contact eyes, nose, and mouth; or fall out of			
	the air to accumulate on surfaces. However, ventilation system upgrades or improvements can			
	increase the delivery of clean air and dilute potential contaminants."			
	*https://www.cdc.gov/coronavirus/2019-ncov/community/ventilation.html			
Equity Measures:	Visalia Government Plaza is a key County office housing 622 employees from multiple			
	departments that serve all county residents. These departments include Health and Human			
	Services Agency (HHSA) Administration, Resource Management Agency (RMA), Registrar of		1	
	Voters, Grand Jury, Information & Communications Technology (TCiCT), and General Services			
	Agency (GSA) Print Shop. Members of the public also frequent the building to receive services		1	
	from these agencies. EQUITY: Due to this building being available to the public, which includes			
	traditionally marginalized communities, this project serves to protect all who enter by utilizing		1	
	ventilation mitigation strategies to reduce viral particle concentration.			
Performance Indicators:	Performance measures include ordering, purchasing, and installation of HVAC System.			
	r eijomanee measures melade ordering, parenasing, and instandion of trove system.			
Project Status	Completed

Project Name:	HVAC Project - Hillman Tulare WORKS and WIC (Women, Infants, and Children)	GSA	\$	1
Project ID #:	1009		1	

^ Must report on whether projects are primarily serving disproportionally impacted communities:

		Dept	Projec	
Description:	Project: Purchase and install two (2) compressors (motors inside the chillers) and one (1) boiler			
	at Hillman Tulare WORKS and WIC office.			
	Project timeline: This project will be completed by December 31, 2024.			
	Intended outcomes: Improve ventilation in congregate settings/key County Offices. According			
	to the Centers for Disease Control and Prevention [*] , "when indoors, ventilation mitigation			
	strategies can help reduce viral particle concentration. The lower the concentration the less			
	likely viral particles can be inhaled by the lungs, contact eyes, nose, and mouth; or fall out of			
	the air to accumulate on surfaces. However, ventilation system upgrades or improvements can			
	increase the delivery of clean air and dilute potential contaminants."			
	*https://www.cdc.gov/coronavirus/2019-ncov/community/ventilation.html			
Fauity Measures:	Hillman Tulare WORKS and WIC are key County offices housing 84 employees. Tulare WORKS			
-4	employees provide benefit assistance to all qualified families seeking governmental assistance.			
	WIC employees provide services to all low-income women, infants, and children under five who			
	are nutritionally at risk seeking governmental assistance. EQUITY: Due to this building being			
	available to the public, which includes traditionally marginalized communities, this project			
	serves to protect all who enter by utilizing ventilation mitigation strategies to reduce viral			
Performance Indicators:	particle concentration. Performance measures include ordering, purchasing, and installation of HVAC System.			
-	Completed 50% or more			
	This building is accessed by the Impacted General Public, Impacted Households that			
	experienced increased food or housing insecurity, and disproportionately impacted low income			
impacted communities:	households and populations.

Project ID #:		00/1		050,00
	Project: Purchase and install seven (7) Dual Packs at the Visalia Library, one (1) Split at Alpaugh Library, one (1) Dual Pack at Tipton Library, two (2) Wall Packs at London Library, two (2) Dual Packs at Ivanhoe Library, five (5) Dual Packs at Dinuba Library, three (3) Dual Packs at Exeter Library, four (4) Dual Packs at Strathmore Library, one (1) Split at Earlimart Library, three (3) Dual Packs at Three Rivers Library, and one (1) Dual Pack at Maddox House. Project timeline: This project will begin by 10/31/2022 and will be completed by December 31, 2024. Intended outcomes: Improve ventilation in congregate settings/key County Offices. According to the Centers for Disease Control and Prevention*, "when indoors, ventilation mitigation strategies can help reduce viral particle concentration. The lower the concentration the less likely viral particles can be inhaled by the lungs, contact eyes, nose, and mouth; or fall out of the air to accumulate on surfaces. However, ventilation system upgrades or improvements can increase the delivery of clean air and dilute potential contaminants." *https://www.cdc.gov/coronavirus/2019-ncov/community/ventilation.html			
	The Tulare County Libraries are key County service locations. The libraries provide services in the cities and unincorporated communities throughout the entire County. The libraries also provide internet and digital services to disadvantaged community members throughout the County.			
	Performance measures include ordering, purchasing, and installation of HVAC System. 2024 Update: Visalia Library- Project has not yet started. Units have been ordered. Alpaugh Library- This location is complete Tipton Library- This location is complete Ivanhoe Library- This location is complete Earlimart Library- This location is complete Strathmore Library- This location is complete Exeter Library- This location is complete			
	Three Rivers Library- This location is complete			
Project Status	Completed 50% or more			
disproportionately	This building is accessed by the Impacted General Public, Impacted Households that experienced increased food or housing insecurity, and disproportionately impacted low income households and populations.

Project Name:	HVAC Project - Fire Stations	GSA	\$	542,2
Project ID #:	1013			
	Project: Purchase and install one (1) Dual Pack (heater and cooler in one unit) in the following fire stations: Exeter, Strathmore, Lindsay, Lemon Cove, Posey, Tulare, Tipton, Pixley, Earlimart, Alpaugh, Badger, Three Rivers, Kings River, Ivanhoe, Goshen, Dinuba, Cutler/Orosi, Porterville (Success Dr.), Terra Bella, Springville, Richgrove, Porterville (Ave. 152), Pine Mountain, Kennedy Meadows, and Camp Nelson. Project timeline: This project will begin by 10/31/2022 and will be completed by December 31, 2024. Intended outcomes: Improve ventilation in congregate settings/key County offices. According to the Centers for Disease Control and Prevention*, "when indoors, ventilation mitigation strategies can help reduce viral particle concentration. The lower the concentration the less likely viral particles can be inhaled by the lungs, contact eyes, nose, and mouth; or fall out of the air to accumulate on surfaces. However, ventilation system upgrades or improvements can increase the delivery of clean air and dilute potential contaminants." *https://www.cdc.gov/coronavirus/2019-ncov/community/ventilation.html			

^ Must report on whether projects are primarily serving disproportionally impacted communities:

		Dept	Projec	l buugei
Equity Measures:	The Tulare County Fire Stations are key County facilities. The Fire Department provides first			
	responder services to over 20 disadvantaged and low-income communities. As frontline			
	professionals, Tulare County firefighters continue working through the COVID-19 pandemic to			
	provide services and keep the community safe, regardless of race, ethnicity, age, religious			
	background, gender, medical ailment, education level, mental health needs, or other beliefs.			
	EQUITY: Due to this building being available to the public, which includes traditionally			
	marginalized communities, this project serves to protect all who enter by utilizing ventilation			
	mitigation strategies to reduce viral particle concentration.			
Performance Indicators:	Performance measures include ordering, purchasing, and installation of HVAC System.			
	2023 Update: Kings River, Dinuba, Posey, Hot Springs, Ivanhoe, Richgrove, Three Rivers,			
	Strathmore, Porterville (West Olive) Terra Bella, Springville, Camp Nelson, and Tulare have not			
	yet been started. The Rich Grove and Tipton units have been replaced. These locations are			
	complete. The cost for the Earlimart unit has been received, the installation has not yet been			
	scheduled. 2024 Update: Project has been completed.			
Project Status	Completed 50% or more

based interventions:				
onal Protective Equipmen	† ^		-	
	PPE for HHSA Staff	HHSA	\$	1,257
Project ID #:	1004			
Description:	Employees continue to use PPE in the office. Funds would cover Cintas monthly order of masks			
	and hand sanitizer stations. Expense serves approximately 1,735 Agency staff, plus members of			
	the public on a monthly contracted basis. On July 26, 2021 the State Public Health Officer issued			
	an order, effective August 9, that requires workers in certain facilities to wear FDA-cleared			
	surgical masks and follow CDC masking guidelines. This applies to: A) Acute Health Care and			
	Long-Term Care Settings; B) High-Risk Congregate Settings; and C) Other Health Care Settings.			
	These supplies would be procured outside of the Agency's agreement with Cintas which			
	provides cloth masks and hand sanitizer stations for employees and clients.			
Equity Measures:	Allows HHSA to serve communities throughout the County by keeping offices open and			
	minimizing risk to both staff and clients. HHSA has offices throughout the County that provide			
	critical face to face services to impacted and disproportionately impacted households,			
	communities, and populations, and the use of PPE reduces the risk of exposure to staff and			
	clients alike. 2023			
	Update : Providing PPE to staff and clients has allowed HHSA offices throughout the County to			
	remain open during COVID-19 and continue to provide much needed services to			
	disproportionately impacted households, communites, and populations while reducing the risk			
	of exposure to staff and clients.			
Performance Indicators:	PPE is purchased and distributed to 57 program sites, for use by 1735 employees and the public			
	they serve. PPE includes masks and hand sanitizer stations. 2023			
	Update: PPE was distributed across HHSA program sites in order to reduce the risk of exposure			
	to COVID-19 to staff and clients. As the Public Health Emergency for COVID-19 expired on May			
	11, 2023, it will no longer be necessary to provide masks to staff and clients. Sanitizer stations			
	will continue to be provided. A small amount of funding has been retained for future PPE			
	purchases, while the remainder has been re-allocated to other HHSA ARPA projects.			
Project Status				
•	HHSA Provides critical face-to-face services to impacted and disproportionately impacted			
	households, communities, and populations across Tulare County, including but not limited to:			
-	Disproportionately impacted households that qualify for certain federal programs			
	Disproportionately impacted low-income households and populations			
	Impacted households or populations that experienced a negative economic impact of the			
	pandemic Impacted households that experienced increased food or housing insecurity			
Project Name:	Distribution of PPE for other Tulare County institutions responding to COVID-19	HHSA	\$	710
Project ID #:		ппза		/10
-	This funding is primarily reserved for any potential COVID-19 surge in the County. Given the			
-	widespread demand that hospitals, nursing homes, doctor's offices, dental clinics, and other			
	small businesses have shown in the past for PPE, a surge in COVID-19 cases could easily require			
	this much funding for PPE, and possibly more. Supplying PPE keeps the disease contained, and		1	
	could help small businesses stay open when they might otherwise have to close due to an		1	
	inability to meet disease-mitigation requirements. This project considers that manufacturers		1	
	have previously raised their prices in the event of widespread PPE shortages, and the proposed		1	
	amount is reasonable, should COVID-19 cases take a sharp increase in the next few months.		1	
	Tulare County seen a large demand for home test kits and funds allocated under this project			

^ Must report on whether projects are primarily serving disproportionally impacted communities:

			Dept	Pro	ject Budget
	Equity Measures:	PPE will be provided throughout the County which includes underserved and unincorporated			
		areas. It will also be provided to healthcare workers who provide services in these areas.			
		2023 Update: PPE is provided through various community based organizations as requested to			
		inividuals at community outreach events. CBOs are seen as trusted messangers and often have			
		more impact distributing this material than government entities.			
		nore impact distributing this matchar than government entitles.			
	Performance Indicators:	The goal is to procure surgical masks, gloves, and N95 masks and distribute throughout the			
		County. 2022 Update: PPE such as masks, home test kits, sanitizers, and gloves have been			
		purchased and is being made available to businesses, health care providers, and schools as			
		requested. 2023 Update: Public Health has been able to shift PPE purchases to meet			
		community needs and demand based on current cases and surges. Test kits, masks, and			
		santizers have been purchased using these funds to ensure availability to the community as			
		needed. 2024 Update: Public Health has been able to shift PPE purchases to meet community			
		needs and demand based on current cases and surges. Test kits, masks, and santizers have been			
		purchased using these funds to ensure availability to the community as needed.

1.6 M	edical Expenses (including A	Alternative Care Facilities)^			
	Project Name:	Hospitals	HHSA	\$	3,189,253
	Project ID #:	1006			
	Description:	Public Health will provide additional funding to local hospitals to assist the hospitals in being			
		reimbursed for COVID-19 expenses and to support hospitals in emergency response services.			
				<u> </u>	
	Equity Measures:	This project was designed to assist community partners with providing direct patient care			
		through mobile clinics and street medicine teams as well as enhanced services provided			
		through the emergency room. The three recipient hospitals in Tulare County serve all residents			
		of the County, including underserved communities and residents who live in qualified census			
		tracts. 2023 Update: The hospitals have been reimbursed for the cost associated with PPE and			
		remdesivir for individuals seeking care. Remdesivir is not currently a reimurseable cost from			
		insurance and improves health outcomes for those at higher risk for long covid. In addition, a			
		project to enhance emergency response services at one local hospital has been proposed and			
		approved. 2024 Update: A project to enhance emergency response services at one local			
		hospital has been proposed and approved.			
	Performance Indicators:	The hospitals will be presenting work plans to provide testing and vaccination services to			
		unincorporated and underserved areas of the County. This includes both direct patient care and			
		the supplies needed to accomplish these tasks. 2022 Update: The hospitals will be presenting			
		workplans aligning with COVID-19 response or requests for reimbursement for COVID-19			
		related expenses. 2023 Update: 3 of the 4 workplans have been provided and submitted for			
		payment to reimburse partners for costs associated with ppe and remdesivir. 2024 Update :			
		Pending project completion from Kaweah Health to enhance EMS systems.		<u> </u>	
	-	Completed 50% or more		<u> </u>

impacted communities:				
Project Name:	OES-Video Conferencing	HHSA	\$	204,2
Project ID #:	1028			
Description:	To purchase and install additional components to the Audio/Video System for the Emergency			
	Operations Center (EOC) in support of video conferencing and other remote collaboration tools.			
	This deficiency was identified during COVID-19 and limited the County's ability to effectively			
	coordinate a major disaster response (DR-4558-CA) within the COVID-19 emergency. This			
	upgrade will allow for full integration of virtual participants while adhering to social distancing			
	or isolation/quarantine measures, and will serve to improve coordination between incident			
	facilities in future emergencies.			
Equity Measures:	This project enhances the Emergency Operations Center which serves the entire County. Tulare			
	County has numerous disadvantaged areas encompassing a large portion of the population. By			
	virtue of serving a County-wide facility, this project serves the large disadvantaged population			
	of Tulare County. Disadvantaged populations are more likely to live in disaster-prone locations			
	(e.g. floodplains, high fire risk areas), making them the most likely beneficiaries of this			
	investment.			
Performance Indicators:	The video conferencing components will be installed in the Emergency Operations Center, and			
	will be used in future emergency operations to incorporate off-site personnel and enhance			
	collaboration / communication with other incident facilities (e.g. incident command posts,			
	DOCs, REOC). 2023 Update: Assessment of the needs of the EOC has been conducted.			
	Meetings with TCiCT have been attended to discuss county purchasing parameters. Exploration			
	of options that are compatible with current equipment has occured. Current action is the			
	preparation of a RFP for vendors to apply. 2024 Update: The RFP yielded no bids. A Vendor			
	was selected and a contract is pending.			
Project Status	Completed less than 50%.

^ Must report on whether projects are primarily serving disproportionally impacted communities:

		Dept	Proj	ect Budget
^ Serving	Disproportionately Impacted Low income households and populations. Projects allocates 100%			
disproportionately	of funds for Housing First interventions, which prioritizes providing permanent housing to			
impacted communities:	people experiencing homelessness, thus ending their homelessness and serving as a platform			
	from which they can pursue personal goals and improve their quality of life.		ļ	
Project Name:	COVID-19 Vaccine and Testing Outreach	HHSA	\$	158,05
Project ID #:				
Description:	Additional messaging and outreach activities are necessary to provide information on COVID-19			
	testing, vaccines, treatments, etc. so that the community is informed of the available resources			
Equity Measures:	Outreach and media activities target the most disadvantaged and underserved communities in			
	the County. For example, radio and TV ads are aired in both English and Spanish in order to			
	reach the Spanish-speaking population, which has been identified as high-risk. Also, as a rural			
	county, media are selected to ensure maximum accessibility to the remote populations (e.g.			
	radio instead of the internet). The majority of the efforts with media and communication has		1	
	been driven by the communities identified among the lower Healthy Places Index (communities		1	
	with less access to services and in greater needs) quartiles.			
	2023 Update: Media campaigns were conducted in Spanish and English with messaging on			
	vaccines, testing, and treatment for COVID-19. Efforts were carried out through mix media			
	efforts including billboards, radio messaging, print media, and on screen to increase reach			
	about safety precautions and prevention relating to COVID-19.			
erformance Indicators:	As the outreach and media will be aimed at reducing vaccine hesitancy, vaccination rates will			
	be measured in the targeted communities to measure the success of the project. Weekly reports			
	are being compiled by Tulare County Epidemiology team to demonstrate the percentage of			
	vaccination among the priority communities, to identify where the needs are and what			
	planning should take place to increase/improve the percentage.			
	2022 Update: Radio and magazine advertising increased attendance to COVID-19 vaccine			
	events by 300% in communities located in the Healthy Places Index Q1 (underserved) areas			
	within Tulare County that lack access to health care by providing services in their communities.			
	Magazine advertising occurred for a six-month period with two ads per magazine. Radio		1	
	advertising was available through two stations. 2023 Update: With increased availability of			
	treatment for COVID-19 pharmaceuticals campaigns on radio, screen, etc. were important ways			
	to inform the community of resources available at test sites, telehealth, etc. while providers			
	prepared to offer medication. 2024 Update: With increased availability of treatment for			
	COVID-19 pharmaceuticals campaigns on radio, screen, etc. were important ways to inform the			
	community of resources available for testing and vaccines, long COVID awareness, etc.

^ Must report on whether projects are primarily serving disproportionally impacted communities:

	Dept	Project Budget
Description: To mitigate the effects of the COVID-19 public health emergency within Tulare County jail		
facilities, the Sheriff's Office has dedicated five of eight housing modules at its Pre-Trial Jail		
Facility. The designated housing modules are utilized strictly for COVID-19 observation,		
quarantine, and isolation. All arrests are housed in observation units for a minimum of 10 days		
before qualifying to go to regular housing.		
Any deemed outbreak within any designated module at the Pre-Trial Facility becomes locked		
down. Inmates are medically screened/assessed; COVID-19 tests are administered on days 0, 5,		
and 10. If no signs/symptoms are present and results are negative for COVID-19, the affected		
module is taken off quarantine status. Suspect Forms and Contact Tracing are completed by		
medical, HHSA, HR&D, and/or designated Infectious Control Officer within the Sheriff's Office.		
Free COVID-19 education (verbal, pamphlet, and video) and free COVID-19 vaccinations for		
inmates are offered during bookings and while housed within any Sheriff's Office jail facility.		
Mandatory Personal Protective Equipment (PPE) is issued and regularly replaced and enforced		
within all jail facilities.		
Trainings for all sworn staff with occasional repeat training as reminders to establish and/or		
any new State or County COVID-19 guidelines will be done regularly. Through the County		
Health Officer, Health & Human Services Agency, and jail medical provider, Wellpath, the		
Sheriff's Office created and will sustain best practice workflow charts for covid prevention		
amongst inmates, staff, and the public. All Sheriff's sworn staff working in these designated		
units or exposed to the COVID-19 virus, use a special assignment code (C19, C19B, C19R) on		
their timecards to track all Salary and Benefits costs associated with this project.		
Equity Measures: All arrests, regardless of race, ethnicity, age, religious background, gender, medical ailment,		
education level, mental health needs, or other beliefs are received, booked, and classified for		
housing in observation units for a minimum of 10 days before qualifying to go to appropriate		
regular housing within one of three Sheriff's Office jail facilities. Placecards are posted in		
various locations in each housing units/modules in both English and Spanish that explain the		
categories of observation, quarantine, and isolation.		
All arrests brought into a Tulare County jail facility are educated about the Covid-19 vaccination		
by contracted medical staff and are offered the vaccination(s) at no cost to the inmate. All		
inmates brought in are also educated about the covid testing methods and tested via Rapid and		
PCR tests at no cost. Any inmate who becomes released before receiving the 2nd dose of the		
covid vaccination is provided a written referral.		
This project primarily serves disadvantaged and low-income communities throughout Tulare		
County. The County comprises approximately 34 towns and cities, of which 17 are in a		
qualified census tract. All arrests within Tulare County, regardless of where they are from or		
what community they are from, are tested for Covid-19, educated on Covid-19, offered the		
Covid-19 vaccination regiment, and housed in observation units for a minimum of 10 days		
before qualifying to go to regular housing. Inmates are not charged for any medical or mental		
health services or referrals.		

^ Must report on whether projects are primarily serving disproportionally impacted communities:

		Dept	Project Budg
Performance Indicators:	A Dashboard has been created and is sustained with daily statistics for any administered covid		
	tests (positive, negative, or recovered) and for any covid vaccinations (1st dose, 2nd dose,		
	refusals, or released prior to 2nd dose). The Dashboard also maintains any current numbers for		
	those inmates who are in isolation, quarantine and/or positive. It is estimated that 4,500		
	inmates are booked into a Tulare County jail every three months or quarter. Through this		
	project, the Sheriff's Office strives to have 100% adherence of all booking into a county jail		
	facility screened through the observation/quarantine protocol.		
	2022 Update:		
	Vaccination and Testing totals for Inmates:		
	Totals through June 20, 2022:		
	Vaccines provided: 2,459: First Dose: 1,209, Second Dose: 885, Third Dose/Booster: 365		
	Secondary Refusal: 88		
	Released prior to secondary: 180		
	Declined Vaccination: 3,141		
	Tests:		
	 Tested: 37,651		
	Confirmed positive: 776		
	2023 Update:		
	Vaccination and Testing totals for Inmates:		
	Totals through June 19, 2023:		
	Vaccines provided: 3,638: First Dose: 1,508, Second Dose: 1,129 ,Third Dose/Booster: 998		
	Secondary Refusal: 215		
	Released prior to secondary: 256		
	Declined Vaccination: 9,241		
	Tests:		
	Tested: 86,924		
	Confirmed positive: 1,106		
	Hospitalied: 1

Project Name: Alpaugh Park	GSA	\$ 728,126
Project ID #: 1033		
Description: Project: Repair one (1) arbor and (3) grills. Install irrigation system and electrical system.		
Project Timeline: Replace arbor and grills by December 31, 2022, install irrigation system and		
electrical system by December 31, 2024.		
Intended Outcomes: Addressing health disparities and the social determinants of health,		
building stronger neighborhoods and communities, and promoting healthy childhood		
environments by improving the park. The Park provides space and amenities for play and		
exercise for the Alpaugh community. Additionally, the park is used for social gatherings whic	h	
will assist in bringing the community back together as recovery efforts begin for the COVID-1	9	
pandemic. Outdoor space and socialization can also assist in improving psychological health.		
An article published in the February 2019 issue of the International Journal of Environmental		
Research and Public Health states, "The presence of urban green spaces can encourage positi	ve	
social interactions that cultivate social cohesion in ways that enhance health and well-being.		
Urban green spaces have also been linked to positive health behaviors and outcomes includin	g	
increased physical activity and social engagement" (Jennings & Bamkole, 2019).

		Dept	Proj	ect Budget
Project Name:	Pixley Park	GSA	\$	1,291,26
Project ID #:	1040			
Description:	Projects: Repair arbors and replace arbors, water distribution, irrigation, picnic tables, grills,			
	and electrical system.			
	Project timeline: Projected will be completed by December 31, 2024.			
	Intended outcomes: Addressing health disparities and the social determinants of health,			
	building stronger neighborhoods and communities, and promoting healthy childhood			
	environments by improving the park. The Park provides space and amenities for play and			
	exercise for the Pixley community. Additionally, the park is used for social gatherings which will			
	assist in bringing the community back together as recovery efforts begin for the COVID-19			
	pandemic. Outdoor space and socialization can also assist in improving psychological health.			
	An article published in the February 2019 issue of the International Journal of Environmental			
	Research and Public Health states, "The presence of urban green spaces can encourage positive			
	social interactions that cultivate social cohesion in ways that enhance health and well-being.			
	Urban green spaces have also been linked to positive health behaviors and outcomes including			
	increased physical activity and social engagement" (Jennings & Bamkole, 2019).

Project Name:	Tech Equipment (Adobe Acrobat Licenses, iPad minis for vaccine pods)	Dept HHSA	\$		t Budge <i>892,5</i>
Project Name: Project ID #:		IIIIJA	Ş		032,3
			-		
Description:					
	This project funds laptops, monitors, docking stations, software licenses, mini-iPads, and Adobe				
	licenses needed to support HHSA employees as they work from home, in the field, and from the				
	office. This item will cover the expenses incurred during the Vaccine POD activities such as iPad				
	minis needed for registration and tracking. Additionally, some funds will be used by the Public				
	Health Branch to support the purchase of call center licenses and improvements to the Public				
	Health Electronic Health Record system and its infrastructure based on the need for				
	modernization to meet state mandates as well as the need to respond to emerging issues, such				
	as ongoing COVID surges, new pandemic threats such as monkey pox, and community concerns				
	such as the infant formula shortage and similar problems. Remaining funds will be utilized to				
	upgrade equipment reaching its end-of-life in HHSA programs and for the replacement of				
	outdated equipment in the Emergency Operation Center.				
Equity Measures:	Provides for continuity of services for public health (disease mitigation & pandemic response),				
	behavioral health (services to address mental health & substance use disorder), and social				
	services (benefits such as cash & food assistance, Medi-Cal,etc.) as well as protection for				
	vulnerable populations (child welfare, foster kids, seniors, etc.) Continuity of services is				
	particularly important for disproportionately impacted communities. 2023 Update: The				
	purchase and distribution of tech equipment and licensing to HHSA staff has enabled County				
Dorformonos la disst	services to be continued, even through office closures during the pandemic.				
	Performance indicators include the number of equipment and licenses purchased and				
	implemented to support telework, HIPAA compliance, privacy and security, and cloud-based				
	structures. 2022 Update: As of June 15th, 2022, 202 cloud based Adobe licenses, 36 laptops				
	with service agreements, and cloud-based compliance software have been purchased and				
	distributed across HHSA. 2023 Update : As of June 15th, 2023, an addional 358 cloud based				
	Adobe licenses, 79 laptops with warranties, and 15 iPads with warranties have been purchased				
	for use within HHSA with distribution ongoing. 2024 Update: As of June 1st 2024, Grammarly,				
	Adobe Acorbat Pro, Smartsheet, Cradlepoint, and Faxcom licenses and subscriptions have been				
	purchased and distributed across HHSA. 8 iPads, 8 LED monitors, 12 Cisco VoIP phones, 55				
	Lenova Thinkpads, 2 Lenova ThinkStations, 28 docking stations, 2 Lenove DDR5s, 6 Lenova				
	ThinkCentres, 2 Notebook Thinkpads, 2 color laserjet printers, and Starlink/Peplink equipment				
	has been purchased, with warranties, for use within HHSA with distribution ongoing for				
	equipment replacement and upgrades.				
Project Status	Completed 50% or More		1

		Dept	Pro	ject Budget
Performance Indicators:	Units will be offered individuals selected through the Coordinated Entry System utilizing HMIS			
	and the VI-SPDAT to evaluate priority based upon health risk to determine eligibility and			
	equitable engagement for placement. 2022 Update: Units will be offered to individuals			
	selected through the Coordinated Entry System and have qualified for housing vouchers. 2023			
	Update: All funds went to Madson Gardens for the purchase of Tagus to be renovated and			
	made into Permanent Supportive Housing (PSH) called Madson Gardens. On schedule to be			
	completed by 12/31/2023. 2024 Update : The funding was used for the purchase and remodel			
	of Tagus Gardens, and it is now 56 units of PSH and renamed Madson Gardens. The renovations			
	were completed in March 2024 and clients began moving into Madson Garden in early April			
	2024. As of 6/13/2024 the site is almost 50% occupied with an estimated time frame of being			
	100% occupied by end of summer. All clients are referred through the Kings/Tulare Homeless			
	Alliance (KTHA) and are entered the Homeless Management Information System (HMIS).			
Project Status				
	The project serves economically disadvantaged individuals with minimum eligibility criteria			
	such that over 25 percent of intended beneficiaries are below the federal poverty line.			
impacted communities:	Disproportionately Impacted Low income households and populations. All 56 units are reserved for homeless and low income households.			
* Amount of total funds	Project allocated 100% of funds toward the purchase of the building. Project uses Housing First			
	Interventions, which prioritizes providing permanent housing to people experiencing			
based interventions:				
based interventions.				
ong-term Housing Security: S	Services for Unhoused Persons*^			
	Addressing Homelessness - Homeless Key Supports	HHSA	\$	1,884,2
Project ID #:	3002			
Description:	Services targeted to sheltered and unsheltered homeless individuals providing targeted high-			
	intensity case management, navigation, and wrap-around services to obtain or maintain			
	permanent supportive housing from September 1, 2021 - December 31, 2026, including the			
	costs of leasing/renting project roomkey sites. Once sites become Homekey facilities, program			
	will support costs of running these facilities.			
Equity Measures:	All renovated units will be targeted as low income units to serve a broad range of disadvantages individuals			
Performance Indicators:	a) Participant nightly stays and b) transition to stable housing vs return to street homelessness.			
Project Status	Completed less than 50%			
^ Serving	Disproportionately Impacted Low income households and populations.

	The Village Tiny Homes in Tulare and Goshen	HHSA	\$	5
Project ID #:				
Description:	Goshen - Neighborhood Village - \$250K - This projected is projected begin construction in Phase		1	
	II of ARPA. When completed, the project will provide approximately 67 beds for the Homeless			
	population. It will be comprised of 52 units of 1 and 2 bedroom manufactured units. Lighthouse			
	Rescue Mission - \$250K - The funding will be used for operation of approximately nine months,			
	offering shelter to the Homeless population in the City of Tulare. In 2022 the facility added 56			
	additional bed to the emergency shelter location, increasing operational costs. 2023 Update:			
	A) Neighborhood Village Project- Project was covered by use of HHAP funding rather than ARPA			
	funds, as we could not meet the Federal requirements of this project to use the ARPA funding.			
	CAO approved for it to be changed over to a Mobile Shower Unit funding. HHSA staff is			
	currently working with The Purchasing Department on this project. B) Lighthouse Rescue			
	Mission project is 100% completed. 2024 Update: The final project on this is the remaining			
	balance of the \$250K. This is still anticipated to be used toward expanding the use of Mobile			
	Shower Units for our unhoused population. At this time the RFP Is being reviewed by Purchasng			
	and is anticipated to be brought before the BOS for approval in July or August 2024.			
Equity Measures:	A)The shelter operations will be for those individuals experiencing homelessness. B)All		1	
	renovated units will be targeted as low income units to serve individuals, such that who are at			
	least 25% below the Federal Poverty Level.			
Performance Indicators:	Neighborhood Village - 67 beds and Lighthouse Rescue Mission 56 beds for a total of 119 bed			
	for the Homeless population. 2023 Update: Lighthouse Rescue Mission - The \$250K fundng			
	was used for operations from 7/1/22 to 9/30/2022. During those months, the Mission housed			
	and fed 287 clients.			
Project Status	Completed 50% or More.		1

^ Must report on whether projects are primarily serving disproportionally impacted communities:

			Dept	 ect Budget
	Description:	Support the building of low-barrier navigation centers and shelters for those in each of the		
		three largest cities in Tulare County:		
		A)Finca Serena is a permanent supportive housing site. The site has broken ground and the		
		money will be used toward construction costs. This project is will provide 80 units of housing to		
		Porterville. The amount earmarked for this project is \$500K.		
		B) The Visalia Navigation Center will be a low barrier homeless shelter offering approximately		
		100 beds. Contracts are scheduled to be executed July 2022 with construction slated to begin in		
		August 2022. The amount earmarked for this project is \$1 million.		
		C) The Tulare shelter project is still in the planning stages. The amount earmarked for this		
		project is \$500K 2023 Update: A)The Finca Serena project was changed from using ARPA funds		
		to HHAP funding based on the project not meeting Federal requirements. B) The Visalia		
		Navigation Center project is currently preparing to go before the BOS for approval soon. The		
		RFP process was completed and approved by County Counsel to move forward. C) The Tulare		
		City Shelter Project is in the final planning stages and the Homeless team is working with the		
		City on finalizing the project so it can be brought before the BOS. 2024 Update: A) Finca		
		Serena did not receive any ARPA funds.		
		B) The funding used for the Visalia Navigation Center was used in the construction of the		
		location. The Center is not open yet and is not currenly serving clients.		
		C) The final project of the \$500K for the City of Tulare has been approved by the BOS and is		
		anticipated to be spent out by 12/31/2024. The City of Tulare plans on spending the funds on		
		furniture for their shelter project. The shelter project is anticipated to have three levels and will		
		house up to 300 clients/beds through each step of the program.		
	Equity Measures:	All shelters and renovated units will be targeted as low income units to serve individuals, such		
		that who are at least 25% below the Federal Poverty Level.		
	Performance Indicators:	Between the two projects- it is anticipated there will be up to 300 shelter beds at the Tulare City		
		Shelter and 100 at the Visalia Navigation Center.		
	Project Status	Completed 50% or more

* Amount of total funds allocated to evidence-based interventions:

		Dept	Proj	ect Budge
Description:	Environmental Health will refund or waive all fees paid by restaurants, bars, and businesses			
	related to body art, all of which were shut down substantially due to COVID-19 mitigation			
	measures. For 1/27/2020 (the official start of the pandemic and the first day costs can be			
	charged to ARPA SLFRF) through 1/31/2021, the cost would be \$442,422 and for the following			
	year the cost would be \$481,724. ARPA SLFRF rules specifically encourage states, counties, and			
	municipalities to use ARPA funds to render assistance to sectors that were disproportionately			
F	impacted by the pandemic.			
Equity Measures:	This project was designed to help businesses effected by the COVID-19 pandemic. These			
	businesses employ people from the entire county and many are located in the unincorporated			
	areas.		<u> </u>	
Performance Indicators:	It is estimated that 965 businesses will be eligible for fee reimbursement from 1/27/20 thru			
	1/27/21 and 983 businesses will be eligible the following year.			
	2022 Update:			
	Environmental Health has issued reimbursement to eligible consumers of Environmental Health			
	to mitigate the financial hardships due to closures imposed on businesses as a result of state			
	required closures. Refunds were issued to 955 businesses in Tulare County including those			
	serving unincorporated areas.			
Project Status	•			
^ Serving	Impacted Small businesses that experienced a negative economic impact of the pandemic

impacted communities:				
	rofit Organizations (Impacted or Disproportionately Impacted)^		<u> </u>	
Project Name:	Aid for local nonprofit organizations	HHSA	\$	1,424,
Project ID #:	2002			
Description:	Develop programs for local nonprofit organizations to assist those organizations in Tulare			
	County which serve the community and which were impacted by the public health emergency			
	by loss of revenue, increased costs, or the need to pay premium/retention pay to their essential			
	workers. Additional community service projects may be approved on a case-by-case basis.			
	workers. Additional community service projects may be approved on a case-by-case basis.			
Equity Measures:	Most of the organizations serve individuals, households, or communities which were			
Equity Measures.				
	disproportionately impacted by the pandemic, as demonstrated by QCT or eligibility for means-			
	tested federal programs such as TANF, SNAP, or the Free or Reduced-Price Meal Program			
	(FRMP). Community service projects will specifically target disproportionately impacted groups,			
	and will be documented accordingly upon their approval.			
Performance Indicators:	No. of organizations funded, no. of residents served by those organizations & services provided.			
	Community service projects will also measure number of disproportionately impacted			
	individuals, households, or communities served. 2023 Update: Seventeen (17) local nonprofit			
	organizations which provided food and other essential services to their communities during the			
	pandemic have been funded thus far. These nonprofits were negatively impacted by the			
	pandemic and experienced a loss of revenue and/or increased costs. The total amount			
	disbursed to these nonprofits was \$701,113. Three additional projects are under consideration		1	
	for funding to improve existing community centers which are in disporportionately impacted		1	
	communities or serving disproportionately impacted households. One has been approved and			
	the remaining two are undergoing the review process. The total amount of funding requested			
	for these projects is \$423,385. 2024 Update: The three community center projects were			
	approved and have begun working towards rehabilitation of each of the centers.			
Project Status	Completed 50% or more.			
^ Serving	Most of the organizations serve individuals, households, or communities which were			
disproportionately	disproportionately impacted by the pandemic, as demonstrated by QCT or eligibility for means-			
	tested federal programs such as TANF, SNAP, or the Free or Reduced-Price Meal Program		1	
	(FRMP). Community service projects will specifically target disproportionately impacted groups,		1	
			1	
	and will be documented accordingly upon their approval. The impacted and disproportionately		1	
	impacted communities include but are not limited to: Impacted Non-Profits that experienced a			
	negative economic impact of the pandemic; Disproportionately Impacted Households and		1

Project ID #: 2004 Description: In response to the COVID-19 pandemic, the Tulare Co	untu Library modified its services for the			
health and safety of patrons. Staff time was redirected				
measures and services that were quickly adopted by				
programs and curbside pick-up services. As a result, t				
to support a broader menu of virtual, pick up, outrea				
recovery as we move toward full reopening. In additi	on to offering virtual and in-person service,			
there is growing demand for the Library's Pop Up Tul	are County vehicle and outreach services			
as patrons in rural Tulare County are taking fewer tri	ps into our more populated areas. For in-			
person programs, there is need for additional staff to	o offer multiple programs with smaller			
attendance and avoid overcrowding during popular e	events. The assistance provides this in two			
ways. The Library provides services for patrons seekir	-			
During the pandemic the demand for new and innova				
allows the Library to meet the ever growing need of a

	Dept	Project Budget
Description: To mitigate the effects of the COVID-19 public health emergency within Tulare Coun	ty jail	
facilities, the Sheriff's Office has dedicated five of eight housing modules at its Pre-T	rial Jail	
Facility. The designated housing modules are utilized strictly for COVID-19 observat.	on,	
quarantine, and isolation. All arrests are housed in observation units for a minimum	of 10 days	
before qualifying to go to regular housing.		
Any deemed outbreak within any designated module at the Pre-Trial Facility become	es locked	
down. Inmates are medically screened/assessed; COVID-19 tests are administered o	n days 0, 5,	
and 10. If no signs/symptoms are present and results are negative for COVID-19, the	e affected	
module is taken off quarantine status. Suspect Forms and Contact Tracing are comp	leted by	
medical, HHSA, HR&D, and/or designated Infectious Control Officer within the Sheri	ff's Office.	
Free COVID-19 education (verbal, pamphlet, and video) and free COVID-19 vaccinati	ons for	
inmates are offered during bookings and while housed within any Sheriff's Office jai	facility.	
Mandatory Personal Protective Equipment (PPE) is issued and regularly replaced and	l enforced	
within all jail facilities.		
Trainings for all sworn staff with occasional repeat training as reminders to establish	-	
any new State or County COVID-19 guidelines will be done regularly. Through the Co		
Health Officer, Health & Human Services Agency, and jail medical provider, Wellpath		
Sheriff's Office created and will sustain best practice workflow charts for covid preve		
amongst inmates, staff, and the public. All Sheriff's sworn staff working in these des	5	
units or exposed to the COVID-19 virus, use a special assignment code (C19, C19B, C	19R) on	
their timecards to track all Salary and Benefits costs associated with this project.		
Equity Measures: All arrests, regardless of race, ethnicity, age, religious background, gender, medical	nilment	
education level, mental health needs, or other beliefs are received, booked, and clas		
housing in observation units for a minimum of 10 days before qualifying to go to ap		
regular housing within one of three Sheriff's Office jail facilities. Placecards are post	-	
various locations in each housing units/modules in both English and Spanish that ex		
categories of observation, quarantine, and isolation.		
All arrests brought into a Tulare County jail facility are educated about the Covid-19	vaccination	
by contracted medical staff and are offered the vaccination(s) at no cost to the inmo		
inmates brought in are also educated about the covid testing methods and tested vi		
PCR tests at no cost. Any inmate who becomes released before receiving the 2nd do	•	
covid vaccination is provided a written referral.		
This project primarily serves disadvantaged and low-income communities throughout	ıt Tulare	
County. The County comprises approximately 34 towns and cities, of which 17 are i		
qualified census tract. All arrests within Tulare County, regardless of where they are		
what community they are from, are tested for Covid-19, educated on Covid-19, offer	-	
Covid-19 vaccination regiment, and housed in observation units for a minimum of 10		
before qualifying to go to regular housing. Inmates are not charged for any medical	-	
health services or referrals.

Description: Tulare County Fire Department (TCFD) provides emergency response service to underserved
communities in need of medical aid attention while using universal precautions. TCFD has
implemented operational strategies in mitigating COVID-19 exposure and the spread of the
virus. The Department has purchased essential Personal Protective Equipment (PPE) and
initiated decontamination procedures designed to keep employees and the community safe.
When COVID-19 was declared a national pandemic during March 2020, the Department
immediately adhered and continues to adhere to strict protocols as outlined by the Central
California Emergency Medical Services Agency, FIRESCOPE, and the Centers for Disease Control.
Utilizing Designated Infection Control Officers as the primary point, the Department
implemented internal protocols to ensure the continuation of emergency services to the

		Dept	Proje	ct Budge
Equity Measures:	Tulare County Fire serves over 20 disadvantaged and low-income communities. As frontline			
	professionals, Tulare County firefighters continue working through the COVID-19 pandemic to			
	provide services and keep the community safe, regardless of race, ethnicity, age, religious			
	background, gender, medical ailment, education level, mental health needs, or other beliefs.			
	Additionally, Department EMTs have assisted with vaccination efforts and hosted vaccination			
	clinics at various fire stations to reach all surrounding disadvantaged communities.			
	2022 Update: Additionally, the fire department distributed approximately 10,000 COVID-19			
	Self-testing Kits, including at disadvantage communities, and collaborated with Tulare County			
	Health and Human Services agency so that fire stations have become local community testing			
	facilities and locations where self-administered tests can be obtained. 2023 Update: In			
	FY2023 the Department worked very closely with the Human Resources Department on updates			
	to Covid 19 guidelines and regulations. The Department continued to adhere to Covid 19			
	protocols, reporting and monitoring possible exposures. The Department took necessary			
	precautions through decontamination of fire stations in a continued effort to keep Tulare			
	County residents safe. Additionally, Fire Dispatchers continue to screen medical aid calls to			
	ascertain potential exposures and/or illnesses.			
	·····			
Performance Indicators:	The Tulare County Fire Department serves a population of more than 460,000. Between			
	December 2020 and June 2021, the Department responded to 5,100 medical aid calls for			
	service. It is anticipated the Department will respond to approximately 12,000 medical calls for			
	service by the end of 2021. The Department will maintain 100% adherence to protocols as			
	outlined by the Central California Emergency Medical Services Agency, FIRESCOPE, and the			
	Centers for Disease Control while responding to medical aid calls for service. 2022 Update: The			
	Tulare County Fire Department serves a population of more than 460,000. Between July 1,			
	2021, and June 30, 2022, the Department responded to 10,216 medical aid calls for service. It is			
	anticipated the Department will respond to approximately 14,000 calls for service by the end of			
	2022. The Department will maintain 100% adherence to protocols as outlined by the Central			
	California Emergency Medical Services Agency, FIRESCOPE, and the Centers for Disease Control			
	while responding to medical aid calls for service. 2023 Update: Between July 1, 2022, and June			
	<i>30, 2023, the Department responded to 11,440 medical aid calls for service. It is anticipated the</i>			
	Department will respond to approximately 15,500 calls for service by the end of 2023. The			
	Department will maintain 100% adherence to protocols as outlined by the Central California			
	Emergency Medical Services Agency, FIRESCOPE, and the Centers for Disease Control while			
	responding to medical aid calls for service. 2024 Update: Additional allocation provided to			
	reimburse for prior year services.			
Project Status	Completed 50% or More			
	This project primarily serves disadvantaged and low-income communities throughout Tulare		1	
0	County. The County is comprised of approximately 34 towns and cities, of which 17 are in a

•	Payroll for HHSA Staff	HHSA	\$	539,
Project ID #:	1043B			

^ Must report on whether projects are primarily serving disproportionally impacted communities:

Description		Dept	Proj	ect Budget
Description	Payroll for all four branches of the Health & Human Services Agency, each of which has had			
	numerous staff take on additional COVID-related duties for which there is no other funding			
	available to pay for their time in mitigating the spread of the disease through, among other			
	activities, ordering & distribution of necessary supplies, contact tracing, testing, and serving at			
	vaccination clinic Point of Distribution (POD) events. In addition, the onset of COVID-19 created			
	circumstances in which Human Services staff have backlogs that must be addressed, as well as			
	anticipated increased caseloads from eligibility determinations as people transition from			
	emergency funded means-tested assistance programs to regular programs. Like Human			
	Services, Fiscal Operations and Public Health also have backlogged workloads that must be			
	addressed. Additionally, extra help/part time staff are needed especially during pandemic surge			
	periods for various classifications including, nurses (all levels), as well as administrative and			
	support staff. Extra help staff are also necessary at Point of Distribution (POD) vaccination			
	clinics, testing events, contact tracing and supporting various administrative projects,			
	particularly during pandemic surges.			
	2024 Update: Project 1043 was broken into three parts in 2024 to better align with U.S.			
	Treasury guidelines. Staff whose time was designated for addressing administrative backlogs in			
	Human Services, Fiscal Operations, Public Health, or other Branches have been incorporated			
	into Project 1043B under EC 3.5.			
Equity Measures:	Programs in HHSA provide safety net services and resources across the county, with a specific			
	focus on equitable distribution of services 2023 Update: HHSA has been able to use extra help			
	to assist in COVID-19 related events, reduce backlogs that were brought on by the pandemic,			
	and expand reach of services offered while continuing to provide mandated services to the			
	community. 2024 Update: Programs in HHSA provide safety net services and resources across			
	the county, with a specific focus on equitable distribution of services . With the addition of extra			
	help staff Public Health was able to expand reach of services offered while continuing to			
	provide mandated services to the community.			
Performance Indicators:	Additional staff will be hired as extra help			
	2022 Update: The number of staff hired. HS: 4 extra help social workers to help reduce CWS			
	case backlog, MH: 0 ; Fiscal: 0; Public Health: 10 extra help staff support vaccine, testing, lab			
	operations, etc. 2023 Update: 4 Extra Help Social Workers to help reduce the CWS case			
	backlog. The number of staff hired. Fiscal: 1 extra help to assist with the tracking of equipment			
	purchased with ARPA funds or which were unable to be placed in tracking system during the			
	pandemic due to the administrative demands of addressing the public health emergency. Public			
	Health has brought on additional staff to support covid contact tracing, testing, and			
	immunizations. 2024 Update: 12 Extra Help Social Workers to help reduce the CWS case			
	backlog in Human Services, which has been very effective. The extra help staff member for			
	Fiscal was hired on full-time and has continued to assist with tracking equipment purchased			
	through ARPA funding. Public Health had more than 10 individuals in place to provide			
	education and outreach for COVID 19 concerns (vaccine, testing, and long COVID). Additionally,			
	support has been offered to the Public Health Laboratory for ongoing surveillance.

Project Name:	Earlimart PUD Sewer - Interceptor & Relief Sewer Project	RMA	\$	1,600,00
Project ID #:	5003			
=	1) This project provides much needed wastewater collection capacity to the community of			
	Earlimart. The District operates and maintains the wastewater collection, treatment and			
	disposal facilities that serve the unincorporated community of Earlimart. The District is divided			
	by Highway 99, which poses a number of unique sewer utility service issues. The largest portion			
	of the District lies to the east of Highway 99. This Project will construct a new larger interceptor			
	and Improvements to the collection system that will lead to correction of flow problems due to			
	the existing pipeline configuration. 2) This Project will take approximately 18 months to			
	complete once funded 3) This is a wastewater infrastructure construction project that will be			
	contracted to an appropriate contractor. 4) Address the 60-year age issue of the existing sewer			
	interceptor pipeline and the full flow issues related to the existing interceptor. It is also to			
	provide additional wastewater collection capacity to address the existing waiting list and the			
	capability to address the acute need for housing. Housing starts are at a halt due to the impacts			
	of the sewer connection moratorium. The project also received funding through the 2022			
	Federal Budget Community Project Earmark process. US EPA is developing contracting			
	protocols for this project. Once EPA issues a contract, this project will be further amended to			
	reflect the appropriate funding gap remaining.			
Equity Measures:	Earlimart is a Severely Disadvantaged Community with approximately 8,800 people. The		-	
	community is 91.4 percent Hispanic/Latino and 40 percent are under the age of 18. The			
	community currently has a moratorium for new sewer connections, due to a lack of collection			
	capacity. As established by the State under section 1452(d)(3) of the Safe Drinking Water Act,			
	the community Median Household Income is < 80% MHI.			
Performance Indicators:	There are two project partners- The County and Earlimart PUD. The Project will meet its goal			
	when the Front Street Well produces water that meets drinking water quality standards. 2024			
	Update : Project will start Quarter 4 2024.

^ Must report on whether projects are primarily serving disproportionally impacted communities:

	1) This president are siden as she and adjuster as ality and with the the approximate of Tinton. The	Dept		
Description:	1) This project provides much needed water quality security to the community of Tipton. The			
	District's oldest well is 62 years old, the second-oldest well is under a State compliance order			
	due to high nitrate, and the newest well has arsenic concentrations above the Maximum			
	Contaminant Level (MCL). The loss of a well either temporarily or for a longer period of time			
	due to repairs or normal maintenance, results in the entire community being served by severely			
	curtailed water supply capacity and risk of bacteriological contamination. The Proposed Project			
	consists of the drilling of a new production well for the District. The Proposed Project will			
	include the drilling of a test well to facilitate final design of the production well features. 2)			
	This Project can be completed in approximately 18 months once funded. 3) This is a water			
	infrastructure construction project contracted to an appropriate contractor. 4) This project will			
	provide reliable access to safe drinking water for the community of Tipton			
	The District has approximately 601 connections, serving 1,792 people. The community is a			
	severely disadvantaged community. As established by the State under section 1452(d)(3) of the			
	Safe Drinking Water Act, the community Median Household Income is < 80% MHI.			
Performance Indicators:	There are two project partners- The County and Tipton CSD. The Project will meet its goal when			
	the District can consistently deliver water that meets drinking water quality standards. 2024			
Draiast Status	Update: Project in progress.			
Project Status	Completed Less Than 50%			
Project Name:	Cutler PUD - Well No. 10	RMA	\$	700,0
Project ID #:				
-	1) The proposed Project consists of completing the Well No. 10 Project, consisting of securing		1	
	and installing a deep well turbine pump, motor, appurtenant electrical service, booster pumps,		1	
	a building housing the electrical power generator set and automatic transfer switch, electrical			
	service and power distribution equipment, and on-site features including surfacing and fencing.			
	2)The Project can completed in approximately 9 months, once funded. 3) This is a water			
	infrastructure construction project that will be contracted to an appropriate contractor. 4) This			
	Project will assist the District in providing adequate drinking water that meets both quantity			
	and quality standards.			
Equity Measures:	Cutler is a Severely Disadvantaged Community, with a Median Household Income of only			
	\$29,655. The Cutler Public Utility District (District) has approximately 1,218 connections, serving			
	6,200 people.			
Performance Indicators:	There are two project partners- The County and Cutler PUD. The Project will meet its goal when			
	the District can consistently deliver water that meets drinking water quality standards. 2024

renormance indicators:	Update: Bartlett Park was significantly impacted by Winter Storms and thus has affected the			
	project timelines for this park. The picnic tables and grills have been ordered and delivered but			
	have not yet been installed. The Bartlett Well project has not yet begun. The contractor for the			
	Arbor repairs has been selected. The start of construction is pending. The masterplan for the			
	irrigation system has been recieved by Landscape architect, contruction has not yet began. The			
	Arbor replacement designs have been finanlized. This project is currently out to bid. 2024			
	Update: The new well has been completed along with the repairs of the arbors, replacing of			
	the old arbors, picnic tables and grills have been installed.			
Project Status	Completed			
Project Name:	Cutler Park	GSA	\$	1,584,
Project ID #:		00/1		1,504,
	Project: Replace irrigation, paving, electrical, arbors, picnic tables, and grills, repair arbors,			
	remove stumps, address gopher damage, clean up brush pile, and restore potable water.			
	Project timeline: Anticipated start date for replacing irrigation, replacing electrical, paving,			
	arbors, picnic tables, and grills, repair arbors, remove stumps, address gopher damage, clean			
	up brush pile, and restore potable water will be September 2, 2022 and the entire project will be			
	completed by June 30, 2023.			
	Intended Outcomes: Addressing health disparities and the social determinants of health,			
	building stronger neighborhoods and communities, and promoting healthy childhood			
	environments by improving the park. The Park does not currently have potable water. Installing			
	a new backflow device will allow patrons to have access to clean drinking water. Additionally,			
	the park is used for social gatherings which will assist in bringing the community back together			
	as recovery efforts begin for the COVID-19 pandemic. Outdoor space and socialization can also			
	assist in improving psychological health. An article published in the February 2019 issue of the

Resurfacing of the bridge is currently under construction. The Picnic Tables and			
	building stronger neighborhoods and communities, and promoting healthy childhood environments by improving the park. The park is used for social gatherings which will assist in bringing the community back together as recovery efforts begin for the COVID-19 pandemic. Outdoor space and socialization can also assist in improving psychological health. An article published in the February 2019 issue of the International Journal of Environmental Research and Public Health states, "The presence of urban green spaces can encourage positive social interactions that cultivate social cohesion in ways that enhance health and well-being. Urban green spaces have also been linked to positive health behaviors and outcomes including increased physical activity and social engagement" (Jennings & Bamkole, 2019). Jennings, V., & Bamkole, O. (2019). The Relationship between Social Cohesion and Urban Green Space: An Avenue for Health Promotion. International Journal of Environmental Research and Public Health, 16(3), 452. doi:10.3390/ijerph16030452 2023 Update: 6 of the 9 Arbors that needed repairs have been completed. The designs for the 9 arbors being replaced have been finalized and are now in the bid process. The Bridge has been painted and tested for structural

	Public Health, 16(3), 452. doi:10.3390/ijerph16030452			
Equity Measures:	Woodville is a rural disadvantaged community with limited access to services which has a		1	
	population of 1,763. The average household income is \$41,676 with a poverty rate of 39.85%.			
	By improving the Park, it gives greater opportunity for residents to exercise, children to play,			
	and family and friends to gather. Residents will be made aware of any modification to the park			
	via social media and through partner collaborations working in the community. Demographics			
	of Woodville: 77.54% Hispanic White, 6.29% non-Hispanic White, 11.12% Other race, 1.36%			
	Native American, 3.29% identify as two or more races, and .40% Asian. Although Woodville is			
	not in a Qualified Census Tract, the population of 1,245, within half a mile of the Park is			
	disadvantaged. The median household income for this area is \$29,052. Additionally, Tulare			
	County has high rates of poverty, obesity, and food insecurity (University of CA, Cal Fresh			
	Healthy Living). By improving the park, residents will have a place to go for activity and exercise			
	to attempt to offset poor health outcomes. Over 25% of intended beneficiaries are below the federal poverty line.			
Performance Indicators:	Compare arbor reservations pre and post improvements.		1

* Amount of total funds allocated to evidence-based interventions:

		Dept	Proj	ect Budget
Equity Measures:	Electronic records help support services to all constituents over the phone or computer without			
	traveling distances to the office, which could be a lengthy trip for those who reside in our rural			
	disadvantaged communities. Electronic records systems that allow staff to work remotely also			
	reduce the impact on our local air quality. The Assessor supports business and community			
	development operations and ongoing County revenues through their work. In particular, the			
	Assessor is making available re-assessments for business property losses tied to COVID-19.			
Performance Indicators:	Intended outcomes:			
	•Having the Assessor's paper records digitized would help provide property information to			
	taxpayers requesting information quicker. The public often has a need to access Assesses			
	records when purchasing properties. The Assessor should aim to not cause any unnecessary			
	delays in real estate transactions to keep the market robust.			
	• If employees are sent home related to the COVID-19 Pandemic & do not have access to file			
	records, they are unable to process exemptions without a delay in services. These various			
	exemptions save taxpayers money & are vital to economic recovery.			
	• Digitized records would allow staff to process deeds from home in the event of an office			
	closure. This would allow the appraisal process to occur in a timely manner resulting in the			
	issuance & collection of supplemental taxes to bring in revenues to the County.

ninistrative Expenses				
	Administration	CAO	\$	261,7
Project ID #:	7001 The County will fund direct and indirect SLFRF award as administrative costs for			
•				
	implementation of projects and programs. Administering and developing the County's Recovery			
	Plan will require the oversight of the County Administrative Office, Auditor's Office, and County			
	Cost Centers (e.g. Health and Human Services Agency, Information and Communications Technology Department, and the General Services Agency). Administrative funds may also be			
	used to hire a consultant to take over administration, monitoring, and reporting associated			
	with the County's Recovery Plan. The proposed consultant would support effective			
	management and oversight, ensuring compliance with legal, regulatory, statutory, and other			
	requirements.			
	requirements.			
Equity Measures:	The County Administrative Office will collaborate with County Departments coordinating ARPA		1	
	projects to ensure that services are prioritized in disproportionally impacted communities.			
Performance Indicators:	The County Administrative Office will develop a report to track reimbursements completed to			
	offset direct and indirect costs for County Cost Centers.			
	2022 Update:			
	The report has been developed, and reimbursement information has been added. The County			
	Administrative Office will continue to track reimbursements.			
Project Status	Completed Less Than 50%			
Project Name:	HHSA Payroll	HHSA	\$	4,7
Project ID #:				
-	Payroll for all four branches of the Health & Human Services Agency, each of which has had			
	numerous staff take on additional COVID-related duties for which there is no other funding			
	available to pay for their time in mitigating the spread of the disease through, among other			
	activities, ordering & distribution of necessary supplies, contact tracing, testing, and serving at			
	vaccination clinic Point of Distribution (POD) events.			
	In addition, the onset of COVID-19 created circumstances in which Human Services staff have			
	backlogs that must be addressed, as well as anticipated increased caseloads from eligibility			
	determinations as people transition from emergency funded means-tested assistance programs			
	to regular programs. Like Human Services, Fiscal Operations and Public Health also have			
	backlogged workloads that must be addressed. Additionally, extra help/part time staff are			
	needed especially during pandemic surge periods for various classifications including, nurses			
	(all levels), as well as administrative and support staff. Extra help staff are also necessary at			
	Point of Distribution (POD) vaccination clinics, testing events, contact tracing and supporting			
	various administrative projects, particularly during pandemic surges. 2024 Updated : Costs			
	which were associated with staff performing COVID-related duties but which were			
	administrative in nature and not eligible under EC 3.1/Project 1043A were designated as Project			

1043C under EC 7.1.
